ZCZC AE22
QST de W1AW
DX Bulletin 22 ARLD022
From ARRL Headquarters
Newington CT May 31, 2012
To all radio amateurs

SB DX ARL ARLD022
ARLD022 DX news

This week's bulletin was made possible with information provided by IT9GCG, NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

EAST MALAYSIA, 9M6. Jan, OZ4Z is QRV as 9M6/OZ4Z from Kuching, Sarawak until June 3. After this, he will be active from Kota Kinabalu, Sabah until June 5. Activity is on 30 to 10 meters. QSL to home call.

OMAN, A4. Waleed, A41LD has been active on 17 meters around 0130z. QSL to home call.

UNITED ARAB EMIRATES, A6. Tom, DL2RMC is QRV as A6/DL2RMC from Yas Island. Activity is in his spare time. QSL to home call.

ANGOLA, D2. Mike, UA1QV is QRV as D3AA from Catoca. Activity is on the HF bands. QSL to home call.

PALESTINE, E4. Vlad, UA4WHX is QRV as E40VB. Of late he has been active on 20 and 17 meters around 0330 and 0430z. QSL to home call.

ESTONIA, ES. Special event station ES2012ABCS is QRV until June 8 during the American Beauty Car Show in Haapsalu. QSL via ES2TT.

JERSEY, GJ. Dave, EI9FBB will be QRV as MJ/EI9FBB from the old German signal station on Jersey from June 2 to 6. Activity will be on the HF bands using mostly CW with some SSB. QSL to home call.

ECUADOR, HC. Rick, NE8Z will be QRV as HC1MD from Tumbaco from June 7 to 14. Activity will be on 40 to 10 meters, and possibly 6 meters, using CW, SSB and RTTY. QSL via K8LJG.

ITALY, I. Special event station II9AS will be QRV from June 6 to 9 in celebration of the 40th anniversary of the first flight of the

long-range reconnaissance aircraft Breuget BR 1150. QSL via IT9JPW.

MONGOLIA, JT. Operators UA9YAB and UA9YPS are QRV as JT0YAB and JT0YPS, respectively, from the Altai Tavan Bogd National Park until June 4. QSL to home calls.

BONAIRE, PJ4. K9HZ is QRV as PJ4HZ until June 10. Activity is on the HF bands. QSL to home call.

SOUTH SHETLAND ISLANDS. Oleg is QRV as RI1ANF from King George Island. He has been active on 160 meters around 0300z to around 0500z. QSL via RK1PWA.

SWEDEN, SM. Ove, SM0PSO is QRV using special event call SF0530COH until June 17. QSL to home call.

AUSTRALIA, VK. Special event station VK100WIQ is QRV during the month of June in celebration of 100 years of Amateur Radio in Queensland. QSL via bureau.

MONTSERRAT, VP2M. John, KB4CRT will be QRV as VP2MRT from June 6 to 13. Activity is on all HF bands, including 6 meters. This includes an entry in the upcoming ARRL VHF contest. QSL direct to home call.

LATVIA, YL. Special event station YL2012USCARS is QRV until June 4 during the American Cars Fan Meeting being held here. QSL via ES2TT.

ST. HELENA, ZD7. Bruce, ZD7VC is usually QRV on 20, 17, 15 and 6 meters between 1700 and 2200z most days. QSL direct to home call.

THIS WEEKEND ON THE RADIO. The IARU Region 1 CW Field Day, RSGB National Field Day, NCCC RTTY Sprint, NCCC Sprint CW Ladder, HA3NS Sprint Memorial CW Contest, 10-10 International Open Season PSK Contest, DigiFest, Wake-Up. QRP CW Sprint, Maritime QSO Party, SEANET Contest, UKSMG Summer Contest, UT5EU VHF Memorial Contest and the Alabama QSO Party are all on tap for this upcoming weekend. The RSGB 80-Meter Club Data Championship is scheduled for June 4. The ARS Spartan CW Sprint is scheduled for June 5. Please see June QST, page 79, and the ARRL and WA7BNM Contest Web Sites for details.

2628. http://www.ybdxc.net/2012/06/worked-all-continents-wac-award.html

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-01 05:50:55 UTC
From: Yb land Dx club
Topic: 2628 Message: 2628

http://www.parc.org.za/index.php?page=awards

Worked All Continents (WAC) award
Award Requirements
The International Amateur Radio Union (IARU) issues Worked All Continents certificates to amateur radio stations to recognise two-way radio communication.
Qualification for the WAC award is based on an examination by the International Secretariat, or by a member-society of the IARU, of QSL cards that the applicant has received from amateur stations in each of the six continental areas of the world. All contacts must be made from the same country or separate territory within the same continental area of the world. Only original QSL cards are accepted.
Endorsements for a single mode or for five or six bands are available. For a five or six band endorsement, the requirements must be met on each of the bands. Contacts made on the 10, 18 and 25 MHz bands or via satellites do not count for these endorsements. The QSL cards must clearly show the mode or band to qualify for an endorsement. A QRP endorsement is also available, for contacts made on or after 1 January 1985 while running a maximum of 5 W output or 10 W input.
The following information should be helpful in determining the continental area of a station located adjacent to a continent:
* Africa includes Madeira (CT3), Gan Island (8Q), French Austral Territory (FT) and Heard Island (VK0), as well as many Indian Ocean islands.
* Asia includes Ogasawara Islands (JD1), most of the Maldives (8Q), Socotra Island (7O), Abu Ail Island (J2/A), Cyprus (5B, ZC4), Eastern Turkey (TA2-9) and Georgia (4L).
* Europe includes the first to sixth call areas of Russia (R1-6), West Istanbul (TA1), most Italian islands (I) and Azores (CU).
* North America includes Greenland (OX), the Carribean and Central America.
* Oceania includes Minami Torishima (JD1), Philippines (DU), Eastern Malaysia (9M6-8) and Indonesia (YB).
* South America includes Trinidad & Tobago (9Y), Aruba (P4), Curacao & Bonaire (PJ2-4) and Easter Island (CE0).
WAC application forms are at present available on the Pretoria Amateur Radio Web site (www.parc.org.za) under “Awards” in MS Word and Adobe PDF format. Once completed, applications and the QSL cards should be directed to:
Awards Manager
South African Radio League
PO Box 721
1735 Strubensvallei
After verification, the cards will be returned to the applicant, followed soon after by the certificate. The fee is R 60. A self-addressed stamped envelope must be included if the applicant would like to have the QSL cards returned. South African amateurs must be current SARL members.Email enquiries can be directed to zs6p@....

http://sv5byr.blogspot.co.uk/2012/05/that-can-happened-only-at-greece.html

That can happen only at Greece....!!!!

On video above the lawyer of SV5/DJ6SI explain how the Greek court charge the German Radio amateur for his transmissions from Kos island.

They arrest him and (as he said) he try to hang himself with a belt during the police operation....!!!
Unbelievable story for us all in Radio amateur Community.
I wrote to him an E-mail just to say sorry and to be as an witness at court just to explain to court what the Amateur Radio is.

All those years from 1962 till today http://www.pileup.de.com/
70 countries all over the world and only in Greece the authorities thing that the man was a SPY....!!!!

I'm calling all radio amateurs to accept my sorry about this.

Also remind to all ham friends before to come Greece and after finishing the paper work to contact some local ham(s) to avoid possibly situation like this.

SV5BYR Mike

No 1100

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

EA - ED3CW (QSL via EB3CW), ED5ATK (QSL via EA5ATK), ED5DM (QSL via EA5DM), ED5DWS (QSL via EA5DWS), ED5DY (QSL via EA5DY), ED5FL (QSL via EA5FL), ED5HAB (QSL via EA5HAB), ED5JC (QSL via EC5JC), ED5KB (QSL via EA5KB), ED6QY (QSL via EA6QY) and ED8DD (QSL via EA8DD) will be active on 5-24 June for the Formula 1 Grand Prix of Europe that will take place in Valencia. Information on the relevant award can be found at www.f1award.com

DL - Friedrich, DL4BBH and Ric, DL2VFR will be active as DM50IOTA from Borkum Island (EU-047) on 27-29 July, IOTA Contest included. QSL via bureau. [TNX rsgbiota.org]

F - Vincent, F4BKV will be active as F4BKV/p from Banc d'Arguin (EU-159) on 2 June, between 7 and 18 UTC. He will be QRV on 20, 15, 10 and 6 metres. QSL via home call. [TNX DX World]

F - Once again (for the 61st year) the Association des Radioamateurs de la Sarthe will activate a special event station for the 24 Hours of Le Mans. The callsign will be TM24H and operations will take place on 3-17 June. QSL via F6KFI.

FO_m - Christian, F5IDM will participate in a scientific expedition to the Marquesas Islands (3-12 June) for the transit of Venus. As time permits, he will operate mainly SSB as TX5VT and "will try to be active for DX calls at given times". Check www.cveillet.net/PF/TX5VT.php for updates. QSL via F5IDM (see qrz.com). [TNX DX World]

FS - Once again John, K9EL will be active as FS/K9EL from St. Martin (NA-105) on 8-24 June. He will operate holiday style on 80-6 metres CW, SSB and RTTY. QSL via home call and LoTW. [TNX The Daily DX]

GJ - Dave, EI9FBB will be active as MJ/EI9FBB from Jersey (EU-013) on 2-6 June. He plans to operate mainly CW with some SSB on the higher HF bands. QSL via home call, direct or bureau, and LoTW.

HC - Once again Rick, NE8Z will be active as HC1MD from Tumbaco, Ecuador on 7-14 June and on 21-31 July. He will operate CW, SSB and RTTY on 40-10 metres. He will also monitor 6m CW and SSB on 50110 kHz. QSL via K8LJG. Information on the HC/Ecuador and HC8/Galapagos DX Diplomas can be found at http://webpages.charter.net/ne8z. [TNX NE8Z]

I - ARI Milano will participate in the Museum Ships Weekend (2-3 June) as II2IGTO (submarine "Toti") and II2IBCI (ocean liner "Conte Biancamano") from the National Museum of Science and Technology. Look for activity on 80-10 metres (plus possibly 6m) CW and SSB. QSL via IQ2MI.

I - Franco, IK4YCQ will be active holiday style as IF9/IK4YCQ from Favignana Island (EU-054) on 4-8 June. He will operate SSB on the HF bands. QSL via home call, bureau preferred. [TNX IK4YCQ]

ON - ON7EX, ON6VOX and ON4LO will be active as ON4LO/LH from lightship "Mayflower" on 8-12 June, They will be QRV on 80-10 metres SSB. QSL via ON4LO, direct and bureau. [TNX ON4LO]

PY - PU1MMZ, PU1SET, PY1HS, PY1MT and PY1MX will be active as ZV1M from Itacuruca Island (SA-029) on 27-29 July, IOTA Contest included. QSL via PY1MT. [TNX rsgbiota.org]

UA - The R44WFF team will be active from Buzuluksky Bor National Park and Orenburg Reserve on 5-12 June. All of the QSOs will be confirmed via the bureau. [TNX R44WFF]

V8 - A large group of operators from the Mediterraneo DX Club and Gemilang Amateur Radio Station will be active as V84SMD from Brunei (OC-088) on 11-23 November. They will operate CW, SSB and RTTY on 160-10 metres with 5-6 stations. QSL via IK2VUC, direct or bureau, and LoTW. Further information, including OQRS in due course, can be found at www.mdxc.org/v84smd

VK - Celebrating one century of Amateur Radio in Queensland, special event callsign VK100WIQ will be activated from 1 June through 31 July by WIA affiliated clubs located across the State. All of the QSOs will be confirmed automatically via the bureau. Direct card requests will be accepted until 31 December 2012 and can be sent to VK100WIQ Manager, P.O. Box 343, Laidley QLD 4341, Australia. Further information can be found in the "News and Events" section on www.wia.org.au

VP2M - John, KB4CRT will be active again as VP2MRT from Montserrat (NA-103) on 6-12 June. He will be QRV on 80-2 metres SSB, with some CW and maybe PSK, and will participate in the ARRL June VHF QSO Party. QSL via VP2MRT (direct) and LoTW. [TNX NG3K]

VP2M - Graham, M0AEP will active as VP2MDD from Montserrat (NA-103) from 7 June to 6 August, with a focus on 12, 10 and 6 metres SSB and CW. QSL via home call, direct or bureau.

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CY0/VE1AWW ---> Al, CY0/VE1AWW has been QRT from Sable Island since 28 May. "A migratory bird (and protected species) was found near my towers with injuries suggesting a collision with one of the towers", he says. "I am required to take down the towers until an investigation and policy can be developed for tern season (April-August)".

ST PAUL ISLAND 2012 ---> In their latest press release (25 May), the CY9M team reported that on 25 July they "will be making their way to Sydney, Nova Scotia, then onwards to the northernmost tip of Cape Breton, ready to depart for St Paul island on July 26th". A few of the team plan to be QRV as VE1/callsign from Cape Breton Island (NA-010) prior to CY9M. There are few landing spots on St Paul, and "actual station location will be determined where we land. From planning discussions, we know each proposed location has positives and negatives to certain regions around the globe - therefore this is very much an 'on the day' set-up at any given landing spot. Now the shipping process begins". Further information, including log search, OQRS and details on how contribute, can be found at www.cy9m.com

XR0ZA ---> A team of operators from Radio Club de Valparaiso went to Robinson Crusoe Island (Juan Fernandez) to set up a radio and conduct an earthquake and tsunami drill. In their spare time they were QRV as XR0ZA. QSL via CE2AA.

Logger 32, saya baru saja di ajari oleh om Syarif dan om Imam... Ciamik ternyata... hahahhaha...

Software nya gratis, download dari internet, install nya mudah, dan penggunaan nya gak ribet.

Terima kasih om Syarif dan om Imam.

Buat kawan kawan yang belum ada logger atau yang selama ini dx ing hanya menggunakan log papper (di tulis tangan) , kini saat nya beralih menggunakan logger software agar kita memudahkan me manage data QSO kita.
Di millist ini kita bisa sharing semuanya.

Regards

Ndut

Logger 32, saya baru saja di ajari oleh om Syarif dan om Imam... Ciamik ternyata... hahahhaha...

Software nya gratis, download dari internet, install nya mudah, dan penggunaan nya gak ribet.

Terima kasih om Syarif dan om Imam.

Buat kawan kawan yang belum ada logger atau yang selama ini dx ing hanya menggunakan log papper (di tulis tangan) , kini saat nya beralih menggunakan logger software agar kita memudahkan me manage data QSO kita.
Di millist ini kita bisa sharing semuanya.

Logger 32, saya baru saja di ajari oleh om Syarif dan om Imam... Ciamik ternyata... hahahhaha...

Software nya gratis, download dari internet, install nya mudah, dan penggunaan nya gak ribet.

Terima kasih om Syarif dan om Imam.

Buat kawan kawan yang belum ada logger atau yang selama ini dx ing hanya menggunakan log papper (di tulis tangan) , kini saat nya beralih menggunakan logger software agar kita memudahkan me manage data QSO kita.
Di millist ini kita bisa sharing semuanya.

Logger 32, saya baru saja di ajari oleh om Syarif dan om Imam... Ciamik ternyata... hahahhaha...

Software nya gratis, download dari internet, install nya mudah, dan penggunaan nya gak ribet.

Terima kasih om Syarif dan om Imam.

Buat kawan kawan yang belum ada logger atau yang selama ini dx ing hanya menggunakan log papper (di tulis tangan) , kini saat nya beralih menggunakan logger software agar kita memudahkan me manage data QSO kita.
Di millist ini kita bisa sharing semuanya.

Regards

Ndut

Subject: [YBDXC_News] Logging Software Chart

http://www.clublog.org/software.php

Logging Software Chart
The table below shows the various logging software products that have been detected by Club Log this month. The number of uploads is counted by inspecting the ADIF file headers at the start of the upload. Logging software and product versions not seen within the last 30 days are automatically dropped, to keep the information current. If you do not see your logger on this page, you could its author to support the ADIF PROGRAMID field.
Software Used By Users With 200+ DXCCs [Top 5]
This chart shows the logging software used by Club Log users who have worked more than 200 DXCCs (an approximation to filtering DXers). The population of users considered is limited

to those with logging software that declares a PROGRAMID in uploaded ADIFs.
Product Name
% of Users
LOGGER32 43%
DXKEEPER 23%
HAMRADIODELUXE 21%
AMATEUR CONTACT LOG 8%
UR5EQF_LOG 5%
Software Used By Honor Roll Users [Top 5]
This chart shows the logging software used by Club Log users who are on the DXCC honor roll (as measured by the number of DXCCs worked in their account). The population of users considered is limited to those with logging software that declares a PROGRAMID in uploaded ADIFs.
Product Name
% of Users
LOGGER32 54%
DXKEEPER 29%
DXBASE 7%
AMATEUR CONTACT LOG 6%
WIN-EQF* 4%
Software Used By New Hams [Top 5]
This chart shows the logging software used by Club Log users who have a total of less than 3 years activity in their log (excluding expeditions). The population of users considered is limited to those with logging software that declares a PROGRAMID in uploaded ADIFs.

Om Zen .. Ternyata tertarik pakai logger 32..

Download dulu om di

www.logger32.net

Pilih Program Files

Download yg versi 3.40.19

Filenya 28 mb

Nanti hasil downloadnya :
lgr32full3049.zip

Di unzip dulu

Lalu click

Setup.exe

Logger 32 terinstall deh di laptop atau di pc kita... Hhahahhhhhahaa

Selamat mencoba om..

Selamat pagi, hari ini cuaca di Banda Aceh cerah dan static noise kecil sekali, karena sudah 3 hari belakangan angin dan hujan kuat hingga pohon banyak yang tumbang, resiko bagi amateur di Banda Aceh bila menggunakan yagi. Angin kecepatan rata rata 170km/jam . Antenna rotary jadi liter C . Cheer de YB6AR

Kalau sudah di download:

Isi callsign anda

Trus jgn lupa isi grid locator

Trus pada kolom call anda isikan dulu frekwensinya
Misal 14200 mode nya msh cw

Lalu click pada frekwensi
Akan keluar kotak Band mode selection

Band from band plan di centang
Mode from band plan di centang juga.

Click apply

Nah skrg begitu di kolom call anda isi 14200 mode nya otomatis ssb band nya 20 m

Anda isi 21250 band nyaa berubah jadi 15m...

Silahkan di coba...

Nah karena log book yg di tampilkan sgt bnyk.. Kita bisa setting data apa saja yg mau di tampilkan pada logbook kita.

Caranya:

Gerakkan cursor di logbook, click kanan, lalu pilih set up, pilih grid lay out.

Nantinya akan terlihat spt pada gambar attachment..

Centang data data yg mau anda tampilkan pada logbook anda

Saya lampirkan juga gambar log book pada logger 32 stlh di setting...

2657. Bls: [YBDXC_News] Logging Software Chart

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-02 02:55:40 UTC
From: syarif Hidayat
Topic: 2632 Message: 2657

Pagi,
dari data tsb, Logger 32 populer dan telah dipergunakan oleh dxer senior sejak lama.
di kalangan new dxer,... sepertinya HAM radiodeluxe lebih banyak dipergunakan,..
mengalahkan logger 32.
Sepertinya boleh kita explore kelebihan dari HAMRadiodeluxe ini, mungkin ada feature yg menonjol.
apakah HRD ini juga gratis seperti halnya Logger 32 ?

Terima kasih
yb1fwo/ja

Judul: [YBDXC_News] Logging Software Chart

http://www.clublog.org/software.php

Logging Software Chart
The table below shows the various logging software products that have been detected by Club Log this month. The number of uploads is counted by inspecting the ADIF file headers at the start of the upload. Logging software and product versions not seen within the last 30 days are automatically dropped, to keep the information current. If you do not see your logger on this page, you could its author to support the ADIF PROGRAMID field.
Software Used By Users With 200+ DXCCs [Top 5]
This chart shows the logging software used by Club Log users who have worked more than 200 DXCCs (an approximation to filtering DXers). The population of users considered is limited to those with logging software that declares a PROGRAMID in uploaded ADIFs.
Product Name
% of Users
LOGGER32 43%
DXKEEPER 23%
HAMRADIODELUXE 21%
AMATEUR CONTACT LOG 8%
UR5EQF_LOG 5%
Software Used By Honor Roll Users [Top 5]
This chart shows the logging software used by Club Log users who are on the DXCC honor roll (as measured by the number of DXCCs worked in their account). The population of users considered is limited to those with logging software that declares a PROGRAMID in uploaded ADIFs.
Product Name
% of Users
LOGGER32 54%
DXKEEPER 29%
DXBASE 7%

AMATEUR CONTACT LOG 6%
WIN-EQF* 4%
Software Used By New Hams [Top 5]
This chart shows the logging software used by Club Log users who have a total of less than 3 years activity in their log (excluding expeditions). The population of users considered is limited to those with logging software that declares a PROGRAMID in uploaded ADIFs.

http://www.hrdsoftwarellc.com/default.html

About Ham Radio Deluxe
What is Ham Radio Deluxe?
Ham Radio Deluxe (HRD) is an integrated suite of software products for amateur radio. The five modules in the suite provide rig control, logging, digital communications, satellite tracking, and rotator control.
Rig Control
Ham Radio Deluxe Rig Control provides rig control through a richly featured full screen interface and other products in the Ham Radio Deluxe Suite via a direct connection or TCP/IP remote access.
Logbook
Ham Radio Deluxe Logbook provides QSO logging, DX cluster connectivity, callsign lookup, awards tracking (with integration to LOTW, eQSL, and Ham Radio Deluxelog.net), and contesting. Microsoft Access and MySQL are support with strong features for backup and recovery.
Digital Master (DM-780)
DM-780 provides most popular sound card digital modes with direct integration to Ham Radio Deluxe Logbook.
Satellite Tracking
Ham Radio Deluxe Satellite Tracking provides satellite operations with rig control and Google Earth integration.
Rotator Ham Radio Deluxe Rotator provides control for 15 popular models of antenna rotators.
How It All Began
In early 2003 Peter PH1PH and Simon HB9DRV talked about developing a simple program to control the soon to be released ICOM IC-703. Maybe it was the beer, maybe the desire to give something back to the radio amateur community, however on June 6th, 2003 the first line of code was written, Ham Radio Deluxe (Ham Radio Deluxe) was born.
By late 2005 the number of registered users stood at 20,006 – quite an achievement in such a short time.
In late 2011, Simon sold HRD to Rick W4PC, Randy KØCBH, and Mike WA6PIE.

http://www.logger32.net/

Welcome to Logger32

Welcome to Logger32, a 32-bit Amateur Radio logging program written by Bob Furzer, K4CY. Bob is also the author of Zakanaka, and a 16-bit version of Logger.

Logger32 runs under Windows 95/98, Windows 2000, Windows ME, Windows NT and Windows XP

Logger32 has been developed to be a highly user configurable general purpose Amateur Radio logbook with computer control support for many radios and antenna rotators. It is NOT a contesting log, although there is no real reason why it could not be used for such, and does not contain some features that might be found in software specifically designed for this activity.

This is the Full Version of Logger32 version 3.40.19
http://www.logger32.net/program.html

Logger32.hlp Version 3.32.0
1. GENERALLOGGER32 has been developed to be a highly user-configurable, general purpose amateur radio logbook with computer control support for many radios and antenna rotators. It is NOT a contesting log, although there is no real reason why it could not be used for such use, and does not contain some features that might be found in software specifically designed for this activity. The functionality that it DOES provide includes:
· Compatible with early and current ADIF specifications
· Logbook Page Window and Previous QSOs Window can each have up to 47 columns, all user configurable, including IOTA, Grid squares, satellite names, ten-ten etc.
· Logbook, Previous QSO, and Worked/Confirmed windows can have the columns presented in any order
· Worked/Confirmed Table can display information in either of two ways
· Seven user-definable log entry page items
· Logs more than 1.5M QSOs
· All Country, County, and IOTA databases are fully editable
· Displays sunrise/sunset, short path distance, long and short path beam headings, and local time for the distant end
· Comprehensive statistics tables for Awards and QSLs.
· Real time satellite tracking using Keps from a local file or collected from a favored web site
· Grayline display with selectable terminator
· DX spot tables with input from packet or telnet sources (or both at once)
· User-definable worked/confirmed color scheme on incoming spots.
· Support for many radios including a debug window
· User-selectable frequency display in KHz or MHz down to 1 Hz resolution.
· User-selectable date and time format
· CDROM support
· Support for the use of QRZ.com and GoList via the Internet

· A facility to synchronize your computer's clock to an atomic standard
· All windows fully re-sizeable and features to retrieve lost windows when screen resolution is modified.
· Supports multiple .INI files for different set-ups (normal, contest, etc.)
· Fully configurable fonts, background, and foreground colors
· Auto log-on scripts for telnet and cluster access
· Definable telnet and cluster shortcuts and scripts
· Personalize you own bandplan
· Prefix statistics available on screen for up to 50 bands and 48 modes
· Previously worked callsigns automatically appear under the callsign entry window (Callsign preview)
· The Logbook, Previously Worked, Spots and Stats tables all have variable width columns
· Support for a parallel port antenna selector that can operate automatically with your bandplan
· Log page can be sorted on QSO#, Callsign, Prefix, Frequency, Band, Mode, CQZ, DXCC, Grid Square, IOTA, State, Continent, and ITUZ.
· Logs can be output in either ADIF, UQF, or CSV format.
· Supports both multiple user (One log for the family or Club station) and multiple logs (one for the main, one for contesting, etc.)
· User-selectable fields to copy from previous QSO details to a new logbook entry
· Logbook percentage full indicator
· Grid Square Calculator
· Support for eQSL and Logbook of The World (LoTW)
· Functional information buttons in the Logbook Entry Window
· Export QSOs flagged for QSLing
· QSLs waiting to be sent are highlighted in the log.
· Send DX spots to a VHF cluster or Telnet
· BIntegration of MMTTY and MMVAri for PSK31/PSK63 and RTTY which includes:
Three independent, simultaneous receive channels in PSK31, Waterfall or spectral signal display.
Selectable colors for receive and transmit windows (TX and RX windows).
Selectable frequency markers
Built-in macros for use with a selectable number of programmable “buttons”
Capture his callsign and his name with a click.
Add QSO number
Programmable default RX (initial receive) frequencies
Independent AFC and squelch settings for each RX window.
Selectable waterfall and spectrum display characteristics (color, brightness, smoothing).
IMD indication
Slash-zero option
Operate RTTY (including 23 Hz.) using MMTTY module written by Mako Mori.
Calibrate the sound card timing
Operate split using audio tones or using radio control.
Save operating parameters in RTTY mode in a “Profile”

SO2R compatibility
* Built in CW keyer (but NO decoder) with programmable buttons and a limited range of macros

* Support for automatic control of your antenna rotator

* Contest serial number counter – up to 999,999 contacts

* User-selectable highlighting for worked, confirmed, QSL send, QSL awaiting printing and general editing

* Single button compression and saving of backup log files

* Built in DVK (Digital Voice Keyer)

* Built in Data Terminal with programmable buttons and a range of macros

* Simple conversion utility (Deg. C -> F. etc.)

* DX Cluster spots can be displayed on a map

* Selective filtering of DX spots

* Synchronization of log to download LoTW and/or eQSL records

* Sending and receiving cluster "Announce" and "Talk" messages made simple by using a separate window

* Support for HamCap - a propagation prediction tool written by VE3ENA

* Support for a second CAT controlled radio

* Support for on-line Hamcall lookup

With Logger32 the answer is probably “Yes”. Now what is the question?

1. GENERAL© 2002-2010 Robert C. Furzer. All rights reserved.
Authorization to use this software is limited to radio amateurs who agree to strictly comply with the following operating practices:
· Always use your full callsign when calling another station
· Never respond to calling operators who do not use full callsigns
· Do not spell your name or QTH unless specifically asked to do so
· Do not call the operator of the station you are in contact with 'Sir', 'Your Highness', 'Doctor', 'Monk' or any other title (real or imaginary)
· Do not end your transmissions with 'QSL', 'Roger', 'Over', or 'Over Over'
· Do not begin your transmissions with 'QSL', 'Roger', or 'Roger Roger'
· Do not operate (or condone those that do) on DX list or DX net operations
· Know the callsign of the station you are calling before you call
* Do not operate on SSB with wider than 2.8 KHz bandwidth filters (or condone those that do)
* Do not use external devices to unnecessarily distort the audio

* Do not precede an exchange of signal reports with "Please copy ...," "When last heard...," or any other superfluous colloquial phrase.
I took the time and effort to write the software. Many others have taken the time and effort to debug the software and write the documentation. At the very least, you can make the effort to comply with the terms of the use of this software. If you chose not to operate in accordance with the requirements listed above, please do not use this software. In general, Logger32 is free for use in amateur radio, but is not licensed for reproduction on CDs or web sites other than those selected by Bob Furzer. Authorization to reproduce this software (on CD, Internet or any other form or media) is explicitly prohibited. Please

don't waste my time or yours by asking. The answer is 'NO.'
Any questions or comments pertaining to Logger32 should be addressed to the Hamlogger Reflector 'hamlogger@...', and NOT to Bob Furzer directly.
The IOTA database is copyright of the RSGB, and is not part of the Logger32 release software. The IOTA and IOTA Island databases now included with Logger32 are sample databases derived from public (non-copyright) sources, from public domain (non-copyright) sources, and extensive contributions from individual amateurs. The validity and accuracy of the Logger32 databases are unknown and have not been validated with the RSGB. Individual users of Logger32 are free to modify the Logger32 IOTA databases as they see fit.

http://n1mm.hamdocs.com/

WELCOME TO THE N1MM LOGGER WEBSITE

N1MM Logger is the world's most popular contest logging program. For CW, phone and digital modes, its combination of contest-optimized features is unmatched. Click here for a quick look at some of the program's features.

N1MM Logger Features
* 1. General
* 2. Key features
* 3. Digital support
* 4. Windows
* 5. Advanced features
* 6. Radio support
* 7. Hardware Support
* 8. Import/Export features
1. GENERAL
* All major and many minor HF Contests are supported
* Including General DX logging, DXpedition, DXSatellite and VHF DX.
* SSB, CW and Digital support
* Multi-user support
* Rover support for QSO parties and other contests which support this.
* VHF and up contesting
* Transverter support (SHF bands supported up to 10, 24, 47, 76, 142 and 241 GHz).
* Dxpedition mode (Stay in Run or S&P)
2. KEY FEATURES
* ESM- Enter Send Message Mode - just press the Enter key to make a qso.
* Uses sound card for DVK but also DVK interface for W9XT and other DVK interfaces.
* Automatic CW generation (LPT and via USB to serial converter).
* Rotator control (Using N1MM Rotor, LP-Rotor or ARSWIN).
* Grayline program
* Two VFO support when using one radio, with one VFO per Bandmap.
* SO2R/SO2V support including $5 SO2R supporting SO2R with just sound cards.
* Telnet and packet support - spots from both automatically update the bandmaps.
* Winkeyer support (Serial CW keyer by K1EL).
* Automatic beam heading and sunrise/sunset calculations.
* Contact recording to wav files. Right-click on log entry to play back.
* Record level indicator for recording QSOs.
* Spot all S&P calls locally (QSYing wipes the call and spots QSO in bandmap).
3. DIGITAL SUPPORT
* All major and most smaller RTTY and Digital contests
* AFSK and FSK with use of soundcards and terminal units (DXP-38, PK-232, Kam, etc.)
* Interfaces with MMTTY, MMVARI, and Fldigi
* SO1V, SO2V and SO2R
* Up to 4 parallel RX decoding windows using either MMTTY or a TU, all interacting with the

Entry Window
* Multiplier/Dupe color coding of calls on the fly in any RX window
* Ability to find calls in Master.dta file in long strings of text in the RX windows (e.g., in ASDFGHJKLN1MMAS#$%WERT, N1MM would be highlighted)
* Multiple call Grab window that displays last 7 callsigns received in the RX window.
* Point and click capture of callsigns and exchanges to Entry Window
* Ability to complete entire QSO with mouse and never leave the RX window (With ESM turned on)
* Up to 24 additional macro buttons
* Ability to stack incoming calls and work them off the stack by using a TU/Now macro
4. WINDOWS
* Entry Window Window, Log Window, ((Packet/Telnet)), Score Window Summary,Info Window, Available Mults and Qs Window and the Digital Interfaces
* Multiplier window.
* Call check function , including N+1 matching
* Dual graphical bandmaps click to tune radio to the spot selected. The bandmap can be zoomed in or out depending on number of spots shown.
* Available Window keeps track of needed spots and mults on each band for easy band-change decisions. **Color-coded buttons indicate on which bands the current contact is needed.
* The program retains the size and position of windows as specified by the user.
* Click on packet spot in Packet/Telnet window, Bandmap or Available window to tune to that frequency/mode.
5. ADVANCED FEATURES
* SO2R including Dueling CQ and selectable advanced SO2R modes
* Serial number server for SO2R and multi-user modes - coordinates serial numbers between radios.
* S&P callsign stacking.
* Multi user support with automatic resync on reconnect.
* Rotator control
* Antenna mapping.
6. RADIO SUPPORT
* Radio interface supports radios from Alinco, Elecraft, FlexRadio, Icom, Kenwood, Orion, TenTec and Yaesu
7. HARDWARE SUPPORT
* LPT port functionality to control antenna switches, radio selection, and PTT (95/98/ME/NT/2000/XP).
* Support for microHAM and OTRSP SO2R protocols.
8. IMPORT/EXPORT FEATURES
* Cabrillo export support.
* ADIF import/export support.
* Transaction log, which keeps all QSOs to facilitate recovery of log.
* Statistical reports.

Dear All,

Mohon maaf .

Diuber bagaimanapun, nyatanya yg namanya edisi KHUSUS bln Mei 2012 terlampir baru bisa dirilis hari ini, Sabtu 2 juni 2012.

Sekedar sbg alasan pemaaf, ini krn Penyunting mencoba meliput secara utuh penerbangan pesawat kargo DRAGON yg men-suplai lojistik bagi 6 (enam) orang AMATIR RADIO dari berbagai kebangsaan (AS, Russia, Belanda) yg meng-awak-i Expedition 31 di setasiun angkasa antarbangsa ISS.

Dragon berangkat meninggalkan Tg Kennedy (Cape Canaveral), FLA pada Selasa 22/05-2012 , dan kembali ke bumi dengan selamat pada hari Jum□at pagi 1 JUNI 2012, yang sebenarnya sudah melewati hari batas tayang bagi sebuah publikasi yg bertajuk □edisi KHUSUS bln Mei 2012□

Konten lain adalah:

+ Pengukuhan DPP & Pengurus ORPUS Masa Bakti 2011-2016

+ Adab ber-REPEATER-ria

+ Mem-biksen BALUN dengan bermacam ratio ..

Dan, yg unik dr edisi ini, ini adalah untuk pertama kalinya (sejak era BeON) kalawarti elektronik ini keluar dengan 10 halaman !!!

Selamat membaca, PSE QSL, and as always: pse ENJOY .!!!

73, de

bam ybØko

[Ed. , e-QSP]

Awards

In the "EFC2012 on the AIR" award program you can earn two diplomas:

Polish EFC2012 Award - issued by the PZK
Ukrainian UR-SP EFC2012 Award - issued by UARL
Second Ukrainian 2012 EFC Award issued by (KRARS) Kharkiv Regional Amateur Radio Society, EM2012L

Requirements of diplomas are presented below.

European Football Championship
2012 Award
Award Rules

1. The Polish Amateur Radio Association (PZK) issues an award in collaboration with the Ukrainian Amateur Radio Association (UARL), in a joint effort during the European Football Championship EURO 2012 which takes place in Poland and in Ukraine.

2. This activity is carried out under the honorary auspices of The Polish Football Association (PZPN).

3. This activity takes place from June 1st to July 5th, 2012. During this period, radio amateurs may collect points needed to obtain the Award.

4. To obtain the award, the following number of points need to be collected:

40 points - SP and UR stations;
25 points - European stations;
15 points - DX stations.

5. QSOs with the following organizing stations are 2 points each:
* PZK: SN2012PZPN, HF2012EFC, 3Z2012EFC, SN2012GD, SN2012PO, SN2012WA, SN2012WR
* UARL: EM2012EFC, EN2012EFC, EO2012EFC, EN2012L, EN2012I, EN2012W, EN2012U

while QSOs with any other station operating in the "EFC-2012 on the air" program are 1 point.
• It is allowed to repeat a QSO with a given station once on another band or mode.
• A special distinction in the form of an "EXCELLENT" sticker will be provided for QSOs with all organizing stations listed above and additionally with 60 other stations from Poland and Ukraine taking part in the "EFC-2012" program.

6. Short wave listeners are also eligible for the award after meeting the same point requirements as amateur radio operators.

7. Certificate fees.
• The award in electronic form (in .pdf form) is free.
• The award in paper form is free for PZK and UARL members and club stations from Poland and Ukraine.
• The cost for a paper award for other stations is: 20 złoty/ 5 Euro/ 6 USD/ 6 IRC.

The fee should be paid to the PZK HQ bank account: PL 33 1440 1215 0000 0000 0195 0797, Nordea Bank Polska S.A. with the annotation: „EFC2012” and one's own call-sign.

8. Applications for the Award should be made by electronically by submitting a form from the Internet web page or by sending a standard application which should be sent to the following address: DOT PZK, Box 1977, 53-316 Wroclaw 14, Poland.

QSL cards are not required - the verification of the application is based on electronic logs of organizing stations, after having received the award fee (if required).

9. Award applications shall be made before December 31st, 2012.

UR-SP EFC 2012"
Award Rules

1. "UR-SP EFC 2012" Award is issued by Ukrainian Amateur Radio League (UARL) in cooperation with Polish Amateur Radio Union (PZK) in honor of European Football Championship EURO-2012 in Poland and Ukraine.

2. Terms of the Award fulfillment: June 1 - July 5, 2012.

3. Basic conditions:

EUROPE: 50 QSOs with Amateur radio stations from the countries-finalists of UEFA EURO 2012 (see Addendum). It is obligatory to apply at least 1 /one/ QSO with every of 16 countries;

DX: DX - 25 QSOs with Amateur radio stations from the countries-finalists of UEFA EURO 2012 (see Addendum). It is obligatory to apply QSOs with at least 10 /ten/ of 16 countries;

The missing QSOs could be compensate by QSOs with Special event stations of Poland and Ukraine.

4. Duplicate QSOs are not allowed.

5. Listeners (SWL) apply for the Award on the same conditions.

6. Award fees:

- Electronic Award is free of charge for all applicants;

- Paper Award is free for all UARL and PZK members as well as for all UR/SP Club stations;

- Paper Award fee for all other stations - 20zl/5 Euro/6 USD/6 IRC.

Payments should be sent to the UARL Award Manager: Olexander M. Senchurov, p.o. Box 1669, Kryvyi Rig, 50038, Ukraine.

7. All applications should be sent by e-mail to: krolru@ukr.net QSL cards are not required, the extract from the log-book would be enough.

8. The applications will be accepted until December 31, 2012.

Addendum:

List of countries - entrants of final stage of UEFA EURO-2012:
9A, CT, DL, EA, EI, F, G, I, OK, OZ, PA, RA (RA2, RA9), SM, SP, SV, UR.

HRD sampai dengan Ver 5.1.1 gartis, Ver 6 komersial. Banyak kelebihan HRD, banyak program terintegrasi di sana spt logger, digital mode (psk sangat bagus), dx cluster, upload ke hrdlog, eQSL, LoTW dan masih banyak lagi. Saran, pakai komputer yg dipasang dua monitor, bisa banyak program dibuka sekaligus. Selamat mencoba.

Pagi,
dari data tsb, Logger 32 populer dan telah dipergunakan oleh dxer senior sejak lama.
di kalangan new dxer,... sepertinya HAM radiodeluxe lebih banyak dipergunakan,..
mengalahkan logger 32.
Sepertinya boleh kita explore kelebihan dari HAMRadiodeluxe ini, mungkin ada feature yg menonjol.
apakah HRD ini juga gratis seperti halnya Logger 32 ?

Terima kasih

Logging Software Chart
The table below shows the various logging software products that have been detected by Club Log this month. The number of uploads is counted by inspecting the ADIF file headers at the start of the upload. Logging software and product versions not seen within the last 30 days are automatically dropped, to keep the information current. If you do not see your logger on this page, you could its author to support the ADIF PROGRAMID field.
Software Used By Users With 200+ DXCCs [Top 5]
This chart shows the logging software used by Club Log users who have worked more than 200 DXCCs (an approximation to filtering DXers). The population of users considered is limited to those with logging software that declares a PROGRAMID in uploaded ADIFs.
Product Name
% of Users
LOGGER32 43%

DXKEEPER 23%
HAMRADIODELUXE 21%
AMATEUR CONTACT LOG 8%

NUNAVUT VY0 DXPEDITION

Celebrating 43 years in Ham Radio by AH6EZ

Our living quarters are the Nanuq Executive Suites on the east side of Rankin Inlet62:48:38.83 N Latitude 92:4:48.76 W LongitudeCentral Time Zone (-5 hours GMT), approximately 1437 miles NNW of our home QTH in Saint Charles, IL.

Our radios and antennas (except for a possible 6m beacon and listening post at the Nanuq Inn, will be at the Arctic College Laboratory Building.
We will have wireless Internet capability and kitchen facilities. The rear of this Laboratory building is on a hill, has plenty of open land and a view to the South.
The Lab will be about a 3/4 mile walk from our living quarters. Notice the heavy trash bin to protect against polar bears.

EQUIPMENT

Primary SSB station
    Icom IC-706MKIIg
Secondary SSB/CW/Digital station
    Flex 1500 (can drive the amplifier to 150-350 watts depending on the band)
Primary CW station
    Elecraft K2-100
Amplifier (when not sharing Hex Beam with INRAD HF Triplexer)
    SPE Expert 1K-FA Solid State 1KW with built-in antenna tuner
HF Filtering   INRAD HF Triplexer for 20-15-10m 200W maximum   W3NQN bandpass filters for 40,30,20,17,15,12,10m 200W maximum

SCHEDULEJune 20   Fly from Chicago to Winnipeg
June 21   Fly from Winnipeg to Rankin Inlet
June 21   Unpack and set up Antennas if possible

June 22   Focus on testing of 20/15/10m shared Hex Beam
June 23   ARRL FD (VY0/AH6EZ, VY0/K9DXA) SSB, CW

June 24   ARRL FD (VY0/AH6EZ, VY0/K9DXA) SSB, CW
June 25-29 WARC bands, 6m, and all modes

June 25-29 Educational outreach to Rankin Inlet community

June 25-29 1 day IOTA activation NA185 Marble Island (TBD)

June 30-31 WARC bands, 6m, and all modes

July 1   RAC Canada Day contest (VY0RAC) SSB,CW
July 2   Pack up, fly to Winnipeg then July 3 fly home

Om Erwin Komalaa baru saja dari QTH saya.. Saya sudah berhasil install kan logger 32 di laptop nya om Erwin dgn windows 7 nya.

Om annes masuk ke:

www.logger32.net

Trus click : Program File

Trus click gmbr comp biru yg kecil yg ada tulisan nya version 3.40.19 new

Nah click di sana lalu save dulu di drive C atau D.. Computer / laptop anda.

Silahkan mencoba...

SB PROP @ ARL $ARLP022
ARLP022 Propagation de K7RA

ZCZC AP22
QST de W1AW
Propagation Forecast Bulletin 22 ARLP022
From Tad Cook, K7RA
Seattle, WA June 1, 2012
To all radio amateurs

SB PROP ARL ARLP022
ARLP022 Propagation de K7RA

Average daily sunspot numbers sank more than 28 points this week (nearly 26%) to 81.9. Average daily solar flux declined more than 16 points to 111.6. This is for the seven days of May 24-30, and is compared to the previous seven days, May 17-23.

No new sunspots appeared over the five days of May 26-30, but on May 31, three new sunspot groups appeared. One day earlier the sunspot number was 78, while the total relative sunspot area was 400. On May 31 those numbers dropped to 73 and 330, even with the new spots.

On May 30, sunspot groups 1486, 1488, 1490 and 1492 were in place. By May 31, 1486 and 1488 disappeared, and new sunspot groups 1493, 1494 and 1495 emerged. But the total area of all visible spots was less than the day before.

You can track the fading of sunspot groups and the emergence of new ones at http://www.swpc.noaa.gov/ftpmenu/forecasts/SRS.html. The dates shown are always for the new UTC day, the one following the day for which the data is shown. So the report marked June 1 is actually displaying data gathered on May 31.

In this report the area for each sunspot group is listed, and this is expressed in millionths of a solar hemisphere. The total sunspot area for the day, along with the sunspot number, is displayed along with solar flux resolved to whole numbers at http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt.

The short term outlook is revised from the one given in yesterday's ARRL Letter, with solar flux peaking around 125 on June 2-7, hitting a minimum of 105 on June 27-28, then peaking at 120 on July 1-12.

The latest prediction has solar flux at 120 on June 1, 125 on June 2-7, 120 on June 8-15, 115 on June 16-18, 110 on June 19-26, and 105, 105, 110 and 115 on June 27-30, then 120 on July 1-12.

Predicted planetary A index is 5 on June 1-2, then 10, 15, 18, 15 and 10 on June 3-7, 5 on June 8-11, 8 on June 12-13, 5 on June 14-17, and 15, 12 and 8 on June 18-20, and 5 on June 21-25.

With the start of a new month, we can revisit our moving averages for sunspot numbers. We've been observing a three-month moving average, based on whole calendar months, so the latest average is for March, April and May 2012. About a month ago we were reporting for the months of February, March and April. It is a simple arithmetic - with an accent on the third, rather than second syllable - average, with a total of all sunspot numbers divided by the number of days in the period.

So over September 1 through November 30, 2011, there were 91 days and the sum of all daily sunspot numbers for that period was 10,808, yielding an average daily sunspot number of 118.8 when the sunspot number total is divided by the number of days. The next period covered October 1 through December 31, 2011, with a total sum of all daily sunspot numbers of 10,913 divided by 92 days, giving us an average daily sunspot number of 118.6. That period in Fall 2011 had the highest sunspot numbers seen so far in Cycle 24.

The three month moving averages of daily sunspot numbers for the three month periods ending January 2010 through May 2012 were 15, 22.4, 25.7, 22.3, 18.5, 16.4, 20.4, 23.2, 28.9, 33, 35.6, 31, 30.1, 35.3, 55.7, 72.3, 74.4, 65.9, 61.5, 63, 79.6, 98.6, 118.8, 118.6, 110, 83.3, 73.7, 71.2, and 87.3. As you can see, the numbers are up slightly over the past few months.

The monthly average sunspot numbers for February through May 2012 are 50.1, 78, 84.5 and 99.4.

Go to
http://phys.org/news/2012-05-science-nugget-solar-particles-infiltrating.html
to read an article on Ground Level Enhancements, or GLE, a rare event in which a sudden rise in neutrons coincides with an energetic solar flare or coronal mass ejection. A GLE detected on May 17 was the first GLE of the current solar cycle.

Dave Blood, W1AFC of Oberlin, Ohio had some comments on WA8MEA's recent query on LUF and MUF. Dave wrote, "MUF is affected by solar UV light mostly and therefore is governed by the daily solar flux levels. The LUF, as mentioned, is set by daytime absorption in the D-region at about 100 km heights (hence by the number of radio wave passes through it (up and down) and the number of ionospheric hops supported by the F-region at 300 km heights). The absorption is altered by the instantaneous X-ray radiation from the Sun and this can vary up and down highly during solar flare activity. Radio 'Blackout' conditions occur when the absorption is so high that the LUF exceeds MUF for any propagation path distance for long periods from 20 minutes to several hours."

Dave worked for Raytheon for several decades on over-the-horizon radar from 1960-1992. Dave has been a ham for 60 years.

Rick McCurdy, WA1GTP is in FN31si in Ivoryton, Connecticut. He wrote, "On May 23 at 1550 UTC I received RADAR on 432.100, first time in years! Heading was WSW from (Essex) New London/New Haven CT area. Very few openings on 6 meters but April 30 worked short E skip to VE2DLC, FN58rk, 527 miles. Also Florida openings May 24, not much else."

We received another geomagnetic forecast from F.K. Janda, OK1HH. He predicts quiet to active conditions on June 1, quiet on June 2, quiet to unsettled June 3-4, quiet to active June 5, active June 6-7, quiet to active June 8-9, quiet to unsettled June 10, quiet June 11-12, quiet to active June 13, mostly quiet June 14, quiet to unsettled June 15-16, quiet to active June 17, mostly quiet June 18, active June 19, and quiet to unsettled June 20-21.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 24 through 30 were 96, 86, 70, 83, 87, 73, and 78, with a mean of 81.9. 10.7 cm flux was 115.5, 117.2, 110, 110.7, 110.3, 106.3 and 111, with a mean of 111.6. Estimated planetary A indices were 8, 6, 4, 4, 6, 6, and 6, with a mean of 5.7. Estimated mid-latitude A indices were 11, 8, 5, 3, 3, 5, and 5, with a mean of 5.7.

Stlh itu unzip dulu filenya... Yg comp/laptopnya sdh ada file winzip atau winrar bisa langsung click file nya ....

Besar filenya hanya 28 mb...

Lalu cari setup.exe...

Click setup.exe

Nah logger 32 sdh terinstall di computer/ laptop om Annes...

Nanti settingnya... Saya sdh tulis cara setting nya..

Subject: Re: [YBDXC_News] logger32

Om Erwin Komalaa baru saja dari QTH saya.. Saya sudah berhasil install kan logger 32 di laptop nya om Erwin dgn windows 7 nya.

Om annes masuk ke:

www.logger32.net

Trus click : Program File

Trus click gmbr comp biru yg kecil yg ada tulisan nya version 3.40.19 new

Nah click di sana lalu save dulu di drive C atau D.. Computer / laptop anda.

Silahkan mencoba...

Selamat malam OM Ndut, saya YB4TRY, setelah membaca tulisan OM Ndut ttg, logger32, saya juga berminat, terus saya buka www.looger32.net ----> setelah membuka Prog. file, saya jadi bingung bagai mana caranya utk men download nya karena disana tidak tulisan "download". Bagai mana terusannya OM Ndut utk men-download-nya. Nyanya boleh dong ya OM Ndut. salam sejahtera dari YB4TRY

Thanks & regards,
Annes Samah (YB4TRY)

Subject: [YBDXC_News] e-QSP Vol. I -edisi KHUSUS, MEI 2012

Dear All,

Mohon maaf ….

Diuber bagaimanapun, nyatanya yg namanya edisi KHUSUS bln Mei 2012 terlampir baru bisa dirilis hari ini, Sabtu 2 juni 2012.

Sekedar sbg alasan pemaaf, ini krn Penyunting mencoba meliput secara utuh penerbangan pesawat kargo DRAGON yg men-suplai lojistik bagi 6 (enam) orang AMATIR RADIO dari berbagai kebangsaan (AS, Russia, Belanda) yg meng-awak-i Expedition 31 di setasiun angkasa antarbangsa ISS.

Dragon berangkat meninggalkan Tg Kennedy (Cape Canaveral), FLA pada Selasa 22/05-2012 , dan kembali ke bumi dengan selamat pada hari Jum’at pagi 1 JUNI 2012, yang sebenarnya sudah melewati hari batas tayang bagi sebuah publikasi yg bertajuk “edisi KHUSUS bln Mei 2012”

Konten lain adalah:

+ Pengukuhan DPP & Pengurus ORPUS Masa Bakti 2011-2016

+ Adab ber-REPEATER-ria

+ Mem-biksen BALUN dengan bermacam ratio ..

Dan, yg unik dr edisi ini, ini adalah untuk pertama kalinya (sejak era BeON) kalawarti elektronik ini keluar dengan 10 halaman !!!

Selamat membaca, PSE QSL, and as always: pse ENJOY ….!!!

73, de

bam ybØko

http://jsfc.org/apsprint/aprule.txt
============================== ASIA-PACIFIC Sprint Contest (revised November 2010
============================== updated February 2012) The Asia-Pacific Sprint Contest Committee would like to announce the latest
running of this spectacular radiosporting event - note changes in the rules: Objective: For stations outside the Asia-Pacific region to work as many Asia-Pacific stations as possible within the 2 hour time limit. For stations inside the Asia-Pacific region to work as many stations as possible, anywhere in the world, within the 2 hour time limit. (A complete list of the Asia-Pacific countries is defined below) Awards: 1 For each contest, certificates will be awarded to the top three winners in
the Asia-Pacific Region, and the winner of each continent outside the
Asia-Pacific region. Winners must have at least 5 QSO's in the log to be
eligible for this award. 2 At the end of each calendar year, an official AP Sprint Plaque will be
awarded to the top three winners in the Asia-Pacific Region, and the winner
of each continent outside the Asia-Pacific region. The winners are
determined by summing the ranking of the 3 sprints of the same calendar year.
The winners must participate all 3 sprints of the year to be eligible for
this prize. This prize is sponsored by CQ Ham radio (Japan).
- Example: If one's results for the 3 sprints of the same calendar year were 2nd, 5th and 1st, then his/her points for the year would be 8 (=2+5+1). The one with the least point would be the winner.
- This prize is not awarded to a station, but to an operator. An individual who operated more than one station in the same region in the same calendar year is eligible for this prize. Conversely, a station operated by different operators in the same calendar year is not eligible for this prize. Date/Time/Bands/Mode: 9 June 2012 / 1100-1300 UTC / 15m & 20m / SSB Mark your calendar now - future Asia-Pacific Sprints will be held: Fall (15m/20m CW) - 3rd Sunday of October (21 Oct. 2012) 0000-0200 UTC Spring (20m/40m CW) - 2nd Saturday of February (9 Feb. 2013) 1100-1300 UTC Summer (15m/20m SSB) - 2nd Saturday of June (8 June 2013) 1100-1300 UTC Suggested frequencies: CW - 15m: 21030-21050, 20m: 14030-14050, 40m: 7015-7040 kHz SSB - 15m: 21350-21380, 20m: 14250-14280 kHz Power limit: Stations in Asia-Pacific region - 150W output Stations outside Asia-Pacific region - legal limit in each country Entry categories: Single operator, Single
radio only
- SO2R type of operation is not allowed (use of 2nd transmitter is not allowed). Use of 2nd receiver (separate or built-in) is allowed. Contest exchange: RS/RST + Serial number beginning with 001 Duplicate contacts: Same station may be worked only once on the per band Multipliers: Prefixes per WPX rules (once only - not once per band) QSY rule: CW - called station (usually CQer) QSYs at least 1 kHz after a QSO SSB - called station (usually CQer) QSYs at least 6 kHz after a QSO Final Score: Number of QSOs x Multipliers Asia-Pacific countries for this contest: (coutries from Asia side PacificRim to 180 degrees longitude): 3D2(all), 4W, 1S/9M0, 9M2, 9M6/8, 9V, BV, BV9, BY, BS, C2, DU, FK(all),
FW, H4(all), HL, HS, JA, JD1/Ogasawara, JD1/Marcus, KH2, KH9, KH0, P29,
T2, T30, T33, T8, UA0(not UA9) , V6, V7, V85, VK1-9(all except VK9X &
VK9Y), VR, XU, XV/3W, XX9, YB, YJ, ZL(all except Chatham & Kermadec) Results will be posted

to: CQ-CONTEST@... contest-rules@... http://jsfc.org/apsprint/ CQ Ham Radio Log Instruction: Only electronic logs sent by email are accepted. All entries must contain complete QSO information plus a summary indicating
your claimed score. Each QSO information must include band, date, time,
callsign, sent nr and received nr. If any of those are not shown in the log,
it will be checklog. The operator's callsign and name has to be indicated if
the operator is different than of the owner of the station used or if the
station used is not owned by an individual. Entries without a summary may be
treated as a checklog. (The summary contained in the Cabrillo log satisfies
this requirement) Electronic logs in Cabrillo format are strongly recommended. In any case,
the log & summary must be in ASCII format (no binary files nor non-English
characters, please). The file name of the electronic log must be your
callsign. (For example, 9V1YC.CBR for Cabrillo log) The electronic log
file must be attached to the email. The subject of the email must contain your callsign.
Email: apsprint@... Entry deadline: 7 days after end of contest Cabrillo QSO template for

Topic: 2678 Message: 2678

http://www.jarl.or.jp/English/4_Library/A-4-3_Contests/2011AA_Rule.htm

The 53nd ALL ASIAN DX CONTEST - 2012

Supported by the Ministry of Internal Affairs and Communications, Japan.

The purpose of this contest is to enhance the activity of radio amateures in Asia and to establish as many contacts as possible during the contest periods.

1. Contest Period
2. Bands
3. Entry Classification
4. Power, Type of Emission and Frequencies
5. Contest Call
6. Exchange
7. Restrictions on the Contest
8. Points and Multipliers
9. Scoring
10. Instructions on the Summary and Log sheet
11. Awards
12. Reporting
13. Disqualifications
14. Announcement of Results
15. List of Asian Entities

01.CONTEST PERIOD:
(1) CW: From 00:00 UTC the third Saturday of June to 24:00 UTC the next day <48 hours>
(June 16-17,2012)
(2) Phone: From 00:00 UTC the first Saturday of Sept. to 24:00 UTC the next day <48 hours>
(Sept. 1-2, 2012)
02. BANDS:
Amateur bands 160m(CW only), 80m, 40m, 20m, 15m, 10m
03.ENTRY CATEGORIES:
(1) Single Operator Single Band
a: Asian stations.....High Power, Low Power
b: Non-Asian stations.....High Power only
(2) Single Operator Multi Band
a: Japanese(JA) stations.....High Power, Low Power, Junior, Senior
b: Asian stations.....High Power, Low Power
c: Non-Asian stations.....High Power only
(3) Multi-Operator Single Transmitter(multi band only)
(4) Multi-Operator Multi Transmitter(multi band only)
Note1: Single Operator stations means that one person performs all concerned operations during contest period. Use of Packet Cluster is permitted.
2: Low Power stations are limited 100W output or less. No limitation on High Power stations.

3: Junior stations' operator age must be 19 years old or younger, and Seniors operators must be 70 years old or older.
4: 10 minutes rule(CQ WW method) is applied to Multi-Operator Single Transmitter stations. The 10 minutes rule means that only one transmitter and one band are permitted during any 10 minutes period, defined as starting with the first logged QSO on a band. However, one-and only one other band may be used during any 10 minutes period if and only if the station worked is a new multiplier. This rule is applied to not only running stations, but also to multi-stations respectively.
04. POWER, TYPE OF EMISSION AND FREQUENCIES:
Within the limits of own station license.
05.CONTEST CALL:
(1) CW ..... "CQ AA"
(2) Phone..... "CQ AA Contest"
06. EXCHANGE:
(1) For OM stations: RS(T) report plus operators' age
For example (If operator is 25 years old): Phone.....5925, CW.....59925
(2) For YL stations: RS(T) report plus operators' age, but if the operator does not want to send her age, RS(T) report plus "00" (zero zero) can be sent.
For example (the operator is 25 years old): Phone.....5925(or 5900), CW.....59925(or 59900)
(3) For Multi-Operator stations: RS(T) report plus the averaged age of operators, but if each operator wishes, the age of active operator can be sent.
For example (the operators are 25 and 35 years old): Phone.....5930 for all operators (or 5925 for 25 years old operator and 5935 for 35 years old operator), CW.....59930 for all operators (or 59925 for 25 years old operator and 59935 for 35 years old operator)

07.RESTRICTIONS ON THE CONTEST:
(1) No cross band contacts.
(2) No change of operating site.
(3) For single Operator and Multi-Operator Single Transmitter entry:
Transmitting two signals or more at the same time, including cases of different bands, is not permitted. (Except transmitting two signals to get New Multiplier under the 10 minutes rules)
(4) For Multi-Operator's entry: Transmitting two signals or more at the same time within the same band is not permitted.
(5) No operation from two sites or more for Multi-Operator's entry.
(6) No contact made through repeaters.
08.POINTS AND MULTIPLIERS:
(1) For Asian stations:
a: Points.....Perfect contact will be scored as follows. Contact among same entities will neither count as a point nor a multiplier. Duplicate contact with the same station on same band will not count as a point.
160m band.....3 points per Asian QSO. 9 points per Non-Asian QSO.
80m band.....2 points per Asian QSO. 6 points per Non-Asian QSO.
10m band.....2 points per Asian QSO. 6 points per Non-Asian QSO.
Other bands.....1 point per Asian QSO. 3 points per Non-Asian QSO.
b: Multipliers.....The total number of different entities (according to the DXCC List) worked on each band.
(2) For non-Asian stations:
a: Points.....Perfect contact with Asian stations (excluding U.S. auxiliary military

radio stations in the Far East, Japan) will be counted as follows:
160m band.....3 points
80m band.....2 points
10m band.....2 points
Other bands.....1 point
b: Multipliers.....The total number of different Asian Prefixes(according to the WPX Contest rules) worked on each band.
(3) JD1 stations.
a: JD1 stations on Ogasawara (Bonin and Volcano) Islands belong to Asia.
b: JD1 stations on Minami-tori Shima(Marcus) Islands belong to Oceania.

(4) Maritime Mobile Stations

For all maritime mobile stations at any location (no matter outside or inside Asia), perfect contacts with only Asian stations can be counted. The total score will be published in the contest results. But, they will not be ranked. Contacts points with maritime mobile stations will be considered as same as contacts among Asian stations. But, it will not count as multiplier.

09. SCORING:
(1) Multi-band: (The total of the contact points on each band) x (The total of the multipliers on each band)
(2) Single-Band: (The total contact points on the band) x (The total multipliers on the band)
10. INSTRUCTIONS ON THE SUMMARY AND LOG SHEET:
It is recommended to use JARL A.A. Contest Log and Summary sheet which are available from JARL HQ for two IRC and SAE. (Summary and Log are available as "PDF files" from the JARL Web site)
(1) Each Summary sheet must include your DXCC entity, callsign used, entry class, multipliers by band, points by band and total score. It should also include a signed declaration indicating that you have observed the rules and regulations of the contest. Multi-Operator stations must submit a list of all operators call-sign or name.
(2) Log sheet must contain band, date, time in UTC, call of station worked, exchange sent, exchange received, multipliers and QSO points. Use a separate sheet for each band.(For Single Transmitter entry:in order of the time contacted). Multipliers should be clearly marked by entities or Asian prefixes, first time worked on each band.
(3) E-mail submission
   JARL Format   or   Cabrillo Format.
11. AWARDS:
(1) For both CW and Phone, certificates will be awarded to those having the highest score in each category in proportion to the number of participants from each entity and also those from US CQ Zone 3, 4, and 5 in the United States.
a: If the number of participants are under 10 there will be an Award only to the highest scorer
b: From 11 to 20 ..... Awards to the highest scorer and the runner-up
c: From 21 to 30 ..... Awards to the top three
d: 31 or more ..... Awards to the top five
(2) The highest scorer among JARL members of each category in each area of Japan, under the condition having a ranking within top half, will receive a certificate from JARL. However,this rule doesn't apply to those who received the highest scorer of the entity certificate.
(3) The highest scorer on each Continent of the Single Operator Multi Band category will

receive a medal from JARL and a certificate from the Minister for Internal Affairs and Communications, Japan.
(4) The highest scorer of the Multi-Operator Single Transmitter and Multi Transmitter category on each Continent will receive a medal from JARL.
(5) Special plaques will be awarded to the stations in the categories mentioned in a separate page.

(6) The Contest Award will be issued to whom fulfill the certain requirements during the contest period. The detailed information will be appeared in a separate page.
12. REPORTING:
(1) Submit a summary sheet and logs of only one entry classification. E-mail submission will be welcomed.
(2) The log and summary should be postmarked by the following dates, addressed to:
JARL, All Asian DX Contest, 170-8073, Japan
Indicate CW or Phone on the envelope.
E-mail submissions to:
a: CW.....aacw@jarl.or.jp
b: Phone.....aaph@...
Deadlines for submissions:
a: CW.....July 31, 2011
b: Phone.....October 31, 2011
13. DISQUALIFICATIONS:
(1) Taking points for duplicate contact on the same band in excess of 2% of the total.
(2) False statements in the report.
(3) Violations of the contest rules.
14.ANNOUNCEMENT OF RESULTS:
Results will be published in the Spring, 2012 issue of JARL News and also will be appeared on JARL's web site (http://www.jarl.or.jp).
For those wishing to receive contest results by post, please enclose two IRC with your log.

http://www.ure.es/contest/431-sm-el-rey-contest-english-version.html

His Majesty The King of Spain Contest
Sponsored by Unión de Radioaficionados Españoles (URE).
Participants: Any licensed amateur station.
Dates: CW: 3rd full weekend of May, from 1200 UTC Saturday till 1200 UTC Sunday (May 19-20, 2012).
SSB: 4th full weekend of June, from 1200 UTC Saturday till 1200 UTC Sunday (June 23-24, 2012).
Bands: 10, 15, 20, 40, 80 and 160 meters, according the IARU Region 1 band plan.
CW: 1810-1838, 3500-3560, 7000-7025, 14000-14060, 21000-21080, 28005-28050.
SSB: 1840-2000, 3600-3650, 3700-3800, 7060-7100, 7130-7175, 14125-14300, 21151-21450, 28225-29200.
Classes:
1) SOAB EA - Single Operator All Band EA.
2) SOSB EA - Single Operator Single Band EA. (Only one band will be worked along the contest).
3) SOAB DX - Single Operator All Band DX.
4) SOSB DX -Single Operator Single Band DX. (Only one band will be worked along the contest).
5) MOEA - Multi-Operator EA, only all band.
6) MODX – Multi-Operator DX, only all band.
NOTES:
a) The DX-cluster can be used in all classes but it is not allowed self-spotting.
b) Only one signal at the same time is allowed in all single operator classes.
c) Only one signal per band is allowed in multi-operator class.
Valid contacts: Any station can be contacted during the contest. Every station can be contacted once per band. Unique QSOs will not be valid for points nor multipliers.
Exchange: Spanish stations: RS(T) + Spanish Province letters (see below).
DX stations: RS(T) + QSO number starting with 001.
Multi-operator stations, if used multi TX, shall report separate serials per band starting with 001.
Points:
EA stations:
QSO with EA stations, 2 points.
QSO with DX stations, 1 point.
DX stations:
QSO with DX stations, 1 point.
QSO with EA stations, 3 points.
Multipliers: Each Spanish Province (52) and each EADX100 entity, except EA, EA6, EA8 and EA9, per band.
EADX100 entities are those of DXCC plus GM3-Shetland, JW-Bear, IT-Sicily and 4UVIC-ONU Vienna International Center.
Final score: Total QSO points by total number of multipliers of all bands.
Prizes:

EA: Trophy will be awarded to the top-scoring entrant in single operator multi-band and to the top-scoring entrant in multi-operator class.
Medal will be awarded to the high scoring entrants in single-band classes, if a minimum of five logs are received for that band.
Certificate will be awarded to stations with a minimum of 150 QSO in multi-band or 50 QSO in single-band classes. For obtaining trophy or medal this same criterion will be applied.
DX: Trophy will be awarded to the top-scoring entrant in single operator multi-band class and to the top-scoring entrant in multi-operator class with at least 150 QSO.
Medal will be awarded to the high scoring entrant in each single-band class with at least 50 QSO, if a minimum of five logs are received for that band.
Certificate will be awarded to the high scoring entrant in each EADX100 country in single operator multi-band class with at least 150 QSO.
Logs: Only logs in Cabrillo format. Paper logs will be not accepted.
Sending: Logs can be sent by e-mail as attached files without compressing them to:
smreycw@... (CW mode)
smreyssb@... (SSB mode)
In the "Subject" of the e-mail must be read "King of Spain log from (your callsign)".
Your output file should be named by your callsign (i.e. EA4URE.LOG)
Computer disks must be sent to: URE-Concursos HF, P.O. Box 220, 28080 Madrid, Spain.
Closing date: Logs must be received by:
CW, June 10.
SSB, July 15.
Logs lately received will not be considered.
Your comments and anecdotes will be wellcome.

http://www.arifano.it/Contest_Marconi.htm#Go to Rules (English)

The XVI Marconi Memorial Contest HF CW 2012
* Aim: The Marconi Memorial contest HF commemorates the II Century of Radio and its father: Guglielmo Marconi. It's a World-Wide competition: everybody can work everybody, only CW.
* Date and Time: Every IV full week-end of June from 14.00 UTC Saturday till 14.00 UTC Sunday. In 2012 it will be on 23-24 June.
* Classes: 1) Single Operator; 2) Multi Operator. Subclasses of class 1: L) Low Power (max 100 watt out); Q) QRP (max 5 watt out). The operators L and Q in the class 1 will be marked and awarded.
* Bands and Mode: Only CW, 10 m thru 160 m (except WARC bands) are allowed according to IARU Band Plans. The band can be changed only after 10 minutes you have been on it. The 10 minutes count starts from the first QSO made on that band
* Exchange: The stations send RST + a serial number from 001.
* QSO/Points: Each verifiable QSO count 1 point.
* Multipliers: All CQWW countries count 1 multiplier. The same multipliers can be counted once for band.
* Final Score: The sum of QSO/Point from all bands multiplied by the sum of multipliers from all bands.
* Log and summary sheet: Standard Logs are necessary. A summary sheet is required showing all the QSO details on each band, class of entry, power, name, call sign, full address of the applicant, call sign of the operators and a signed declaration. You can apply for the log to: Download Log ; Summary. Logs must be mailed within 30 days from the end of the contest and addressed to: A.R.I. Associazione Radioamatori Italiani sezione di Fano P.O. Box 35 Uff. P.T. via Garibaldi I-61032 Fano (PU) Italy, or via E-mail standard log CABRILLO to contest.marconi@... .
* Penalties and disqualification: Penalties and disqualifications will be applied for violation of the contest rules. Each decision of the Contest Committee will be final.
* Award: A Plaque will be awarded to the No. 1 top scoring station in each Class and Subclass. A certificate will be awarded to No. 2, 3, 4, 5 top scoring in each class.
* Sito web: http://www.arifano.it
The President ARI Fano
IK6NTY Sandro Magrini

Om Erwin Komalaa baru saja dari QTH saya.. Saya sudah berhasil install kan logger 32 di laptop nya om Erwin dgn windows 7 nya.

Om annes masuk ke:

www.logger32.net

Trus click : Program File

Trus click gmbr comp biru yg kecil yg ada tulisan nya version 3.40.19 new

Nah click di sana lalu save dulu di drive C atau D.. Computer / laptop anda.

Silahkan mencoba...

Saat saya menulis email ini ,
saya sedang mendengarkan di 7.100
suaranya riuh rendah...
ramai sekali, memang betul kata orang sono, sperti "karapan kuda"
bukan karapan sapi, hi...
akhirnya saya enjoy aja,.....
kasihan.....
mereka butuh peledakan emosi kegembiraan...
mengeluarkan emosi gengsi.....

kasihan memang ....
memang betul "seratus tapi masih kurang satu"

sungguh kasihan.....
mesakno.......
hikzzzzz .... (trenyuh .....)

salam
seno, yb2lsr

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 27th-May, through Sunday, 3rd-June there were 227 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T32, T5, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
8Q, MALDIVES
Juergen, OE4JHW, reports that he will do a suitcase DX- pedition to Kuredu Island between September 2-4th. More details will be forthcoming soon.
A5, BHUTAN
The members of the FGC DX Group (Foundation for Global Children) will continue to be active as A5A from a mountain area in Bhutan until June 6th. The ClubLog shows as of 0851z, June 3rd, the A5A team has made 28113 QSOs with 12290 unique callsigns (14883/CW and 13280/SSB). Breakdown is: 187/AF, 5147/AS, 18093/EU, 4327/NA, 163/OC and 196/SA. QSL A5A via JH1AJT (see Web page for details). For more details and update, visit the A5A Web apge at: http://bhutan2012.com/index.php
A6, UNITED ARAB EMIRATES
Ulli, DL9WVM, will once again be active as A6/DL9WVM from Dubai between June 10-30th. Activity will be on 80-10 meters. He informs OPDX that any SKED requests can be arranged via SKYPE (account 'dl9wvm'). Ulli states that he is working remotely from Dubai for his

company in Berlin and sits the whole day 'beside' his equipment. QSL via LoTW, or via his home callsign, direct or by the Bureau. Meanwhile, Ulli mentions that his friend Tom/DL2RMC is also active from Abu Dhabi which started around May 29th, and he will be there for 3 weeks depending on his job in UAE. Callsign is A6/DL2RMC and his license has already been issued.
CONTEST CHART CORRECTION
Please note that in OPDX. 1063 the "NG3K CQWW WPX CW Contest chart" listed VK9PN as Norfolk Island. This is incorrect and should be Lowe Island.
CS, PORTUGAL
Members of the Amateur Radio Association of the District of Leiria (ARAL) will activate CS5FAT from its facilities in the Cova da Iria at the Shrine of Fatima between June 10-13th. Activity will be on the HF, VHF and UHF bands. QSL via CT6ARL, direct or by the Bureau. Amateur radio operators are invited to operate from the Shrine of Fatima between now and October on the dates 10, 11, 12 and 13 of every month or such other dates of amateur radio convenience by appointment. For more details, see(QRZ.com) or the Blog page: http://cs5fat.blogspot.pt
CY9, ST. PAUL ISLAND (Press Release #2)
On May 25th, the CY9M team reports:
"Time is flying! Two months today the CY9M team will be making their way to Sydney, Nova Scotia, then onwards to the northernmost tip of Cape Breton, ready to depart for St Paul island on July 26th.
>Much has happened since the first press release in February. Those who keep an eye on the CY9M Web site will note major organizations such as Northern California DX Foundation
>http://www.ncdxf.organd ARRL Colvin Awardhttp://www.ncdxf.orghave agreed to financially back our plans. Together, with all other kind donors and clubs, we thank them sincerely.
>The team makes special mention to Al, VE1AL, for his local logistical help. His ongoing assistance is much appreciated.
>Meanwhile, the last few weeks has seen a host of sponsors commit to the expedition.
>Elecraft, main equipment sponsor of our expedition, is providing six K3 transceivers. We are indebted to Elecraft for their support.
>DX Engineering, Tigertronics, Waters & Stanton, Heil Sound, Spiderbeam, RF Power and Vibroplex have shown faith in our activation by generously supporting too.
>G3TXQ Broadband Hexbeam by MW0JZE is providing the team with three antennas. Using both Hexbeams and vertical arrays, we hope to be heard from the island! M2 Antenna Systems are also contributing with a 50 MHz yagi/beam we know how wanted St Paul island is on 6m and cross fingers for good openings.
>As mentioned previously, there are few landing spots on the island. Actual station location will be determined where we land. From planning discussions, we know each proposed location has positives and negatives to certain regions around the globe therefore this is very much an "on the day" set-up at any given landing spot.
>Now the shipping process begins.
>If you would like to donate any amount to the CY9M St Paul Island Dxpedition, please click here:
>http://www.cy9m.com/donorFeel free to follow us on Twitterhttps://twitter.com/#!/CY9Mand Facebookhttp://www.facebook.com/CY9M.2012- nearer the time of departure (and afterwards) various team members will update as we journey.
>Thanks for taking the time to read and share we look forward to working you from DXCC Most Wanted entity #40.
>73, CY9M Team, St Paul Island DXpedition."CY0, SABLE ISLAND (QRT)
Alan, VE1AWW, reported on May 28th:
"Very bad news. Sable Island is a Migratory Bird Sanctuary. Yesterday, a migratory bird

(and protected species) was found near my towers with injuries suggesting a collision with one of the towers. I am required to take down the towers until an investigation and policy can be developed for tern season (April-August). Very disappointing for sure. CY0/VE1AWW QRT . . . ."DXER ARRESTED ON ESPIONAGE!
Several sources are reporting that well-known DXer/World-Traveller Baldur, DJ6SI, who has been active from all over the world from 70 countries, was arrested on the Island of Kos while operating as SV5/DS6SI. He was there on holiday with his XYL. Many Greek amateurs are pretty upset and embarrassed over this event. It is also reported that Baldur is back in Germany, but is scheduled to return for a trial day. Here are a few Web pages about the in cident:http://sv2dcd.blogspot.de/2012/05/what-shame-for-greek-authorities.htmlhttp://sv8cs .blogspot.co.uk/2012/05/sv5dj6si-arrested-as-spy-incredible.htmlhttp://sv5byr.blogspot.co. uk/2012/05/that-can-happened-only-at-greece.htmlhttp://dx-world.net/2012/sv5-dj6si-arreste d-on-espionagehttp://yo4px.blogspot.com
EH8, SPAIN (Special Park Op)
Members of the Grupo DX Teide will once again activate the Teide Volcano, the highest point in Spain, between June 30th and July 2nd. Last operation was in 2007 using the callsign AN8TID. To commemorate their 5th anniversary of that operation, and the Teide National Park being added to the UNESCO World Heritage List, the team will be active as EH8TID this time. Operations will take place from the same location as last time: the La Rambleta del Teide, 3555m ASL, and less than 163m from the top of the mountain. The area is highly protected, and therefore; they are only authorized to use vertical and wire antennas and only 100 watts.
Operators mentioned are José Antonio/EA8ARG, Luis/EA8AY, Ángel/EA8BFH, Miguel Ángel/EA8BRW, and Francisco/EA8CW. Activity will be on 80-6 meters using CW, SSB, RTTY and PSK31. QSL via EA8NQ. A special certificate will be provided _upon request_ to whom made at least three contacts on different bands and/or modes. The certificate will be sent free by E-mail as a printable image or PDF. Those who want a printed certificate must send 5.00 Euros, 6.00 USAs or 5 IRC to cover printing and shipping expenses. For more details, see their Web page at:
http://www.eh8tid.tk
FO, FRENCH POLYNESIA (IOTA Op)
Just a reminder that Pat, F4EBT, is now active as FO/F4EBT until June 24th, and plans to activate the following French Polynesia IOTA Islands: Tahiti (OC-046), Moorea (OC-046), Raiatea (OC-067), Huaine (OC-067), Bora-Bora (OC-067) and Maupiti (OC-067). Activity will be holiday style, usually SSB only on 80/40/20/17/15/12/10 meters using a TS-50 w/100 watts into a FD4 Multiband antenna. QSL via his home callsign, direct (1 IRC or 2 USDs) or by the Bureau.
FO/M, MARQUESAS ISLANDS
Christian, F5IDM, a member of a scientific expedition to observe the Venus Transit, will be active as TX5VT between June 3-12th. He plans to activate the following islands in the Marquesas Island group (OC-027): Hiva Oa (DIFO FO-021, WLOTA 1233), Nuku Hiva (DIFO FO-023, WLOTA 2030), Ua Huka (DIFO FO-026) and Ua Pou (DIFO FO-027). QSL via F5IDM (KH6 Bureau or direct, see (QRZ.com)). For more details, see:
http://www.cveillet.net/PF/TX5VT.php
GB0, ENGLAND (Special Event)
Look for GB0AFD (Armed Forces Day) to be active on Sunday, July 1st, to commemorate the UK's Armed Forces Day with the local Veterans Association. The large event will be held in Alexandra Park Hastings Sussex together with all local associations. They hope that many ex-Servicemen Operators from RNARS, RAFARS and the Royal Signals Association will give them a call and help build up interest for the general public attending the event. Their intended operating bands will be on 80/40/20/30 meters using SSB or CW or PSK31. Depending

on conditions other bands may be tried. They will have a Linear 300/400W using wire dipoles; they will also monitor 2m and 6m CW or SSB. Their times of operations are from 10:00 am until 16:00 pm. They would welcome any schedules -- just contact Tony, G4KLF, QTHr.

HC, ECUADOR

Dr. Rick, NE8Z/HC1MD, will once again be active from here. Look for HC1MD from Tumbaco between June 7-14th and July 21-31st. Activity will be on 40-10 meters operating CW, SSB and RTTY, using a TS-850s w/SB-200 and a Carolina Windom. He will also be on 6 meters CW/SSB, monitoring 50.110 MHz using a FT-857D w/100w into a Moxon Antenna. QSL via K8LJG. View the HC/Ecuador and HC8/Galapagos DX-Diplomas at:

http://webpages.charter.net/ne8z

IOTA NEWS

AS-061/

AS-092. (Update) "DX-World.net" is reporting members of the Russian Robinson Club will be active as RI0K from Ratmonova Island (AS-061, Big Diomede Island) and Alyumka Island (AS-092, in the Chukotka Autonomous Region) between July 15th and August 28th. These are very rare IOTAs.

AS-066. Vladimir "Vlado", UA0LCZ, will be active as RI0NZ from Popov Island between July 24-30th. QSL via his home callsign, by the Bureau or direct.

AS-154. (CANCELLED) A team of Hungarian and Turkish operators were expected to activate Giresun Island between July 24th and August 1st. Hungarian Radio Amateurs were not granted per- mission to operate.

EU-029. Alain, F5LMJ, will be active as 5P5J from Lolland Island between July 14-28th. QSL via LoTW or eQSL, or his home callsign by the Bureau.

EU-158. Operators Mike/SV1RK and Stavros/SV3CJU will once again be active from Sapienza Island (LH GRE116, WLOTA 1471, WW LOC KM06US) after 7 years as J48SAI between June 8-10th. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. QSL via LoTW or via SV1RK, by the Bureau or direct.

NA-039. Jeff, KL2HD, is currently staying on Adak Island until June 8th. He is a biologist and studies wildlife in the Aleutian Islands of Alaska in the summer and occasionally runs his rig from Adak Island where his summer office is located. He also spends most of the summer on a research ship, the M/V Tiglax, traveling the Aleutians and will someday try maritime mobile operation. Watch for activity on 20/17 meters SSB between 0400-0800z. QSL via LoTW (preferred), direct or by the Bureau. Check out his QRZ.com page for an online log and pictures.

OC-177. Look for 30 operators to be active as YE0M from Kaliage Besar Island (Seribu Islands) between July 6-9th. Activity will be on 160-2 meters using CW, SSB and RTTY. Operators mentioned are YB0AA, YB0AZ, YB0HD, YB0JS, YE0YE, YB0AKM, YB0BUI, YB0ECT, YB0KVN, YC0KVM, YC0LOW, YC0LLY, YC0MXV, YC0RAN, YC0TSU, YC0VKI, YD0RVT, YB1PR, YB1MH, YB1CCF, YB1GJS, YB1KAR, YC1CDV, YC1KAF, YD1JZ, YD1GCL, YD1LUX, YD1MRI, YD1ORZ and YD1XUH.QSL via YB1GJS.

SA-012/

SA-035. Operators Alex/UA9YAB and Alex/UA9YPS will be active as from Margarita Island (pfx YV7 and SA-012) and Los Roques Islands (pfx YV5 and SA-035) between August 2-9th. Signing YV7/homecall and YV5/homecall, activity will be on the HF bands. QSL via their home callsigns.

SA-029. (Update) Operators Marcelo/PY1MT, Moreira/PU1MMZ, Mauricio/ PU1SET, Jose/PY1MX and Jair/PY1HS will be active as ZV1M from Itacuruca Island (DIB RJ-08), Rio de Janeiro State, Brazil, between July 27-29th. Activity will include the RSGB IOTA Contest (July 28-29th). Operations will be on 80/40/ 20/15/10 meters using CW and SSB. QSL via PY1MT, direct only with SASE/SAE + 2 USDs (no IRC). Their Web site is available at:

http://www.casadoradioamador.blogspot.com
II9, ITALY (Special Event)
Members of the Italia ARAS (Amateur Radio Society - http://www.arasitalia.org) of Pedara, Catania, and the ARI (Associazione Radioamatori Italiani - http://www.ari.it), will activate special event station II9AS to remember the 40° anniversary of first flight of the famous Anti-Submarine Aircraft employed by NATO, Breuget BR 1150 "Atlantic" between June 6-9th. Operators mentioned are Marco/IT9JPW, Michele/IW9HPW and some other IT9 operators. Look for the ARI team to be active from the Air Base Station of Sigonella in Catania between 0600-1800z on June 9th. Activity will be on 40-10 meters using CW and SSB, and operating a couple of stations. A special QSL card will be available via IT9JPW.
J3, GRENADA (Op Cancelled!)
Harry, AC8G (J37K), who was planning a 6 night stay in Grenada for the CQ WW SSB Contest (Oct. 27-28th), has announced that American Air has cancelled his flight to Grenada. Other dates are not acceptable, so he cancelled the operation.

Mike, W2GR, will be on the air with the special callsign N2W between June 10-24th. The callsign N2W will be on the air during the week before and the week after Nik Wallenda tries to or becomes the first person in history to walk directly over Niagara Falls on a tightrope. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via W2GR CBA. The walk will be broadcast live worldwide on ABC on Friday, June 15th, 2012.
PJ4, BONAIRE
By the time you read this, Bill, K9HZ, should be active as PJ4HZ from Kralendijk, Bonaire (SA-006, WLOTA LH-1279), until June 10th. QSL via his home callsign.
PJ7, SINT MAARTEN (2013 Op!)
Randy, N0TG, has announced a real early 2013 operation to Sint Maarten (NA-105, WLOTA 383, DIFO FS-001) between March 15-23rd. He states that they have the facility arranged, tickets, etc. So, look for Randy/N0TG, Ron/AA4VK and Jeff/N1SNB to sign PJ7/homecall next year. Activity will probably be on all bands and modes. QSL "all" callsigns via N0TG.
PT7, BRAZIL (Contest/Lighthouse Op)
Members of the GPDX-CE (Portuguese DX Group Ceará) will be active as PT7ZT/p from the Paracurú Lighthouse (BRA-276, DFB and DFCE EC-09) in the Municipality of PARACURU between June 8-10th. The Lighthouse of Paracuru is about 115km from the capital Fortaleza. The team plans to participate in the Portugal Day Contest (June 9-10th). They will use a FT 890AT with a GP20 Vertical Dipole and Window Tagra antenna. QSL via the home callsign, direct or by the Bureau.

R1150, EUROPEAN RUSSIA (Special Event)
Look for club station RK3VWA to operate with the special callsign R1150V between now and August 31st. Activity is to celebrate the 1150th anniversary of the birth of the Russian statehood. Additional information about days of activities and other events will be published on the Web site:
http://www.r3v.ru
SILENT KEY
It has been reported that Bill Wells, VK4UA, become a Silent Key (SK) on May 30th, having turned 89 earlier in May 2012. He came from Victoria and his interest in radio began as a 14 year old when he built his first radio receiver. Bill served in the RAAF from 1942-46 and was licensed for 65 years. OPDX and its readers would like to send out our deepest sympathy to the family and friends of VK4UA.
TK, CORSICA (EU-014)
Alex, IW5ELA, will be active as TK/IW5ELA from Calvi between June 6-9th. Activity will be

on 40/20/15/12 meters and mainly on CW. He will use a FT857 w/100w into a vertical antenna. QSL via his home callsign.
V8, BRUNEI (Update)
Members of the Gemilang Amamteur Radio Club (GEMILANG Radio) and the Mediterraneo DX Club will team-up and sponsor/plan another DXpedition, this time to Brunei (OC-088). The multi-national team (90% of the team operated during the 9N7MD DXpedition) will be active as V84SMD between November 13-22nd. Activity will be on 160-10 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. They plan to have 15 to 18 operators with 4 to 5 stations on the air 24 hours.
Suggested frequencies are:
CW - 1826.5, 3505, 7005, 10105, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 1840, 3799, 7080, 14200, 18145, 21295, 24950 and 28470 kHz
RTTY - 3600, 7040, 10140, 14085, 18100, 21080, 24930 and 28085 khz
Their equipment will be three Icom 7000s, Icom 7200 and a Elecraft K2. Antennas will be 2 Spiderbeam (5 bands), 80m vertical full size, inverted L for 160m, vertical for 40m, vertical dipole for 30m and beverages for receiving. The current operators mentioned are Norbert/DJ2JC, Heye/DJ9RR, Henri/F1HRE, Michel/F5EOT, Jean-Luc/F6BIV, Gabriele/I2VGW (Team Co-leader), Francesco/I2DMI, Bob/I2WIJ, Pino/I8YGZ (Techical Supervisor), Fabio/IK2LTR, Marco/IZ2GNQ, Dario/IT9ZZO (Physician), Fabrizio/IZ2KXC, Ant/IZ8CCW (Team leader), Eric/ON7RN, UZ2HKC, Lan/V85AVE, Nizam/V85AX, Ayub/V85TX (Logistic Supervisor) and Adhi/YB3MM. Pilot stations are Pino/IZ8BGY (AS/EU/OC) and Don/N1DG (NA/SA). QSL via IK2VUC, direct, by the Bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. The V84SMD Web page is now online at:

2690. Bls: [YBDXC_News] HB9CV Beam Aerial 9.8.1981

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-04 02:50:50 UTC
From: hendro s.joedho
Topic: 2620 Message: 2690

OM Toni,
Kira2 sama gak dengan yang dari internet ini tapi dalam bahasa perancis dan ini dimensi untuk 15M band saja.

73,
yc0qr

Antenne HB9CV pour la bande
15m

retour au menu : Les antennes
décamétriques,Les
antennes pour THFVoir aussi : L'antenne
HB9CV -

L'intérêt de réaliser une antenne HB9CV plutôt qu'une beam 3 éléments monobande peut être :
- encombrement plus faible car boom trois
fois plus court.
- coût plus faible (2 éléments au lieu de 3)
- plus
faible prise au vent.
En contrepartie :
- réalisation plus compliquée à
cause de la ligne
- plus grande fragilité

Matériel

- D et R : tube AG3
diamètre 26x30
- D' et R' : tube AG3 diamètre 21x25
- S :
boom en tube rectangulaire 40x25 en acier
- Pattes en plat 50x4 en
acier
- L1 et L2 : Lignes en fil de cuivre 4 mm²
- E : tube PVC pour entretoises
- C : colliers Serflex en inox
- U : brides en U et visserie en inox
- boîte de dérivation 100x100
genre Plexo pour abriter le CV
- CV ajustable 200 pF
- tôle AG5 ép. 3mm
pour réalisation des curseurs

Réalisation

Le support S est en acier soudé à l'arc et peint.
J'ai utilisé avec satisfaction de la peinture à deux composants pour automobile sur un apprêt antirouille. Les pattes en acier ont une longueur de 20cm. Si l'on n'est pas sûr de réaliser l'étanchéité complète du tube support il vaut mieux percer un trou de diamètre 6 mm au point bas pour l'évacuation des éventuels condensats.
Les entretoises E peuvent être découpée dans du tube de PVC et pliées à chaud.
Les extrémités de chaque lignes sont reliées au tube à l'aide d'un curseur, entretoise en aluminium que l'on fera coulisser pour ajuster les réglages.
Le CV ajustable et l'extrémité du câble coaxial sont abrités dans une boîte de dérivation étanche en plastique "Plexo" de 100x100mm. L'axe du CV (fendu pour une lame de tournevis) est positionné en face d'un trou amorcé dans un presse-étoupe ou face au couvercle.

Réglages et résultats

Le mieux est de prérégler l'antenne au sol à une hauteur de 2 m au minimum pour n'avoir qu'à retoucher le CV une fois en place sur le mât.
La procédure de réglage est sommairement décrite dans la description de l'antenne HB9CV. On procédera par retouches successives séparée par une mesure complète de l'impédance ou du ROS.
L'appareil de mesure idéal est l'impédancemètre MFJ ou un pont de bruit associé à un récepteur à couverture générale (ou du moins couvrant 500 kHz de part et d'autre de la bande 15m). A défaut on pourra utiliser un grid-dip pour vérifier la fréquence de résonance ou un émetteur et un ROS-mètre.
La courbe de ROS ou d'impédance en fonction de la fréquence permet de vérifier le centrage de la bande passante par rapport à la fréquence souhaitée. après cela il suffit de raccourcir ou rallonger les deux éléments de façon symétrique proportionnellement à l'écart de fréquence.
L'ajustement de l'impédance (50+j0) se fait en jouant d'abord sur le CV puis sur la longueur des lignes (en déplaçant de façon identique les curseurs) si cela est nécessaire.

Antenne HB9CV pour la bande
15m

retour au menu : Les antennes
décamétriques,Les
antennes pour THFVoir aussi : L'antenne
HB9CV -

L'intérêt de réaliser une antenne HB9CV plutôt qu'une beam 3 éléments monobande peut être :
- encombrement plus faible car boom trois
fois plus court.
- coût plus faible (2 éléments au lieu de 3)
- plus
faible prise au vent.
En contrepartie :
- réalisation plus compliquée à
cause de la ligne
- plus grande fragilité

Matériel

- D et R : tube AG3
diamètre 26x30
- D' et R' : tube AG3 diamètre 21x25
- S :
boom en tube rectangulaire 40x25 en acier
- Pattes en plat 50x4 en
acier
- L1 et L2 : Lignes en fil de cuivre 4 mm²
- E : tube PVC pour entretoises
- C : colliers Serflex en inox
- U : brides en U et visserie en inox
- boîte de dérivation 100x100
genre Plexo pour abriter le CV
- CV ajustable 200 pF
- tôle AG5 ép. 3mm
pour réalisation des curseurs

Réalisation

Le support S est en acier soudé à l'arc et peint.
J'ai utilisé avec satisfaction de la peinture à deux composants pour automobile
sur un apprêt antirouille. Les pattes en acier ont une longueur de 20cm. Si l'on
n'est pas sûr de réaliser l'étanchéité complète du tube support il vaut mieux
percer un trou de diamètre 6 mm au point bas pour l'évacuation des éventuels
condensats.
Les entretoises E peuvent être découpée dans du tube de PVC et
pliées à chaud.

Les extrémités de chaque lignes sont reliées au tube à l'aide
d'un curseur, entretoise en aluminium que l'on fera coulisser pour ajuster les
réglages.
Le CV ajustable et l'extrémité du câble coaxial sont abrités dans
une boîte de dérivation étanche en plastique "Plexo" de 100x100mm. L'axe du CV
(fendu pour une lame de tournevis) est positionné en face d'un trou amorcé dans
un presse-étoupe ou face au couvercle.

Réglages et
résultats

Le mieux est de prérégler l'antenne au sol à une hauteur de
2 m au minimum pour n'avoir qu'à retoucher le CV une fois en place sur le
mât.
La procédure de réglage est sommairement décrite dans la description
de l'antenne HB9CV. On procédera par retouches successives séparée par une
mesure complète de l'impédance ou du ROS.
L'appareil
de mesure idéal est l'impédancemètre
MFJ ou un pont de bruit associé à un récepteur à couverture générale (ou du
moins couvrant 500 kHz de part et d'autre de la bande 15m). A défaut on pourra
utiliser un grid-dip pour vérifier la fréquence de résonance ou un émetteur et un
ROS-mètre.
La
courbe de ROS ou d'impédance en fonction de la fréquence permet de vérifier le
centrage de la bande passante par rapport à la fréquence souhaitée. après cela
il suffit de raccourcir ou rallonger les deux éléments de façon symétrique
proportionnellement à l'écart de fréquence.
L'ajustement de l'impédance
(50+j0) se fait en jouant d'abord sur le CV puis sur la longueur des lignes (en
déplaçant de façon identique les curseurs) si cela est nécessaire.

All,

☐Perasaan☐ sy bilang: HB9CV = ZL-special utk HF

Kalo☐ ya, ini kan = 2 dipole yg di phased-fed bareng-bareng .

☐Perasaan☐ sy juga bilang, kalo☐ sama-sama 2 dipole dan sama-sama full size, buat lahan pas-pasan kaya☐nya mending pake MOXON yg footprintnya jauh lbh ☐bemat-lahan☐, ya nggaak !?

Feeding-nya juga ☐nggak ribet lageee .

[☐perasaan☐ sy jg bilang:

1. HB9CV n Moxon ini mending dipertimbangkan HANYA kalo☐ lagi kepikir utk ☐ngeksperimen dg low-band HF, ketimbang utk di hi-bandnya]

2. Utk di hi-band, mending cari rancangan yg pada dasarnya sdh 3-2 elemen .]

[bam]

Subject: e-QSP Vol. I -edisi KHUSUS, MEI 2012

Dear All,

Mohon maaf ….
Diuber bagaimanapun, nyatanya yg namanya edisi KHUSUS bln Mei 2012 terlampir baru bisa dirilis hari ini, Sabtu 2 juni 2012.
Sekedar sbg alasan pemaaf, ini krn Penyunting mencoba meliput secara utuh penerbangan pesawat kargo DRAGON yg men-suplai lojistik bagi 6 (enam) orang AMATIR RADIO dari berbagai kebangsaan (AS, Russia, Belanda) yg meng-awak-i Expedition 31 di setasiun angkasa antarbangsa ISS.
Dragon berangkat meninggalkan Tg Kennedy (Cape Canaveral), FLA pada Selasa 22/05-2012 , dan kembali ke bumi dengan selamat pada hari Jum’at pagi 1 JUNI 2012, yang sebenarnya sudah melewati hari batas tayang bagi sebuah publikasi yg bertajuk “edisi KHUSUS bln Mei 2012”

Konten lain adalah:

+ Pengukuhan DPP & Pengurus ORPUS Masa Bakti 2011-2016
+ Adab ber-REPEATER-ria
+ Mem-biksen BALUN dengan bermacam ratio ..

Dan, yg unik dr edisi ini, ini adalah untuk pertama kalinya (sejak era BeON) kalawarti elektronik ini keluar dengan 10 halaman !!!

Selamat membaca, PSE QSL, and as always: pse ENJOY ….!!!

Lagi2 akibat nyontek.
CT5GOQ salah tangkap/dengar atau dia juga nyontek dari spot di cluster sebelumnya, sebenarnya dia QSO dengan P29FR - setelah itu dia spotting di dxwatch, dibaca dan diikuti lagi kesalahannya oleh IT9TFX.

Mungkin juga spellnya yg salah, HI HI : Vava 2 Nine Foxtrot Romeo, maksudnya P29FR ditulis V2NFR.
Pas akan QSLing, lihat data di QRZ.com di Antigua & Barbuda gak ada callsign itu.

salam dari yg lagi iseng,

OM Toni,
Kira2 sama gak dengan yang dari internet ini tapi dalam bahasa perancis dan ini dimensi untuk 15M band saja.

73,
yc0qr

Antenne HB9CV pour la bande 15m

retour au menu : Les antennes décamétriques, Les antennes pour THF
Voir aussi : L'antenne HB9CV -

L'intérêt de réaliser une antenne HB9CV plutôt qu'une beam 3 éléments monobande peut être :
- encombrement plus faible car boom trois fois plus court.
- coût plus faible (2 éléments au lieu de 3)
- plus faible prise au vent.
En contrepartie :
- réalisation plus compliquée à cause de la ligne
- plus grande fragilité

Matériel

- D et R : tube AG3 diamètre 26x30
- D' et R' : tube AG3 diamètre 21x25
- S : boom en tube rectangulaire 40x25 en acier
- Pattes en plat 50x4 en acier
- L1 et L2 : Lignes en fil de cuivre 4 mm²
- E : tube PVC pour entretoises
- C : colliers Serflex en inox
- U : brides en U et visserie en inox
- boîte de dérivation 100x100 genre Plexo pour abriter le CV
- CV ajustable 200 pF
- tôle AG5 ép. 3mm pour réalisation des curseurs

Réalisation

Le support S est en acier soudé à l'arc et peint. J'ai utilisé avec satisfaction de la peinture à deux composants pour automobile sur un apprêt antirouille. Les pattes en acier ont une longueur de 20cm. Si l'on n'est pas sûr de réaliser l'étanchéité complète du tube support il vaut mieux percer un trou de diamètre 6 mm au point bas pour l'évacuation des

éventuels condensats.
Les entretoises E peuvent être découpée dans du tube de PVC et pliées à chaud.
Les extrémités de chaque lignes sont reliées au tube à l'aide d'un curseur, entretoise en aluminium que l'on fera coulisser pour ajuster les réglages.
Le CV ajustable et l'extrémité du câble coaxial sont abrités dans une boîte de dérivation étanche en plastique "Plexo" de 100x100mm. L'axe du CV (fendu pour une lame de tournevis) est positionné en face d'un trou amorcé dans un presse-étoupe ou face au couvercle.

Réglages et résultats

Le mieux est de prérégler l'antenne au sol à une hauteur de 2 m au minimum pour n'avoir qu'à retoucher le CV une fois en place sur le mât.
La procédure de réglage est sommairement décrite dans la description de l'antenne HB9CV. On procédera par retouches successives séparée par une mesure complète de l'impédance ou du ROS.
L'appareil de mesure idéal est l'impédancemètre MFJ ou un pont de bruit associé à un récepteur à couverture générale (ou du moins couvrant 500 kHz de part et d'autre de la bande 15m). A défaut on pourra utiliser un grid-dip pour vérifier la fréquence de résonance ou un émetteur et un ROS-mètre.
La courbe de ROS ou d'impédance en fonction de la fréquence permet de vérifier le centrage de la bande passante par rapport à la fréquence souhaitée. après cela il suffit de raccourcir ou rallonger les deux éléments de façon symétrique proportionnellement à l'écart de fréquence.
L'ajustement de l'impédance (50+j0) se fait en jouant d'abord sur le CV puis sur la longueur des lignes (en déplaçant de façon identique les curseurs) si cela est nécessaire.

Le mieux est de prérégler l'antenne au sol à une hauteur de 2 m au minimum pour n'avoir qu'à retoucher le CV une fois en place sur le mât.
La procédure de réglage est sommairement décrite dans la description de l'antenne HB9CV. On procédera par retouches successives séparée par une mesure complète de l'impédance ou du ROS.
L'appareil de mesure idéal est l'impédancemètre MFJ ou un pont de bruit associé à un récepteur à couverture générale (ou du moins couvrant 500 kHz de part et d'autre de la bande 15m). A défaut on pourra utiliser un grid-dip pour vérifier la fréquence de résonance ou un émetteur et un ROS-mètre.
La courbe de ROS ou d'impédance en fonction de la fréquence permet de vérifier le centrage de la bande passante par rapport à la fréquence souhaitée. après cela il suffit de raccourcir ou rallonger les deux éléments de façon symétrique proportionnellement à l'écart de fréquence.
L'ajustement de l'impédance (50+j0) se fait en jouant d'abord sur le CV puis sur la longueur des lignes (en déplaçant de façon identique les curseurs) si cela est nécessaire.

Tony Jonanta WJ YB2DI YBDXC#085

Skema Antenna dari Penciptanya langsung yg legendaris , Sebuah Antenna HB9CV di ambil dari nama Callsign nya. Saya dpt info dari YB2CR bahwa beliaunya kadang muncul saya nanti ber bulan2 Achirnya benar HB9CV muncul di 15 M saking ngototnya saya ber teriak2 This is Yengke Bravo Two Delta India From Indonesia...ber ulang2 hampir putus asa Atas kebaikan seorang Amatir radio saya dibantu dari JA land Achirnya bisa QSO dng beliau nya, Kesempatan ini tdk sia2 saya gunakan untuk minta Skema Antenna ,Sebuah DX yg memounyai kepuasan tersendiri termasuk dng sebuah Raja dari Yordania (tulisan menyusul) Antenna Hasilnya sdh saya coba sangat memuaskan (dari segi efesensi) bisa di VHF UHF HF Murah Meriah , mudah , simple Bagi yg yg berminat ..... Selamat mencoba

Lagi2 akibat nyontek.
CT5GOQ salah tangkap/dengar atau dia juga nyontek dari spot di cluster sebelumnya, sebenarnya dia QSO dengan P29FR - setelah itu dia spotting di dxwatch, dibaca dan diikuti lagi kesalahannya oleh IT9TFX.

Mungkin juga spellnya yg salah, HI HI : Vava 2 Nine Foxtrot Romeo, maksudnya P29FR ditulis V2NFR.
Pas akan QSLing, lihat data di QRZ.com di Antigua & Barbuda gak ada callsign itu.

salam dari yg lagi iseng,

Selamat pagi mbak Endang,

Alphabet/fonetik sudah hafal semua dari Alfa sampe Zulu dari Unaone sampe Nadazero, tapi lidah, dialek bawaan lahir, HI HI.
Ada teman saya yg pengucapan terbalik untuk huruf "P" dan "V/F", seperti kalo bilang VW dia akan bilang "Pe We" (ini banyak), yg parahnya kalo nyebut "Pool bus" = "Fool bus".

Banyak orang Jepang terbalik pada pengucapan huruf "L & R" - Ruaaarrrrr biasa, Seramat maram.

Kusus kasus (HI) tadi, saya juga agak bingung karena di band itu 10M sebenarnya yg ada VU2XO, sedangkan P29FR adanya di 15M.

Mungkin orek2an, kertas buremnya banyak catatan tumpang tindih - gak langsung ke logsheet/logbook.

"Mangkanya pake Logger32.......dong !!!" - kata OM Ndut.

Fatal, ya OM Mei...
Gimana dengan nomor polisi di mobil & motor sekarang ini, khan kebalik juga.
Yang ANGKA, karena dari dulu pakenya "O" yah diterusin begitu - tapi setelah dibelakang angka diperlukan tambahan huruf O (oscar), maka justru yg dipakein coretan itu justru yg HURUF.

Iya sih, bener juga masih banyak lidah yg suka kesrimpet.
Foxtrot jadi fostrot, K (key) dibaca Qi, Z jadi julu, J (jey) dibaca ji (G)... etc etc...

Dulu kalo aq masih suka jadi NCS, baik di Vhf maupun Hf, suka bingung nulis CS yg check in.
Log sheet jadi penuh coretan, karena telinga dan mulut ngga sinkron...

Salam,

OM Hendro..
Jadi kuncinya adalah : mengasah ketajaman pendengaran yaa.. Kalo pake logger 32 apalagi n1mm pas kontes lumayan bisa terdeteksi bila callsign itu sudah masuk dlm database..tapi tetap harus 'tajam' kupingnya..hi hi.. Mantappss..

OM Irsan,
Kontest adalah ajang lomba dimana operatornya sudah siap utk lomba tsb.

Kesiapan bisa berarti bahwa operatornya sudah paham & siap aturan mainnya, siap peralatannya (jangan sampai di tengah kegiatan jadi macet), siap waktunya.

Detilnya sbb:
Ttg peraturan kontest: paham akan lawan stasiunnya, yg mana yg boleh dan yg mana tdk boleh (jika pakai N1MM) maka akan lebih terbantu. Callsign Yg tdk bisa di entry berarti haram. Yg bisa dientry berarti halal. Yg berwarna merah berarti multiplier.. Dst.. Dst..

Ttg peralatan: komputer berikut software nya sudah running well (tinggalkan cara kuno dgn pena & kertas, karena ini event Kontest dgn pertukaran serial number, dgn date dan UTC yg harus akurat, bukan kirologi)

Ttg waktu, bisa saja kita tidak full krn diselingi dgn aktivitas keluarga, tetapi disaat kita di depan radio maka kita harus jeli ttg waktu dan tempat arah stasiun yg dituju yg propagasinya terbuka sehingga waktu yg tersedia (meskipun hanya 1 jam) maka kita bisa meraup QSO dgn maksimal.

Ttg kesiapan peralatan utk kontest, sebaiknya di coba satu atau dua hari sebelum pelaksanaan kontest sudah kita coba ber DXing (buka warung), sehingga jika ada kekurangan atau masalah yg ada pd mikropon, antena, PC dll bisa kita antisipasi segera.
Bahkan dgn uji coba H-2 kita sudah tahu Band yg mana saja yg terbuka sehingga kita tidak harus ikut pd kategori all band. Bisa fokus pd satu band yg terbuka saja.

Hal-hal Yang lain sih masih banyak..
Nanti bisa dilengkapi oleh teman2 yg lain..

Semoga sharing ini bermanfaat

Waduuuhhh..... kesindir nih sama OM Imam, selama ini yg namanya buka warung baru 3 kali - itupun gak lama juga.
Selama ini beraninya cuma S&P doang, habis dapat kabur sudah seperti sprint aja deh. ;))

Kalo pas kontes beneran saya justru lebih gak berani lagi kalo di YE0X, nanti malahan bikin malu, bikin pointnya kurang maksimal.
Harusnya ikut kontes beneran dulu dg CS sendiri dg resiko sendiri, kalo udah lancar baru saya ikut join di YE0X.
Kalo OM Irsan khan memang sudah sering buka warung, HI - sementara saya baru pada taraf pengamat di station YE0X beberapa waktu yll.

Nah ini saya setuju sekali.
Tapi saat ini saya baru sampai pada memanfaatkan calon peserta kontes 2-3 hari sebelum kontes berlangsung yg sudah mengudara.

Mungkin kecuali utk test antenna, cek propagasi, cek transceiver mereka juga memperkenalkan callsign yg biasanya CS khusus, sehingga pada saat kontes beberapa peserta lain sudah familiar dg CS-nya.
Ibarat tukang mancing, malam sebelum lomba mancing diadakan ada yg nyebar umpan yg besok akan digunakan, supaya ikannya kenal umpan yg enak dan aman. ;)

Saya sering dengar tuh yb0mwm, yb4ir buka warung...
Beberapa minggu yg lalu saat saya buka warung di 10m... Ketemu yb0mwm... Dulu waktu msh YC ketemunya om Uun... di 15m band. Kadang ketemu Tata YB0EIN...

Iya om Hen.. Gak apa biasakan buka warung.. Tidak akan ada yg meledek kita. Malah kawan2 membantu jika kita kesulitan mendengar.

Di YE0X om Hendro bisa ikut latihan DX contest.. Nanti akan di dampingi... Om Irsan sdh pernah di dampingi.. Bahkan om Irsan belajar mendengar dulu..

Kami di YE0X tdk pernah meledek siapapun yg mau belajar... Bahkan kami senang, jika bisa menciptakan mesin contest baru.

Dulu saya ikut dx contest pertama thn 2006... Di Grobogan cqwpx multi multi callsign YE2O... Bareng YB2DDT... Dan teman2 di lokal Grobogan.. Tidak ada yg meledek saya..

Pak Dragon malah mengajari bgm caranya menghadapi piled up..

Om Hen bisa gabung ke YE0X.. Tiap tahun pasti ikut cqww ssb contest...

Regards:

Ndut

Saya sering dengar tuh yb0mwm, yb4ir buka warung...
Beberapa minggu yg lalu saat saya buka warung di 10m... Ketemu yb0mwm... Dulu waktu msh YC ketemunya om Uun... di 15m band. Kadang ketemu Tata YB0EIN...

Iya om Hen.. Gak apa biasakan buka warung.. Tidak akan ada yg meledek kita. Malah kawan2 membantu jika kita kesulitan mendengar.

Di YE0X om Hendro bisa ikut latihan DX contest.. Nanti akan di dampingi... Om Irsan sdh pernah di dampingi.. Bahkan om Irsan belajar mendengar dulu..

Kami di YE0X tdk pernah meledek siapapun yg mau belajar... Bahkan kami senang, jika bisa menciptakan mesin contest baru.

Dulu saya ikut dx contest pertama thn 2006... Di Grobogan cqwpx multi multi callsign YE2O... Bareng YB2DDT... Dan teman2 di lokal Grobogan.. Tidak ada yg meledek saya..

Pak Dragon malah mengajari bgm caranya menghadapi piled up..

Om Hen bisa gabung ke YE0X.. Tiap tahun pasti ikut cqww ssb contest...

Regards:

Waduuuhhh..... kesindir nih sama OM Imam, selama ini yg namanya buka warung baru 3 kali - itupun gak lama juga.
Selama ini beraninya cuma S&P doang, habis dapat kabur sudah seperti sprint aja deh. ;))

Kalo pas kontes beneran saya justru lebih gak berani lagi kalo di YE0X, nanti malahan bikin malu, bikin pointnya kurang maksimal.
Harusnya ikut kontes beneran dulu dg CS sendiri dg resiko sendiri, kalo udah lancar baru saya ikut join di YE0X.
Kalo OM Irsan khan memang sudah sering buka warung, HI - sementara saya baru pada taraf pengamat di station YE0X beberapa waktu yll.

Nah ini saya setuju sekali.
Tapi saat ini saya baru sampai pada memanfaatkan calon peserta kontes 2-3 hari sebelum kontes berlangsung yg sudah mengudara.

Mungkin kecuali utk test antenna, cek propagasi, cek transceiver mereka juga memperkenalkan callsign yg biasanya CS khusus, sehingga pada saat kontes beberapa peserta lain sudah familiar dg CS-nya.
Ibarat tukang mancing, malam sebelum lomba mancing diadakan ada yg nyebar umpan yg besok akan digunakan, supaya ikannya kenal umpan yg enak dan aman. ;)

OM Irsan,
Kontest adalah ajang lomba dimana operatornya sudah siap utk lomba tsb.

Kesiapan bisa berarti bahwa operatornya sudah paham siap aturan mainnya, siap peralatannya (jangan sampai di tengah kegiatan jadi macet), siap waktunya.

Detilnya sbb:
Ttg peraturan kontest: paham akan lawan stasiunnya, yg mana yg boleh dan yg mana tdk boleh (jika pakai N1MM) maka akan lebih terbantu. Callsign Yg tdk bisa di entry berarti haram. Yg bisa dientry berarti halal. Yg berwarna merah berarti multiplier.. Dst.. Dst..

Ttg peralatan: komputer berikut software nya sudah running well (tinggalkan cara kuno dgn pena kertas, karena ini event Kontest dgn pertukaran serial number, dgn date dan UTC yg harus akurat, bukan kirologi)

Ttg waktu, bisa saja kita tidak full krn diselingi dgn aktivitas keluarga, tetapi disaat kita di depan radio maka kita harus jeli ttg waktu dan tempat arah stasiun yg dituju yg propagasinya terbuka sehingga waktu yg tersedia (meskipun hanya 1 jam) maka kita bisa meraup QSO dgn maksimal.

Ttg kesiapan peralatan utk kontest, sebaiknya di coba satu atau dua hari sebelum pelaksanaan kontest sudah kita coba ber DXing (buka warung), sehingga jika ada kekurangan atau masalah yg ada pd mikropon, antena, PC dll bisa kita antisipasi segera.
Bahkan dgn uji coba H-2 kita sudah tahu Band yg mana saja yg terbuka sehingga kita tidak harus ikut pd kategori all band. Bisa fokus pd satu band yg terbuka saja.

Hal-hal Yang lain sih masih banyak..
Nanti bisa dilengkapi oleh teman2 yg lain..

Semoga sharing ini bermanfaat

Regards

OM Irsan,
Kuping saya masih payah, harus dilatih mendengar bisikan2 mesra, HI.
Saya suka salut dengan operator DXpedition yg kadang langsung nangkap tanpa salah satu panggilan radio yg lemah di antara pile up yg hingar-bingar.

OM Hendro..
Jadi kuncinya adalah : mengasah ketajaman pendengaran yaa.. Kalo pake logger 32 apalagi n1mm pas kontes lumayan bisa terdeteksi bila callsign itu sudah masuk dlm database..tapi tetap harus 'tajam' kupingnya..hi hi.. Mantappss..

Saya sering dengar tuh yb0mwm, yb4ir buka warung...
Beberapa minggu yg lalu saat saya buka warung di 10m... Ketemu yb0mwm... Dulu waktu msh YC ketemunya om Uun... di 15m band. Kadang ketemu Tata YB0EIN...

Iya om Hen.. Gak apa biasakan buka warung.. Tidak akan ada yg meledek kita. Malah kawan2 membantu jika kita kesulitan mendengar.

Di YE0X om Hendro bisa ikut latihan DX contest.. Nanti akan di dampingi... Om Irsan sdh pernah di dampingi.. Bahkan om Irsan belajar mendengar dulu..

Kami di YE0X tdk pernah meledek siapapun yg mau belajar... Bahkan kami senang, jika bisa menciptakan mesin contest baru.

Dulu saya ikut dx contest pertama thn 2006... Di Grobogan cqwpx multi multi callsign YE2O... Bareng YB2DDT... Dan teman2 di lokal Grobogan.. Tidak ada yg meledek saya..

Pak Dragon malah mengajari bgm caranya menghadapi piled up..

Om Hen bisa gabung ke YE0X.. Tiap tahun pasti ikut cqww ssb contest...

Regards:

Ndut

OM Seno & OM Ndut,
Saya senang banyak rekan yg menawarkan utk meguru/belajar utk contest & CQing dan saya sangat percaya yg berpengalaman pasti akan banyak memberikan arahan kepada greenhorn dan gak akan meledek (ini bahasa betawi lho di jateng artinya bisa lain). Itulah sebabnya saya juga gabung di YBDX Club ini.

Sementara ini utk kontes insya Allah saya jadi penonton saja di YE0X deh atau di YE2R kalo sempat nyambangi kesana.

tnx

OM Hen,

Kebetulan tim YE2R butuh operator sperti OM Hen nih,
Gimana kalo nanti gabung di YE2R utk kontes CQWW SSB Okt 2012 nanti.
Hi hi.....

Saya sering dengar tuh yb0mwm, yb4ir buka warung...
Beberapa minggu yg lalu saat saya buka warung di 10m... Ketemu yb0mwm... Dulu waktu msh YC ketemunya om Uun... di 15m band. Kadang ketemu Tata YB0EIN...

Iya om Hen.. Gak apa biasakan buka warung.. Tidak akan ada yg meledek kita. Malah kawan2 membantu jika kita kesulitan mendengar.

Di YE0X om Hendro bisa ikut latihan DX contest.. Nanti akan di dampingi... Om Irsan sdh pernah di dampingi.. Bahkan om Irsan belajar mendengar dulu..

Kami di YE0X tdk pernah meledek siapapun yg mau belajar... Bahkan kami senang, jika bisa menciptakan mesin contest baru.

Dulu saya ikut dx contest pertama thn 2006... Di Grobogan cqwpx multi multi callsign YE2O... Bareng YB2DDT... Dan teman2 di lokal Grobogan.. Tidak ada yg meledek saya..

Pak Dragon malah mengajari bgm caranya menghadapi piled up..

Om Hen bisa gabung ke YE0X.. Tiap tahun pasti ikut cqww ssb contest...

Regards:

Ndut

Waduuuhhh..... kesindir nih sama OM Imam, selama ini yg namanya buka warung baru 3 kali - itupun gak lama juga.
Selama ini beraninya cuma S&P doang, habis dapat kabur sudah seperti sprint aja deh. ;))

Kalo pas kontes beneran saya justru lebih gak berani lagi kalo di YE0X, nanti malahan bikin malu, bikin pointnya kurang maksimal.
Harusnya ikut kontes beneran dulu dg CS sendiri dg resiko sendiri, kalo udah lancar baru saya ikut join di YE0X.
Kalo OM Irsan khan memang sudah sering buka warung, HI - sementara saya baru pada taraf pengamat di station YE0X beberapa waktu yll.

Amateur Radio Contesting FAQ
See the end of this document for copyright and contact information.

The top three teams receive their trophies at the
World Radiosport Team Championship 2002 (photo: Marijan Miletic S56A)

Contents

1. Why take part in contests?
2. How is the winner determined?
3. How are points scored?
4. What is a "multiplier"?
5. What sort of things count as multipliers?
6. What is a DXCC Entity?
7. What is a CQ Zone?
8. What bands can be used during contests?
9. What are the "WARC" bands?
10. Can I work the same station more than once?
11. What if I work a station more than once on the same band and mode?
12. Why are there different entry categories?
13. What sorts of entrance categories are provided?
14. What do "SOLP", "SOHP", "SOAB", "SOSB", "M/S", "M/2" and "M/M" mean?
15. What is the "DX Cluster"?
16. What category should I enter?
17. Do I need a computerized logging program?
18. What logging program should I get?
19. What should I look for in a contest logging program?
20. What is the "Cabrillo" log-file format?
21. How do I connect the computer to my rig?
22. Do I need a beam to enter contests?
23. Do I need an antenna farm to enter contests?
24. What is a "little pistol"?
25. What sort of rig do I need to enter a contest?
26. What is "QSK", and do I need it?
27. What is the alternative to QSK?
28. What is a "fill"?
29. I have a limited budget. What should I spend it on?
30. How good does my CW have to be to enter a CW contest?
31. Why do contesters only exchange reports and other numbers, not name and QTH?
32. Why are reports in contests always send as "5NN"?
33. What are "cut numbers"?
34. What does it mean when I hear a station send "TEST ZS1AN" or "ZS1AN TEST" during a CW contest?

35. How should I reply to such a call?
36. What sort of reply should I expect, and what does it mean?
37. How do I send my report?
38. What then?
39. How do I ask you to repeat the zone or serial number?
40. What does it mean if I call a station and get the reply "DUP" or "B4"?
41. Could you give an example of a complete contest QSO?
42. What is a serial number?
43. What is a "pass"?
44. What is "running"?
45. What is "search and pounce"?
46. What is "Single Operator Two Radio" contesting?
47. What is a "Sprint"?
48. What is the exchange format for a Sprint?
49. What is a "QTC"?
50. What should I do before a contest?
51. What do I do after the contest?
52. What should I not do after the contest?
53. How long do I have to wait for the results?
54. What is a "busted call"?
55. What should I do if I'm not sure whether I copied a callsign correctly?
56. What is a "UBN report"?
57. What is "NIL"?
58. What are these unusual callsigns I hear in contests?
59. Should I QSL my contest QSOs?
60. What is the "World Radiosport Team Championships"?
61. How do I find out what contests are on?
62. Where can I get more information?
63. May I reproduce this FAQ?

Questions & Answers

1. Why take part in contests?

Everyone has their own reasons. Some of mine are: to sharpen my operating skills, to learn to get the most I can out of my equipment, to compete against my peers, to be a part of the community of contesters.

2. How is the winner determined?

The winner in each category is the station which gets the most points in that category.

3. How are points scored?

Each QSO will score a certain number of points. The number of points scored for a QSO may depend on the location of the station contacted - for example in the CQ Worldwide DX contest stations on the same continent as yourself count 1 point each, stations on a different continent count 3 points and contacts between two stations both located in North America count 2 points. In other contests, QSOs for certain stations may count for more points than QSOs with others - for example, in the ARRL 10m contest, contacts with stations holding Novice or Technician Plus class licenses count more than contacts with other license classes. In contests which allow you to work in different modes (for example, CW and SSB) the number of points may also depend on the mode.

4. What is a "multiplier"?

As well as getting points for each QSO, most contests allow you to get multipliers from

certain QSOs. For example, you might get a multiplier for every different country (DXCC entity) you work on each band during the contest. Your final score for the contact will then be calculated by multiplying the total of all your QSO points by the number of multipliers you worked. For example, if you worked 100 stations at 2 points per QSO and 20 multipliers, then your total QSO points would be 100 x 2 = 200, and your multiplier is 20, so your final score would be 200 x 20 = 4000 points.
5. What sort of things count as multipliers?
That depends on the particular contest, so I will give a few examples:
* In the CQ Worldwide DX contest, countries (DXCC entities) and CQ zones both count as multipliers. So if you work 100 countries in 20 zones, you would have a total of 100 + 20 = 120 multipliers.
* In the IARU HF World Championships, ITU zones and IARU member society headquarter stations and IARU officials worked count as multipliers.
* In the ARRL International DX Contest, for stations in North America each country (DXCC entity) worked is a multiplier. For stations located outside North America, every American or Canadian state worked is a multiplier.
6. What is a DXCC Entity?
Entities correspond roughly to countries and administrative territories, but they also may be islands and even reefs if they meet criteria set by the ARRL, which administers the DX Century Club (DXCC) award and decides what qualifies as an "entity".
7. What is a CQ Zone?
The world is divided into 40 "CQ Zones" which are used as multipliers for some contests. Get further information and a map showing the different zones
at www.cq-amateur-radio.com/wazmain.html.
8. What bands can be used during contests?
That depends on the particular contest. Some contests are limited so a single band - for example, the ARRL 10m contest is (not surprisingly) for 10m only. Many contests allow operation on all the pre-WARC HF bands - that is: 160m, 80m, 40m, 20m, 15m and 10m. Other contests are for VHF bands only. However note that contesting is never permitted on the WARC bands: 30m, 17m and 12m. This is so that amateurs who do not enjoy contesting can take refuge on the WARC bands during contests.
9. What are the "WARC" bands?
The WARC bands are the 30m, 17m and 12m bands. They were named after the World Amateur Radio Conference in 1979 at which these bands were allocated for amateur use. The WARC bands may not be used for contesting.
10. Can I work the same station more than once?
Generally you can only work a station once on each band and mode that is allowed during the contest. For example, in an SSB-only contest, you can only work a station once on each band. In a contest that allows both CW and SSB, you may be able to work a station twice on each band, once on CW and once on SSB. But read the rules - the ARRL Sweepstakes, for instance, allows only one contact per station, period.
11. What if I work a station more than once on the same band and mode?
If you claim points for both contacts, then you will lose both the points claimed and additional points as a penalty for your error. It is fine to work a station multiple times if you only claim points for one of the contacts (usually the first one), although this is a waste of time and won't do your score any good.
12. Why are there different entry categories?
Different contesters have different preferences and budgets. Some like to work on their own, others prefer to be part of a team. Some can afford high-power stations, others prefer to compete with a "barefoot" or QRP transceiver. By dividing a single contest into a number of different entry categories, all contesters can share the fun and contribute to the

contest, while competing against similarly equipped stations in the same category.
13. What sorts of entrance categories are provided?
That depends on the contest, but the entrance categories for the CQ Worldwide DX contest are a good example of a fairly extensive list of possibilities:
* Single Operator High - a single operator, maximum power 1.5 KW, no DX alerting assistance (for example, DX cluster spots) allowed.
* Single Operator Low - a single operator, maximum power 100W, no DX alerting assistance allowed.
* Single Operator QRPp - a single operator, maximum power 5W, no DX alerting assistance allowed.
* Single Operator with DX Spotting Net (also called "Single Operator Assisted") - a single operator, maximum power 1.5 KW, passive use of spotting nets allowed.
* Multi-Operator, Single Transmitter (also called "multi single" or "MS" for short) - any number of operators, but only one transmitted signal allowed at any time. The additional operators will often be listening for new multipliers, and passing the information on to the one transmitter operator.
* Multi-Operator, Two Transmitter (also called "multi two") - Any number of operators, but only two transmitters. In CQWW, both transmitters may work any stations. In some other contests there are strict restrictions on what the second transmitter may do - for example, it may only be allowed to work new multipliers.
* Multi-Operator, Multi Transmitter (also called "multi multi") - Any number of operators, operating any number of stations, but with only one transmitted signal on each band at any time. In many cases a "multi-multi" station will have a dedicated transmitter for each of the contest bands.
Note that in CQWW, single operator entries can choose to be all-band, or only to work a single nominated band.
14. What do "SOLP", "SOHP", "SOAB", "SOSB", "M/S", "M/2" and "M/M" mean?
These are all abbreviations for contest entry categories:
* SOLP - Single Operator Low Power
* SOHP - Single Operator High Power
* SOAB - Single Operator all band
* SOSB - Single Operator Single Band, often includes the band, e.g. "SOSB/80" for a single band entry on 80m
* M/S - Multi/Single - Many operators but only a single transmitter
* M/2 - Multi/Two - Many operators with two transmitters
* M/M - Multi/Multi - Many operators with many transmitters
15. What is the "DX Cluster"?
It is a worldwide computer system on which DX stations are reported ("spotted"). It can be accessed via Packet Radio or on the Internet at www.dxsummit.com. You are only allowed to make use of DX Cluster spots if you are entered in an "assisted" class. No matter what class you are entered in you may not enter your own station into the DX cluster, this is called "self spotting" and is illegal in all contests. Don't do it. K1TTT will get you if you do.
16. What category should I enter?
If you don't have a kilowatt linear, then single operator low power is an attractive option since you don't have to compete with all the kilowatt-plus signals in the high power category. If you are an experienced QRP operator, then by all means choose QRPp instead, but if you are not a QRP operator then you may find this category a bit frustrating at first as you will have to learn how to make your QRP signal heard while learning the ropes of contesting at the same time. If your antenna system is limited then you may want to enter single-band or, like me, enter all-band anyway 'cause it's more fun and just live

with a less competitive score.
17. Do I need a computerized logging program?
To make a serious attempt at an international contest, yes. Most of the smaller stations that enter a contest spend much of their time answering other stations that are calling CQ. This is known as "search and pounce" - you search for a station you need, and then pounce on it by replying to its call. However since you can only work a station once on each band and mode, before you reply to the CQ, you need to know whether you have worked the station before, and unless you have a photographic memory a computer logging program is by far the best way to do this. Contesters are a very friendly bunch, but calling the same station five or six times on the same band during a major international contest will test the patience of even the most saintly participant. Of course if you are fortunate enough to be even moderately rare DX (ZS for example), then you can get by with calling CQ yourself and waiting for a reply, log this on paper and later remove the
duplicates ("de-dup" the log) by hand. This is what I did in my first major contest, but after manually de-duping 475 QSOs, which took me a whole day, I went out and bought a logging program.
Note that for many of the smaller state or national contests, you can get by without a logging program as there are few enough entrants that you can remember who you have worked or look it up on your paper logs. These contests can be great fun and are excellent practise for the "big ones".
18. What logging program should I get?
There are many different, some commercial ones, which you have to pay for, and some which are free. Popular commercial programs include WriteLog for Windows, TRLog and SD. Writelog has a Windows graphical user interface. Although originally written for DOS, TRLog will also run under most versions of Windows. SD is available in two versions, one which runs character-mode under Windows, and one for DOS. Free contest logging software includes CT, also originally designed for DOS, and the open-source N1MM logger for Windows. You can read user reviews of these and other programs at www.eham.net.
19. What should I look for in a contest logging program?
First, be aware that logging programs come in two different flavours - general logging programs designed to maintain a normal station log, and specialized contest logging programs. The difference is that contest logging programs have contest scoring rules "built in" for major contests, so they will automatically keep track of your score, tell you whether you can work a particular station for the contest, and other contest-specific time saving features. Needless to say, you want a program designed for contest logging. Then make sure it supports the contests you want to enter, since having the contest programmed into the software for you is a real time saver. If you don't know exactly which contests you want to enter, then at least see how many contests it supports. Also consider the ease of adding new contests yourself if you have to. Some programs, like WriteLog for Windows, require programming skills to do this while with others, like TRLog, you can add
new contests by editing a configuration file. Also look for a program that can interface with the rig(s) you use or are likely to use. Having the logging program automatically pick up the band and mode your rig is set to is a great time saver and eliminates a common source of costly errors. Many logging programs can also turn your beam automatically for you to point at the station you are working, so if you want to use this feature then make sure the program is compatible with the rotator(s) you are using. Finally, make absolutely sure that the logging program can export the log file in the standard "Cabrillo" format, which is used to submit logs for most contests. All decent logging programs can interface to your rig's key jack to send CW automatically. This is a great feature as it allows you to send exchanges while capturing information into the logging program.
20. What is the "Cabrillo" log-file format?

Cabrillo is a standard format for submitting log files to contest organizers so they can be checked and scored by computer. Although different logging programs store the log files in different formats, most have the ability to export to Cabrillo format for submission.
21. How do I connect the computer to my rig?
There are a couple reasons to connect your computer to your rig. First, so it can send CW automatically and/or PSK31 or RTTY depending on the contest. Some logging programs also provide a "voice keyer" which allows you to record messages and then replay them over the air. This is great for calling "CQ" in a phone contest, for example. For this you need a computer soundcard interface with support for CW keying. A simple example can be found on my web site. The second reason is so the logging program can keep track of the band and mode of your transceiver. This may require a proprietary interface from the transceiver manufacturer. Many of these interfaces will also allow the computer to control the transceiver, so for example you can change frequency simply by typing the new frequency on your computer.
22. Do I need a beam to enter contests?
No but it will help significantly! I have spent my first year of contesting using only wire antennas, and I have learned a lot and had plenty of fun. I even made first place single operator in our local field day contest, which only allows single-element antennAs. But I know that I won't be even vaguely competitive in the major international contests until I have at least a triband beam. That said, I wouldn't have been competitive in my first year if I had stacked monoband beams on all bands, since I did not (and still don't) have enough experience. So there's still a lot to be gained from entering contests, even if you don't have a beam.
23. Do I need an antenna farm to enter contests?
No but it will help significantly :) Actually, at least one major contest - the CQ Worked All Prefixes (WPX) contest - now has an entry category where stations are limited to using a single triband beam on 10, 15 and 20m and single-element antennas on all other bands. So there is hope for us "little pistols".
24. What is a "little pistol"?
The high power multi-multi (multi operator multi transmitter) stations are often called "big guns". The "little pistols" are all us low power, single operator stations.
25. What sort of rig do I need to enter a contest?
Just the rig you use every day. That's not to say that some rigs aren't better for contesting than others, but just about any rig will do to start. If you plan to buy a new rig for contesting, then look for one with a "strong" receiver which can receive weak signals in the presence of very strong signals without overloading. The "blocking dynamic range", "intermodulation dynamic range", "third order intercept" and "phase noise" specifications found in most technical reviews are important indicators of this.
Also, note that it is a good idea to have your commonly used functions such as filter selections, if width and shift (if available), notch filter, attenuator, RF gain, mode, and band switch available on the front panel, to avoid having to wade through a menu system in the heat of battle. This means that the compact transceivers designed primarily for mobile operation may not be the best choice in a contest. The ability to interface the rig to your computer so the logger can automatically enter the correct band and mode is another useful feature that is found on most modern rigs. A narrow (250 or 500 Hz) filter is almost essential for CW contests.
Amongst current production HF transceivers the Elecraft K2, Icom IC-756 Pro 2, Ten-Tec Orion and Yaesu Mk V FT-1000 MP are some of the best. However note that these are not beginner's radios (with the possible exception of the K2, but this must be constructed from a kit and so is best suited to someone with prior construction experience), so if you have

no prior operating experience it may be better (not to mention cheaper) to start off with an entry-level or mid-range radio. There are also some excellent radios available at very reasonable prices second-hand, such as the ICOM IC-765, Kenwood TS-850S, Ten Tec Omni VI Plus and the Yaesu FT-990 as well as earlier versions of the FT-1000 (both the FT-1000D and the original 'MP are excellent radios) and the IC-756 Pro.

26. What is "QSK", and do I need it?

QSK or "full break-in keying" means that the transceiver switches into receive mode as soon as it has finished transmitting a Morse code dot or dash. This means that you can hear other stations operating on your receive frequency between the dots and dashes that you are transmitting. Whether or not to use QSK is a matter of personal preference. I often use QSK as a single operator station with only a single radio when I am calling CQ ("running") as it allows me to hear if another station calls me as I start another CQ call, so I can stop calling CQ and instead just send "?" to ask who is calling me. However when the band is noisy I often turn QSK off as it can be very fatiguing listening to band noise between every dot and dash! SO2R operators do not generally use full break-in keying, as while their "run" station is calling CQ, they will search-and-pouncing on another band, so the last thing they want is to hear the band noise from the "run" station
as well. Note that some station equipment such as linear amplifiers may not support full break-in, so please check your manuals before operating QSK.

27. What is the alternative to QSK?

The best alternative is to have your logging computer, which is also generating CW, switch the rig from receive to transmit and back using the external T/R control line found on most radios. Most logging programs will allow you to specify the delay between switching the rig to "transmit" and sending the first dot or dash, which avoids hot-switching accessories such as your linear amplifier. This way has the big advantage that your rig can be switched back to receive immediately the last character has been sent, without any unnecessary delays. (Note that for this to work correctly if you use a paddle to send "fills" then the paddle should also be connected to the computer, with the logging program generating the actual dots and dashes, so that the computer can switch the rig into transmit mode when sending a fill.)

If your rig does not provide an external T/R line then you can use "semi-break-in" keying. This means that the first transmitted dot or dash will switch the rig into transmit mode, and it will remain in transmit mode some period of time after each dot or dash is transmitted, in case there is another character on its way. This delay is usually adjusted so that it is just long enough to avoid switching back into receive mode between words. The disadvantages of semi-break-in keying as compared to computer-controlled T/R switching are (a) the necessary delay depends on keying speed, so you may have to adjust the delay when working a slower operator; (b) it will result in an unnecessary delay before switching back to receive after the last dot or dash, as the rig does not know that there are no more characters coming (although the computer does!); and (c) many rigs do not support a configurable time delay between switching into transmit mode and sending the
first character, which makes it difficult to avoid hot-switching your accessories. For these reasons, computer-controlled T/R switching is preferable.

28. What is a "fill"?

In a computerized CW contest station, the logging program will automatically generate most of the Morse code. However occasionally you may need to send something that is not pre-programmed into the logging program. This is known as a "fill". Some operators send fills by typing the text into the logging program, while others prefer to have a paddle handy to send fills manually. In this case the paddle must either be connected to the computer so the computer can generate the Morse code, or it must be connected to a keyer and the keying line from the keyer must be connected in parallel with the computer keying

line so that both the computer and the paddle can key the rig. One of my pet gripes is that on some rigs with an internal keyer such as the Mark V FT-1000MP, even though there are two keying jacks it is not possible to configure one keying jack to operate through the internal keyer and the other to accept a "straight key" type input from the computer.
29. I have a limited budget. What should I spend it on?
Assuming you already have a basic station, then I would suggest you first purchase a computer (which does not have to be new, especially if you are happy to use DOS) for logging; then upgrade your antennas; then upgrade your rig if necessary; and save the linear for last since most contests have a 100W category. If your plan to enter CW contests, then you might want to invest in a narrow filter (maximum 500 Hz) for your existing rig in the meantime, even if you plan to buy a new contesting rig in a year or two. Other people's opinions will differ.
30. How good does my CW have to be to enter a CW contest?
That depends very much on the contest. For many of the "local" contests, i.e. state or national contests of small countries, you can get by with 10 w.p.m. or so. For the big international contests you probably need to be able to copy callsigns reliably at 20 w.p.m. (Note this is not the same as being able to ragchew at 20 w.p.m., copying callsigns is easier than ragchewing). Many of the QSOs in international contests take place at 25-30 w.p.m, but if you can copy callsigns at 20 w.p.m. then you should be able to get a faster callsign after a couple of tries. Practise makes perfect!
31. Why do contesters only exchange reports and other numbers, not name and QTH?
The object is to make as many QSOs as possible in a limited time, so "QSO rate" - the number of QSOs per hour - is (almost) everything. Hence all "unnecessary" parts of the QSO are omitted, leaving only the required essentials - call signs, 599 signal reports and a serial number or zone number if required by the rules. Be sure to check the rules to see what the required exchange is for each contest you enter.
32. Why are reports in contests always send as "5NN"?
Although the rules normally specify that the exchange must include a signal report, no-one actually cares much what the real signal report is. So to simplify things, contesters just send 599 reports even if the signal is barely intelligible. However the number "9" is replaced by the letter "N" because it is faster to send. "Shortened" numbers, like "N" instead of "9" are known as "cut numbers".
33. What are "cut numbers"?
In Morse code, all numbers consist of five dots and/or dashes, which takes a fairly long time to send. "Cut numbers" provide an alternative way of representing numbers using (mostly) shorter Morse sequences that are faster to sent. The actual sequences used are:
Number
Normal Morse
"Cut" number
Equivalent character
0 dah-dah-dah-dah-dah dah T
1 di-dah-dah-dah-dah di-dah A
2 di-di-dah-dah-dah di-di-dah U
3 di-di-di-dah-dah di-di-di-dah V
4 di-di-di-di-dah di-di-di-di-dah 4
5 di-di-di-di-dit dit E
6 dah-di-di-di-dit dah-di-di-di-dit 6
7 dah-dah-dit-dit-dit dah-dah-dit G
8 dah-dah-dah-di-dit dah-di-dit D
9 dah-dah-dah-dah-dit dah-dit N
Note that for all numbers except "5", the "cut" numbers simply replace all the dashes in

the usual Morse representation of the number with a single dash. This is an easy way to remember the cut numbers. By far the most common in practise are "T" for "0" and "N" for "9", so you should be familiar with at least these.
34. What does it mean when I hear a station send "TEST ZS1AN" or "ZS1AN TEST" during a CW contest?
This is a shortened CQ call - in other words, the operator wants other stations (specifically stations participating in the contest) to reply to his or her call. "TEST" is short for "CONTEST", and a full CQ might be "CQ CONTEST DE ZS1AN K". However, in the spirit of omitting everything that is not absolutely essential, the "CQ" and "DE" are often omitted, leaving just "TEST ZS1AN" or sometimes "ZS1AN TEST".
35. How should I reply to such a call?
Just send your callsign - once if conditions are good, twice if they are poor. Don't send "ZS1AN ZS1AN DE N1XXX N1XXX N1XXX K" - I know who I am, and the timing of your reply will clue me in to the fact that you are replying to me, not to someone else. And better not to send your callsign too many times, a competent contest operator should get it first time. So instead you just send "N1XXX" and wait for the reply.
36. What sort of reply should I expect, and what does it mean?
Your callsign, an abbreviated signal report and a zone or serial number depending on the contest. For example, "N1XXX 5NN38". "5NN" is the abbreviated "599" report using "cut numbers", and "38" is in this case my CQ Zone, which is required for the CQ Worldwide DX contest. In other contests I might send you a serial number instead of my CQ Zone, for example "N1XXX 5NNTT5 TT5", which "TT5" stands for "005" again using the "cut number" equivalent for "0". In this case I have repeated the serial number, giving you a second chance if you missed it the fist time. Note that the leading zeros (or Ts using cut numbers) on the serial number or zone may not be required, so some contesters would send simply "N1XXX 5NN 5". Check the contest rules to see if they specify how many digits the serial number must contain, if not then it is perfectly acceptable to omit the leading zeros.
37. How do I send my report?
You can just send the report followed by the zone or serial number. For example, "599T5". Here you are sending the CQ zone "5" as "T5", with "T" replacing the "0". It is not necessary to send your callsign again if the station you called has got it right. If they got your callsign wrong, then you should send it again a couple of times with your report - for example, "N1XXX N1XXX 599T5".
38. What then?
I'll send "TU ZS1AN" - thank you for the QSO, and my callsign so if another station is waiting for me then she/he can call immediately without having to wait for my next "TEST ZS1AN" call. Note that this is the end of the QSO - don't prolong it unless you missed some important information, like the zone or serial number. "MY NAME IS ANDREW ANDREW QTH CAPE TOWN CAPE TOWN PSE UR NAME ES QTH" won't go down too well in a major contest!
39. How do I ask you to repeat the zone or serial number?
"NR?" is sufficient, and I will respond with something like "NR 38 38 BK". Assuming you got it this time, you can just send "TU" (thank you) and move on.
40. What does it mean if I call a station and get the reply "DUP" or "B4"?
This means that the station you are calling has (or thinks he or she has) worked you already on this mode and band. "B4" stands for "before". Don't stop to argue about it - find another station to work and move on.
41. Could you give an example of a complete contest QSO?
Sure. Here ZS1AN is calling CQ ("running") and N1XXX responds. The callsign in the square brackets is the callsign of the station which transmits the information that follows. The callsign in the square brackets is not actually transmitted. This example is from CQWW:

[ZS1AN] TEST ZS1AN An abbreviation for "CQ CONTEST DE ZS1AN"
[N1XXX] N1XXX You respond with your callsign
[ZS1AN] N1XXX 5NN38 I send my exchange "599" and my CQ zone "38"
[N1XXX] 5NNT5 You reply with your "599" report and zone "05"
[ZS1AN] TU ZS1AN Thank you, and I'm waiting for the next caller so please don't reply
The following example shows what happens if the called station gets your callsign wrong:
[ZS1AN] TEST ZS1AN
[N1XXX] N1XXX
[ZS1AN] N1XX 5NN38 Oops I got your callsign wrong...
[N1XXX] N1XXX N1XXX 5NNT5 ...so you send it again with the exchange
[ZS1AN] N1XXX TU ZS1AN and I acknowledge the correction
42. What is a serial number?
Many contests require that, in addition to the signal report, you send a serial number as part of the report. This is simply a number, starting from 1, which you increment with each successive contact. Serial numbers are usually send as 3 or 4 digit numbers, with the letter "T" (a single dash) being sent in place of leading zeroes. For example, "T23" for "23". Most contests require that you use a single sequence on all bands if you are a single operator (so for example, if you send "23" to the last station you work on 20m, and then move to 15m you would send "24" to the first station worked there). Multi-operator stations are often required to use a separate sequence on each band. Check the rules to be sure.
43. What is a "pass"?
A "pass" is when you work a station on one band, and he or she asks you to give him/her a call on another band. This most often happens if you are a multiplier which the other station still needs on the other band. Should you accede to the request? Well, that is up to you. If the station making the request is a multiplier that you still need on the other band, then it may be worthwhile. But if you already have that country or zone on the other band, then the time end effort to change to the correct frequency probably isn't worth it for a single contact (which you may not get anyway if the path isn't working on the other band). Often the station requesting the "pass" is a multi-multi station, and they are just giving you the frequency that their operator on that band is already working, so it's no skin off their nose to change bands.
44. What is "running"?
When a station can stay on one frequency calling CQ and working station after station, this is known as "running". If you can do it then it is a very effective way to make lots of QSOs, although often they will be from the same area so you may not accumulate as many multipliers as you could if you were "searching and pouncing" on needed multipliers. In order to "run" successfully, you need either to have a good signal, or to be a moderately rare multiplier, in order to attract sufficient callers and hold on to your frequency. You also need to be fairly competent at recognizing callsigns, whether CW or Phone, which may be buried in a pile-up. Nobody minds if you take 4 or 5 tries to figure out the callsign of a station when you are search and pouncing and the other station is calling CQ, since you can just listen to his or her CQ call 4 or 5 times without disturbing anyone, and only your own score will suffer. However if you call CQ and then take four or five attempts to get the callsign of the station coming back to you correct, then you had better be a very rare multiplier!
45. What is "search and pounce"?
Search and Pounce (S&P) means tuning around the band listening for stations calling CQ (or "TEST" as the case may be) and then calling them. It is the easiest way of operating for a beginner, as you can take your time to copy the callsign if necessary without any pressure (except the knowledge that time is points). Depending on band conditions, it may be

worthwhile calling everyone you hear, or you may only want to call multipliers that you have not worked already. In either case, listen for the weaker signals that might get lost next to the strong stations (a narrow filter can do wonders), to make sure you don't miss out on a valuable multiplier just because there was a string local station 500 Hz away.
46. What is "Single Operator Two Radio" contesting?
Although it is not a separate entry class in most contests, some single-operator entrants will use two radios when they contest. This is known as "single operator two radio" or SO2R for short. Typically one radio is used to "run" on a band, while a separate radio - with separate antennas and amplifier if necessary - is used to "search and pounce" on a different band. (The bands need to be different to prevent the transmission from one radio from damaging the receiver in the other.) Most contest rules specify that a single operator may only transmit one signal at a time, so a SO2R operator must be careful to ensure that both radios cannot transmit simultaneously. Some sophisticated hardware is available from contesters like Bernie ZS4TX to interface the components of a SO2R station.
47. What is a "Sprint"?
A sprint is a contest where a station that initiates a QSO (for example, by calling "CQ") must change frequency immediately after the QSO, without working any other station on the same frequency. The reason for this is that in normal contests, high powered and rare stations can get a significant advantage by "running" - calling "CQ" and then working stations one after another on the same frequency, which can result in a very high QSO rate. By forcing the station to change frequency, the "sprint" format prevents stations from "running" and evens the odds for the smaller station. Note that the change frequency rule only applies to the station that initiated the qso; the other station is allowed to initiate a second QSO on the same frequency before he or she must also change frequency. Sprints are harder for beginners than normal contests, because you can't listen to several QSOs by the same station in order to get it's callsign right - you pretty much have to get the callsign right first time.
48. What is the exchange format for a Sprint?
Of course that depends on the rules for the particular contest, but generally you will find that both stations' callsigns are sent during the exchange. This is because the station that initiated the QSO is going to have to change frequency immediately after the QSO, so there is no chance for the other station to "wait around" to confirm the callsign. There is a convention that the station initiating the QSO sends his or her callsign before the rest of the exchange, while the station responding to the CQ sends his/her callsign after the exchange. This helps to indicate to other listening stations which of the two participants will stay on frequency (remember, only the station who responds to the CQ can remain on frequency) and so can be called next. For example, the following exchange is taken from the EU (European) Sprint, where the exchange must consist of: your callsign, the other station's callsign, a serial number and the operator's name or nickname. Note that a signal report is not required. My thanks to Dave Lawley G4BUO for the following example:
[I2UIY] CQ CQ I2UIY I2UIY TEST I2UIY calls CQ
[G4BUO] G4BUO G4BUO replies
[I2UIY] G4BUO I2UIY 013 PAOLO I2UIY sends his exchange. Note that he sends his callsign before the rest of the exchange to indicate that he is the initiator
[G4BUO] I2UIY 008 DAVE G4BUO G4BUO sends his exchange, sending his callsign at the end to indicate that he will remain on frequency
[I2UIY] R I2UIY acknowledges receipt ("R" means "Received everything you sent correctly") and must now change frequency
[OK2FD] OK2FD OK2FD heard the end of the exchange, so he knows that G4BUO is now on frequency

[G4BUO] OK2FD G4BUO 009 DAVE G4BUO sends his exchange
[OK2FD] G4BUO 011 KAREL OK2FD OK2FD sends his exchange, ending with his callsign - he now temporarily "owns" the frequency
[G4BUO] R G4BUO acknowledges and changes frequency
[OK2FD] TEST OK2FD TEST Nobody calls OK2FD, so he calls CQ
[DL6RAI] DL6RAI DL6RAI answers the CQ
[OK2FD] DL6RAI OK2FD 012 KAREL OK2FD sends his callsign before the exchange to indicate that he will be leaving the frequency
[DL6RAI] OK2FD 003 BEN DL6RAI DL6RAI sends his callsign after the exchange as he now "owns" the frequency
[OK2FD] R OK2FD acknowledges and moves to another frequency
As you can see, it is an intricate dance. Careful practice is called for if you are to avoid treading on your partner's toes!
49. What is a "QTC"?
Some contests - notably the European HF DX Contest - allow stations to exchange information about contacts they have made with other stations for additional points. These reports of contacts with other stations are known as QTCs.
50. What should I do before a contest?
Read the contest rules and decide which category you will enter. Test your station and antennas. Have a look at the expected propagation and draw up an operating schedule showing when you expect to operate on which bands, and where your beam will be pointing. (This schedule will change during the contest as conditions unfold, but you should at least have an initial plan.) Stock up on fast food - microwave meals are my favourite. Set up your computer, check that the logging program is interfacing with the PC correctly, and ensure that you select the right contest in the logging program. Try to get as much sleep before the contest starts as possible so you can work long hours during the contest itself. Feed your pets. Read the contest rules (again) and make sure you understand the exchange format, multipliers, sequence numbers, entry categories, power restrictions etc. Accurately set your computer clock so the QSOs will be logged at the correct time.
51. What do I do after the contest?
In order to be listed in the results, you will need to submit your log to the contest organizers. Most of the major contests these days prefer electronic logs, usually in Cabrillo format, as they can be automatically checked and scored. Smaller (e.g. national) contests may prefer paper logs. In most cases if you have not used computer logging then paper logs will be accepted. However many contests will not accept paper logs printed by a computer logging program. After all if you have the log on computer then they don't want to have to type it in again. The address for submitting your logs can be found in the contest rules.
52. What should I not do after the contest?
"Massaging your log" - for example, checking callsigns in a callsign database and then correcting those found to be in error - is generally frowned upon by contesters, although it may not be strictly illegal.
53. How long do I have to wait for the results?
The official results often take a couple of months. However there is an unofficial email reflector called "3830" on which contesters post their claimed scores. To subscribe, send an email to 3830-request@... with the word "subscribe" in the body of the message (not the subject line). You can post your claimed score directly to the group by sending an email to 3830@..., but it is more convenient to submit scores via the web form at http://www.hornucopia.com/3830score/. This also ensures that the score will be posted in a format which makes it easy for it to be included in the regular summaries which are

posted to the mail reflector.
54. What is a "busted call"?
A "busted call" is a call which you captured incorrectly during the contest. You will generally lose points for busted calls or incorrectly logged serial numbers.
55. What should I do if I'm not sure whether I copied a callsign correctly?
If you are responding to a CQ, then wait for the station to call CQ again so you can copy the call correctly. If you are cvalling CQ, then send "CL?" and the other station will repeat his or her callsign. If conditions are poor, then you may have to ask a couple of times, but this is much better than getting the callsign wrong - which will cost you penalty points for the contest - or not entering the QSO in your log file, which is very unfair to the other station and will cost him or her penalty points. Note that although some programs (e.g. WriteLog) have the ability to mark a QSO as "unclaimed", the Cabrillo format used to submit contest entries has no such mechanism, so QSOs marked as "unclaimed" in the log file will just not be included in the Cabrillo file. It is very bad karma to do this unless you are absolutely sure that the other station knows they are not in your log, otherwise they might submit the QSO and be penalised for it.
56. What is a "UBN report"?
It is a report from the contest committee showing errors and possible errors in the log you submitted for a contest. The main errors are abbreviated as follows:
* U (Unique callsign) - you claimed credit for a callsign which nobody else claimed credit for. This may indicate that you made a mistake with the callsign. However since it is also possible that you did really work a unique station, you generally won't lose any points for this.
* B (Bad callsign) - you claimed credit for a callsign that definitely wasn't in the contest. This may mean that the callsign is illegal or has not been allocated, although there are many other possible reasons as well. You will lose credit for this contact and will probably also be penalized some further points.
* N (Not in log) - you claimed credit for a callsign which was active in the contest, but you are not in his or her log. You will lose the points for this contact and will probably also be penalized some further points. (This is why it is so important to report all the QSOs you make during a contest.
The report get its name from the abbreviations U, B and N used for these errors.
57. What is "NIL"?
NIL is an abbreviation for Not In Log, meaning you have claimed to have worked a particular callsign, but you are not in the other station's log.
58. What are these unusual callsigns I hear in contests?
You hear unusual callsigns during contests for two reasons. First, some administrations reserve special short or unusual callsign sequences specifically for use during contests. For example, in Britain callsigns with a single letter in the suffix like "M5A" or "GM1A" are reserved for contest use. In France, the prefix "TM" is allocated to contest stations rather than the more usual "F" prefix, for example "TM6X". A short callsign gives the station an advantage because it is faster to send and less likely to be copied incorrectly. Unusual prefixes are attractive because in some contests like the CQ Worldwide WPX (Worked all Prefixes) contest, each unique prefix counts as a multiplier, so the more unusual prefixes will attract more calls. That happens in other contests as well. The first time I heard a "TM" station I was convinced I had found some rare DX, and was somewhat disappointed when I discovered it was located in mainland France.
Some countries have even issued callsigns without a digit following the national identifier. For example, the callsign "D4B" is issued by Cape Verde which has the national identifier "D4", so there is no digit following the national identifier - the "4" is part of the national identifier. However Article 19 of the ITU Radio Regulations was amended by

the World Radio Conference 2003 (WRC-03) making it mandatory to have a digit following the national identifier, so it is likely that such callsigns will be phased out.
Another reason for unusual prefixes is that many stations operate temporarily from a foreign country, usually to make themselves more sought after in the contest. For example, American stations are two a penny in most contests, but an American visiting the Bahamas is an attractive multiplier. Operators visiting a foreign country may be allocated a "normal" callsign for the country they are visiting, but will often use their home call either preceded or followed by the country (and possibly region) prefix of the country they are visiting. For example, KD4D operating from South Africa would use the callsign ZS/KD4D, while the same station operating from Canada would use a callsign like KD4D/VE3. Note that the Morse code for the "/" symbol is "dah-di-di-dah-dit", and it is pronounced "stroke" on phone.
Unfortunately there is no standard as to whether the national identifier of the country being visited should precede or follow the home call. The CEPT agreement, which is the largest reciprocal licensing arrangement covering Europe, North America and some other countries, specifies that the national prefix should precede the home call. However other reciprocal agreements, like the one between the United States and Canada, specify that the national identifier should follow the home call and even within the CEPT agreement there is one exception (Peru).
Also note that following WRC-03 it is now legal for amateur callsigns to have a suffix of up to four characters (even more for special event stations), and the suffix may use both letters and digits provided that the last character is a digit. So in future contests you may hear callsigns like "ZS1234A" or even "22222A"! The latter would be from Britain, which has been allocated the national prefix "2".
So the best advice on callsigns is to expect the unexpected, and log each callsign exactly as received.
59. Should I QSL my contest QSOs?
If you are using Logbook of the World then by all means. If you are using QSL cards then this is likely to take a lot of time and money due to the number of contacts made in a contest. My policy is that in contests I only QSL on request, which normally means the other station sending me a direct QSL with a self-addressed envelope. This differs from my normal non-contest policy which is to QSL every contact via the bureau unless otherwise agreed. But whatever you decide, please don't enquire about QSLs on air during the contest. If you work a station you need, then QSL direct with a dollar bill or IRC after the contest.
60. What is the "World Radiosport Team Championships"?
The World Radiosport Team Championship (WRTC) is the "Olympics of Amateur Radio". It brings the top two-person contesting teams from around the world together in the same geographic area and with similar antennas and "anonymous" callsigns in order to eliminate some of the extraneous variables (such as propagation and who has the most friends) and emphasize the skill of the teams. Each team consists of two operators from the same country, so there is a "national" dimension to the contest, although the participating teams are decided in part on previous contest results so there may be m any teams representing the same country in the championship. It was first held as part of the Goodwill Games in Seattle (1990). Since then the WRTC has been held in San Francisco (1996), Slovenia (2000) and Finland (2002). The winning team in WRTC 2002 was Jeffrey Steinman N5TJ and Daniel Street K1TO from the USA. The next WRTC will be held in Brazil (2006). The WRTC is a sub-contest that is held within the IARU HF World Championships, which gives the (relatively few) teams competing in the WRTC a large number of contest stations to contact. The rules for WRTC teams are somewhat different from those for other participants in the IARU International HF World Championship, and they are usually restricted to 100 W and to a

triband beam for 20, 15, and 10 metres and a wire antenna for the low bands.
61. How do I find out what contests are on?
Visit the Contest Calendar website maintained by Bruce Horn WA7BNM.
62. Where can I get more information?
See the following websites:
* Contesting.com
* Contesting.info
* SM3CER Contest Service
* RadioContesting.net
* RSGB HF Contesting Guide
63. May I reproduce this FAQ?
Only with my permission. However I am generally happy to give permission for it to be reproduced in printed format, or as part of a club newsletter, or any other non-Web format. I just want you to ask so I know where it is being reproduced. I generally won't permit copies of the HTML FAQ to be posted on other sites, since the FAQ is constantly changing and I have no way of keeping it up to date if it's posted on many web sites. In any case, the Web gives you a simple alternative - just link to it atwww.qsl.net/zs1an/contesting_faq.html. You can even use frames to "embed" the FAQ within your web site without having to make a copy of it. One exception to this is if you use mirroring software which automatically updates your mirrored copy when changes are made to the original, in which case I will happily allow you to mirror the FAQ (but please ask first). If you have any questions please email me at zs1an@....

OM Seno & OM Ndut,
Saya senang banyak rekan yg menawarkan utk meguru/belajar utk contest & CQing dan saya sangat percaya yg berpengalaman pasti akan banyak memberikan arahan kepada greenhorn dan gak akan meledek (ini bahasa betawi lho di jateng artinya bisa lain). Itulah sebabnya saya juga gabung di YBDX Club ini.

Sementara ini utk kontes insya Allah saya jadi penonton saja di YE0X deh atau di YE2R kalo sempat nyambangi kesana.

tnx
hen

Saya sering dengar tuh yb0mwm, yb4ir buka warung...
Beberapa minggu yg lalu saat saya buka warung di 10m... Ketemu yb0mwm... Dulu waktu msh YC ketemunya om Uun... di 15m band. Kadang ketemu Tata YB0EIN...

Iya om Hen.. Gak apa biasakan buka warung.. Tidak akan ada yg meledek kita. Malah kawan2 membantu jika kita kesulitan mendengar.

Di YE0X om Hendro bisa ikut latihan DX contest.. Nanti akan di dampingi... Om Irsan sdh pernah di dampingi.. Bahkan om Irsan belajar mendengar dulu..

Kami di YE0X tdk pernah meledek siapapun yg mau belajar... Bahkan kami senang, jika bisa menciptakan mesin contest baru.

Dulu saya ikut dx contest pertama thn 2006... Di Grobogan cqwpx multi multi callsign YE2O... Bareng YB2DDT... Dan teman2 di lokal Grobogan.. Tidak ada yg meledek saya..

Pak Dragon malah mengajari bgm caranya menghadapi piled up..

Om Hen bisa gabung ke YE0X.. Tiap tahun pasti ikut cqww ssb contest...

Justru yang langka itu yang (masih) punya loyalitas, yang punya duit itu banyak.
Kuatirnya kalo OM Seno jadi anggota DPR jadinya terbalik - duitnya banyak, loyalitas ke ORARI turun.
Apa jadi anggota DPR mewakili konstituen masyarakat ORARI..??

Gak koq ya ? Jangan sedih...

hen

Judul: Re: Bls: Bls: Re: Bls: Bls: [YBDXC_News] nyontek

Ampun Pak Har........!

Kami tidak pya duit,
Yang kita pya cuman loyalitas aja,
Nanti klo aku sdh jadi anggota DPR deh...

:-((sedih)

24. What is a "little pistol"?
25. What sort of rig do I need to enter a contest?
26. What is "QSK", and do I need it?
27. What is the alternative to QSK?
28. What is a "fill"?
29. I have a limited budget. What should I spend it on?
30. How good does my CW have to be to enter a CW contest?
31. Why do contesters only exchange reports and other numbers, not name and QTH?
32. Why are reports in contests always send as "5NN"?
33. What are "cut numbers"?
34. What does it mean when I hear a station send "TEST ZS1AN" or "ZS1AN TEST" during a CW contest?
35. How should I reply to such a call?
36. What sort of reply should I expect, and what does it mean?
37. How do I send my report?
38. What then?
39. How do I ask you to repeat the zone or serial number?
40. What does it mean if I call a station and get the reply "DUP" or "B4"?
41. Could you give an example of a complete contest QSO?
42. What is a serial number?
43. What is a "pass"?
44. What is "running"?
45. What is "search and pounce"?
46. What is "Single Operator Two Radio" contesting?
47. What is a "Sprint"?
48. What is the exchange format for a Sprint?
49. What is a "QTC"?
50. What should I do before a contest?
51. What do I do after the contest?
52. What should I not do after the contest?
53. How long do I have to wait for the results?
54. What is a "busted call"?
55. What should I do if I'm not sure whether I copied a callsign correctly?
56. What is a "UBN report"?
57. What is "NIL"?
58. What are these unusual callsigns I hear in contests?
59. Should I QSL my contest QSOs?
60. What is the "World Radiosport Team Championships"?
61. How do I find out what contests are on?
62. Where can I get more information?
63. May I reproduce this FAQ?

Questions & Answers

1. Why take part in contests?

Everyone has their own reasons. Some of mine are: to sharpen my operating skills, to learn to get the most I can out of my equipment, to compete against my peers, to be a part of the community of contesters.

2. How is the winner determined?

The winner in each category is the station which gets the most points in that category.
3. How are points scored?
Each QSO will score a certain number of points. The number of points scored for a QSO may depend on the location of the station contacted - for example in the CQ Worldwide DX contest stations on the same continent as yourself count 1 point each, stations on a different continent count 3 points and contacts between two stations both located in North America count 2 points. In other contests, QSOs for certain stations may count for more points than QSOs with others - for example, in the ARRL 10m contest, contacts with stations holding Novice or Technician Plus class licenses count more than contacts with other license classes. In contests which allow you to work in different modes (for example, CW and SSB) the number of points may also depend on the mode.
4. What is a "multiplier"?
As well as getting points for each QSO, most contests allow you to get multipliers from certain QSOs. For example, you might get a multiplier for every different country (DXCC entity) you work on each band during the contest. Your final score for the contact will then be calculated by multiplying the total of all your QSO points by the number of multipliers you worked. For example, if you worked 100 stations at 2 points per QSO and 20 multipliers, then your total QSO points would be 100 x 2 = 200, and your multiplier is 20, so your final score would be 200 x 20 = 4000 points.
5. What sort of things count as multipliers?
That depends on the particular contest, so I will give a few examples:
* In the CQ Worldwide DX contest, countries (DXCC entities) and CQ zones both count as multipliers. So if you work 100 countries in 20 zones, you would have a total of 100 + 20 = 120 multipliers.
* In the IARU HF World Championships, ITU zones and IARU member society headquarter stations and IARU officials worked count as multipliers.
* In the ARRL International DX Contest, for stations in North America each country (DXCC entity) worked is a multiplier. For stations located outside North America, every American or Canadian state worked is a multiplier.
6. What is a DXCC Entity?
Entities correspond roughly to countries and administrative territories, but they also may be islands and even reefs if they meet criteria set by the ARRL, which administers the DX Century Club (DXCC) award and decides what qualifies as an "entity".
7. What is a CQ Zone?
The world is divided into 40 "CQ Zones" which are used as multipliers for some contests. Get further information and a map showing the different zones
at www.cq-amateur-radio.com/wazmain.html.
8. What bands can be used during contests?
That depends on the particular contest. Some contests are limited so a single band - for example, the ARRL 10m contest is (not surprisingly) for 10m only. Many contests allow operation on all the pre-WARC HF bands - that is: 160m, 80m, 40m, 20m, 15m and 10m. Other contests are for VHF bands only. However note that contesting is never permitted on the WARC bands: 30m, 17m and 12m. This is so that amateurs who do not enjoy contesting can take refuge on the WARC bands during contests.
9. What are the "WARC" bands?
The WARC bands are the 30m, 17m and 12m bands. They were named after the World Amateur Radio Conference in 1979 at which these bands were allocated for amateur use. The WARC bands may not be used for contesting.
10. Can I work the same station more than once?
Generally you can only work a station once on each band and mode that is allowed during the

contest. For example, in an SSB-only contest, you can only work a station once on each band. In a contest that allows both CW and SSB, you may be able to work a station twice on each band, once on CW and once on SSB. But read the rules - the ARRL Sweepstakes, for instance, allows only one contact per station, period.
11. What if I work a station more than once on the same band and mode?
If you claim points for both contacts, then you will lose both the points claimed and additional points as a penalty for your error. It is fine to work a station multiple times if you only claim points for one of the contacts (usually the first one), although this is a waste of time and won't do your score any good.
12. Why are there different entry categories?
Different contesters have different preferences and budgets. Some like to work on their own, others prefer to be part of a team. Some can afford high-power stations, others prefer to compete with a "barefoot" or QRP transceiver. By dividing a single contest into a number of different entry categories, all contesters can share the fun and contribute to the contest, while competing against similarly equipped stations in the same category.
13. What sorts of entrance categories are provided?
That depends on the contest, but the entrance categories for the CQ Worldwide DX contest are a good example of a fairly extensive list of possibilities:
* Single Operator High - a single operator, maximum power 1.5 KW, no DX alerting assistance (for example, DX cluster spots) allowed.
* Single Operator Low - a single operator, maximum power 100W, no DX alerting assistance allowed.
* Single Operator QRPp - a single operator, maximum power 5W, no DX alerting assistance allowed.
* Single Operator with DX Spotting Net (also called "Single Operator Assisted") - a single operator, maximum power 1.5 KW, passive use of spotting nets allowed.
* Multi-Operator, Single Transmitter (also called "multi single" or "MS" for short) - any number of operators, but only one transmitted signal allowed at any time. The additional operators will often be listening for new multipliers, and passing the information on to the one transmitter operator.
* Multi-Operator, Two Transmitter (also called "multi two") - Any number of operators, but only two transmitters. In CQWW, both transmitters may work any stations. In some other contests there are strict restrictions on what the second transmitter may do - for example, it may only be allowed to work new multipliers.
* Multi-Operator, Multi Transmitter (also called "multi multi") - Any number of operators, operating any number of stations, but with only one transmitted signal on each band at any time. In many cases a "multi-multi" station will have a dedicated transmitter for each of the contest bands.
Note that in CQWW, single operator entries can choose to be all-band, or only to work a single nominated band.
14. What do "SOLP", "SOHP", "SOAB", "SOSB", "M/S", "M/2" and "M/M" mean?
These are all abbreviations for contest entry categories:
* SOLP - Single Operator Low Power
* SOHP - Single Operator High Power
* SOAB - Single Operator all band
* SOSB - Single Operator Single Band, often includes the band, e.g. "SOSB/80" for a single band entry on 80m
* M/S - Multi/Single - Many operators but only a single transmitter
* M/2 - Multi/Two - Many operators with two transmitters
* M/M - Multi/Multi - Many operators with many transmitters
15. What is the "DX Cluster"?

It is a worldwide computer system on which DX stations are reported ("spotted"). It can be accessed via Packet Radio or on the Internet at www.dxsummit.com. You are only allowed to make use of DX Cluster spots if you are entered in an "assisted" class. No matter what class you are entered in you may not enter your own station into the DX cluster, this is called "self spotting" and is illegal in all contests. Don't do it. K1TTT will get you if you do.

16. What category should I enter?

If you don't have a kilowatt linear, then single operator low power is an attractive option since you don't have to compete with all the kilowatt-plus signals in the high power category. If you are an experienced QRP operator, then by all means choose QRPp instead, but if you are not a QRP operator then you may find this category a bit frustrating at first as you will have to learn how to make your QRP signal heard while learning the ropes of contesting at the same time. If your antenna system is limited then you may want to enter single-band or, like me, enter all-band anyway 'cause it's more fun and just live with a less competitive score.

17. Do I need a computerized logging program?

To make a serious attempt at an international contest, yes. Most of the smaller stations that enter a contest spend much of their time answering other stations that are calling CQ. This is known as "search and pounce" - you search for a station you need, and then pounce on it by replying to its call. However since you can only work a station once on each band and mode, before you reply to the CQ, you need to know whether you have worked the station before, and unless you have a photographic memory a computer logging program is by far the best way to do this. Contesters are a very friendly bunch, but calling the same station five or six times on the same band during a major international contest will test the patience of even the most saintly participant. Of course if you are fortunate enough to be even moderately rare DX (ZS for example), then you can get by with calling CQ yourself and waiting for a reply, log this on paper and later remove the
duplicates ("de-dup" the log) by hand. This is what I did in my first major contest, but after manually de-duping 475 QSOs, which took me a whole day, I went out and bought a logging program.

Note that for many of the smaller state or national contests, you can get by without a logging program as there are few enough entrants that you can remember who you have worked or look it up on your paper logs. These contests can be great fun and are excellent practise for the "big ones".

18. What logging program should I get?

There are many different, some commercial ones, which you have to pay for, and some which are free. Popular commercial programs include WriteLog for Windows, TRLog and SD. Writelog has a Windows graphical user interface. Although originally written for DOS, TRLog will also run under most versions of Windows. SD is available in two versions, one which runs character-mode under Windows, and one for DOS. Free contest logging software includes CT, also originally designed for DOS, and the open-source N1MM logger for Windows. You can read user reviews of these and other programs at www.eham.net.

19. What should I look for in a contest logging program?

First, be aware that logging programs come in two different flavours - general logging programs designed to maintain a normal station log, and specialized contest logging programs. The difference is that contest logging programs have contest scoring rules "built in" for major contests, so they will automatically keep track of your score, tell you whether you can work a particular station for the contest, and other contest-specific time saving features. Needless to say, you want a program designed for contest logging. Then make sure it supports the contests you want to enter, since having the contest programmed

into the software for you is a real time saver. If you don't know exactly which contests you want to enter, then at least see how many contests it supports. Also consider the ease of adding new contests yourself if you have to. Some programs, like WriteLog for Windows, require programming skills to do this while with others, like TRLog, you can add new contests by editing a configuration file. Also look for a program that can interface with the rig(s) you use or are likely to use. Having the logging program automatically pick up the band and mode your rig is set to is a great time saver and eliminates a common source of costly errors. Many logging programs can also turn your beam automatically for you to point at the station you are working, so if you want to use this feature then make sure the program is compatible with the rotator(s) you are using. Finally, make absolutely sure that the logging program can export the log file in the standard "Cabrillo" format, which is used to submit logs for most contests. All decent logging programs can interface to your rig's key jack to send CW automatically. This is a great feature as it allows you to send exchanges while capturing information into the logging program.

20. What is the "Cabrillo" log-file format?

Cabrillo is a standard format for submitting log files to contest organizers so they can be checked and scored by computer. Although different logging programs store the log files in different formats, most have the ability to export to Cabrillo format for submission.

21. How do I connect the computer to my rig?

There are a couple reasons to connect your computer to your rig. First, so it can send CW automatically and/or PSK31 or RTTY depending on the contest. Some logging programs also provide a "voice keyer" which allows you to record messages and then replay them over the air. This is great for calling "CQ" in a phone contest, for example. For this you need a computer soundcard interface with support for CW keying. A simple example can be found on my web site. The second reason is so the logging program can keep track of the band and mode of your transceiver. This may require a proprietary interface from the transceiver manufacturer. Many of these interfaces will also allow the computer to control the transceiver, so for example you can change frequency simply by typing the new frequency on your computer.

22. Do I need a beam to enter contests?

No but it will help significantly! I have spent my first year of contesting using only wire antennas, and I have learned a lot and had plenty of fun. I even made first place single operator in our local field day contest, which only allows single-element antennAs. But I know that I won't be even vaguely competitive in the major international contests until I have at least a triband beam. That said, I wouldn't have been competitive in my first year if I had stacked monoband beams on all bands, since I did not (and still don't) have enough experience. So there's still a lot to be gained from entering contests, even if you don't have a beam.

23. Do I need an antenna farm to enter contests?

No but it will help significantly :) Actually, at least one major contest - the CQ Worked All Prefixes (WPX) contest - now has an entry category where stations are limited to using a single triband beam on 10, 15 and 20m and single-element antennas on all other bands. So there is hope for us "little pistols".

24. What is a "little pistol"?

The high power multi-multi (multi operator multi transmitter) stations are often called "big guns". The "little pistols" are all us low power, single operator stations.

25. What sort of rig do I need to enter a contest?

Just the rig you use every day. That's not to say that some rigs aren't better for contesting than others, but just about any rig will do to start. If you plan to buy a new rig for contesting, then look for one with a "strong" receiver which can receive weak signals in the presence of very strong signals without overloading. The "blocking dynamic

range", "intermodulation dynamic range", "third order intercept" and "phase noise" specifications found in most technical reviews are important indicators of this.
Also, note that it is a good idea to have your commonly used functions such as filter selections, if width and shift (if available), notch filter, attenuator, RF gain, mode, and band switch available on the front panel, to avoid having to wade through a menu system in the heat of battle. This means that the compact transceivers designed primarily for mobile operation may not be the best choice in a contest. The ability to interface the rig to your computer so the logger can automatically enter the correct band and mode is another useful feature that is found on most modern rigs. A narrow (250 or 500 Hz) filter is almost essential for CW contests.
Amongst current production HF transceivers the Elecraft K2, Icom IC-756 Pro 2, Ten-Tec Orion and Yaesu Mk V FT-1000 MP are some of the best. However note that these are not beginner's radios (with the possible exception of the K2, but this must be constructed from a kit and so is best suited to someone with prior construction experience), so if you have no prior operating experience it may be better (not to mention cheaper) to start off with an entry-level or mid-range radio. There are also some excellent radios available at very reasonable prices second-hand, such as the ICOM IC-765, Kenwood TS-850S, Ten Tec Omni VI Plus and the Yaesu FT-990 as well as earlier versions of the FT-1000 (both the FT-1000D and the original 'MP are excellent radios) and the IC-756 Pro.
26. What is "QSK", and do I need it?
QSK or "full break-in keying" means that the transceiver switches into receive mode as soon as it has finished transmitting a Morse code dot or dash. This means that you can hear other stations operating on your receive frequency between the dots and dashes that you are transmitting. Whether or not to use QSK is a matter of personal preference. I often use QSK as a single operator station with only a single radio when I am calling CQ ("running") as it allows me to hear if another station calls me as I start another CQ call, so I can stop calling CQ and instead just send "?" to ask who is calling me. However when the band is noisy I often turn QSK off as it can be very fatiguing listening to band noise between every dot and dash! SO2R operators do not generally use full break-in keying, as while their "run" station is calling CQ, they will search-and-pouncing on another band, so the last thing they want is to hear the band noise from the "run" station
as well. Note that some station equipment such as linear amplifiers may not support full break-in, so please check your manuals before operating QSK.
27. What is the alternative to QSK?
The best alternative is to have your logging computer, which is also generating CW, switch the rig from receive to transmit and back using the external T/R control line found on most radios. Most logging programs will allow you to specify the delay between switching the rig to "transmit" and sending the first dot or dash, which avoids hot-switching accessories such as your linear amplifier. This way has the big advantage that your rig can be switched back to receive immediately the last character has been sent, without any unnecessary delays. (Note that for this to work correctly if you use a paddle to send "fills" then the paddle should also be connected to the computer, with the logging program generating the actual dots and dashes, so that the computer can switch the rig into transmit mode when sending a fill.)
If your rig does not provide an external T/R line then you can use "semi-break-in" keying. This means that the first transmitted dot or dash will switch the rig into transmit mode, and it will remain in transmit mode some period of time after each dot or dash is transmitted, in case there is another character on its way. This delay is usually adjusted so that it is just long enough to avoid switching back into receive mode between words. The disadvantages of semi-break-in keying as compared to computer-controlled T/R switching are (a) the necessary delay depends on keying speed, so you may have to adjust the delay when

working a slower operator; (b) it will result in an unnecessary delay before switching back to receive after the last dot or dash, as the rig does not know that there are no more characters coming (although the computer does!); and (c) many rigs do not support a configurable time delay between switching into transmit mode and sending the first character, which makes it difficult to avoid hot-switching your accessories. For these reasons, computer-controlled T/R switching is preferable.

28. What is a "fill"?

In a computerized CW contest station, the logging program will automatically generate most of the Morse code. However occasionally you may need to send something that is not pre-programmed into the logging program. This is known as a "fill". Some operators send fills by typing the text into the logging program, while others prefer to have a paddle handy to send fills manually. In this case the paddle must either be connected to the computer so the computer can generate the Morse code, or it must be connected to a keyer and the keying line from the keyer must be connected in parallel with the computer keying line so that both the computer and the paddle can key the rig. One of my pet gripes is that on some rigs with an internal keyer such as the Mark V FT-1000MP, even though there are two keying jacks it is not possible to configure one keying jack to operate through the internal keyer and the other to accept a "straight key" type input from the computer.

29. I have a limited budget. What should I spend it on?

Assuming you already have a basic station, then I would suggest you first purchase a computer (which does not have to be new, especially if you are happy to use DOS) for logging; then upgrade your antennas; then upgrade your rig if necessary; and save the linear for last since most contests have a 100W category. If your plan to enter CW contests, then you might want to invest in a narrow filter (maximum 500 Hz) for your existing rig in the meantime, even if you plan to buy a new contesting rig in a year or two. Other people's opinions will differ.

30. How good does my CW have to be to enter a CW contest?

That depends very much on the contest. For many of the "local" contests, i.e. state or national contests of small countries, you can get by with 10 w.p.m. or so. For the big international contests you probably need to be able to copy callsigns reliably at 20 w.p.m. (Note this is not the same as being able to ragchew at 20 w.p.m., copying callsigns is easier than ragchewing). Many of the QSOs in international contests take place at 25-30 w.p.m, but if you can copy callsigns at 20 w.p.m. then you should be able to get a faster callsign after a couple of tries. Practise makes perfect!

31. Why do contesters only exchange reports and other numbers, not name and QTH?

The object is to make as many QSOs as possible in a limited time, so "QSO rate" - the number of QSOs per hour - is (almost) everything. Hence all "unnecessary" parts of the QSO are omitted, leaving only the required essentials - call signs, 599 signal reports and a serial number or zone number if required by the rules. Be sure to check the rules to see what the required exchange is for each contest you enter.

32. Why are reports in contests always send as "5NN"?

Although the rules normally specify that the exchange must include a signal report, no-one actually cares much what the real signal report is. So to simplify things, contesters just send 599 reports even if the signal is barely intelligible. However the number "9" is replaced by the letter "N" because it is faster to send. "Shortened" numbers, like "N" instead of "9" are known as "cut numbers".

33. What are "cut numbers"?

In Morse code, all numbers consist of five dots and/or dashes, which takes a fairly long time to send. "Cut numbers" provide an alternative way of representing numbers using (mostly) shorter Morse sequences that are faster to sent. The actual sequences used are:

Number

Normal Morse
"Cut" number
Equivalent character
0 dah-dah-dah-dah-dah dah T
1 di-dah-dah-dah-dah di-dah A
2 di-di-dah-dah-dah di-di-dah U
3 di-di-di-dah-dah di-di-di-dah V
4 di-di-di-di-dah di-di-di-di-dah 4
5 di-di-di-di-dit dit E
6 dah-di-di-di-dit dah-di-di-di-dit 6
7 dah-dah-dit-dit-dit dah-dah-dit G
8 dah-dah-dah-di-dit dah-di-dit D
9 dah-dah-dah-dah-dit dah-dit N
Note that for all numbers except "5", the "cut" numbers simply replace all the dashes in the usual Morse representation of the number with a single dash. This is an easy way to remember the cut numbers. By far the most common in practise are "T" for "0" and "N" for "9", so you should be familiar with at least these.
34. What does it mean when I hear a station send "TEST ZS1AN" or "ZS1AN TEST" during a CW contest?
This is a shortened CQ call - in other words, the operator wants other stations (specifically stations participating in the contest) to reply to his or her call. "TEST" is short for "CONTEST", and a full CQ might be "CQ CONTEST DE ZS1AN K". However, in the spirit of omitting everything that is not absolutely essential, the "CQ" and "DE" are often omitted, leaving just "TEST ZS1AN" or sometimes "ZS1AN TEST".
35. How should I reply to such a call?
Just send your callsign - once if conditions are good, twice if they are poor. Don't send "ZS1AN ZS1AN DE N1XXX N1XXX N1XXX K" - I know who I am, and the timing of your reply will clue me in to the fact that you are replying to me, not to someone else. And better not to send your callsign too many times, a competent contest operator should get it first time. So instead you just send "N1XXX" and wait for the reply.
36. What sort of reply should I expect, and what does it mean?
Your callsign, an abbreviated signal report and a zone or serial number depending on the contest. For example, "N1XXX 5NN38". "5NN" is the abbreviated "599" report using "cut numbers", and "38" is in this case my CQ Zone, which is required for the CQ Worldwide DX contest. In other contests I might send you a serial number instead of my CQ Zone, for example "N1XXX 5NNTT5 TT5", which "TT5" stands for "005" again using the "cut number" equivalent for "0". In this case I have repeated the serial number, giving you a second chance if you missed it the fist time. Note that the leading zeros (or Ts using cut numbers) on the serial number or zone may not be required, so some contesters would send simply "N1XXX 5NN 5". Check the contest rules to see if they specify how many digits the serial number must contain, if not then it is perfectly acceptable to omit the leading zeros.
37. How do I send my report?
You can just send the report followed by the zone or serial number. For example, "599T5". Here you are sending the CQ zone "5" as "T5", with "T" replacing the "0". It is not necessary to send your callsign again if the station you called has got it right. If they got your callsign wrong, then you should send it again a couple of times with your report - for example, "N1XXX N1XXX 599T5".
38. What then?
I'll send "TU ZS1AN" - thank you for the QSO, and my callsign so if another station is

waiting for me then she/he can call immediately without having to wait for my next "TEST ZS1AN" call. Note that this is the end of the QSO - don't prolong it unless you missed some important information, like the zone or serial number. "MY NAME IS ANDREW ANDREW QTH CAPE TOWN CAPE TOWN PSE UR NAME ES QTH" won't go down too well in a major contest!
39. How do I ask you to repeat the zone or serial number?
"NR?" is sufficient, and I will respond with something like "NR 38 38 BK". Assuming you got it this time, you can just send "TU" (thank you) and move on.
40. What does it mean if I call a station and get the reply "DUP" or "B4"?
This means that the station you are calling has (or thinks he or she has) worked you already on this mode and band. "B4" stands for "before". Don't stop to argue about it - find another station to work and move on.
41. Could you give an example of a complete contest QSO?
Sure. Here ZS1AN is calling CQ ("running") and N1XXX responds. The callsign in the square brackets is the callsign of the station which transmits the information that follows. The callsign in the square brackets is not actually transmitted. This example is from CQWW:
[ZS1AN] TEST ZS1AN An abbreviation for "CQ CONTEST DE ZS1AN"
[N1XXX] N1XXX You respond with your callsign
[ZS1AN] N1XXX 5NN38 I send my exchange "599" and my CQ zone "38"
[N1XXX] 5NNT5 You reply with your "599" report and zone "05"
[ZS1AN] TU ZS1AN Thank you, and I'm waiting for the next caller so please don't reply
The following example shows what happens if the called station gets your callsign wrong:
[ZS1AN] TEST ZS1AN
[N1XXX] N1XXX
[ZS1AN] N1XX 5NN38 Oops I got your callsign wrong...
[N1XXX] N1XXX N1XXX 5NNT5 ...so you send it again with the exchange
[ZS1AN] N1XXX TU ZS1AN and I acknowledge the correction
42. What is a serial number?
Many contests require that, in addition to the signal report, you send a serial number as part of the report. This is simply a number, starting from 1, which you increment with each successive contact. Serial numbers are usually send as 3 or 4 digit numbers, with the letter "T" (a single dash) being sent in place of leading zeroes. For example, "T23" for "23". Most contests require that you use a single sequence on all bands if you are a single operator (so for example, if you send "23" to the last station you work on 20m, and then move to 15m you would send "24" to the first station worked there). Multi-operator stations are often required to use a separate sequence on each band. Check the rules to be sure.
43. What is a "pass"?
A "pass" is when you work a station on one band, and he or she asks you to give him/her a call on another band. This most often happens if you are a multiplier which the other station still needs on the other band. Should you accede to the request? Well, that is up to you. If the station making the request is a multiplier that you still need on the other band, then it may be worthwhile. But if you already have that country or zone on the other band, then the time end effort to change to the correct frequency probably isn't worth it for a single contact (which you may not get anyway if the path isn't working on the other band). Often the station requesting the "pass" is a multi-multi station, and they are just giving you the frequency that their operator on that band is already working, so it's no skin off their nose to change bands.
44. What is "running"?
When a station can stay on one frequency calling CQ and working station after station, this is known as "running". If you can do it then it is a very effective way to make lots of QSOs, although often they will be from the same area so you may not accumulate as many multipliers as you could if you were "searching and pouncing" on needed multipliers.

In order to "run" successfully, you need either to have a good signal, or to be a moderately rare multiplier, in order to attract sufficient callers and hold on to your frequency. You also need to be fairly competent at recognizing callsigns, whether CW or Phone, which may be buried in a pile-up. Nobody minds if you take 4 or 5 tries to figure out the callsign of a station when you are search and pouncing and the other station is calling CQ, since you can just listen to his or her CQ call 4 or 5 times without disturbing anyone, and only your own score will suffer. However if you call CQ and then take four or five attempts to get the callsign of the station coming back to you correct, then you had better be a very rare multiplier!

45. What is "search and pounce"?

Search and Pounce (S&P) means tuning around the band listening for stations calling CQ (or "TEST" as the case may be) and then calling them. It is the easiest way of operating for a beginner, as you can take your time to copy the callsign if necessary without any pressure (except the knowledge that time is points). Depending on band conditions, it may be worthwhile calling everyone you hear, or you may only want to call multipliers that you have not worked already. In either case, listen for the weaker signals that might get lost next to the strong stations (a narrow filter can do wonders), to make sure you don't miss out on a valuable multiplier just because there was a string local station 500 Hz away.

46. What is "Single Operator Two Radio" contesting?

Although it is not a separate entry class in most contests, some single-operator entrants will use two radios when they contest. This is known as "single operator two radio" or SO2R for short. Typically one radio is used to "run" on a band, while a separate radio - with separate antennas and amplifier if necessary - is used to "search and pounce" on a different band. (The bands need to be different to prevent the transmission from one radio from damaging the receiver in the other.) Most contest rules specify that a single operator may only transmit one signal at a time, so a SO2R operator must be careful to ensure that both radios cannot transmit simultaneously. Some sophisticated hardware is available from contesters like Bernie ZS4TX to interface the components of a SO2R station.

47. What is a "Sprint"?

A sprint is a contest where a station that initiates a QSO (for example, by calling "CQ") must change frequency immediately after the QSO, without working any other station on the same frequency. The reason for this is that in normal contests, high powered and rare stations can get a significant advantage by "running" - calling "CQ" and then working stations one after another on the same frequency, which can result in a very high QSO rate. By forcing the station to change frequency, the "sprint" format prevents stations from "running" and evens the odds for the smaller station. Note that the change frequency rule only applies to the station that initiated the qso; the other station is allowed to initiate a second QSO on the same frequency before he or she must also change frequency. Sprints are harder for beginners than normal contests, because you can't listen to several QSOs by the same station in order to get it's callsign right - you pretty much have to get the callsign right first time.

48. What is the exchange format for a Sprint?

Of course that depends on the rules for the particular contest, but generally you will find that both stations' callsigns are sent during the exchange. This is because the station that initiated the QSO is going to have to change frequency immediately after the QSO, so there is no chance for the other station to "wait around" to confirm the callsign. There is a convention that the station initiating the QSO sends his or her callsign before the rest of the exchange, while the station responding to the CQ sends his/her callsign after the exchange. This helps to indicate to other listening stations which of the two participants will stay on frequency (remember, only the station who responds to the CQ can remain on frequency) and so can be called next. For example, the following exchange is taken from the

EU (European) Sprint, where the exchange must consist of: your callsign, the other station's callsign, a serial number and the operator's name or
nickname. Note that a signal report is not required. My thanks to Dave Lawley G4BUO for the following example:
[I2UIY] CQ CQ I2UIY I2UIY TEST I2UIY calls CQ
[G4BUO] G4BUO G4BUO replies
[I2UIY] G4BUO I2UIY 013 PAOLO I2UIY sends his exchange. Note that he sends his callsign before the rest of the exchange to indicate that he is the initiator
[G4BUO] I2UIY 008 DAVE G4BUO G4BUO sends his exchange, sending his callsign at the end to indicate that he will remain on frequency
[I2UIY] R I2UIY acknowledges receipt ("R" means "Received everything you sent correctly") and must now change frequency
[OK2FD] OK2FD OK2FD heard the end of the exchange, so he knows that G4BUO is now on frequency
[G4BUO] OK2FD G4BUO 009 DAVE G4BUO sends his exchange
[OK2FD] G4BUO 011 KAREL OK2FD OK2FD sends his exchange, ending with his callsign - he now temporarily "owns" the frequency
[G4BUO] R G4BUO acknowledges and changes frequency
[OK2FD] TEST OK2FD TEST Nobody calls OK2FD, so he calls CQ
[DL6RAI] DL6RAI DL6RAI answers the CQ
[OK2FD] DL6RAI OK2FD 012 KAREL OK2FD sends his callsign before the exchange to indicate that he will be leaving the frequency
[DL6RAI] OK2FD 003 BEN DL6RAI DL6RAI sends his callsign after the exchange as he now "owns" the frequency
[OK2FD] R OK2FD acknowledges and moves to another frequency
As you can see, it is an intricate dance. Careful practice is called for if you are to avoid treading on your partner's toes!
49. What is a "QTC"?
Some contests - notably the European HF DX Contest - allow stations to exchange information about contacts they have made with other stations for additional points. These reports of contacts with other stations are known as QTCs.
50. What should I do before a contest?
Read the contest rules and decide which category you will enter. Test your station and antennas. Have a look at the expected propagation and draw up an operating schedule showing when you expect to operate on which bands, and where your beam will be pointing. (This schedule will change during the contest as conditions unfold, but you should at least have an initial plan.) Stock up on fast food - microwave meals are my favourite. Set up your computer, check that the logging program is interfacing with the PC correctly, and ensure that you select the right contest in the logging program. Try to get as much sleep before the contest starts as possible so you can work long hours during the contest itself. Feed your pets. Read the contest rules (again) and make sure you understand the exchange format, multipliers, sequence numbers, entry categories, power restrictions etc. Accurately set your computer clock so the QSOs will be logged at the correct time.
51. What do I do after the contest?
In order to be listed in the results, you will need to submit your log to the contest organizers. Most of the major contests these days prefer electronic logs, usually in Cabrillo format, as they can be automatically checked and scored. Smaller (e.g. national) contests may prefer paper logs. In most cases if you have not used computer logging then paper logs will be accepted. However many contests will not accept paper logs printed by a computer logging program. After all if you have the log on computer then they don't want to have to type it in again. The address for submitting your logs can be found in the contest

rules.
52. What should I not do after the contest?
"Massaging your log" - for example, checking callsigns in a callsign database and then correcting those found to be in error - is generally frowned upon by contesters, although it may not be strictly illegal.
53. How long do I have to wait for the results?
The official results often take a couple of months. However there is an unofficial email reflector called "3830" on which contesters post their claimed scores. To subscribe, send an email to 3830-request@contesting.com with the word "subscribe" in the body of the message (not the subject line). You can post your claimed score directly to the group by sending an email to 3830@..., but it is more convenient to submit scores via the web form at http://www.hornucopia.com/3830score/. This also ensures that the score will be posted in a format which makes it easy for it to be included in the regular summaries which are posted to the mail reflector.
54. What is a "busted call"?
A "busted call" is a call which you captured incorrectly during the contest. You will generally lose points for busted calls or incorrectly logged serial numbers.
55. What should I do if I'm not sure whether I copied a callsign correctly?
If you are responding to a CQ, then wait for the station to call CQ again so you can copy the call correctly. If you are cvalling CQ, then send "CL?" and the other station will repeat his or her callsign. If conditions are poor, then you may have to ask a couple of times, but this is much better than getting the callsign wrong - which will cost you penalty points for the contest - or not entering the QSO in your log file, which is very unfair to the other station and will cost him or her penalty points. Note that although some programs (e.g. WriteLog) have the ability to mark a QSO as "unclaimed",
the Cabrillo format used to submit contest entries has no such mechanism, so QSOs marked as "unclaimed" in the log file will just not be included in the Cabrillo file. It is very bad karma to do this unless you are absolutely sure that the other station knows they are not in your log, otherwise they might submit the QSO and be penalised for it.
56. What is a "UBN report"?
It is a report from the contest committee showing errors and possible errors in the log you submitted for a contest. The main errors are abbreviated as follows:
* U (Unique callsign) - you claimed credit for a callsign which nobody else claimed credit for. This may indicate that you made a mistake with the callsign. However since it is also possible that you did really work a unique station, you generally won't lose any points for this.
* B (Bad callsign) - you claimed credit for a callsign that definitely wasn't in the contest. This may mean that the callsign is illegal or has not been allocated, although there are many other possible reasons as well. You will lose credit for this contact and will probably also be penalized some further points.
* N (Not in log) - you claimed credit for a callsign which was active in the contest, but you are not in his or her log. You will lose the points for this contact and will probably also be penalized some further points. (This is why it is so important to report all the QSOs you make during a contest.
The report get its name from the abbreviations U, B and N used for these errors.
57. What is "NIL"?
NIL is an abbreviation for Not In Log, meaning you have claimed to have worked a particular callsign, but you are not in the other station's log.
58. What are these unusual callsigns I hear in contests?
You hear unusual callsigns during contests for two reasons. First, some administrations reserve special short or unusual callsign sequences specifically for use during contests.

For example, in Britain callsigns with a single letter in the suffix like "M5A" or "GM1A" are reserved for contest use. In France, the prefix "TM" is allocated to contest stations rather than the more usual "F" prefix, for example "TM6X". A short callsign gives the station an advantage because it is faster to send and less likely to be copied incorrectly. Unusual prefixes are attractive because in some contests like the CQ Worldwide WPX (Worked all Prefixes) contest, each unique prefix counts as a multiplier, so the more unusual prefixes will attract more calls. That happens in other contests as well. The first time I heard a "TM" station I was convinced I had found some rare DX, and was somewhat disappointed when I discovered it was located in mainland France.

Some countries have even issued callsigns without a digit following the national identifier. For example, the callsign "D4B" is issued by Cape Verde which has the national identifier "D4", so there is no digit following the national identifier - the "4" is part of the national identifier. However Article 19 of the ITU Radio Regulations was amended by the World Radio Conference 2003 (WRC-03) making it mandatory to have a digit following the national identifier, so it is likely that such callsigns will be phased out.

Another reason for unusual prefixes is that many stations operate temporarily from a foreign country, usually to make themselves more sought after in the contest. For example, American stations are two a penny in most contests, but an American visiting the Bahamas is an attractive multiplier. Operators visiting a foreign country may be allocated a "normal" callsign for the country they are visiting, but will often use their home call either preceded or followed by the country (and possibly region) prefix of the country they are visiting. For example, KD4D operating from South Africa would use the callsign ZS/KD4D, while the same station operating from Canada would use a callsign like KD4D/VE3. Note that the Morse code for the "/" symbol is "dah-di-di-dah-dit", and it is pronounced "stroke" on phone.

Unfortunately there is no standard as to whether the national identifier of the country being visited should precede or follow the home call. The CEPT agreement, which is the largest reciprocal licensing arrangement covering Europe, North America and some other countries, specifies that the national prefix should precede the home call. However other reciprocal agreements, like the one between the United States and Canada, specify that the national identifier should follow the home call and even within the CEPT agreement there is one exception (Peru).

Also note that following WRC-03 it is now legal for amateur callsigns to have a suffix of up to four characters (even more for special event stations), and the suffix may use both letters and digits provided that the last character is a digit. So in future contests you may hear callsigns like "ZS1234A" or even "22222A"! The latter would be from Britain, which has been allocated the national prefix "2".

So the best advice on callsigns is to expect the unexpected, and log each callsign exactly as received.

59. Should I QSL my contest QSOs?

If you are using Logbook of the World then by all means. If you are using QSL cards then this is likely to take a lot of time and money due to the number of contacts made in a contest. My policy is that in contests I only QSL on request, which normally means the other station sending me a direct QSL with a self-addressed envelope. This differs from my normal non-contest policy which is to QSL every contact via the bureau unless otherwise agreed. But whatever you decide, please don't enquire about QSLs on air during the contest. If you work a station you need, then QSL direct with a dollar bill or IRC after the contest.

60. What is the "World Radiosport Team Championships"?

The World Radiosport Team Championship (WRTC) is the "Olympics of Amateur Radio". It brings the top two-person contesting teams from around the world together in the same geographic

area and with similar antennas and "anonymous" callsigns in order to eliminate some of the extraneous variables (such as propagation and who has the most friends) and emphasize the skill of the teams. Each team consists of two operators from the same country, so there is a "national" dimension to the contest, although the participating teams are decided in part on previous contest results so there may be m any teams representing the same country in the championship. It was first held as part of the Goodwill Games in Seattle (1990). Since then the WRTC has been held in San Francisco (1996), Slovenia (2000) and Finland (2002). The winning team in WRTC 2002 was Jeffrey Steinman N5TJ and Daniel Street K1TO from the USA. The next WRTC will be held in Brazil (2006). The WRTC
is a sub-contest that is held within the IARU HF World Championships, which gives the (relatively few) teams competing in the WRTC a large number of contest stations to contact. The rules for WRTC teams are somewhat different from those for other participants in the IARU International HF World Championship, and they are usually restricted to 100 W and to a triband beam for 20, 15, and 10 metres and a wire antenna for the low bands.
61. How do I find out what contests are on?
Visit the Contest Calendar website maintained by Bruce Horn WA7BNM.
62. Where can I get more information?
See the following websites:
* Contesting.com
* Contesting.info
* SM3CER Contest Service
* RadioContesting.net
* RSGB HF Contesting Guide
63. May I reproduce this FAQ?
Only with my permission. However I am generally happy to give permission for it to be reproduced in printed format, or as part of a club newsletter, or any other non-Web format. I just want you to ask so I know where it is being reproduced. I generally won't permit copies of the HTML FAQ to be posted on other sites, since the FAQ is constantly changing and I have no way of keeping it up to date if it's posted on many web sites. In any case, the Web gives you a simple alternative - just link to it
atwww.qsl.net/zs1an/contesting_faq.html. You can even use frames to "embed" the FAQ within your web site without having to make a copy of it. One exception to this is if you use mirroring software which automatically updates your mirrored copy when changes are made to the original, in which case I will happily allow you to mirror the FAQ (but please ask first). If you have any questions please email me at zs1an@....

Ahh......
Bisa aja OM Hendro,

Kalo aku jadi anggota DPR nanti,
Yg aku masukkan salah satu agendanya adalah pembangunan PUSAT TRAINING AMATIR RADIO INDONESIA, berikut fasiltas dan prasarana-nya,
Bukan utk pembangunan gedung atlit aahhh, kebanyakan duitnya.
Boros.....
Aku anggarkan 10 M aja cukup utk beli 7800 - 20 biji, antena, gedung, pasang antenanya ex-YC0LOW, mess, dapur, tempat solat, kapel,pure dll

Saya jamin anggota kita mesti tambah banyak deh...

Justru yang langka itu yang (masih) punya loyalitas, yang punya duit itu banyak.
Kuatirnya kalo OM Seno jadi anggota DPR jadinya terbalik - duitnya banyak, loyalitas ke ORARI turun.
Apa jadi anggota DPR mewakili konstituen masyarakat ORARI..??

Gak koq ya ? Jangan sedih...

Iya, betul berarti OM Seno konstituennya = masyarakat ORARI ya ?

Mata pelajaran yg pasti akan diajarkan di Pusat Training itu pasti :
- Basic Contesting & DXing/CQing

- QRP DXing, How to increase the transmitted signal without QRO
- Band Plan

Ini khan berdasarkan topik di milis (buka warung & iwak-iwak). ;))

2745. Contes

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-05 07:45:38 UTC
From: Annes Samah
Topic: 2745 Message: 2745

Saya rasanya ingin juga untuk mengikuti DX contest, namun sarana penunjang sayanya tidak begitu baik. bagaimana ya, saya tidak mengharapkan jadi pemenang, hitung cari pengalaman contest saja. Dulupun saya pernah juga ikuti All Asia Contes, but got for nathing. Begitu juga dengan contest2 lainnya. Sarannya dari rekan2 saya harapkan. saya berminat sekali juga untuk ikut contest. Radio saya TS 680 S, power 100 watts, dan G5RV (buatan sendiri) 15 meters high. Selain itu saya juga mempergunakan automatic antenna tuner
AT - 250. Mohonsaran dong dari rekan2 berpengalam, namun motto saya tidak mengharapkan Champion. Terima kasih dan salam dan sukses selalu buat rekan2 anggota semua.

Thanks & regards,
Annes Samah (YB4TRY)

Di sela-sela stress membahas iwak-iwak kita lupakan sejenak deh........

Coba baca dibawa ini....
Ketawa ya ...., janji lho ....

"Cerita dibalik Beri Hitam alias Black Berry BB"

Untung ya Blackberry dibikin oleh perusahaan Kanada, jd disingkatnya BB. coba kl dibikin o/ perusahaan Indonesia, namanya jd Beri Hitam or BH

Agak gmn gitu ga sih kl punya Beri Hitam trus ditanya "loe pake BH ga?" "pin BH loe brp?" "BH loe seri apa?" "BH loe touch screen ya?"

Agak lbh ngenes kl ada cewek yg jawab "sori, gw ga pake BH" "BH gw qwerty" "BH gw ketinggalan di rumah" "BH gw lemot nih"

Apalagi kl lg dinner sama camer. ntar diprotes pacar: "sayang, jgn main BH terus dong. kita kan lg makan. taro BH-nya di meja"

"BH gw kok lambat bgt ya?!" trus dijawab "isinya kepenuhan, kaliii" apa ga makin berabe kl begitu?!

"eh, BH loe udah dipasangin anti-spy, blm?"
"buat apa? ga penting jg gitu orang2 ngintip isi BH gw".

Wkwkwkwkwk...........!

Expedition Leaderboards: Good or Bad?
Posted on June 5, 2012 by Michael Wells
Expedition pileups and Club Log Leaderboards
An open letter from Michael, G7VJR (creator of Club Log)
In recent years, Club Log charts have become a new option for expeditions above a certain size to engage with the Dxing community while they're on the air. As well as the essentials for log search and some statistical insights, Club Log is the home of the expedition leaderboards feature, which allows DXers to be ranked by the slots they have worked and adds an element of competition.
As a Dxer myself, I have of course seen the amplifying effect the leaderboards have on expedition activity and band/mode slot chasing. As I enjoy expeditioning too, I've experienced the lift in the size of pileups when using the leaderboards from the hot end. There's no doubt it changes the game.
Some criticisms have been made which I want to discuss openly in this letter. These are my personal thoughts and I hope this debate can carry on more widely, too.
Slots and uniques – the balancing act
An objection I have heard said is that the leaderboards are encouraging "big guns" to dominate Dxpedition pileups. Leaderboards promote chasing band/mode slots, and expeditions want to make a lot of QSOs. Working the same big signals on many slots is a possibility. There are total of 26 slots for the main 9 HF bands, so in theory an expedition can accumulate 100,000 QSOs while actually working fewer than 4000 hams. I hope I speak for most of us if I say that this would be terrible news for the hobby and the future of Dxing, if it ever actually happened. At the risk of stating the obvious, the smaller the team, the rarer the entity and the shorter the activation, the less appropriate it is for the expedition to go for slot chasing. The balance has to be just right.
Expedition teams are tenacious about being on the right band at the right time. It is they that determine when they would like to start exploring new band/modes. We all know that the leaderboard will put pressure on Dxers and tempt dxpeditions to activate and work more slots, respectively. I do not think that the leaderboard is the only factor though: only if the peak bands are abandoned is there a problem. Expeditions should be given full credit when they take charge of the game.
Let's make an example of T32C: there was an operator on every band that was open around the clock (sometimes two per band) so while the exotic slots on edge bands were being activated, a key slot such as 17M SSB was always ready and waiting for a small station to make his or her first ever QSO.
In fact, T32C worked more unique calls than any other expedition (as well as the biggest total number of QSOs). To my knowledge, no-one felt excluded by the use of the leaderboards since there was always an opportunity – getting easier every day – to come and work T32C on a peak band. Don't forget, the initial pile ups leave behind evidence of the propagation, too, which is enormously helpful for smaller stations to target their efforts.
Population centres and 'walls'
The second most common objection I have heard is that when a rare expedition is geographically close to a major population centre, it may be easier for the expedition to

work more local hams (and activate more slots) than work DX hams on marginal paths and marginal bands. The objection is that the leaderboards increase the size of the ‘wall’ between regions.
I’m sure this effect exists. It is certainly there whether Club Log is involved or not. Propagation for DX paths exists in short windows, and of course at these times there will be demand from anywhere that the band is open – including loud locals. Expeditions can choose again now: work the loudest stations or work the DX?
There is no reason to believe that a highly skilled expedition team will ignore DX openings. It shouldn’t be surprising that the expedition will also activate other band/mode slots – they deserve their pile ups and there is no down side to doing so, if they can service them at the same time as the peak bands.
Operating standards
The pressure on expeditions is intense and the enjoyment on both sides of the QSO is badly affected by deliberate QRM, caused by frustration and impatience, the DX cluster and countless other non-radio influences. Exemplary dxpeditions and courteous Dxers with capable stations are being mixed into an environment fraught with malicious QRM that can spin out of control. They are not the ones to blame.
I realise that slot chasing may be contributing to bigger pile ups. Does this mean we should give up, repeal innovations like Club Log leaderboards, or remove complications like band/mode slots in favour of only band slots?
I don’t feel it is right to remove or dilute any part of the Club Log leaderboards, nor try to rule out advanced awards that require many slots to be worked, since that would be at the expense of those who deserve it the least.
What to do?
Firstly, let’s start measuring the reach of expeditions. Club Log now provides a leaderboard of expeditions, ranked firstly by unique QSOs, and secondly by total QSOs. You can see this leaderboard here:
http://www.clublog.org/uniques.php
This page also answers the time old question of how many Dxers are chasing expeditions, using the Club Log database to arrive at an estimate.
The next step is to encourage unique callsigns more. In short, there will be a new award for expeditions that work uniques and prioritise QSOs with all stations, not only slot chasers. Please look out for news of this award. Club Log is sponsoring part of the prize.
Finally, the leaderboards will become optional (at the discretion of the expedition managers). Other features such as propagation feedback, statistics and OQRS can still be used while leaving the leaderboard page out. I see no reason to reserve this choice for myself – let the expedition choose!
Thank you to everyone who has taken the trouble to write to me with detailed thoughts.
73,
Michael G7VJR

Dear IOTA Chasers & DXers,
YEØM operation already scheduled by Team from 6 until 9 July 2012
on 2 throught 160 meters with CW, SSB and RTTY.
The TEAM:
YBØAA,YBØAZ,YBØHD,YBØJS,YEØYE,YBØAKM,YBØBUI,YBØECT,YBØKVN,
YCØKVM,YCØLOW,YCØLLY,YCØMXV,YCØRAN,YCØTSU,YCØVKI,YDØRVT,
YB1PR,YB1MH,YB1CCF,YB1GJS,YB1KAR,YC1CDV,YC1KAF,
YD1JZ,YD1GCL,YD1LUX,YD1MRI,YD1ORZ,YD1XUH.
QSLing:
All QSL will be handled by our QSL Manager: OM Jel - YB1GJS.
More details about Direct / Buro / LoTW will be available during
the course of DX-pedition.
YEØM operation supporters:
The Team are pleased to receive donation from all amateur radio around the world
and also the company or other societies who would like to support this operation.
Curently supporters until now:
1. Media Groups: MetroTV and Media Indonesia,
2. Personal donation from the team members.
If you interest to support us, please contact Our Team Finance Manager
OM Wis - YBØAZ via yb0az@...
License:
The team already received the license from the Ministry of Communication
and Information Technlogy Republic of Indonesia.
For further information please email us YE0M.OC177@yahoo.com
or visit our web http://www.ye0m.com

DX Spots for Needed DXCCs
Using this tool, you can search the DX Cluster for spots related to DXCCs that you have not yet worked. There are 11,883,987 spots in the database up to 6th June, 2012, so the search is limited to the last 30 days or 300 results.

2761. Cut numbers pada CW contest

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-07 01:00:21 UTC
From: Donny
Topic: 2761 Message: 2761

Jim K8MR's guidelines for using them...if you must:

1. Avoid using them except for numbers that are already known (such as a CQ zone) or sent repeatedly (such as RST or when sending power in the ARRL DX contests).

2. Leading T's (zeros) in serial numbers are OK but not for more than three total digits.

3. Don't ever mix cut numbers and letters: For example, ENNA for the grid square EN91 is very bad form.

Semoga membantu bagi yang ingin berkancah di contest international

2762. DXNL 1783 - Jun 6, 2012

Yahoo group: YBDXC_News (2012-06 — 2012-12)

DXNL 1783 - Jun 6, 2012
DX Newsletter

5H, TANZANIA
Chas,NK8O/VE3ISD, is visiting to Mwanza on Lake Victoria for several years now but this time he plans his first amateur radio operation in CW signing 5H9CP with a KX3 (QRP) from Jun 11-22. The antenna design will depend on the local trees. Scheduled times and frequencies will be released on QRZ.com. The hobby comes only after his obligations at the "Nyakato Health Center", of course. QSL via NK8O.

A5, BHUTAN
JA1JQY (A52JY), JK1EBA (A52BA), JA3MCA (A52MA), JA1KJW (A52KJ), and JA8VE (A52VE) will be QRV in SSB/CW/RTTY on 160m-6m from a hotel at 3000m altitude in the capital Thimpu from Jun 6-14. A beacon will be set up to run continuously on 50.125 MHz. QSLs via homecalls.

A6, UNITED ARAB EMIRATES
Here is a small contribution from Ulli,DL9WVM, for the DXNL:
I am going to visit my children again and will stay in Dubai from Jun 10-30. So far I have made nearly 25.000 QSOs from this location and will try to be QRV again on 80-10m as much as possible. Inquiries about 6m are useless since operating on 6m is not allowed in the UAE. I also try to activate WFF A6FF-004 (Mushrif National Park [and buffer zone]) once which is virtually "across the road" in Mirdif. The are is completely fenced and used for a recreation and amusement park. There is plenty space for parking and I will try to become QRV as A6/DL9WVM/m from there. However, this depends on whether I can find a hidden spot of shade (do not attract too much attention!). Despite air conditioning it is impossible to endure an hour in the car, at temperatures between 40 and 50 degrees Celsius in the shade :-)
If Abdullah,A61Q, is available (and willing), then we would investigate whether it is possible to activate Dibbah rock in the Gulf of Oman in some way. Based on his first recordings this 'island' seems to be difficult to access and would then be the only remaining place that counts for AS-124. After the construction of the new breakwater in the harbor lying opposite to it, the distance to Shark Island is less than 300m. If we can not report positive results concerning Dibbah rock to Roger Ballister there is a risk that AS-124 could be removed from the IOTA list.
If you like to arrange a sked with me please contact me on Skype. I am available in Dubai both via VoIP and chatting. Simply send a contact request which I can answer. If anyone plans to obtain a license for the United Arab Emirates you can contact me as well and I will be happy to support the person. Licenses are NOT a problem to obtain in principle. The Emirates Amateur Radio Society (EARS) was put in charge by the TRA

(the local licensing authority) to issue the licenses, which in general is no problem.

CO, CUBA, NA-015
The "Radio Club Las Tunas" wil join the ARRL June VHF QSO Party in the "limited multi operator" class signing T48K (Loc FL10mw) on Jun 9-11. On 6m they will use a 5-ele-antenna by Tonna with 100 watts and on 2m they will run 50 watts into a homebrew 9-ele-quad. They hope for a first contact between Las Tunas and USA. QSL via DK1WI.
See also: http://www.arrl.org/june-vhf-qso-party

CT, PORTUGAL
Members of the "Amateur Radio Association of the District of Leiria" (ARAL) plan to hit the airwaves as CS5FAT on all bands from the Cova da Iria at the shrine of Fatima from Jun 10-13. Until October all amateurs are invited to become active from the shrine of Fatima each month from the 10th to 13th or by special appointment. QSL via CT6ARL.
See also: http://cs5fat.blogspot.pt

CY0, SABLE ISLAND (QRT)
a wounded animal of a protected migratory bird species has been found at the antenna system of CY0/VE1AWW within the nature reserve. This is the preliminary end of CY0/VE1AWW.

EA, SPAIN
ED3CW (QSL via EB3CW), ED5ATK (QSL via EA5ATK), ED5DM (QSL via EA5DM), ED5DWS (QSL via EA5DWS), ED5DY (QSL via EA5DY), ED5FL (QSL via EA5FL), ED5HAB (QSL via EA5HAB), ED5JC (QSL via EC5JC), ED5KB (QSL via EA5KB), ED6QY (QSL via EA6QY) and ED8DD (QSL via EA8DD) want to enjoy pile-ups from Jun 5-24 on the occasion of the F1 Grand Prix at Valencia. They have issued also a special award program. See: http://www.f1award.com

F, FRANCE
From Jun 3-17 the "Association des Radio Amateurs de la Sarthe" is using the special call TM24H for the 60th time on the occasion of the 24-hours race at Le Mans. QSL via F6KFI.

FS, ST MARTIN, NA-105
John,FS/K9EL, plans to work in holiday style from St. Martin (NA-105, DIFO FS-001, WLOTA 0383, Grid Loc FK88) from June 8-24. He uses an IC7000, a vertical for 80m-10m, a 3-ele-yagi for 6m and in CW, SSB and RTTY. He has also a power amp available for 6m. Skeds are possible via e-mail to john@.... QSL via homecall, LoTW or club log.
See: http://www.k9el.com and http://www.clublog.org/logsearch/FS/K9EL

HC, ECUADOR
Rick,NE8Z, will show up on the bands as HC1MD from Tumbaco in CW, SSB and RTTY on 40m-10m (possibly 6m) from Jun 7-14. QSL via K8LJG.

I, ITALY
ARAS Italia (IQ9DM) is celebrating the 40th anniversary of the maiden flight of the long-distance reconnaissance aircraft Breguet Atlantic

BR 1150 by using the special callsign II9AS from Jun 6-9. They will be QRV from the base of Sigonella in Catania on Jun 9, together with ARI. Operation will take place with several stations in all modes on 40-10m. QSL via IT9JPW, unfortunately only direct.
See also: http://www.assoradiomarinai.it

IS0, SARDINIA, EU-024
Patrick,IM0/ON7ARQ, will be QRV from Sardinia on Jun 12-26. He will join the All Asian DX Contest from Isola di San Pietro in the southwest of Sardinia.

KL7, ALASKA, NA-039
Jeff,KL2HD, is staying on Adak Island (NA-039) until June 8. He is a biologist and spends most of his time on the research vessel MS Tiglax. You can work him in SSB on 20m and 17m between 0400-0800 UTC.
QSL preferably via LoTW, but via bureau is ok as well.

ON, BELGIUM
Robert,ON4LRG, Janny,ON5PO, Paul,ON6DP, Didier,ON6YH, Pierre,ON7PC, and Jean,ON7ZM, will show up on HF signing OP0P/p or homecalls/p from the St Fontaine castle (WCA ON-00496, BCA LG-095) on Jun 10, 0600-1000 UTC.
QSLs for OP0P via ON6DP, LoTW and eQSL.

On the occasion of Gerhard Mercator's 500th birthday the special event station ON500MERCATOR will be put on the air. With his large world map from 1569 (Nova et orbis terrae aucta descriptio ad usum navigantium) Mercator acquired world fame. The eponymous projection was developed by him and is important for the maritime and aviation because of its conformal projection. QSL via ON7KO. See also: http://www.snw.uba.be

SM, SWEDEN
Each year from May 15 to June 15, Ove,SM0PSO, celebrates his new life with a donor heart by using the special callsign SF0530COH.
QSL via homecall. See also: http://www.sm0pso.com

SV, GREECE
Mike,SV1RK, and Stavros,SV3CJU, will be QRV as J48SAI from the island of Sapienza (EU-158, LH GRE116, WLOTA 1471, Loc KM06us) working in CW, SSB and RTTY on HF and 6m from Jun 8-10. QSL via SV1RK, LoTW.

UA, EUROPEAN RUSSIA
Members of the clubstation RK3VWA are active as R1150V until Aug 31 to celebrate the 1150th anniversary of Russian statehood.
See also: http://www.r3v.ru

The special event station R200V is activated from various historical sites in the Smolensk and Moscow regions between June and September to remember the 200th anniversary of the French invasion.
QSL via RK3LO, LoTW and eQSL.

The special event station R200BS remembers 200th anniversary of the Battle of Borodino until July 31. QSL via RK3CQ.

The Russian section of the "European PSK Club" is using the special callsigns R73EPC and R55EPC on all bands in B(Q)PSK31 on all bands from Jun 1-30. QSLs for R73EPC via RK3DSW, for R55EPC via R9CBA.
See also: http://www.epc-ru.ru

VE, CANADA
CJ3 and CK3 prefixes are allowed from Jun 12-26 on the occasion of the 100th anniversary of the city of Kitchener in Ontario.
QSL routes will be announced in the QSOs.

VK, AUSTRALIA
Organized amateur radio service was introduced in Queensland 100 years ago under the auspices of the "Wireless Institute of Australia". Radio amateurs celebrate this with the special callsign VK100WIQ between June 1 and July 31. A special award program was established, too.
QSL via bureau. See also: http://www.wia.org.au

VP2M, MONTSERRAT, NA-103
John,KB4CRT (SMIRK 3932), announced to become active as VP2MRT from Gingerbread Hill in St. Peters Parish (NA-103, WLOTA 1475, Loc FK86VS) working in SSB, some CW and maybe also PSK on 80m-2m from Jun 6-12. He plans to join the upcoming "ARRL June VHF QSO Party" (Jun 9-11), too.
John will listen particularly for AS and OC.
Unfortunately QSLs only direct via KB4CRT, LoTW.

Graham,M0AEP, goes to Montserrat (NA-103) as well and will sign VP2MDD in SSB and CW with a focus on 12m/10m/6m between June 7 and August 6.
QSL via homecall.

W, UNITED STATES
Andy,N8OFS (SMIRK 6737), will take part in the ARRL June VHF QSO Party working portable (WW Loc EN91) in FM on 52.525 MHz.
QSLs unfortunately only direct or via eQSL.

Mike,W2GR, will use the special callsign N2W in CW, SSB and RTTY on 40m-10m from Jun 10-24. The occasion is the first attempt to cross the Niagara Falls on a rope by Nik Wallenda on June 15. QSL via W2GR.

ZD7, ST HELENA, AF-022
Bruce,ZD7VC, is usually working on 20m/17m/15m/6m from 1700-2200 UTC.
QSLs unfortunately only direct.

VP9PN log: The log of the VK9PN DXpedition is online now.

SILENT KEYS: Joel Oulie,F6FHP, has died. The EME community and all radio friends will miss him sorely. Steve Mendelsohn,W2ML, who was elected into the CQ Amateur Radio Hall of Fame only recently, died on May 23 from cancer. Bill Wells,VK4UA, passed away on May 30 at the age of 89.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost them, but grateful that we could get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
    http://www.sotawatch.org

    Detailed information about current VHF activities can be found on the
    VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 9/10 DRCG Long Distance Contest
Jun 9/10 Portugal Day Contest
Jun 9   Asia Pacific Sprint Contest
Jun 9/10 WW South America Contest

The ARI Roma organizes the second 70 MHz and Crossband Contest on June 10
from 0700-1700 UTC. See also: http://www.ariroma.it/70.html

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
AS-004, 5B/ZC4, Cyprus: Carolyn,5B/KC9URR, and Padraig,5B/KC9UUS, are doing
    their first DXpedition to Cyprus from Jun 2-17. They will work holiday
    style only in SSB using a FT-857 and Buddipole. KC9UUS is only 15 years
    old. QSLs via homecalls (bureau/direct). QSL cards will be sent after
    their return home.

AS-017, JA6, Okinawa Islands: The special event station 8N6JAPAN is working
    on HF from Okinawa until Jul 31 and celebrates the 40th anniversary of
    the return of Okinawa to Japan. QSL via bureau.

EU-014, TK, Corsica Island: Alessandro,TK/IW5ELA, is spending his holidays
    in Calvi/Corsica (Loc JN42jn) from Jun 6-9. QSL via homecall.

EU-020, SM1, Gotland County group: Tetsu,SM1/JH8SGR, will be active from
    Gotland (WLOTA 2969) running 500 watts and wire beams on the HF bands
    from Jun 11-13. QSL via homecall (bureau/direct).

EU-054, I*9, Egadi Islands: Franco,IK4YCQ, spends his holidays on the island
    of Favignana (IIA TP-011, MIA MI-025, WLOTA 1545) until Jun 8. Listen
    for IF9/IK4YCQ working holiday style in SSB on HF. QSL via homecall.

EU-065, F, Bretagne (Finistere North West) Region group: Keith,F/G3TTC/p, is
    working in SSB on 40m and above from Quessant (DIFM AT001, WLOTA 0208)
    on Jun 6. QSL via G3TTC (bureau/direct).

EU-068, F, Bretagne (Finistere South West) Region group: The next stop of
    Keith,G3TTC, will be Sein Island (DIFM AT007, WLOTA 2721) on Jun 9.
    QSL via G3TTC (bureau/direct).

EU-094, F, Bretagne (Finistere South) Region group: The third destination
    of Keith,G3TTC, will be Glenan Island. He will hand out IOTA points
    in SSB on Jun 12. QSL via G3TTC (bureau/direct).

OC-128, DU1, Palawan Island: Dandy,K6ZRH (aka DU1IMA), is planning to visit
    Palawan Island (WLOTA 1612) and wants to become active as K6ZRH/DU1 in

SSB on 40m, 20m and 15m from Jun 10-30. QSL only direct via K6ZRH.

NON-IOTA: Erik,ON7EX, Dries,ON6VOX, Hakim,ON7HLU, and Francois,ON4LO, will be QRV as ON4LO/LH from the fireship "Mayflower" (ARLHS BEL048) in SSB on 80m-10m from Jun 8-12. QSL via ON4LO (bureau/direct).

William,KD8PZO, will be QRV from Burton Island (USi VT020L) working holiday style in SSB on 10m-20m from Jun 8-10. QSL via homecall.

Paracuru Lighthouse: Moreira,PT7ZT, and members of the GPDX-CE will show up as PT7ZT/p from Paracuru Lighthouse (ARLHS BRA-276, DFB CE-09, DFCE CE-09, Loc HI06lo) from Jun 8-10. QSL via PT7ZT (bureau/direct).

Lighthouse activities

FS/K9EL LH 0383 Jun 8-24
GX4BJC/A LH 1841 Jun 11-30
MX1SWL/A LH 1841 Jun 11-30
T48K LH 0032 Jun 9-11
VP2MRT LH 1475 Jun 6-12

WFF activities

KFF: W3WFF will activate a new KFF from the nature park Powdermill (KFF-623) on Jun 9. Activities are planned in CW and SSB on 40m-10m (WFF QRGs) using 100 watts and wire antennas. The logs wil be uploaded to the LoTW and WFF LogSearch. QSL via N3GJ (bureau/direct).

DLFF: Daniel,DM3DA/p, will be QRV from the national park Eifel (DLFF-003) from Jun 7-9. QSL via DM3DA (bureau/direct).

RFF: The team of R44WFF will activate several RFF areas from Jun 5-12 like Buzulusky national park (RFF-171) and the Orenburgsky reserve (RFF-067) Special QSLs will be sent via bureau. QSL via RA3AKF.

EUFF: The EUFF Green Party 2012 will take place on Jun 9, 0600-1759 UTC. This day is thought to encourage amateurs to leave their home QTH and do some portable activities in nature. QSOs with stations in WFF areas are supported especially. See also: http://www.wff44.org/committees/day and http://wff-yo.blogspot.com

How your antenna can resist the wind blow . If wind blow rate 70Km/H to 120Km/H , do you care it. Let's puts same wire support between your element to boom or any support for element antenna to safe.
Let's we check my Rotary dipole can be ,wind blow vs 80Km/H rate and peak 120Km/H last night , 25 meter above the ground. Any one can calculate the effect and what kinds your effort of this.

Dear All Registered Member,

Untuk database di sekretariat YBDXC, kami mengharapkan teman-teman untuk dapat mengisi form terlampir secara lengkap
Mohon kesediannya untuk dapat mengirimkannya kembali (berikut lampiran yang sudah diisi dengan lengkap) ke ybdxc@... paling lambat tanggal 15 Juni 2012

Demikian kami sampaikan untuk dapat dimaklumi. Atas perhatian dan kerjasamanya diucapkan terima kasih

Hormat Kami,

Sekretaris Jenderal
Yana Koryana - YB1AR

DX Bulletin 23 ARLD023
From ARRL Headquarters
Newington CT June 7, 2012
To all radio amateurs

SB DX ARL ARLD023
ARLD023 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Carolyn, KC9URR and Pat, KC9UUS are QRV as 5B/homecalls until June 15. Activity is holiday style mostly on 20 meters using SSB. QSL to home calls.

TANZANIA, 5H. Chas, NK8O is working at Mwanza on Lake Victoria and plans to be active as 5H3CP from June 11 to 22. Activity will be in his spare time with QRP power on various HF bands using CW. QSL to home call.

BHUTAN, A5. Operators JA1JQY, JK1EBA, JA3MCA, JA1KJW and JA8VE are QRV as A52JY, A52BA, A52MA, A52KJ and A52VE, respectively, from Thimphu until June 14. Activity is on 160 to 6 meters using CW, SSB and RTTY. They have a 6 meter beacon on 50125 kHz. QSL to home calls.

CUBA, CO. Members of the Radio Club Las Tunas will be QRV as T48K in the ARRL June VHF QSO Party as a Limited Multi Op entry. They plan to be active on 6 and 2 meters. QSL via DK1WI.

PHILIPPINES, DU. Dandy, K6ZRH will be QRV as K6ZRH/DU1 from Palawan Island, IOTA OC-128, from June 10 to 30. Activity will be on 40, 20 and 15 meters using SSB. QSL direct to home call.

MARQUESAS ISLANDS, FO. Christian, F5IDM is QRV as TX5VT until June 12 and is active from the islands Hiva Oa, Nuku Hiva, Ua Huka and Ua Pou, all IOTA OC-027. QSL to home call.

ST. MARTIN, FS. John, K9EL is QRV as FS/K9EL until June 24.
Activity is holiday style on 80 to 6 meters using CW, SSB and RTTY.

QSL to home call.

JAPAN, JA. Special event station 8N6JAPAN is QRV from Okinawa, IOTA AS-017, until July 31 in celebration of the 40th anniversary of the return of Okinawa to Japan. QSL via bureau.

LEBANON, OD. Gaby, OD5NJ has been active on 15 meters around 1430 to 1600z. QSL via EA5BYP.

BELGIUM, ON. Special event station ON500MERCATOR is QRV until the end of the year in celebration of the 500th birthday of Gerhard Mercator, the cartographer named for the Mercator projection world map. QSL via ON7KO.

GREECE, SV. Mike, SV1RK and Stavros, SV3CJU are QRV as J48SAI from Sapienza Island, IOTA EU-158, until June 10. Activity is on the HF bands plus 6 meters using CW, SSB and RTTY. QSL via SV1RK.

CORSICA, TK. Alex, IW5ELA is QRV as TK/IW5ELA from Calvi until June 9. Activity is on 40, 20, 15 and 12 meters using mainly CW. QSL to home call.

EUROPEAN RUSSIA, UA. Members of club station RK3VWA are QRV as R1150V until August 31 in celebration of the 1150th anniversary of Russian statehood. QSL via RK3VWA.

MONTSERRAT, VP2M. John, KB4CRT is QRV as VP2MRT from Gingerbread Hill in St. Peters Parish until June 12. Activity is on 80 to 2 meters using SSB, with some CW and possibly PSK. This includes being an entry in the ARRL June VHF QSO Party. QSL direct to home call.

MACAO, XX9. Jose, EB5BBM is QRV as XX9TBM until June 10. Activity is in his spare time on 20, 17 and 15 meters using SSB. QSL via EB7DX.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Macao, XX9E, 2012 operation.

THIS WEEKEND ON THE RADIO. The ARRL June VHF QSO Party, NCCC RTTY Sprint, World Wide South America Contest, NCCC Sprint CW Ladder, DRCG Long Distance RTTY Contest, VK Shires Contest, Asia-Pacific SSB Sprint, Portugal Day Contest, GACW WWSA CW DX Contest, REF DDFM 6-Meter Contest and SKCC Weekend CW Sprintathon are all on tap for this upcoming weekend. The RSGB 80-Meter Club CW Championship, NAQCC-EU Monthly CW Sprint, NAQCC Straight Key/Bug CW Sprint and CWops Mini-CWT CW Test are all scheduled for June 13. Please see June QST, page 79, and the ARRL and WA7BNM Contest Web Sites for details.

JABAR FIELD DAY - Dari Masa ke Masa

By Gatot Dewanto YE1GD in ORARI Daerah Jawa Barat · Edit Doc

Kegiatan Field Day di Jawa Barat diawali tahun 1988, ketika itu Ketua ORARI Daerah Jawa Barat Bp. A. Moeis Tjondro - YB1CPT berkeinginan mengadakan suatu event/kegiatan ditingkat ORARI Daerah yang tentu saja Kegiatan dimaksud haruslah khas dan berbeda dengan kegiatan yang lazim diadakan di Lokal. Beberapa kali beliau melontarkan keinginannya tsb. hingga suatu saat menjadi pembicaraan juga diantara rekan-rekan ORARI Lokal Cibeunying. Maka tercetus ide dari Mas Bambang Watuadji - YB1KV untuk menyelenggarakan Field Day, karena kegiatan ini di Amerika merupakan suatu event nasional. Ketua Lokal Cibeunying, Bp. Rifadhie (ex YC1FRI) menyampaikan ide tersebut kepada pak Moeis, yang ternyata mendapat respon positif. Pak Moeis kemudian meminta ORARI Lokal Cibeunying segera menyelenggarakan Field Day pertama, yang dimaksudkan sebagai model untuk menjadi Kegiatan milik ORARI Daerah Jawa Barat.

FIELD DAY 1988 ini diselenggarakan di Perkebunan Teh Malabar, Pangalengan, pada September 1988. Ditunjuk menjadi Ketua Panitia Field Day Pertama adalah Mas Bambang Watuadji - YB1KV sendiri. Bentuk kegiatan yang dipertandingkan adalah "Logging Contest", dimaksudkan sebagai sarana latih diri dibidang preparedness emergency communication. Logging Contest yang pertama kalinya ini diikuti oleh 26 ORARI Lokal di Jawa Barat, bekerja di band 2 meter dengan daya pancar dibatasi 10 watt. Disamping logging contest juga diadakan acara hiburan, rekreasi dan pertandingan olahraga (al. volley, balap karung, tarik tambang antar lokal). Kegiatan Field Day ini dianggap sukses melibatkan lokal-lokal se Jawa Barat ikut berperan serta, maka selanjutnya Field Day diadopsi menjadi kegiatan resmi milik ORARI Daerah Jawa Barat.

JABAR FIELD DAY 1990 diselenggarakan 2 tahun kemudian oleh ORARI Daerah Jawa Barat di Kawasan Wisata Tangkuban Parahu. Sebagaimana Field Day di Pangalengan, kali inipun lomba Logging Contest masih di band VHF (2 meter). Banyaknya peserta yang sudah mendirikan tenda dan towernya sebelum lomba dimulai menjadi bahan evaluasi tersendiri bagi panitia ORARI Daerah. Kegiatannya sendiri masih terfokus di logging contest, artinya belum diikuti lomba2 keamatirradioan lainnya (seperti fox hunting, merakit, atari dsb). Acara tambahan yang ada hanya hiburan, keolahragaan dan pameran perangkat homebrew. Ketika itu dicanangkan Jabar Field Day akan digelar setiap 2 tahun, yang wajib diikuti seluruh ORARI Lokal di Jawa Barat.

JABAR FIELD DAY 1992 diselenggarakan oleh ORARI Daerah Jawa Barat di Bumi Perkemahan Cibodas. Inilah JBFD pertama yang melibatkan ORARI Lokal setempat dimana kegiatan dilaksanakan. Lomba Logging Contest masih diadakah di band 2 meter, namun kali ini peserta harus start bersama-sama pada acara pelepasan (setelah upacara pembukaan), dan harus menggotong semua perlengkapannya, seperti tenda, radio, antenna, tiang, dll. Secara umum kegiatan masih seperti JBFD 1990, yaitu Logging Contest, hiburan dan keolahragaan, namun ditambah lomba eye ball QSO.

JABAR FIELD DAY 1995 diselenggarakan di Bumi Perkemahan Cibodas. Disinilah untuk pertama kalinya Logging Contest diujicobakan di Band HF (80-40-15-10 meter). Sayangnya saat itu belum semua lokal dapat mengikuti logging contest di band HF ini. Ada beberapa lokal yang tidak mengikuti dengan alasan belum ada anggotanya yang bekerja di band HF. Hal ini membuat Pak Moeis Tjondro menjadi marah, dan mengancam akan membubarkan lokal-lokal tersebut apabila hingga JBFD berikutnya masih juga belum mampu mengikuti logging contest di band HF. Namun tentu saja kemarahan dan ancaman tersebut bukannya tanpa solusi, ORARI Daerah Jawa Barat menawarkan pinjaman lunak untuk membeli perangkat HF yang dapat dimanfaatkan oleh para anggota lokal. Pengembalian dari pinjaman itu akan diambil dari dana pembangunan milik Lokal. Kondisi area Bumi perkemahan Cibodas yang tidak begitu luas, menjadi tantangan terberat bagi peserta Logging Contest saat itu. Penempatan antar peserta yang saling berdekatan, walaupun dengan daya pancar dibatasi 10 watt, membuat banyak diantara peserta yang frustasi.

Tenda Logging Contest

JABAR FIELD DAY 1997 diseleggarakan di Kawasan Wisata Riung Rangga, Ciater, Subang. Area kawasan Riung Rangga lebih luas dibanding Cibodas membuat kondisi penyelenggaraan Logging Contest sedikit lebih baik dari sebelumnya. Namun demikian masih ada juga 1 lokal yang tidak berpartisipasi, tetapi dianggap lebih disebabkan karena masalah intern kepengurusan lokalnya. Pada JBFD kali ini kegiatan lomba ditambah dengan mini Fox Hunting, juga diadakan kegiatan sarasehan sebagai ajang temu muka dan temu wicara antara Pengurus ORARI Daerah dengan Pengurus Lokal-lokal se Jawa Barat. Sempat terjadi insiden kecil, dimana panitia setempat terlupa menyediakan tempat berikut plang nama beberapa lokal saat upacara pembukaan. Ini membuat anggota lokal-lokal tersebut sedikit kecewa dan hanya duduk-duduk saja di pinggir arena upacara. Setelah panitia meminta maaf barulah mereka bersedia memasuki lapangan upacara.

Kontingen Lokal-lokal

Penyelenggaraan JBFD berikutnya ternyata tidak dapat diselenggarakan tepat waktu. Bp. A. Moeis Tjondro - YB1CPT silent key pada 22 November 1998, di tengah masa jabatannya sebagai Ketua ORARI Daerah Jawa Barat. Masa Bakti Kepengurusannya dilanjutkan oleh Bp. Maman Soebarna - YB1YD yang bertindak sebagai Pejabat Ketua ORARI Daerah Jabar. Masa "kepengurusan lanjutan" ini, disertai kondisi perekonomian nasional yang mengalami masa krisis ditambah panasnya kondisi perpolitikan Indonesia saat itu, membuat JBFD tidak dapat berjalan sesuai yang telah dicanangkan.

JABAR FIELD DAY 2002, diselenggarakan di Bumi Perkemahan Pramukan Kiara Payung, Sumedang. Inilah JBFD pertama pasca "silent-key"nya Bp. A Moeis Tjondro - YB1CPT, yang diselenggarakan oleh kepengurusan baru ORARI Daerah Jawa Barat hasil Musda 1999 di Ciater. Area kawasan Kiara Payung yang luas, membuat jarak antar peserta Lomba Logging Contest bisa ditempatkan cukup berjauhan. Ini menjadikan kondisi yang lebih baik, namun tetap tidak mengurangi tantangan yang dihadapi oleh para peserta Logging Contest. Pada JBFD kali ini kegiatan lomba yang diadakan ditambah lagi antara lain Fox Hunting, dan kode morse, disamping kegiatan sarasehan antara Pengurus ORARI Pusat, ORARI Daerah dan Lokal-lokal di Jawa Barat.

JABAR FIELD DAY 2007, kembali diselenggarakan di Bumi Perkemahan Kiara Payung. Inilah penyelenggaraan JBFD yang dianggap "paling komplit", karena disamping lomba2 resmi, panitia juga memberi kesempatan setiap lokal untuk mengekspresikan kreativitasnya masing-masing. Setiap kontingen mendapat lokasi tenda yang cukup luas, ada lokal yang memamerkan hasil karya anggotanya, pemutaran video, dll. Pengurus ORARI Daerahpun

berkeliling mengunjungi masing-masing tenda kontingen lokal untuk bersilaturrahmi dan menyaksikan berbagai kreatifitas tersebut. Kegiatan lombanyapun cukup lengkap, disamping Logging Contest, juga ada Motorbike Foxhunting, Mini-foxhunting, menerima kode Morse, merakit pemancar, dll. Tidak ketinggalan sarasehan sebagai ajang temu wicara antara ORARI Pusat dengan ORARI Daerah dan Lokal-lokal se Jawa Barat. Yang membanggakan, upacara penutupan kegiatan JBFD 2007 ini dilakukan oleh Gubernur Jawa Barat Bp. Danny Setiawan - YC1DS, dengan suguhan
atraksi kesenian Jawa Barat.

Mini Fox Hunting

YB1AA, YC1DS dan YBØAA

Lomba merakit pemancar

LOGQSO Contest Log Viewer - Analyzer

Help For using the LOGQSO Contest Log Viewer

FUNCTIONALITY:
View Charts and Graphs of your CQWW contest Log
Compare your CQWW contest Log with 1 or 2 other Competitor's Logs
Compare your CQWW contest Log with your previous contest Logs
Analyze 1, 2 or 3 CQWW contest Logs for generating your next contest strategy
LOG SELECTION:
This applicatin has 3 Controls for selecting the logs and filtering the log data
Contest Category Selection
Contest Call Selection
Log QSO Filtering
CHART and GRAPH SELECTION:
This application produces a chart or graph for the 1 to 3 calls selected. The results displayed are dependent on the Contest selected, the call selected, the Category of the Log and the Log QSO filter.
Chart and Graph Fields

Contest Category Selection
The contest Category selectors allow a user to limit the log choices. This can make it easier to select from the 4000 plus logs available in each supported contest. The limits are seleted by making choices in the Contest Category Selection items. You can limit the contests to a single contest entry category or a group of contest categories. If you use the default Contest Category Selection, all calls in the contest will be available for selection. This control is used if you want to compare your log with another log in the same entry category. For example: you would not normally compare a SOSB 160M log with a SOSB 40M log.
Default Contest Category Selection

The Contest entry category for this selection is all categories. You can select Calls in the Call Selection Controls for all contest participants.
All Single-Op All Band Logs (SOAB) Selection

This Contest entry category will limit the Call Selection Controls to selecting only Contest logs that are in the Single-Op All Band category. Low or High Power and Assisted or Non-Assisted logs will be selectable
Single-Op Single Band Logs (SOSB) Selection

This Contest entry category will limit the Call Selection Controls to selecting logs that are in the Single-Op Single Band 20M category. Low or High Power and Assisted or

Non-Assisted logs will be selectable
Single-Op Single Band High Power Logs (SOSB) Selection

This Contest entry category will limit the Call Selection Controls to selecting logs that are in the Single-Op Single Band 40M High Power category. Assisted or Non-Assisted logs will be selectable
All Multi-Op Logs Selection

This Contest entry category will limit the Call Selection Controls to selecting logs that are in the Multi-Op category. Multi-Single, Multi-2 and Milti-Multi logs will be selectable
Multi-Single Logs (MS) Selection

This Contest entry category will limit the Call Selection Controls to selecting logs that are in the Multi-Single category.
Multi-2 Logs (M2) Selection

This Contest entry category will limit the Call Selection Controls to selecting logs that are in the Multi-2 category.
Multi-Multi Logs (MM) Selection

This Contest entry category will limit the Call Selection Controls to selecting logs that are in the Multi-Multi category.
Disable box Selection

Checking the Disable check box allows the user to disable all category filtering. This is the same as the Default Contest Category Selection.Removing the check box will return to using the selected categories.

Contest Call Selection

Call1 Contest Selection

The Contest for 'Call1', 'Call2', and 'Call3' are selected by clicking on the 'Contest' dropdown box. The supported contests are listed. Click on one of the contests displayed. The contest you select determines the list of log callsigns presented in the Call Selection Controls. The presented calls are also filtered by the Contest Category Selection you have chosen.
Call1 Call Selection

You must select at least one callsign in any of the 3 'Call#' group. You can select up to 3 callsigns for analysis.

When you click on the call entry window you are presented with a tabbed [(1-9)-Z] sorted list of calls to select from. Each tab contains all calls that begin with the letter dispalyed in the tab. The default tab is dependent on the country of your internet proivder. Click on any call, displayed under the tab, to select. Clicking on any other tab will download and display its calls. The calls, in the tab, depend on what contest you select in the Contest Selection selector The presented calls are also filtered by the Contest Categoryselections. You can cancel a call selection by clickimg on the red X box in the upper right corner of a tab call list. When you change the contest or the Category settings the Call you have selected may disappear. This is normal and occurs when that Call did not operate in the selected category or selected contest.

Call1 Disable

The Contest Disable checkbox can be checked for 'Call1', 'Call2', and 'Call3'. Checking the box removes that call from the graph or chart. Removing the check allows the selected call to be included in the graph.

Log QSO Filtering

The application can filter the QSOs of a selected Call log. QSOs of a log can be included or excluded from the Chart or Graph. For example: Show the 160M QSOs of a SOAB log or Show the QSOs for a specific zone.... The QSO filter always applies to 'Call1', 'Call2', and 'Call3'. If you disable two of the Call Disable boxes in the 'Call#' group you can view the QSO filtering for one call.

The Continent, Country, and Zone selections can only be used individually. It would make no sense to Filter Germans in Zone 5 in Africa. When Using one of these 3 selectors you must return them to their 'ALL' settings before you can activate the other two. The 'ALL' choice is at the top of the dropdown list. You can Hyperscroll to the desired country, in the dropdown list, by entering the first letter of the desired Country.

Default Log QSO Filtering

The Default QSO filtering is No filtering. All QSOs will be used to generate the chart and graph data. Clicking the 'Defaults' button will return all selections to their default setting.

Band Log QSO Filtering

The band QSO filtering selects only QSOs on the selected band for charts and graphs. This filtering will be a[[lied to all 'Call#' that are not disabled. The Band filtering is always available. The selection shown will graph and chart only 80M QSOs from all Continents, all Countries and all zones.

Continent Log QSO Filtering

The Continent QSO filtering selects only QSOs on the selected Continent for charts and graphs. This filtering will be applied to all 'Call#' that are not disabled. The selection shown will graph and chart only European (EU) QSOs from all Bands.

Country Log QSO Filtering

The Country QSO filtering selects only QSOs in the selected Country for charts and graphs. This filtering will be applied to all 'Call#' that are not disabled. The selection shown will graph and chart only German QSOs from all Bands.

Zone Log QSO Filtering

The Zone QSO filtering selects only QSOs in the selected Zone for charts and graphs. This filtering will be applied to all 'Call#' that are not disabled. The selection shown will graph and chart only Zone 15 QSOs from the 20M Band.

Disable Log QSO Filtering

Checking the Disable QSO filtering Checkbox will select all QSOs for the charts and graphs. The filtering choices remain but they are ignored. Removing the check will return to filtering using the current selections.

CHART and GRAPH SELECTION
Supported Charts and Graphs include QSO rate and many more. You can save the chart by right clicking on the chart image and selecting: 'Save Picture as' in Internet Explorer, 'Save Image As' in Firefox and 'Save Image' in Opera.

The Charts and Graphs views have 2 groups of control. The View Y-Axis Selection and the Time Zoom Selection.

The View Y-Axis Selection group allows the user to select a 'Function', 'Interval', and 'View type'. With these controls, you can select a Rate or Sum view for QSOs, Score,Zones, Countries, Points and Mults. The 'Interval' control selects the sample point interval. You can select from 60 Minutes to 1 minutes intervals. The interval time is very useful when Zooming the time. The 'View type' control selects how the data is charted or graphed. You can select 3D views and line, column, area, spline and point.

The Time Zoom Selection group controls the zoom for the chart or graph. You can select a 'Start Time' in 4 hour increments. The 'Hours' control selects how many hours to display after the start time.
Default View Y-Axis Selection

The Default selection is QSO Rate, 60 min sample points and column charting. Changing any of these controls will redraw the Chart or graph.The Chart below is the result View.
Default View Y-Axis Selection QSO Rate Chart

The chart shown is for 'QSO Rate'. The 3 calls CN2R, 8P5A and CR2X are all drawn in the chart. Each call has a specific color. The color legend is shown at the top right corner of the chart. The lower Left corner shows each calls category information in green. All of these calls were in the SOAB High
---

Score Sum View Y-Axis Selection

The Score Sum 'Function' selection forces the 'View type to spline. All 'Function' Sum selections will force the View to spline. You can change the 'View type' to any other selection after you choose a sum 'Funtion'.
Score Sum View Y-Axis Selection Graph

QSO Rate with 1600Z Day 1- 24 Hour View Y-Axis Selection

The Time Zoom Selection group is set to a 'Start Time' of 1600Z Day1. The 'Hours control is set to 24 to view 24 Hours beyond 1600z
QSO Rate with 1600Z Day 1- 24 Hour View Y-Axis Selection Chart

---

QSO Rate 1 Minute Intervals with 0000Z Day 1- 1 Hour View Y-Axis Selection

This selection allows a user to zoom in on the QSO Rate to check the QSOs by the minute
QSO Rate 1 Minute Intervals with 0000Z Day 1- 1 Hour View Y-Axis Chart

---

Point Sum with 2000Z Day 2- 16 Hour View 40M Europeans

JABAR FIELD DAY - Dari Masa ke Masa

By Gatot Dewanto YE1GD in ORARI Daerah Jawa Barat · Edit Doc

Kegiatan Field Day di Jawa Barat diawali tahun 1988, ketika itu Ketua ORARI Daerah Jawa Barat Bp. A. Moeis Tjondro - YB1CPT berkeinginan mengadakan suatu event/kegiatan ditingkat ORARI Daerah yang tentu saja Kegiatan dimaksud haruslah khas dan berbeda dengan kegiatan yang lazim diadakan di Lokal. Beberapa kali beliau melontarkan keinginannya tsb. hingga suatu saat menjadi pembicaraan juga diantara rekan-rekan ORARI Lokal Cibeunying. Maka tercetus ide dari Mas Bambang Watuadji - YB1KV untuk menyelenggarakan Field Day, karena kegiatan ini di Amerika merupakan suatu event nasional. Ketua Lokal Cibeunying, Bp. Rifadhie (ex YC1FRI) menyampaikan ide tersebut kepada pak Moeis, yang ternyata mendapat respon positif. Pak Moeis kemudian meminta ORARI Lokal Cibeunying segera menyelenggarakan Field Day pertama, yang dimaksudkan sebagai model untuk menjadi Kegiatan milik ORARI Daerah Jawa Barat.
FIELD DAY 1988 ini diselenggarakan di Perkebunan Teh Malabar, Pangalengan, pada September 1988. Ditunjuk menjadi Ketua Panitia Field Day Pertama adalah Mas Bambang Watuadji - YB1KV sendiri. Bentuk kegiatan yang dipertandingkan adalah "Logging Contest", dimaksudkan sebagai sarana latih diri dibidang preparedness emergency communication. Logging Contest yang pertama kalinya ini diikuti oleh 26 ORARI Lokal di Jawa Barat, bekerja di band 2 meter dengan daya pancar dibatasi 10 watt. Disamping logging contest juga diadakan acara hiburan, rekreasi dan pertandingan olahraga (al. volley, balap karung, tarik tambang antar lokal). Kegiatan Field Day ini dianggap sukses melibatkan lokal-lokal se Jawa Barat ikut berperan serta, maka selanjutnya Field Day diadopsi menjadi kegiatan resmi milik ORARI Daerah Jawa Barat.
JABAR FIELD DAY
1990 diselenggarakan 2 tahun kemudian oleh ORARI Daerah Jawa Barat di Kawasan Wisata Tangkuban Parahu. Sebagaimana Field Day di Pangalengan, kali inipun lomba Logging Contest masih di band VHF (2 meter). Banyaknya peserta yang sudah mendirikan tenda dan towernya sebelum lomba dimulai menjadi bahan evaluasi tersendiri bagi panitia ORARI Daerah. Kegiatannya sendiri masih terfokus di logging contest, artinya belum diikuti lomba2 keamatirradioan lainnya (seperti fox hunting, merakit, atari dsb). Acara tambahan yang ada hanya hiburan, keolahragaan dan pameran perangkat homebrew. Ketika itu dicanangkan Jabar Field Day akan digelar setiap 2 tahun, yang wajib diikuti seluruh ORARI Lokal di Jawa

Barat.
JABAR FIELD DAY 1992 diselenggarakan oleh ORARI Daerah Jawa Barat di Bumi Perkemahan Cibodas. Inilah JBFD pertama yang melibatkan ORARI Lokal setempat dimana kegiatan dilaksanakan. Lomba Logging Contest masih diadakah di band 2 meter, namun kali ini peserta harus start bersama-sama pada acara pelepasan (setelah upacara pembukaan), dan harus menggotong semua perlengkapannya, seperti tenda, radio, antenna, tiang, dll. Secara umum kegiatan masih seperti JBFD 1990, yaitu Logging Contest, hiburan dan keolahragaan, namun ditambah lomba eye ball QSO.
JABAR FIELD DAY 1995 diselenggarakan di Bumi Perkemahan Cibodas. Disinilah untuk pertama kalinya Logging Contest diujicobakan di Band HF (80-40-15-10 meter). Sayangnya saat itu belum semua lokal dapat mengikuti logging contest di band HF ini. Ada beberapa lokal yang tidak mengikuti dengan alasan belum ada anggotanya yang bekerja di band HF. Hal ini membuat Pak Moeis Tjondro menjadi marah, dan mengancam akan membubarkan lokal-lokal tersebut apabila hingga JBFD berikutnya
masih juga belum mampu mengikuti logging contest di band HF. Namun tentu saja kemarahan dan ancaman tersebut bukannya tanpa solusi, ORARI Daerah Jawa Barat menawarkan pinjaman lunak untuk membeli perangkat HF yang dapat dimanfaatkan oleh para anggota lokal. Pengembalian dari pinjaman itu akan diambil dari dana pembangunan milik Lokal. Kondisi area Bumi perkemahan Cibodas yang tidak begitu luas, menjadi tantangan terberat bagi peserta Logging Contest saat itu. Penempatan antar peserta yang saling berdekatan, walaupun dengan daya pancar dibatasi 10 watt, membuat banyak diantara peserta yang frustasi.
Tenda Logging Contest
JABAR FIELD DAY
1997 diseleggarakan di Kawasan Wisata Riung Rangga, Ciater, Subang. Area kawasan Riung Rangga lebih luas dibanding Cibodas membuat kondisi penyelenggaraan Logging Contest sedikit lebih baik dari sebelumnya. Namun demikian masih ada juga 1 lokal yang tidak berpartisipasi, tetapi dianggap lebih disebabkan karena masalah intern kepengurusan lokalnya. Pada JBFD kali ini kegiatan lomba ditambah dengan mini Fox Hunting, juga diadakan kegiatan sarasehan sebagai ajang temu muka dan temu wicara antara Pengurus ORARI Daerah dengan Pengurus Lokal-lokal se Jawa Barat. Sempat terjadi insiden kecil, dimana panitia setempat terlupa menyediakan tempat berikut plang nama beberapa lokal saat upacara pembukaan. Ini membuat anggota lokal-lokal tersebut sedikit kecewa dan hanya duduk-duduk saja di pinggir arena upacara. Setelah panitia meminta maaf barulah mereka bersedia memasuki lapangan upacara.
Kontingen Lokal-lokal
Penyelenggaraan JBFD berikutnya ternyata tidak dapat diselenggarakan tepat waktu. Bp. A. Moeis Tjondro - YB1CPT silent key pada 22 November 1998, di tengah masa jabatannya sebagai Ketua ORARI Daerah Jawa Barat. Masa Bakti Kepengurusannya dilanjutkan oleh Bp. Maman Soebarna - YB1YD yang bertindak sebagai Pejabat Ketua ORARI Daerah Jabar. Masa "kepengurusan lanjutan" ini, disertai kondisi perekonomian nasional yang mengalami masa krisis ditambah panasnya kondisi perpolitikan Indonesia saat itu, membuat JBFD tidak dapat berjalan sesuai yang telah dicanangkan.
JABAR FIELD DAY 2002, diselenggarakan di Bumi
Perkemahan Pramukan Kiara Payung, Sumedang. Inilah JBFD pertama pasca "silent-key"nya Bp. A Moeis Tjondro - YB1CPT, yang diselenggarakan oleh kepengurusan baru ORARI Daerah Jawa Barat hasil Musda 1999 di Ciater. Area kawasan Kiara Payung yang luas, membuat jarak antar peserta Lomba Logging Contest bisa ditempatkan cukup berjauhan. Ini menjadikan kondisi yang lebih baik, namun tetap tidak mengurangi tantangan yang dihadapi oleh para peserta Logging Contest. Pada JBFD kali ini kegiatan lomba yang diadakan ditambah lagi antara lain Fox Hunting, dan kode morse, disamping kegiatan sarasehan antara Pengurus ORARI Pusat, ORARI Daerah dan Lokal-lokal di Jawa Barat.

JABAR FIELD DAY 2007, kembali diselenggarakan di Bumi Perkemahan Kiara Payung. Inilah penyelenggaraan JBFD yang dianggap "paling komplit", karena disamping lomba2 resmi, panitia juga memberi kesempatan setiap
lokal untuk mengekspresikan kreativitasnya masing-masing. Setiap kontingen mendapat lokasi tenda yang cukup luas, ada lokal yang memamerkan hasil karya anggotanya, pemutaran video, dll. Pengurus ORARI Daerahpun berkeliling mengunjungi masing-masing tenda kontingen lokal untuk bersilaturrahmi dan menyaksikan berbagai kreatifitas tersebut. Kegiatan lombanyapun cukup lengkap, disamping Logging Contest, juga ada Motorbike Foxhunting, Mini-foxhunting, menerima kode Morse, merakit pemancar, dll. Tidak ketinggalan sarasehan sebagai ajang temu wicara antara ORARI Pusat dengan ORARI Daerah dan Lokal-lokal se Jawa Barat. Yang membanggakan, upacara penutupan kegiatan JBFD 2007 ini dilakukan oleh Gubernur Jawa Barat Bp. Danny Setiawan - YC1DS, dengan suguhan atraksi kesenian Jawa Barat.
 Mini Fox Hunting
 YB1AA, YC1DS dan YBØAA
 Lomba merakit pemancar
 YB1BS merakit Panel Tenaga Surya
 Pemutaran Film "Frequency" - Lokal Cibeunying
 Parade Kunci Morse

 Quiz Morse, yang tercepat menebak kalimat dapat hadiah.
 YB1KEN mendemokan antena Microvert

http://www.hamradionews.net/2012/06/most-famous-dxer-of-all-time-don-miller.html

Most famous DXer of all time: Don Miller W9WNV
An Introduction by Paul Dunphy, VE1DX © by LU5DX
How does one write an introduction to a section on Don Miller, W9WNV? The best description of Don and his impact on DXing that I ever read was written by Hugh Cassidy. It was an article he wrote some years ago entitled "I Remember Don" and it is reproduced below. Cass's reminiscences of Don Miller tell it through the eyes of a true blue DXer who lived during the period . . . through the eyes of an Old Timer who worked Don Miller from those exotic DX worlds. Through the eyes of a member of the ARRL executive who saw the entire saga unfold from all sides. No one can do it better than Cass . . . he was there and he had the insight, knowledge and interest.
When K2CD asked me to put together something of an introduction on Don Miller, I was at a loss. It seemed everything had been said, and better than I could say it. Then I began to think about my own interest in W9WNV. I had no direct experience with Don Miller. Don went QRT 10- 15 years before I got my HAM ticket and got bit by the DX bug. Yet I can rattle off tales of Don's DXpeditions, his triumphs and failures, and even a few of the details of how he obtained his lodging from 1981 until the present day. Why could I do this? More to the point, why is it that most DXers can do the same after they've been on the air only a few years? Good questions.
The answer is that Don Miller is probably the most famous DXer of all time. Was Don Miller the Babe Ruth of DXing? Or was he the John Dillinger? The answer is he was neither . . . or maybe both. Don was famous. Don was DX personified in the mid-60s. He had a public dispute with the ARRL and the DXCC desk. Some of his operations were disallowed. Others remain counters today, over 30 years later. Don made a lot of DXers happy. He infuriated probably just as many. His operations had more influence on shaping the DXCC program than any other person or event since 1945. And in spite what anyone says, the DXCC program is better because of Don. Absolutely. W9WNV made the ARRL take a step back and reassess the entire program and the accreditation criteria. And although most HAMs didn't realize it at the time, it shifted the DXCC and DXers into the limelight. For years the DXCC and DXing had been just a sideline of the ARRL. They existed for the traffic men, for
the home-brew enthusiasts, for QST and the Amateur's Code. Don changed all this, and how he did it is explained below by Hugh Cassidy, WA6AUD, far better than I ever can. Cass was there, I wasn't.
All this being said, why the fascination of modern day DXers with Don Miller? Why doesn't the charisma of W9WNV go away? I think it's because there is a little bit of Don in every DXer. When we first get bitten by the DX bug, there are always the Big Guns of solar cycles past who tell us how great it was in the Golden Days of DXing. They tell of the famous DXers and DXpeditions when propagation was better that it was during any solar peak we are likely to ever see again. Sometimes we look at charts and plots of these past cycles and wonder why this is so. Time often embellishes memory, but who are we, the newly minted QRPers, to suggest this to those with DXCC totals we can only dream of?
During this reminiscing of DXing, the topic of W9WNV always comes up. Stories are told of how Don could listen to a ferocious CW pileup for 30-45 seconds and then 5NN four or five

stations in rapid succession. And Don could do this for hour and hours at a time, while camped out on some obscure rock or volcanic outcropping with the water splashing at his ankles. Who of us, with DXCC totals between 100 and 200, wouldn't want to have been around in those glorious days when Don Miller handed out all these new ones to the deserving? For that matter, don't we envy those who actually accompanied Don on those operations? And we are always curious about why the ARRL picked W9WNV's operations to scrutinize. There were lots of other DXpeditioners of the day. Why was Don different? Were there politics and infighting going on? Surely this was not the case, for are not all amateurs honest and don't they follow the Amateur's Code . . . if not, they wouldn't be amateurs.
And when we ask what happened to Don, the answers are vague. There are hints that he ran into serious legal problems in the late seventies and early eighties. However, not everyone tells quite the same story and usually only part of it is known. Since it is not really amateur related, I will not discuss it here . . . other than to say Don Miller is currently serving time in a California prison and rumor has it he will soon be eligible for parole. There are those, myself included, who hope this is true and that we too may get a chance to work Don from some rare and exotic DX location.
All activities have their heroes and villains. Don Miller was one or the other, or both, in the eyes of the Old Timers. Whatever the truth is, the stories of W9WNV and his exploits add to the lure of DXing. Even though most of us weren't there, in a way many identify in some way with Don. Can the entire story of Don Miller ever be told? No. Too many years have passed. Many of the players of the day are no longer around. Stories with opposing viewpoints are told by those who were. Some of them are presented here. There are a couple of DX Bulletins of the day written by Don Miller himself. There are the articles by Hugh Cassidy and in another section on the web page, there is a West Coast DX Bulletin with the ARRL's position on the topic. Combine these with the stories told at your local DX club, and you will slowly see that Don Miller was, and still is, one of the Eternal Enigmas of DXing. One of the Mysteries of the Ages that contribute to the
understanding of DX IS!
(Don is now AE6IY)

https://secure.clublog.org/uniques.php

Expeditions Ranked By Unique Calls
An emerging and important measure of expeditions is their ability to reach a wide audience, not only big guns. Expeditions that are truly successful will invest special efforts in making QSOs with every possible radio amateur. The following table recognises those expeditions that have worked the most unique callsigns (as determined by logs uploaded to Club Log). The maximum duration of expedition considered in scope is 60 days.
The count of operators is determined from the expedition ADIFs, where this data is available.
More information and insights: How many DXers have been active in the last 5 years?
Last updated: Thu, 07 Jun 2012 05:25:05 +0000
Tip: Click on the table headings to sort by any heading (eg by date, by number of QSOs)

Om Hendro,,

Kita harus memaklumi kalo om Yana agak telat,,
Karna om Yana urus data kita thoo dan belum lagi prestasi dan penghargaan om Yana kan banyak,, jadi harus agak makan waktu buat laporannya.. :)

Saya rasanya ingin juga untuk mengikuti DX contest, namun sarana penunjang sayanya tidak begitu baik. bagaimana ya, saya tidak mengharapkan jadi pemenang, hitung cari pengalaman contest saja. Dulupun saya pernah juga ikuti All Asia Contes, but got for nathing. Begitu juga dengan contest2 lainnya. Sarannya dari rekan2 saya harapkan. saya berminat sekali juga untuk ikut contest. Radio saya TS 680 S, power 100 watts, dan G5RV (buatan sendiri) 15 meters high. Selain itu saya juga mempergunakan automatic antenna tuner AT - 250. Mohonsaran dong dari rekan2 berpengalam, namun motto saya tidak mengharapkan Champion. Terima kasih dan salam dan sukses selalu buat rekan2 anggota semua. Thanks & regards, Annes Samah (YB4TRY)

Hallo juga OM Harry, assalamu'alaikum OM Harry, apa kabar? Moga2 sehat selalu ya OM Hari.Saya kira dengan ikut menjadi member suatu club itu saya akan mendapat banyak teman/saudara tempat saling berbagi rasa. Makanya saya coba menulis di sini dg. harapan banyak teman/saudara saya yg bersedia merespon keluhan saya, ternyata tak seorangpun yang berkenan. " Kasihan deh gua ". Tapi Alhamdulillah ada juga seorang saudaraku yg baik hati meresponnya, yaitu OM harry, urang kampung ambo.Ya OM Hari, contes2 Nusantara saya sudah banyak yang saya ikuti, phone maupun CW. Tapi yang " International " baru beberapa kali saya ikuti, namun .... Baik OM Hari akan saya coba membaca cerita OM Harry untuk saya. Salam sejahtera buat keluarga de YB4TRY

Thanks & regards,
Annes Samah (YB4TRY)

Assalammu'alaikum
OM Annes..
Salaam kenal yaa om..
Mohon maaf sy nubie om dlm hal urusan kontes, awal mula ikutan aja hanya bisa di YE0X..

Ga punya radio canggih, boro-boro bisa ikutan kontes krn awalnya antena sy hanya wire diapole.. Itupun msh bersyukur kalo bisa diterima RST 59 di regional asean n JA land.. Radionya aja cuma IC 730 yg hanya bare foot power aja..Tuner pake AT-230 aja..

Karena diundang om Hari YB0MWM ke group bb pra- YBDXC (sebelum itu namanya masih Indonesian DX-ers trus Yellow Banana DX club lalu kemudian YBDXC)..saya terpicu untuk mulai mencicil 'bekal' untuk DX-ing.

Saya coba mendirikan tower (ex rt-rwNet) sekitar 20m di halaman belakang, mencoba mempelajari karakteristik setiap antena dari wire, rotary ∂αη yagi..sesuai kemampuan.
Itupun dicicil, maklum wiraswasta kelas UKM jadi kalo punya uang ditabung utk DX station saya..

Tapi karena jam kerja sampai malam skrg susah juga M̲ªů DX hehehe.. Saya mencoba menbiasakan utk mendengar ∂αη mempelajari teknik contesting rekan-rekan senior semua disini, ga bisa komentarin OM Annes krn memang pengalaman masih 'cetek' (minim) banget..

Maaf yaa om, kalo nanti yagi 3 el 21 MHz saya udh naik lagi..ajarin saya kontes yang benar yaa om..sementara antena yg diatas rotary dual band jg masih blm match swr-nya..

Terima kasih..73
Wassalam,

Irsan - YC0OST

OM Annes dkk,
Jika disimak dari diskusi di forum mailist ini, Sebetulnya yang OM Annes tanyakan mengenai cara ikut kontes di beberapa topik sudah selalu dikupas dari para punggawa kontester.

Dari informasi tersebut kita bisa merangkum dan menyesuaikan dengan peralatan yang ada di tempat kita.

Sehingga tidak benar bahwa apa yang OM Annes tanyakan tidak di respon, sebaliknya semua yang OM Annes ingin ketahui bisa OM Annes baca pada group ini.

Subject ataupun topiknya mungkin berbeda, seperti yang OM Annes kirim email ke group dengan subject dari OM Annes berjudul "Contes" tetapi jawaban yang OM Annes tanyakan bisa kita ambil hasil dari diskusi yang dikupas dari email yang lain oleh beberapa teman, termasuk yang diuraikan oleh OM Imam YB4IR dkk di subject "nyontek"

Pada subject "Nyontek" menurut kami sudah begitu gamblang termasuk software contest yang sebaiknya kita gunakan dan dibahas juga kelemahan/kerugiannya jika kita menggunakan dengan cara lama "pakai kertas dan pena"

Semoga apa yang kami uraikan di atas dapat memulihkan kekecewaan OM Annes.. :)

73 Salam Sejahtera
YBDXC admin

Halo Om Anes

Dengan perangkat yang om Anes miliki sudah cukup utk mengikuti contest..jangan hawatir dgn yang lain just PD aja saja
Semua yang berkaitan dgn kontest telah ada pada web ybdxc
Namun walau hanya sekedar ikut meramaikan..saran saya tetap harus ada "goal" nya..apakah akan menambah entity baru pada band + mode tsb, atau sekalian hunting rare atau new one country..jadi sambil menyelam minum air..walau nanti hanya dapat 50 qso's kalau semuanya "new country" kan ceritanya jadi lain...
Just only a little share om

Yth.:

Pak Anes dan Om Irsan....

Mohon maaf ikutan nimbrung, saya mungkin termasuk yang Om irsan katakan, saya hanya bekerja dengan 1 pesawat yaitu TS140S sedang antena saya semuanya kabel bikinan sendiri. 40m wire dipole, 15m bazooka rg8, 10m qubical kabel data 80m wire dipole.

Awalnya :
Guru DX ? Ndak punya
Guru kontes ? Ndak ada
Club DX ? Levelnya jauh diatas

Jadi saya nekat sajalah langsung terjun ke DX dan Kontes, dan hanya boleh di Mode CW saja..... Alhamdulillah kalau kata orang "alah bisa karena biasa", tentunya saya mencoba mencari referensi tulisan maupun buku yang menunjang untuk itu.
Hasil : DXCC award bisa lebih setahun baru bisa aplikasi

Masakini :
Wah banyak sekali rekan2 yang siap membantu, menyediakan tempat untuk DX maupun kontes. Apalagi sekarang ada YBDXC semua referensi sudah selalu diposting dan lengkap.
Dx cluster, dxspot sudah bertambah jenisnya
Hasil : Diamond DXCC bisa selesai 1,5 bulan saja

Jadi tunggu apalagi Pak Anes dan Om Irsan.... Siapkan waktu dan Langsung saja teriak CQ DX CQ DX. He...he... Band dan Mode nya juga lebih banyak di banding saya yang hanya sekedar siaga... Saya yakin lebih cepat jumlah Cnty/Entty yang bisa masuk Log...

Kata Obama "Yes We Can"

Salam

Edy - YD1XUH

Kopi...? Copy...? Saya gak monitor tuh ada SP (Poland), SV (Greece), UA,UR (Russia) & OK (Chesch)..di 10M ?

OM Hari,

Saya gak begitu hobi nonton bola, kalaupun nonton biasanya nemenin anak yg ceweq kalo pas MU main, suka gak kuat ngantuknya.

tnx
hen

09 June 2012 A.R.I. DX Bulletin

No 1101

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

5H - Chas, NK8O will be active as 5H9CP from Mwanza, Tanzania between 11 and 22 June. He is primarily a CW operator, and QRV times will depend on his "responsibilities and schedule at the Nyakato Health Center". QSL via EA7FTR and LoTW.

9K - The Kuwait Amateur Radio Society will operate special event station 9K2KCBB on 13-15 June to celebrate World Blood Donor Day. QSL direct to 9K2RA.

A6 - Tom, DL2RMC is currently active as A6/homecall from Abu Dhabi. He operates from the artificial island of Yas, which does not qualify for IOTA and should not be misunderstood for Sir Bani Yas (AS-021).

A6 - Ulli, DL9WVM will be active as A6/DL9WVM from Dubai on 10-30 June. He will be QRV on 80-10 metres. Ulli and Abdullah, A61Q might "investigate whether it is possible to activate Dibba Rock in the Gulf of Oman". This uninhabited rocky islet of difficult access could count for IOTA group AS-124. [TNX DX Newsletter]

CT7 - The Associacao de Radioamadores do Distrito de Leiria will operate as CS5FAT from the Shrine of Fatima on 10-13 June. QSL via CT6ARL, direct or bureau.

DU - Dandy, K6ZRH plans to be active as K6ZRH/DU1 from Palawan Island (OC-128) on 10-30 June. He will be QRV on 40, 20 and 15 metres SSB. QSL direct to home call. [TNX rsgbiota.org]

EA8 - Five operators will be active as EH8TID from Teide volcano (3,555 metres a.s.l.) from 30 June to 2 July. The Teide National Park (Tenerife, Canary Islands) was included on the UNESCO World Heritage List five years ago. Expect activity on 80-6 metres CW, SSB, RTTY and PSK31. All of the QSOs will be confirmed automatically via the bureau; direct cards to EA8NQ. [TNX EA8NQ]

JA - Taka, JA8COE will be active as JA8COE/8 from Yagishiri Island (AS-147) on 16-19 June. He will operate SSB and BPSK on 40, 20, 17 and 15 metres. QSL via home call, direct or bureau. [TNX JA8COE]

KH0 - Tony, JA6CNL will be active as KH0N from Saipan (OC-086) on 15-18 June. He will operate CW only on 80-6 metres. QSL via JA6CNL. [TNX NG3K]

OZ - Alain, F5LMJ will be active as 5P5J from Lolland Island (EU-029) on 14-28 July. QSL via home call (bureau preferred), LoTW and eQSL. [TNX F5LMJ]

SM - Tetsu, JH8SGR will be active as SM1/JH8SGR from Gotland Island (EU-020) on 11-13 June. QSL via home call. [TNX DX World]

SM - Bernd, DL8AAV will be active as SD1B/6 from Orust Island (EU-043) on 18-30 June. QSL via DL8AAV, direct or bureau. [TNX rsgbiota.org]

SV - Mike, SV1RK and Stavros, SV3CJU will be active as J48SAI from Sapientza Island (EU-158) on 8-10 June. They will operate CW, SSB and RTTY on the HF bands and 6 metres. QSL via SV1RK, direct or bureau, and LoTW. [TNX OPDX Bulletin]

SV9 - Special callsign SX9S will be active from 1 July to 31 December to celebrate the 50th anniverasry of the Samaria Gorge National Park on Crete (EU-015). QSL via SV9AUE. [TNX SV9AHZ]

TF - Bill, W4TAA and Pete, VE3IKV will be active as TF/VX3T from Iceland (EU-021) on 17-30 June. They will operate CW and SSB on 6 metres. QSL direct to VE3IKV. [TNX NG3K]

V7 - Steve, G3ZVW is active as V73/AF6SU until the end of June from the V73AX club station on Kwajalein Atoll (OC-028), Marshall Islands. QSL via G3ZVW, direct or bureau. [TNX DX World]

VE - Special prefixes CJ3 and CK3 will be in use rom the Province of Ontario, Canada between 12 and 26 June to celebrate the Centennial of the City of Kitchener. QSL via operators' instructions. [TNX VA3RJ]

W - Mike, W2GR will be active as N2W on 10-24 June, i.e. during the week before and the week after Nik Wallenda's attempt at walking across Niagara Falls on a tightrope. Mike will operate CW, RTTY and SSB on 40-10 metres. QSL via W2GR. [TNX W2GR]

XX9 - Jose, EB5BBM will be active as XX9TBM from Macau on 8-10 June. He plans to operate SSB on 20, 17 and 15 metres. QSL via EB7DX. [TNX The Daily DX]

Direttore Responsabile I2VGW

APOLLO PROGRAM ---> ARI Tortona (IQ1TW) will commemorate the Apollo Space Program (1961-1972) between 1 and 31 July. Further information on the relevant award can be found at http://aritortona.xoom.it or from Pier Paolo Liuzzo (IZ1XBB, iz1xbb[@]tiscali.it). [TNX IZ1XBB]

DXCC NEWS ---> XX9E (Macao, 2012 operation) has been approved for DXCC credit. [TNX NC1L]

IDXC 2013 ---> Sponsored by the Northern California DX Club, the 64th Annual International DX Convention will be held at the Visalia Conference Center in downtown Visalia, California on 19-21 April 2013. Please check the IDXC website (www.dxconvention.com) during the week of 18 June for details about booking hotel rooms for the Convention.

IOTA EU-155 ---> Back in October 2011 [425DXN 1069] the RSGB IOTA Manager reported that "following information received from a local operator in Italy that the only two islands listed as qualifying for EU-155, Baron and Scanno di Piallazza, no longer existed, we would not be accepting for credit any new operations claiming to take place from EU-155 pending a final check. This has now been carried out and it confirms the report. Under IOTA rules we have no option but to withdraw EU-155 from the list of valid IOTA groups and to amend scores down. However we have noted that the Po Delta is a remarkably fragile natural environment with a varying sedimentation rate influenced by river flow, tide and storm and have not ruled out the possibility of one of the islands reforming in time. In the circumstances, we have decided to remove EU-155 credit from all scores on 1 September 2012 but to retain the QSO information on the database in a non-counting format in case the situation should change. We will review the position periodically. In the meantime, while credit will not be given for new operations, we will allow credit for pre-October 2011 operations for certificate purposes only in applications received before 1 September 2012". [TNX Roger Balister, G3KMA, RSGB IOTA Manager]

IOTA NEWS ---> The following operations in the period February to May 2012 have provided acceptable validation and are therefore approved for IOTA credit: AT2DW (AS-175), XF1AA (NA-189), 4A3RCC (NA-200), KL7RRC/P (NA-240), 4W0VB/P (OC-232), and CW5GI (SA-039). The 7O6T (AF-028) operation, which has been accepted for DXCC, is also approved. [TNX G3KMA]

QSL 4U1ITU, 4U1UN & 4U1WRC ---> Get your missing QSLs for QSOs with 4U1ITU, 4U1UN and 4U1WRC (2012) at the Swiss DX Foundation's booth at Hamradio 2012 (Friedrichshafen) on 22-24 June. Bring your QSO data with you and observe the working hours of the QSL manager (to be available at the booth). [TNX HB9BOU]

TOPBAND MOST WANTED SURVEY ---> All 160m enthusiasts are invited to participate in the 2012 Topband Most Wanted Survey conducted by NI6T and K8UT. The survey will be running until 31 August and can be found at http://survey.hamdocs.com/?sid=11389. The results will be available in September.

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

WORLD CASTLES WEEKEND ---> Organized by the World Castles Activity Group, it will be held on 16-17 June. Several stations are expected to operate from fortresses and castles in the Azores, Belarus, Belgium, Croatia, Czech Republic, France, Germany, Hungary, Ireland, Italy, Kazakhstan, Latvia, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Switzerland, The Netherlands, Ukraine and the United Kingdom. Information on the event can be found at www.wcagroup.org. [TNX RN1CW]

+ SILENT KEYS + Gene Zimmerman (W3ZZ), "an icon in ham radio contesting in the Washington, D.C. area and beyond", as well as "an avid VHF man", passed

away on 3 June at 71 years of age.
Other recently reported Silent Keys include Peter Kallfelz (DL8YR), Joel Oulie (F6FHP), Luciano Montanari (I4MNK) and Abel Aguirre (LU8EDK), a radio operator during 18 summer and 6 winter Antarctic campaigns between 1953 and 1997.

YTH Om Annes

Waalakumsalam wr wb om Annes, harapan sehat walafin sama Uni dilampung, saya masih kebayang ruang operator om annes yang luas dibelakang kalau haus dan lapar ngambilnya dekat banget hehehehe.

Senang mendengar om Annes aktif lagi di Amatir Radio,, apa lagi sudah jadi member YBDXC,, yang kegiatannya piiuuur,,, kegiatan Amatir murni,,, Jozzz tenan tambah mantep om Annes, sedikit demi sedikit lama-lama jadi bukit banyak info, ilmu yang didapat,, kan begitu om Annes.

Kadang kita masih ragu,, dari mana harus memulai, bagi yang rajin nyari info di dunia maya tentang Amatir Radio no problemo semuanya tersedia disana kemudian kita sadur kesini,, nah kemaren saya coba ngajak om Annes membaca esai ringan versi dalam negeri, ternyata om Irsan (ost), om Edi (xuh) dan yang lain-2 mulai berbagi cerita,, maju terussss om Annes,, biar "hobby ini semakin jadi hobby yang meriah".

Salam manis dari Yogya de yc2www.

Hallo juga OM Harry, assalamu'alaikum OM Harry, apa kabar? Moga2 sehat selalu ya OM Hari. Saya kira dengan ikut menjadi member suatu club itu saya akan mendapat banyak teman/saudara tempat saling berbagi rasa. Makanya saya coba menulis di sini dg. harapan banyak teman/saudara saya yg bersedia merespon keluhan saya, ternyata tak seorangpun yang berkenan. " Kasihan deh gua ". Tapi Alhamdulillah ada juga seorang saudaraku yg baik hati meresponnya, yaitu OM harry, urang kampung ambo.Ya OM Hari, contes2
Nusantara saya sudah banyak yang saya ikuti, phone maupun CW. Tapi yang " International " baru beberapa kali saya ikuti, namun .... Baik OM Hari akan saya coba membaca cerita OM Harry untuk saya. Salam sejahtera buat keluarga de YB4TRY Thanks & regards,
Annes Samah (YB4TRY)

Hallo,, Uwak Annes

Belum ada yang nanggapi ya Om Annes,, setelah baca tulisan om annes saya tertarik nulis dan berbagi pengalaman buat Om Annes,, tdk usah mikirin dapet award apa tidak,, kalau om annes dengan kemampuan morse yg dikuasiai pake moda cw single band saja 40 atau 80 m kalau hanya award rank oceania mudah kok,, saya sudah buktikan kok Om,, bukan hanya sekali malah

berkali-kali hehehe.. ini aku buat cerita utk om annes klik ini http://yc2www.blogspot.com/2012/06/mendadak-contest.html#more atau diblok copas saja

Saya rasanya ingin juga untuk mengikuti DX contest, namun sarana penunjang sayanya tidak begitu baik. bagaimana ya, saya tidak mengharapkan jadi pemenang, hitung cari pengalaman contest saja. Dulupun saya pernah juga ikuti All Asia Contes, but got for nathing. Begitu juga dengan contest2 lainnya. Sarannya dari rekan2 saya harapkan. saya berminat sekali juga untuk ikut contest. Radio saya TS 680 S, power 100 watts, dan G5RV (buatan sendiri) 15 meters high. Selain itu saya juga mempergunakan automatic antenna tuner AT - 250. Mohonsaran dong dari rekan2 berpengalam, namun motto saya tidak mengharapkan Champion. Terima kasih dan salam dan sukses selalu buat rekan2 anggota semua. Thanks & regards,
Annes Samah

Dear om Annes.. Iya betul saran om Hari.... Saya telp om annes saat nanyakan kaos dan topi kiriman saya. Om annes tanya :

1. Apa yg harus saya lakukan stlh menjadi member ybdxc ??

2. Apa sih keuntungan yg di dapat stlh bergabung di YBDXC ???

Nah skrg saya coba jawab.. Jika ada yg kurang, kawan2 bisa menambahkan..

1. YBDXC di dirikan agar amatir radio di YB Land mencintai kegiatan dx ing. Masuk member YBDXC tdk di pungut bayaran om alias gratis. Tetapi hrs menunjukkan syarat minimal 5 qsl card dari 5 continent (oc tdk berlaku)

YBDXC berbeda dgn dx club lain yg tanpa menunjukkan persyaratan asal bisa bayar iuran sudah bisa jd member. Jadi siapapun yg bergabung di club ini sdh memiliki setidak2nya sedikit pengetahuan ttg Dx ing... Walaupun dgn cara yg msh konvensional (misalnya pakai log yg msh di tulis tangan)

Yg om annes bisa lakukan adalah : bertanya di millist ini.. Apa yg blm om annes ketahui. Misal soal logger. Wah.. Om Imam ahli logger 32, om Dani ahli HRD, om Rijanto juga,om Syarif juga.

Software contest ...
Bisa bertanya juga disini.. Karena kami biasa menggunakan N1MM.. Gratis dan ciamik.

Mau tanya soal dxpedition :

Om adhi yb3mm... Pengalaman dxpedition nya banyak sekali..

Mau tanya teknik radio dan antena ... Disini ada om Taufan YB0ai..

Mau di racuni perangkat radio ?? Tanya saja om Hans YB2DX.. Dia ahli meracuni sehingga om annes nanti tahu banyak perangkat Dx ing yg bagus bagus.. Hahhaahhaaha

Nah stlh om annes sdh install logger dan software contest... Mulailah berburu sertifikat DXCC award. Kalau om Hari yb0mwm bilang: sertifikat nya Dx er.. Hahhhahahahhaa..

Jika om annes sdh piawai, om annes bisa duplikasikan "ilmu" yg om annes miliki ke teman2 lain agar tertarik menjadi DX er.

2. Keuntungan bergabung di sebuah club dx ing adalah : memotivasi kita utk bisa mendapatkan award2 bergengsi spt DXCC, WAS, WAZ dan msh bnyk lagi.

Sharing pengalaman sesama member. Sehingga nantinya jika suatu saat YBDXC membuat DX Convention.. Om Annes bisa hadir dan berbagi ilmu dgn Dx er mancanegara.

Menyenangkan sekali bukan ???

Om Annes tenang saja.. Semua pertanyaan om Annes pasti ada yg menjawab. Karena amatir radio itu harus berjiwa ramah tamah memberikan pengetahuan yg di dapatnya kepada amatir lain.

Demikian om annes.. Jika kawan2 ada yg mau menambahkan... Silahkan..

Hallo juga OM Harry, assalamu'alaikum OM Harry, apa kabar? Moga2 sehat selalu ya OM Hari. Saya kira dengan ikut menjadi member suatu club itu saya akan mendapat banyak teman/saudara tempat saling berbagi rasa. Makanya saya coba menulis di sini dg. harapan banyak teman/saudara saya yg bersedia merespon keluhan saya, ternyata tak seorangpun yang berkenan. " Kasihan deh gua ". Tapi Alhamdulillah ada juga seorang saudaraku yg baik hati meresponnya, yaitu OM harry, urang kampung ambo.Ya OM Hari, contes2
Nusantara saya sudah banyak yang saya ikuti, phone maupun CW. Tapi yang " International " baru beberapa kali saya ikuti, namun .... Baik OM Hari akan saya coba membaca cerita OM Harry untuk saya. Salam sejahtera buat keluarga de YB4TRY Thanks & regards,
Annes Samah (YB4TRY)

Saya rasanya ingin juga untuk mengikuti DX contest, namun sarana penunjang sayanya tidak begitu baik. bagaimana ya, saya tidak mengharapkan jadi pemenang, hitung cari pengalaman contest saja. Dulupun saya pernah juga ikuti All Asia Contes, but got for nathing. Begitu juga dengan contest2 lainnya. Sarannya dari rekan2 saya harapkan. saya berminat sekali juga untuk ikut contest. Radio saya TS 680 S, power 100 watts, dan G5RV (buatan sendiri) 15 meters high. Selain itu saya juga mempergunakan automatic antenna tuner AT - 250.
Mohonsaran dong dari rekan2 berpengalam, namun motto saya tidak mengharapkan Champion.
Terima kasih dan salam dan sukses selalu buat rekan2 anggota semua. Thanks & regards,
Annes Samah

Om Zen.. Masuk ke website arrl.. Trus ke lotw.. Om zen download trusted qsl (tqsl) install, lalu daftar.. Nanti akan ada file nya tq5. Misal yb0mzi.tq5... File ini kirim via email ke arrl.

Lotw om zen tdk akan aktiv sblm om zen kirim via post fotocopy iar dan KTP ke arrl.. Tunggu 1 bulan.. Baru di aktivkan account lotw kita.

Stlh dpt balasan dari arrl, nanti akan di ksh password account lotw.

Jika kwn2 bisa menambahkan monggo ...

Dear om Annes.. Iya betul saran om Hari.... Saya telp om annes saat nanyakan kaos dan topi kiriman saya. Om annes tanya :

1. Apa yg harus saya lakukan stlh menjadi member ybdxc ??

2. Apa sih keuntungan yg di dapat stlh bergabung di YBDXC ???

Nah skrg saya coba jawab.. Jika ada yg kurang, kawan2 bisa menambahkan..

1. YBDXC di dirikan agar amatir radio di YB Land mencintai kegiatan dx ing. Masuk member YBDXC tdk di pungut bayaran om alias gratis. Tetapi hrs menunjukkan syarat minimal 5 qsl card dari 5 continent (oc tdk berlaku)

YBDXC berbeda dgn dx club lain yg tanpa menunjukkan persyaratan asal bisa bayar iuran sudah bisa jd member. Jadi siapapun yg bergabung di club ini sdh memiliki setidak2nya sedikit pengetahuan ttg Dx ing... Walaupun dgn cara yg msh konvensional (misalnya pakai log yg msh di tulis tangan)

Yg om annes bisa lakukan adalah : bertanya di millist ini.. Apa yg blm om annes ketahui. Misal soal logger. Wah.. Om Imam ahli logger 32, om Dani ahli HRD, om Rijanto juga,om Syarif juga.

Software contest ...
Bisa bertanya juga disini.. Karena kami biasa menggunakan N1MM.. Gratis dan ciamik.

Mau tanya soal dxpedition :

Om adhi yb3mm... Pengalaman dxpedition nya banyak sekali..

Mau tanya teknik radio dan antena ... Disini ada om Taufan YB0ai..

Mau di racuni perangkat radio ?? Tanya saja om Hans YB2DX.. Dia ahli meracuni sehingga om annes nanti tahu banyak perangkat Dx ing yg bagus bagus.. Hahhaahhaaha

Nah stlh om annes sdh install logger dan software contest... Mulailah berburu sertifikat DXCC award. Kalau om Hari yb0mwm bilang: sertifikat nya Dx er.. Hahhhahahahhaa..

Jika om annes sdh piawai, om annes bisa duplikasikan "ilmu" yg om annes miliki ke teman2 lain agar tertarik menjadi DX er.

2. Keuntungan bergabung di sebuah club dx ing adalah : memotivasi kita utk bisa mendapatkan award2 bergengsi spt DXCC, WAS, WAZ dan msh bnyk lagi.

Sharing pengalaman sesama member. Sehingga nantinya jika suatu saat YBDXC membuat DX Convention.. Om Annes bisa hadir dan berbagi ilmu dgn Dx er mancanegara.

Menyenangkan sekali bukan ???

Om Annes tenang saja.. Semua pertanyaan om Annes pasti ada yg menjawab. Karena amatir radio itu harus berjiwa ramah tamah memberikan pengetahuan yg di dapatnya kepada amatir lain.

Demikian om annes.. Jika kawan2 ada yg mau menambahkan... Silahkan..

Regards:

Ndut

YTH Om Annes

Waalakumsalam wr wb om Annes, harapan sehat walafin sama Uni dilampung, saya masih kebayang ruang operator om annes yang luas dibelakang kalau haus dan lapar ngambilnya dekat banget hehehehe.

Senang mendengar om Annes aktif lagi di Amatir Radio,, apa lagi sudah jadi member YBDXC,, yang kegiatannya piiuuur,,, kegiatan Amatir murni,,, Jozzz tenan tambah mantep om Annes, sedikit demi sedikit lama-lama jadi bukit banyak info, ilmu yang didapat,, kan begitu om Annes.

Kadang kita masih ragu,, dari mana harus memulai, bagi yang rajin nyari info di dunia maya tentang Amatir Radio no problemo semuanya tersedia disana kemudian kita sadur kesini,, nah kemaren saya coba ngajak om Annes membaca esai ringan versi dalam negeri, ternyata om Irsan (ost), om Edi (xuh) dan yang lain-2 mulai berbagi cerita,, maju terussss om Annes,, biar "hobby ini semakin jadi hobby yang meriah".

Salam manis dari Yogya de yc2www.

Saya rasanya ingin juga untuk mengikuti DX contest, namun sarana penunjang sayanya tidak begitu baik. bagaimana ya, saya tidak mengharapkan jadi pemenang, hitung cari pengalaman contest saja. Dulupun saya pernah juga ikuti All Asia Contes, but got for nathing. Begitu juga dengan contest2 lainnya. Sarannya dari rekan2 saya harapkan. saya berminat sekali juga untuk ikut contest. Radio saya TS 680 S, power 100 watts, dan G5RV (buatan sendiri) 15 meters high. Selain itu saya juga mempergunakan automatic antenna tuner AT - 250.
Mohonsaran dong dari rekan2 berpengalam, namun motto saya tidak mengharapkan Champion.
Terima kasih dan salam dan sukses selalu buat rekan2 anggota semua. Thanks & regards,
Annes Samah

Om Zen.. Masuk ke website arrl.. Trus ke lotw.. Om zen download trusted qsl (tqsl) install, lalu daftar.. Nanti akan ada file nya tq5. Misal yb0mzi.tq5... File ini kirim via email ke arrl.

Lotw om zen tdk akan aktiv sblm om zen kirim via post fotocopy iar dan KTP ke arrl.. Tunggu 1 bulan.. Baru di aktivkan account lotw kita.

Stlh dpt balasan dari arrl, nanti akan di ksh password account lotw.

Jika kwn2 bisa menambahkan monggo ...

Dear om Annes.. Iya betul saran om Hari.... Saya telp om annes saat nanyakan kaos dan topi kiriman saya. Om annes tanya :

1. Apa yg harus saya lakukan stlh menjadi member ybdxc ??

2. Apa sih keuntungan yg di dapat stlh bergabung di YBDXC ???

Nah skrg saya coba jawab.. Jika ada yg kurang, kawan2 bisa menambahkan..

1. YBDXC di dirikan agar amatir radio di YB Land mencintai kegiatan dx ing. Masuk member YBDXC tdk di pungut bayaran om alias gratis. Tetapi hrs menunjukkan syarat minimal 5 qsl card dari 5 continent (oc tdk berlaku)

YBDXC berbeda dgn dx club lain yg tanpa menunjukkan persyaratan asal bisa bayar iuran sudah bisa jd member. Jadi siapapun yg bergabung di club ini sdh memiliki setidak2nya sedikit pengetahuan ttg Dx ing... Walaupun dgn cara yg msh konvensional (misalnya pakai log yg msh di tulis tangan)

Yg om annes bisa lakukan adalah : bertanya di millist ini.. Apa yg blm om annes ketahui. Misal soal logger. Wah.. Om Imam ahli logger 32, om Dani ahli HRD, om Rijanto juga,om Syarif juga.

Software contest ...
Bisa bertanya juga disini.. Karena kami biasa menggunakan N1MM.. Gratis dan ciamik.

Mau tanya soal dxpedition :

Om adhi yb3mm... Pengalaman dxpedition nya banyak sekali..

Mau tanya teknik radio dan antena ... Disini ada om Taufan YB0ai..

Mau di racuni perangkat radio ?? Tanya saja om Hans YB2DX.. Dia ahli meracuni sehingga om annes nanti tahu banyak perangkat Dx ing yg bagus bagus.. Hahhaahhaaha

Nah stlh om annes sdh install logger dan software contest... Mulailah berburu sertifikat DXCC award. Kalau om Hari yb0mwm bilang: sertifikat nya Dx er.. Hahhhahahahhaa..

Jika om annes sdh piawai, om annes bisa duplikasikan "ilmu" yg om annes miliki ke teman2 lain agar tertarik menjadi DX er.

2. Keuntungan bergabung di sebuah club dx ing adalah : memotivasi kita utk bisa mendapatkan award2 bergengsi spt DXCC, WAS, WAZ dan msh bnyk lagi.

Sharing pengalaman sesama member. Sehingga nantinya jika suatu saat YBDXC membuat DX Convention.. Om Annes bisa hadir dan berbagi ilmu dgn Dx er mancanegara.

Menyenangkan sekali bukan ???

Om Annes tenang saja.. Semua pertanyaan om Annes pasti ada yg menjawab. Karena amatir radio itu harus berjiwa ramah tamah memberikan pengetahuan yg di dapatnya kepada amatir lain.

Demikian om annes.. Jika kawan2 ada yg mau menambahkan... Silahkan..

Regards:

Ndut

Om Zen.. Masuk ke website arrl.. Trus ke lotw.. Om zen download trusted qsl (tqsl) install, lalu daftar.. Nanti akan ada file nya tq5. Misal yb0mzi.tq5... File ini kirim via email ke arrl.

Lotw om zen tdk akan aktiv sblm om zen kirim via post fotocopy iar dan KTP ke arrl.. Tunggu 1 bulan.. Baru di aktivkan account lotw kita.

Stlh dpt balasan dari arrl, nanti akan di ksh password account lotw.

Jika kwn2 bisa menambahkan monggo ...

Subject: Re: Bls: [YBDXC_News] Contes

Dear om Annes.. Iya betul saran om Hari.... Saya telp om annes saat nanyakan kaos dan topi kiriman saya. Om annes tanya :

1. Apa yg harus saya lakukan stlh menjadi member ybdxc ??

2. Apa sih keuntungan yg di dapat stlh bergabung di YBDXC ???

Nah skrg saya coba jawab.. Jika ada yg kurang, kawan2 bisa menambahkan..

1. YBDXC di dirikan agar amatir radio di YB Land mencintai kegiatan dx ing. Masuk member YBDXC tdk di pungut bayaran om alias gratis. Tetapi hrs menunjukkan syarat minimal 5 qsl card dari 5 continent (oc tdk berlaku)

YBDXC berbeda dgn dx club lain yg tanpa menunjukkan persyaratan asal bisa bayar iuran sudah bisa jd member. Jadi siapapun yg bergabung di club ini sdh memiliki setidak2nya sedikit pengetahuan ttg Dx ing... Walaupun dgn cara yg msh konvensional (misalnya pakai log yg msh di tulis tangan)

Yg om annes bisa lakukan adalah : bertanya di millist ini.. Apa yg blm om annes ketahui. Misal soal logger. Wah.. Om Imam ahli logger 32, om Dani ahli HRD, om Rijanto juga,om Syarif juga.

Software contest ...
Bisa bertanya juga disini.. Karena kami biasa menggunakan N1MM.. Gratis dan ciamik.

Mau tanya soal dxpedition :

Om adhi yb3mm... Pengalaman dxpedition nya banyak sekali..

Mau tanya teknik radio dan antena ... Disini ada om Taufan YB0ai..

Mau di racuni perangkat radio ?? Tanya saja om Hans YB2DX.. Dia ahli meracuni sehingga om annes nanti tahu banyak perangkat Dx ing yg bagus bagus.. Hahhaahhaaha

Nah stlh om annes sdh install logger dan software contest... Mulailah berburu sertifikat DXCC award. Kalau om Hari yb0mwm bilang: sertifikat nya Dx er.. Hahhhahahahhaa..

Jika om annes sdh piawai, om annes bisa duplikasikan "ilmu" yg om annes miliki ke teman2 lain agar tertarik menjadi DX er.

2. Keuntungan bergabung di sebuah club dx ing adalah : memotivasi kita utk bisa mendapatkan award2 bergengsi spt DXCC, WAS, WAZ dan msh bnyk lagi.

Sharing pengalaman sesama member. Sehingga nantinya jika suatu saat YBDXC membuat DX Convention.. Om Annes bisa hadir dan berbagi ilmu dgn Dx er mancanegara.

Menyenangkan sekali bukan ???

Om Annes tenang saja.. Semua pertanyaan om Annes pasti ada yg menjawab. Karena amatir radio itu harus berjiwa ramah tamah memberikan pengetahuan yg di dapatnya kepada amatir lain.

Demikian om annes.. Jika kawan2 ada yg mau menambahkan... Silahkan..

Regards:

Ndut

YTH Om Annes

Waalakumsalam wr wb om Annes, harapan sehat walafin sama Uni dilampung, saya masih kebayang ruang operator om annes yang luas dibelakang kalau haus dan lapar ngambilnya dekat banget hehehehe.

Senang mendengar om Annes aktif lagi di Amatir Radio,, apa lagi sudah jadi member YBDXC,, yang kegiatannya piiuuur,,, kegiatan Amatir murni,,, Jozzz tenan tambah mantep om Annes, sedikit demi sedikit lama-lama jadi bukit banyak info, ilmu yang didapat,, kan begitu om Annes.

Kadang kita masih ragu,, dari mana harus memulai, bagi yang rajin nyari info di dunia maya tentang Amatir Radio no problemo semuanya tersedia disana kemudian kita sadur kesini,, nah kemaren saya coba ngajak om Annes membaca esai ringan versi dalam negeri, ternyata om Irsan (ost), om Edi (xuh) dan yang lain-2 mulai berbagi cerita,, maju terussss om Annes,, biar "hobby ini semakin jadi hobby yang meriah".

Salam manis dari Yogya de yc2www.

Hallo juga OM Harry, assalamu'alaikum OM Harry, apa kabar? Moga2 sehat selalu ya OM Hari. Saya kira dengan ikut menjadi member suatu club itu saya akan mendapat banyak teman/saudara tempat saling berbagi rasa. Makanya saya coba menulis di sini dg. harapan banyak teman/saudara saya yg bersedia merespon keluhan saya, ternyata tak seorangpun yang berkenan. " Kasihan deh gua ". Tapi Alhamdulillah ada juga seorang saudaraku yg baik hati meresponnya, yaitu OM harry, urang kampung ambo.Ya OM Hari, contes2
Nusantara saya sudah banyak yang saya ikuti, phone maupun CW. Tapi yang " International " baru beberapa kali saya ikuti, namun .... Baik OM Hari akan saya coba membaca cerita OM Harry untuk saya. Salam sejahtera buat keluarga de YB4TRY Thanks & regards,
Annes Samah (YB4TRY)

2807. News about HRDLOG.net

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-09 13:53:15 UTC
From: Yb land Dx club
Topic: 2807 Message: 2807

List of the most important news on HRDLOG.net (April-May 2012)
Email alias
Now there is the opportunity to create an e-mail alias on HRDLOG.net.
The alias allows anyone to send a message to you without knowing your real e-mail address.
For example, if you send an email to iw1qlh @ hrdlog.net , the email will be automatically forwarded to the real mail inbox even if the sender is not required to know it.
This function can be useful if you want an e-mail address easy to remember (callsign @ hrdlog.net) or if you don’t want to let your real address be known or if you want an address which doesn’t change during the time.
To activate the function Login -> Modify profile -> Mail alias.
Facebook
The integration with the social network Facebbok has been completely updated.
Now, once you have activated the link between HRDLOG.net and Facebook, it is possible:
* To use an application on Facebook in order to see your own QSO and the ones of your friends;
* To allow the view of your own logbook on a Facebook page;
* To publish automatically the number of countries working in on your own Facebook home page.The complete instructions are available at the following address: http://www.hrdlog.net/docs/Facebook.aspx

WikiHamRadio
HRDLOG.net is enriched with a web-site reachable at the following address: http://wiki.hrdlog.net
Through this site, which is similar to WikiPedia, it is possible to make available for the community your own radio experiences (electronic,experiments, etc).
So if you are an amateur radio or an electronics enthusiast, remember to share your knowledge and experience on WikiHamRadio.
Other news
* Possibility for the web site to remember your last login and not to ask again your password(Keep me logged in)
* It has been optimized the update of the ViewLogbook.aspx page,which now is able to visualize also the hour of the last changes to the logbook and the program used.
* We are preparing HRDLabel version 6, which will allow to print the QSL just drawing the data directly from HRDLOG.net.

SB PROP @ ARL $ARLP023
ARLP023 Propagation de K7RA

ZCZC AP24
QST de W1AW
Propagation Forecast Bulletin 23 ARLP023
From Tad Cook, K7RA
Seattle, WA June 8, 2012
To all radio amateurs

SB PROP ARL ARLP023
ARLP023 Propagation de K7RA

Average daily sunspot numbers increased about 60% during the past week (May 31 through June 6), when compared to the previous seven days (May 24-30). The increase was 48.5 points, from 81.9 to 130.4. Average daily solar flux was up 18.6 points from 111.6 to 130.2.

The increase in activity began June 1. On May 29 the daily sunspot number was 73, with four sunspot groups visible, 1486, 1488, 1490 and 1492. On May 30, the size of groups 1486, 1488 and 1492 diminished, but 1490 grew, and the sunspot number was 78. On May 31 sunspot groups 1486 and 1488 disappeared, and new groups 1493, 1494 and 1495 appeared. The daily sunspot number was still about the same, 76. On June 1 three new groups appeared, 1496, 1497 and 1498, and the daily sunspot number jumped to 151, and the next day the sunspot number was 113.

On June 3 sunspot group 1499 appeared, the sunspot number was 133, and on June 4 three more sunspot groups arose, 1500, 1501 and 1502. Two groups disappeared, 1490 and 1492, and the sunspot number jumped again, this time to 155, the high for the week and the highest since May 14 when it was 156.

On June 5, group 1492 emerged again (briefly), 1495 and 1501 faded, and new sunspot group 1503 appeared. The sunspot number was 154, about the same as June 4. On June 6 groups 1492 and 1500 disappeared, and the sunspot number dropped to 131. On Thursday, June 7, the daily sunspot number dropped to 98, and sunspot groups 1502 and 1503 were gone. Solar flux also made a big drop, from 140 on June 6 to 128.2 on June 7.

Actually the noon solar flux on June 6 at the observatory (in Penticton, British Columbia) was 151.9, but because NOAA reported it as 140, from past experience we know that the higher number was an outlier, a value indicating that the 2.8 GHz receiver at the Penticton observatory must have been overwhelmed with radiation,

perhaps from solar wind, that made accurate measurement of solar flux difficult. This is similar to front-end overload in a receiver, when a strong nearby signal swamps the input.

At ftp://ftp.geolab.nrcan.gc.ca/data/solar_flux/daily_flux_values/fluxtable.txt you can examine the raw numbers from Penticton. There are three readings per day at 1700z, 2000z and 2300z. The local noon (2000z) reading is the official solar flux value for the day. Judging from the readings just before (138.7, 133.6 and 132.7) and just after (134.5, 131.4 and 128.2) the June 6 noon reading, an estimated value of 140 seems generous.

Compare these readings to the solar flux numbers in the NOAA table of values at http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt and you can see how the Penticton flux values resolved at one digit past the decimal point are presented as whole numbers.

There are some nice photos of the observatory at Penticton in a 2011 presentation by astrophysicist Kenneth Tapping at http://lasp.colorado.edu/sorce/news/2011ScienceMeeting/docs/presentations/6i_Tapping_SORCE2011-KFT.pdf.

Geomagnetic activity peaked on June 3, when the planetary A index was 19, and the high-latitude college A index was 33. The activity continues, with the planetary A index on June 4-6 at 16, 17 and 17, and the predicted planetary A index for June 8-11 at 8, 5, 10 and 10, followed by 5 on June 12-17. Geomagnetic activity is expected to increase again, with a predicted planetary A index on June 18-20 at 15, 12 and 8. For June 21-25 a planetary A index of 5 is expected, followed by another peak at 15 on July 1 and again on July 15.

Predicted solar flux is 130 on June 8-10, 135 on June 11, 130 on June 12, and 125 on June 13-15, 115 on June 16-18, and 110 on June 19-26.

The recent geomagnetic activity was caused by a coronal hole, an opening in our Sun's magnetic field allowing solar wind to spew forth.

Petr Kolman, OK1MGW of the Czech Propagation Interested Group says there is a "High probability of changes in solar wind which may cause changes in magnetosphere and ionosphere, expected on June 17-18." He also says to watch for quiet to active conditions June 8-9, quiet to unsettled June 10, quiet June 11-12, quiet to active June 13, mostly quiet June 14, quiet to unsettled June 15-16, quiet to active June 17, mostly quiet June 18, active conditions on June 19, quiet to unsettled June 20-21, mostly quiet June 22-23, and quiet to unsettled again on June 24-27.

You've heard of the glory days of Cycle 19 (maybe you were on the air in the late 1950s?) and that the twentieth century was an

unusual period of heightened solar activity? Well check out this interesting piece, presented by a researcher who thinks the modern sunspot numbers may have been inflated: http://www.leif.org/research/The%20long-term%20variation%20of%20solar%20activity.pdf.

Just after last week's Propagation Forecast Bulletin ARLP022 was posted, this came in from Mark Bell, K3MSB of Airville, Pennsylvania:

"Just a quick note on 6 meter happenings from FM19. I've only been on six since about 2005, but this year I've seen openings into the Caribbean, South America, and Europe in late May which is a few weeks earlier than typical. On May 26 at 2231Z I worked FG8AR, followed shortly thereafter by J69MV. May 31 at 0049Z yielded HK7AAG who was up and down with deep QSB. At 1555Z on the same day I worked Costas SV1DH in KM18. Costas was putting out a decent signal into the East Coast. I emailed him after our QSO and he reports: "Running hr 1KW RF into 7el Yagi CL6DXX CREATE and I'm on top of a seven story building, clear to US, but have lots of Athens city noise limiting greatly my reception and so lost many US station calling..."

And last, baby boomers (those of us born in the United States between 1946 and 1964) of a certain age may recall the scary early-1960s, when we lived with fear of The Bomb, and the Cold War raged in the news. There was great fear of Russia and the Eastern Block, and we would see occasional references in the news to the Soviet newspaper Pravda and what seemed to us like wild propaganda. At the same time, we saw public service announcements on television about Radio Free Europe, transmitting a USA version of truth (Pravda, by the way, literally translates from Russian as "true" or "truth") to people "behind the Iron Curtain," who we were told were hungry for an alternative to state-controlled media. Well Pravda is still publishing, and it turns out Radio Free Europe is still broadcasting. Check out this wild story from RFE quoting a Russian scientist who posits that increased solar activity correlates with periods of heightened social unrest: http://www.rferl.org/content/russias-sunspot-revolution/24604395.html.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 31 through June 6 were 76, 151, 113, 133, 155, 154, and 131, with a mean of 130.4. 10.7 cm flux was 117.3, 128.6, 129.1, 129.4, 128.2, 138.7 and 140, with a mean of 130.2. Estimated planetary A indices were 10, 6, 9, 19, 16, 17, and 17, with a mean of 13.4. Estimated mid-latitude A indices were 7, 6, 8, 16, 14, 15, and 17, with a mean of 11.9.

http://www.cassaward.com/
The Cass Award
Presented annually, the Cass Award encourages DXPeditions to maximize the number of DXers worked with a $1000 prize for the single-operator DXpedition that works the most unique callsigns within a 4-week interval. This award honors the wisdom and spirit of Cass WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers that DX IS! The timely story below is written in WA6AUD's style.
Too Many Awards
Well, I dreamed I saw the lights on the cluster flashing,
>Saying something about a spot.
>There were call signs listed and
>Callers calling
>And alarms were going off.
>There was a pileup building
>On the band
>That was growing like a fire.
>Hear the DX station pound the key
>On fourteen oh two three.
>Hear the DX station pound the key
>On fourteen oh two three.
One of the Local QRPers came by the other day with purpose in his stride and a glare in his eye. It was a warm, spring day, and we were sitting on the verandah with the window open. There was mostly hissing as the rig scanned a rather dead band. It was one of those lulls in the afternoon when the bands take a rest before the early evening flurry of activity. As we watched the QRPer beat his way up the hill we had the usual twinge of anxiety. We never really understood it, but we suspected it was a bit of the residual fight or flight primordial protection. For while these Local QRPers sometimes bring amusement and even a bit of newfound DX information, they often cause enough aggravation to make it wise to exit before the show begins.
We waited a bit too long, as the QRPer made eye contact, and our escape was blocked. This one was a bit overweight, sleek of head, and wearing a baseball cap. He made his way up the steps and flopped into the chair beside us, needing a few seconds to catch his breath before he began. This one seemed to be carrying the weight of a heavy load on his shoulders. "Tell me", he said, staring at us with his beady little eyes, "Why do the pileups never die down? Why is it after 10, 12, even 15 days the hordes are still calling?" We looked at him with the usual poker face and said, "How so? Things always are crazy the first few days, but after a week no matter how rare, the din subsides and the spread narrows.
It was like we threw gasoline on a fire! "Not always true!" he shouted at us, leaning closer and waving his finger in the air. "When I first started there were more DXers and more Hams than today. And now it seems that every time there is a new one on, the pileups are bigger and they last days longer! I hear the same calls on every band and every mode working the DXpedition over and over! It isn't fair. I have a tribander and a 500 watt amp, and still I have to fight for hours to try to get a contact. Sometimes for days! And I know most of the calls in the pileup have worked the DX before! Some of them are #1 Honor Roll,

and still they are in there calling and calling! Why is that?
We thought about it for a bit and then said, "You missed that rare one that was activated a few weeks ago, right?" NO!!" was the quick retort, "Not at all!!" I got them on the third day on 20 CW and then a backup on 17 phone, but I spent endless hours calling and calling. He was S9 most of the time, but I heard stations calling him who I know had it confirmed from 15-20 years ago, and others who I heard work them an hour earlier on 20 phone! I checked the Internet log and some of them had them worked 6-7 times the first day! 40 phone, 40 CW, 30 RTTY, 17 CW, 15 phone, 10 CW! Why do they need to keep calling and calling and making it harder for me? They have monobanders and stacks and big amplifiers, and all that sophisticated software that sets off alarms when the DX shows on any band or mode they haven't logged them on. At the end of one of the operations last year, I saw a few calls that had 26-27 QSOs with the same DXpedition!! Why do they do this?
Are they duping them on the same band and mode?, we asked. No, but you only need one CW QSO and one phone QSO and one digital QSO to satisfy the DXCC. So what is the point of working them on 160 through 10 on CW? And on 160 through 10 on phone? And 160 through 10 on RTTY or PSK or whatever other mode they show up on? And 160 is really tough, so if you happen to get lucky enough to log them on 160M CW, why are there DX Cluster comments begging for 160 SSB? It makes no sense!
We were starting to see the point the QRPer was making and, although we were pretty sure of the answer, we decided to get a second opinion. So we hauled the Local QRPer up the hill a bit further to consult with the Old Timer. The Old Timer had his amp apart on the bench and was replacing the plate choke. Resonates on 25 MHz and I nearly burnt it out trying to tune this thing for 12, he explained, so I'm moving it up to 26-27 MHz. I need full power for all the bands and this thing was designed before we had 30/17/12.
The QRPer didn't seem interested in the amp redesign, and launched right into his story, with pacing back and forth and wiping the sweat off of his upper lip. Occasionally he stopped to stare at the Old Timer to make sure he was listening. The Old Timer was winding his plate choke and checking it with his grid dip meter.
He looked at the choke with a slight smile of satisfaction. Then he turned to the QRPer and said, "How many have you got worked and confirmed?" The QRPer stopped for a second, and then replied, "It is number 281 worked and I have 277 confirmed. Why?" The Old Timer added half a turn of wire, made a final measurement and put the choke down on the bench. "I've got all 340 confirmed, and with deletions, I think I'm somewhere around 366. Know why I'm working on this amp?" The QRPer stopped pacing and answered, "So you can work DX on 12 meters." "Right", the Old Timer replied.
The QRPer scratched his head and said, "But if you have all of them worked, why do you need them on 12? You have them on other bands . . . wait! I get it! You are after 12 meter DXCC, right?" "Nope, got that with 100 watts 5 years ago." "Then why work them on 12 if you already have 12 meter DXCC?" The Old Timer looked back and stated the obvious, "The DXCC Challenge. Only have 168 on 12."
Enlightenment! The QRPer jumped up and exclaimed, "I get it! The reason for the big pileups on every band is because everyone is chasing the DXCC Challenge! OK, it still makes my life difficult, but I see the reason." Then his face took on a puzzled look and he said, "But wait a minute! Red-Eyed Louie has well over 300 on 12, and I hear him in there chasing every DXpedition. Chasing stuff I know he has verified by the DXCC Desk on 12 meters. Why is he doing that?" We had the answer for that, and before the Old Timer could speak, we simply said, "CQ DX Marathon.".
The QRPer stepped back and looked at us. He wasn't happy. "That's the one that starts over every year at zero! Another award to contend with. OK, so that adds to the pileups too. But why are there DXers in there calling on every mode on every band?" We spoke in unison with The Old Timer "Leader boards."

Son of a Gun! The QRPer threw his baseball cap on the floor, clenched his fists and screamed, "So I have to compete with the regular DXers, the DX Challenge guys, the CQ DX Marathon and now this Leader board thing!! That's not fair! There are too many awards.
We thought for a moment and said, "There is no award for the Leader board. It's just a competition to see who can get their call into the on-line logs the most, and who can do it the fastest.
"This is ridiculous!", the sleek-headed QRPer yelled. "All you bored old fellows are tying up the DX to get awards that are less important than the basic DXCC! And in some cases, there is no award at all! No wonder I can't get through for a week." He glared at us and let out a growl of exasperation and frustration. "How can we fix this?" The Old Timer shrugged and said, "It isn't broken. There is nothing to fix. DX IS! Who told you that the basic, mixed DXCC was the most important award? Just remember, son, that DX IS!
"What do you mean? You two have been saying that forever and it makes no sense! DX IS! DX IS! What does that mean? I want to work everything on the DXCC list, and that's what is important. He threw up his arms in frustration, stomped, out and ran down the hill. The Old Timer looked at the crumpled baseball cap on the floor, "Hope he doesn't sunburn his head.
We turned to the Old Timer and said, "Good thing we didn't mention WPX. Lot of those DXpeditions get new prefixes. Some of the fellows are looking for new zones too." The Old Timer picked up his plate choke and looked at it carefully. Then he said, "Lot of the DXers who have thousands of QSLs never send in for any awards, either." We nodded in agreement, "For many of the QRPers, this is the hardest of the Eternal Enigmas to understand, and one of the biggest Mysteries of the Ages. It isn't the chase to work them all, or to fill in bands and modes. Or to get an award to put on the wall. It's to understand that DX IS!
And with that we left the Old Timer to work on his amp. We walked back down to the house and into the shack to wait for the polar path to open to Asia. Some times things can't be put into words, and this was one of them. DX IS! Follow the advice of Lord Baden Powell, the Hero of Mafeking, and Be Prepared. Be prepared for big pileups. Huge pileups with a lot of familiar calls!
by Paul VE1DX

Hugh Cassidy, or "Cass" as he was known, began the West Coast DX Bulletin (WCDXB) 1968, publishing it for 11 years, every week, without missing one . . . and he and his XYL Virginia did it alone! That's right, a two person publishing team who used the cover "The Marin County DX Group." At its peak, the WCDXB had a circulation of 3200 . . . 2600 in the US, Canada and Mexico and 600 overseas. This was all done by hand by these two people! Their equipment in the shack consisted of a Multilith 1250 offset printing press, a big camera and a processor for making the paper printing plates.
The WCDXB had the usual DXpedition information and propagation forecasts, etc. However, what made it unique was Cass's editorial every week where he put a humorous spin on the DX events of the day. He did this by inventing a unique writing style, along with a number of fictitious characters that argued about DXing, DXpeditions and almost anything else that was controversial at the time. In the limelight were the Local QRPers. They were not QRP operators in the true sense . . . in fact many of them had respectable linear amplifiers and a few even had monobanders to go with the extra power. They were deemed to be DXers with country totals somewhere between 100 and 150. They had enough experience to ask the right questions, but never really understanding the answers. The Locals had the interest, energy and motivation. They wanted to know everything about DXing, and they were the ones who were always seeking the true meaning of DX IS, trying to understand
the Mysteries of the Ages, the Inevitable Truths and the Eternal Enigmas of DXing.
The Old Timer knew everything about DX and DXing. He had everything worked, and had grown

up with amateur radio. It was rumored he was there when the first DXCC QSO was made in 1945. He never tired of DXing and was always ready for the next new one. The old Timer had all the answers, but it was difficult to get him to share them with the QRPers. The Old Timer was both patient and impatient at the same time, realizing that in many cases if you had to ask the question, you wouldn't understand the answer! Sunspot Louie watched the solar flux and the Ap index. His cousin, Red-Eyed Louie, was forever spending long days and nights tuning the bands . . . he always knew where the DX was, when it was on, etc. His legendary red eyes came from scanning the dials looking for DX to report, and, more recently, from watching DX Cluster screens. There was the Legion of Handwringers, the malcontents who were forever finding something to worry and complain about. The Hero of Mafeking, a relative of Baden Powell, was always around prior to DXpeditions warning the Deserving DXers to "Be prepared!"

The Palos Verdes Sundancers were the ones who brought on the solar cycles . . . they first appeared near the bottom of Cycle 20 when QST was reporting the possibility of another Maunder Minimum. There was historical evidence that there was a time some hundreds of years ago when there were no sunspots for a period of about seventy years. This fact was discovered by someone named Maunder, hence the name. In order to prevent such a dire reoccurrence, the Palos Verdes Sundancers got out their grass skirts and the big bass bongo, Big DX, and danced up the sunspots every 11 years or so. The problem with the Sundancers was that after they got the flux up, they lost interest and stopped dancing This plunged us into another cycle minimum and they had to be coaxed into doing it all over again.

Terms such as The Great Days of DXing, Only The Deserving, Be a Believer, and of course DX IS! all came from the wit and wisdom of Hugh Cassidy and the WCDXB. We still hear these phrases today being used by seasoned DXers and newcomers alike, some perhaps not even aware of their origin. Nevertheless, they have become part of the DX experience, jargon exchanged by true-blue DXers in their quest for just one more new one!

In 1979, Hugh Cassidy decided to cease publication of the WCDXB. In his own words, "In simple truth, the bulletin was taking all our time every day of the week. There were times when I would work until two or three in the morning on the bulletin and then go right back to work when we arose in the morning." When Hugh ceased publication, there were other editors who claimed they were the successor to Cass. This is not entirely true. Again, in Hugh Cassidy's own words: "On the WCDXB, I was the only editor. I ran its course and knocked it on the head when I got to the point where I had to end it. If some say they are the successor, it is not quite true. One group wanted to buy the mailing list, I sold that. I never did sell the bulletin." Cass went on to be the DX Editor for CQ Magazine for 10 years.

WA6AUD was elected to the CQ Magazine DX Hall of Fame not a DXpeditioner, but because of his literary contributions to DXing. And this honor was well deserved. Absolutely.

We miss the WCDXB. WA6AUD's legacy lives on in the minds of the Deserving True-Blue DXers, who, for the most part, have come to understand the true meaning of DX IS! Cass made us laugh at ourselves. He made us think about DXers and DXing! He showed us our strengths and weaknesses, and most of all, he made us better DXers.

* The State of DXing - a story by Cass from the 1979-05-23 issue of the West Coast DX Bulletin
* DX Stories - written in Cass' style by Paul VE1DX

The Cass Award will be presented each March to the single-operator DXpedition that during the previous year worked the most unique callsigns.

* To qualify as a DXpedition, the operation must take place in a single DXCC entity in which the operator does not reside or own property.
* To qualify as a single-operator DXpedition, all QSOs must be have been made by one

operator.
* If a submitted log encompasses QSOs made over an interval longer than 4 weeks, only QSOs from the first 4 weeks will be counted unless a later starting date and time is specified.
* Logs must be completely uploaded to Club Log before 0000Z on February 1st.
* Logs will be checked against a list of known active callsigns; callsigns not found in this list for which positive confirmation cannot be obtained will not count toward this award.
Submit your DXpedition's log by exporting an ADIF file from your logging application and uploading it to the DXpedition's station callsign account in Club Log before 0000Z on February 1st. Each QSO record in this file must include the following fields:
* CALL
* QSO_DATE
* TIME_ON
* BAND
* MODE
Then send an email message declaring your participation to Submission@... ; if your log encompasses QSOs made over an interval longer than 4 weeks and you wish to specify a start time other than that of the first QSO, specify this start time in the message.

Contributions to the Cass Award have been made by:
* Art N4PJ
* Bill W9OL
* Club Log (Michael G7VJR)
* Dave K1ZZ
* Duncan KF6ILA
* DXLab (Dave AA6YQ)
* Franco 3A2MW
* Jerry K3BZ
* Networks & More! (Jamie W2QO)
* Paul VE1DX
* Rick K8GI
To add your name to this list, send an email message to Contribution@... .

2813. Logger32

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-10 03:42:34 UTC
From: Annes Samah
Topic: 2813 Message: 2813

Selamat pagiOM Imam - YB4IR, saya pengen tanya OM Imam. Saya sudah download logger32 dan sudah fix. Tapi OM Imam saya belum tahu cara pemakaiannya. apakah radio saya
TS 680 S Ken Wood bisa memakai logger32 itu OM Imam? And how to connect my radio to my PC untuk dapat mempergunakan logger32 itu OM Imam, mohon petunjuknya ya OM Imam. Sementara itu dulu yg saya tanyakan ya OM Imam dan PC saya memakai Window 7 Propetional. Terima kasih sebelumnya ya OM Imam. Mudah2an saya dapat mengikuti jejak OM Imam dalam DXing/Contest. Salam hormat buat keluarga and best regards de YB4TRY

Thanks & regards,
Annes Samah (YB4TRY)

2814. Bls: [YBDXC_News] Logger32

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-10 04:00:02 UTC
From: yb4ir@yahoo.com
Topic: 2813 Message: 2814

Om Annes,
Untuk menghubungkan Radio ke PC, diperlukan CAT Cable.

Type dan jenis CAT Cable bisa di lihat di manual book radio tsb.

Sebetulnya tanpa CAT Cable, kita sudah bisa menjalankan logger software utk kebutuhan log sheet kita, hanya saja utk frekuensi, Band dan Modenya kita input secara manual sebelum kita memulai buka warung (DXing). Sedangkan utk Date & UTCnya secara otomatis akan menyesuaikan sendiri dengan jam pada PC.

Utk info yg berhubungan dgn logger32, coba recheck posting sebelum ini, karena sudah pernah di bahas ttg cara install dan pengaturannya. Namun tidak menutup kemungkinan utk kembali kita diskusikan bersama2.

Salam,
Imam YB4IR

OPDX Bulletin 1065 June 11, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1065
BID: $OPDX.1065
June 11, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, AB2E, W2NK, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KS5Z, AA6YQ, KH6BZF, AC7DX, N7US, K8GI, K8YSE, W8GEX & 60m News, W9ILY, Amateur Radio Newsline™, 1A0C, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1HYW, I1JQJ/IK1ADH & 425 DX News, LA9VDA, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SV1DPI, TA1HZ, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 3rd-June, through Sunday, 10th-June, there were 213 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JT, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OJ0, OK, OM, ON, OX, OZ, P2, P4, P5, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TR, TT, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE, XT, XU, XX9, YA, YB,
YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
1A, S.M.O.M. (Press Release #1)

"Thirty years have passed since 1A made its way onto the DXCC list. And an activation by an International team looks to celebrate the uniqueness of this event. So, from the 1st to the 4th July, we will listen them on the air as 1A0C from Santa Maria del Priorato, home of the Sovereign Military Order of Malta. The callsign that will be used belongs to the 'The Order of Malta's Italian Relief Corps (CISOM)", an organization specialized in bringing assistance and relief during emergencies. This underscores the dual value of this activation. On the one hand, there's the fun side ham radio, giving a not so easy 'new one' to as many stations as possible (especially from the U.S. and Japan). On the other hand, however, there's the noble goal, as often seen in ham radio, where a spirit of cooperation and mutual aid are shared by operators all over the world. The team's aim, in fact, is to raise funds thanks to donations and contributions from QSL requests
in order to buy radio equipment which The Order of Malta's Italian Relief Corps volunteers will be able to use in case of emergencies.

>The operators list includes: 1A0X, 1A0Z, EA2RY, EA5RM, EA7AJR, EA7KW, F5CWU, IN3ZNR, IT9YVO, IZ8IYX, PB2T, SP3DOI and KH6CG as a pilot for North America and Pacific. They will be active on HF+6m and the QSLs for contacts with 1A0C can be requested via Francesco Cozzi, 1A0Z. A website will be online soon, stay tuned! 73 de 1A0C"2012 TOPBAND MOST WANTED SURVEY

This annual survey of 160 Meter DX needs is taken by Garry/NI6T and Larry/K8UT and is now available online at:http://survey.hamdocs.com/?sid=11389Please submit your needs list between now and August 31, 2012. Modifications submitted after August 31, 2012, will be used for the following year's survey. The results for 2012-2013 will be available in September 2012. A link to the 2011 Topband Most Wanted Survey results is available at:http://www.k8ut.com/tiki-list_file_gallery.php?galleryId=12

5H, TANZANIA

Just a reminder that Chas, NK8O/VE3ISD, has traveled to Mwanza on Lake Victoria for several years working there but has never operated any amateur radio from Tanzania. Look for him for the first time to operate as 5H9CP between June 11-22nd. Chas states,

"I am primarily a CW operator. QRP and straight key operators, please be ready! After fighting through pile-ups with my QRP station at home, I understand the challenges. The rig on this trip will be an Elecraft KX3 and antenna arrays will depend on the trees, how high I can get the ropes to go, and whether a dipole, loop, or vertical will be the best for the site from which I choose to operate. Times and frequencies will be published [QRZ.com] before my departure for Tanzania, but they definitely will not be written in stone. Operating times will depend entirely on my responsibilities and schedule at the Nyakato Health Center."QSL via NK8O.

9K2, KUWAIT (Special Event)

Members of the Kuwait Amateur Radio Society will be active with the special callsign, 9K2KCBB, between June 13-15th. Activity is to celebrate "World Blood Donor Day" which is held on June 14th every year. See

http://en.wikipedia.org/wiki/World_Blood_Donor_Day

orhttp://www.who.int/worldblooddonorday/en/Activity will be on CW, SSB and RTTY. QSL direct to 9K2RA.

A5, BHUTAN

The members of the FGC DX Group (Foundation for Global Children) are now QRT as A5A. The ClubLog shows as of 2308z, June 6th, the A5A team made 38068 QSOs with 14819 unique callsigns (20879/CW and 17189/SSB). Breakdown is: 337/AF, 6954/AS, 25273/EU, 4929/NA, 309/OC and 266/SA. QSL A5A via JH1AJT (see Web page for details). For more details and update, visit the A5A Web apge at:

http://bhutan2012.com/index.php

A5, BHUTAN

Just a reminder (in case you did not work the A5A operation) that a JA team of operators are now active from a hotel (altitude 10,000 ft.) in Thimpu between now June 14th. Operators mentioned with their A5 callsigns are Shigeo/JA1JQY (A52JY), Nakayama/JA1KJW (A52KJ), Kaoru/ JA3MCA (A52MA), Akira/JK1EBA (A52BA) and Kunio/JA8VE (A52VE). Activity will be on 160-6 meters [with an emphasis on 6 meters] using CW, SSB and RTTY. A beacon will be on 50.125 MHz. QSL via their home callsigns.

DXCC NEWS

Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:

XX9E - Macao; 2012 Operation

DXER ARRESTED IN GREECE UPDATE!

Amateur Radio Newsline™ reported an update this week, and that well-known DXer/World-Traveller Baldur Drobnika, DJ6SI, stated that
"I wasn't charged with espionage. As a reason of my arrest it was stated that:
>1. I performed radio traffic without the approval of the Greek authorities;
>2. I owned transmitting equipment which enabled the reception of other frequencies;
>To the accusation was later added an other point: I hindered the visualiza- tion of the content of my notebook."Kostas, SV1DPI, also reported an update on June 9th, stating [edited]:
"According to the RAAG's site, the Court decided yesterday (June 8th) that Baldur is innocent for the first accuse (operating his rig). According to the Court for the 2nd accuse (destroy of his computer and possible evidence of his activity), he was guilty. This second case will be examined again in the future, and I hope they get the right decision in the future. Baldur was, of course, in Germany (he left after the first judge) and only his lawyer was at the Court. My opinion is that what happened was by mistake in an island (Kos) very close to Turkey (the 2 coasts are only some meters far) where the Authorities were too suspicious... When Greek or foreign hams ask for special calls from the Islands which are too close to our borders, the Navy has been asked for approval. If Greece would like to have this policy for some of the islands, it should have signed the CEPT with the exception of these islands but we didn't. So everyone should have better
knowledge of the laws and stop asking these papers in general because it has no sense. But unfortunately it seems that we have more important things to do during this time frame... All SV hams, we ask from Baldur to forgive our country for the bad behavior..."EFC 2012 ON THE AIR
Look for many stations (and we do mean many - too many to list) from the Ukraine and Poland to be active during the "European Football Championship 2012" between now and July 5th. The on-the-air activity by Polish and Ukrainian amateurs that are affiliated with PZK and UARL will have numerous special event stations using the special prefixes:Polish - 3Z2012, HF2012 and SN2012Ukrainian - EM2012, EN2012 and EO2012.The complete list of callsign can be found at:http://sq2rh.idsl.pl/efc/index_en.php?go=4They will be operating concurrently with the 2012 European Football Championship, which this year is organized jointly by Poland and Ukraine. More detailed information about their activities can be found on the "EFC 2012 on the AIR" Web site at:http://efc2012.pzk.org.plActivity will be on all the amateur bands. There are two awards which can be earned during this period, as well as many interesting QSL cards and prizes.
IOTA NEWS
AN-013. Henry, LU4DXU, reports that Juan Manuel, LU4ZS, is currently based and active from the Argentine Marambio station on Seymour Island. Activity has been on 80 and 40 meters, usually working his fellow Argentine stations. QSL via LU4DXU.
AS-008. Look for JA2MET to be active as JA2MET/1 from Mikura-jima, North Izu Islands (WW Loc. PM93TU), in the Philippine Sea and the Miyake Subprefecture of Tokyo Metropolis, between June 26th and July 1st. Activity will be on all HF bands and modes. Mikura-jima is also within the boundaries of the Fuji- Hakone-Izu National Park (WFF JAFF-009). QSL via his home callsign, by the Bureau or direct.
AS-147. Taka, JA8COE, will be active as homecall/8 from Yagishiri Island between June 16-19th. Activity will be on the 40/20/17/15 meters using SSB, PSK and RTTY. QSL via his home callsign, direct or by the Bureau.
EU-032. Tim, ON5HC, will be active as F/OO5C/P from Ile d'Oleron during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ Low-Power/SSB entry. QSL via ON5HC.
EU-038. Ray, PE1GUR, will be active as PA6FUN from Ameland Island (WLOTA 1059, WW Loc. JO23VK) between July 30th and August 15th. Activity will be on 6 meters only (Watch Es, Ms

and Tropo). QSL via PE1GUR, by the Bureau or direct.
EU-044/
EU-139. Operators Waldi/SP7IDX and Mek/SP7VC will be active as LA/SP7IDX and LA/SP7VC from Mageroya Island (WW Locator KQ21VC) between June 20-29th. They plan to have 2 stations on the air - One on the HF bands and the second on 6 meters. Operations will be on 80-6 meters using SSB and RTTY. They will also be in the RSGB IOTA Contest (July 28-29th). Their equipment consist of a IC-746, TS480sat, w/Heil headsetHC6, and amps for HF and 6m, with the following antennas - HEX-BEAM by SP7IDX TECHNOLOGY 20-10m, R-7 vertical 20-10m, 6 element yagi for 6m and 2x Inverted L for 80-40m.,PA for HF and 6m. The software is Win-Test sending QSOs to Clublog in real time and Mixw. During their travel to Mageroya Island, there is a possibility to activate Seskaro Island (EU-139) in the evening or at night of June 19th and the next day June 20th, during the morning. The QTH WW Locator is KP15VR and callsigns will be SM/SP7VC and SM/SP7IDX. QSL via their home callsigns.
The log will be uploaded in LoTW. For more info, see:
http://sp7idx-hexbeam.euhttp://www.sp7vc.pl
EU-045. Operators Antonio/IZ8IQL, Giorgio/IZ8FAV, Sal/IZ8GGF, Carlo/ IZ0EGC, Giuseppe/IZ0GZW and Gianni/IW0BTN will be active as IB0F from Ponza Island (IIA LT-001, MIA MI-076, WLOTA 1395) in the Tyrrhenian Sea between July 23-31st. They will also participate in the RSGB IOTA Contest (July 28-29th). QSL information TBA. Watch (QRZ.com).
EU-056. Operators Glenn/LA8XRA and Trond/LA9VDA will be active as LA6Q from Little Sandøy Island between August 13-17th. This will be a first activation of the Sandøy Lighthouse (WLOTA LH-2769). Activity will be on the 80-10 meters using CW, SSB and RTTY. QSL via LA9VDA, direct or by the Bureau (E-mail requests for Bureau cards can be sent to: la9vda [at] gmail dot com). Trond states, "Thanks to W5BXX Dave for sponsoring us."
EU-079. Operators Glenn/LA8XRA and Trond/LA9VDA will be active as LA6Q from Jønsholmen (Jonsholmen) Island between August 10-13th. Activity will be on the 80-10 meters using CW, SSB and RTTY. If they have time, he will make side trips to Dimna Island (EU-079, WLOTA 2438) and Nerlandsøy Island (EU-079, WLOTA 2193). QSL via LA9VDA, direct or by the Bureau (E-mail requests for Bureau cards can be sent to: la9vda [at] gmail dot com). Trond states, "Thanks to W5BXX Dave for sponsoring us."
EU-158. (Update) Operators Mike/SV1RK, Stavros/SV3CJU, Costas/SV1AER and Gabriel/SV1GSV were expected to be active from Sapienza Island (LH GRE116, WLOTA 1471, WW LOC KM06US) as J48SAI between June 8-10th. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. QSL via LoTW or via SV1RK, by the Bureau or direct.
NA-067. Nathan, N4YDU, will be active as W4O from Ocracoke Island between 2300z July 26th, and 1200z July 29th. He plans to be in the RSGB IOTA Contest (July 28-29th) as a Single-Op/ All-Band/Low-Power entry. QSL via N4YDU - Direct Only.
OC-128. Dandy, K6ZRH/DU1IMA, will be active as K6ZRH/DU1 from Palawan Island (WLOTA 1612) between June 10-30th. Activity will be on 40/20/15 meters SSB. QSL via his home callsign, direct only. OC-170. (Op Needed!) members of the West OZ DX Group are planning a visit to Woody Island this year. The group is looking for keen operators to join them. The visit will likely occur in the southern spring, leaving Perth on a Thursday and returning on a Tuesday. If you are interested, please contact them at:
Webmaster@westozdx.netFor update, watch:http://www.westozdx.net
SA-037. To celebrate Venezuelan Navy Day, members of the Grupo DX Caracas will be active as YW5B from La Blanquilla Island between July 11-16th. Activity will be on 160-2 meters using CW, SSB, Satellites, FM and the Digital modes. QSL manager TBA.
J3, GRENADA (Is Still On!)
Terry, KS5Z, is planning a 7 day stay in Grenada with the guidance of Harry, AC8G, for the CQWW DX SSB Contest (October 27-28th). Interested operators should contact Terry via his E-mail address ks5z@... for additional information.

The Hawaii IOTA Club (KH6RRC) was born to explore and operate from "New-One IOTA" islands in Hawaii. Founding members are David/AH6HY, Merle/K5MT, Yuri/N3QQ, Dick/N7RO and Lanny/W5BOS. They welcome participation from interested parties in their planned expeditions and state, "73 and CU soon from KH6!". They provide a map on (QRZ.com) of all the Hawaiian archipelago, and also mention that the Papahanaumokua'kea Marine national monument spans the archipelago from Nihoa to Kure Atoll, it is one of the largest Marine Protected Areas in the world.
NEW AWARD FOR DXPEDITIONS
Dave, AA6YQ, reports [edited]: "The Cass Award encourages DXpeditions to maximize the number of DXers they work by annually presenting a 1000 USDs prize to the single-operator DXpedition that works the most unique callsigns within a 4-week interval. This award is named in honor of Cass, WA6AUD (SK), whose stories in the West Coast DX Bulletin taught a generation of DXers, that "DX IS"! The winner of the 2012 Cass Award will be announced in March 2013.
An 'unlimited' award category with a larger prize is under development for introduction in 2013. If you'd like to pledge a contribution, send E-mail to Contribution@... To learn more, visit the Cass Award Web site at:
http://www.CassAward.com
OG0/OH0, ALAND ISLANDS
Look for the following operators and callsigns to be active from Aland Islands during the CQWW DX RTTY Contest (September 29-30th):
OG0Z - Raimo, OH3BHL, as a Single-Op/Single-Band (10m) entry. QSL via W0MM.
OH0Z - Juha, OH9MM, as a Single-Op/Single-Band (15m) entry. QSL via W0MM.
OH0I - Marko, OH8KVY, as a Single-Op/Single-Band (20m) entry. QSL via OH3BHL.

QSLS RECEIVED VIA THE BUREAU: 3B9/G3TXF, 4K9W, 5R8HL, 9Q1EK, 9X0R, A6/DL9WVM, CT9/DL3KWR, DK4PL, DL1CA, DL7VKD, DL8LRZ/P, DL9GR, E44M, EA1CDV, EA8AOP, EK6TA, FJ/SM5FUG, FO0PT, FY/G3TXF, GM3MZX, HB9MGS, HC/SM6FKF, HD2M, IK8HJG, IN3NJB, IS0OFC, IZ0FVH, IZ0MQN, J73CCM, JA1KEV, JA4DND, JA5PJ, JA6ATL, JG2AJK, JH1BBS, JH3LSS, KB1SUA, KC0BMF, ON3LA, P29VCX, P29VLR, S59SV, SA4BFH, SV5/DJ5AA/P, T30AQ, T6MB, UX5IO, VU2ATV and WA3WZR
RUSSIAN IOTA, ARCTIC STATION, RRA and RFF OP
Operators Victor, RW0BG (RRC #869), and Igor Petlin, plan to travel along the Yenisei River to the North on the Yenisei River from Dudinka. They will start from Talnah in early July. Scheduled stops on the islands of the Yenisei River for the "Russian Robinson" program are: Kazan Island (RR-06-32), Mininskie Island (RR-06-33), Nikandrovskie Island (RR-06-34), Deryabinskie Island (RR-06-35) and the Island of Golchikha (RR-06-36). It is also planned to stop at the existing Sopochnaya hag Polar Station. Interest in the polar stations on the air is always great. The second phase of the expedition is the Kara Sea. They are planning to stop at Deer Islands (RR-06-06) and Shokalski (RR-06-05, IOTA AS-083, Gydansky Reserve RFF-030). If they have time, they will also work in the RSGB IOTA Contest. The third stage of their expedition is Ob Bay, and possibly stopping on the islands in the IOTA group AS-109; which they have not yet decided. Further possible stop in the Ob Bay are Chulym to Achinsk, moving to the city of Krasnoyarsk on a vehicle (~ 160 km). The final stage on the river Yenisey is a possible stop for a short activity at the Biosphere Reserve Tsentralnosibirsky (RFF-096) to Dudinka, then return in Talnakh.
SV9, CRETE
Luc, ON6DSL, will be active as SV9/ON6DSL/P from the Island of CRETE (EU-015) between August 27th and September 3rd. Activity will be a holiday style, a SOTA portable and SSB only operations, and using a FT817ND w/5w QRP into a multiband dipole. QSL via his home callsign, direct or by the UBA Bureau.
V7, MARSHALL ISLANDS
Steve, G3ZVW (aka ZD8N and AF6SU), is now active as V73/AF6SU from the V73AX Kwajalein Amateur Radio Club (KARC) station on Kwajalein Island. Activity has been mainly on 20 meters CW. QSL via G3ZVW, direct or by the RSGB QSL Bureau. PLEASE - Do not send your cards via the U.S. callsign or address!
VQ9, CHAGOS ISLANDS
Chuck, W4XP, will be active as VQ9XP from the VQ9X club station on Diego Garcia (AF-006) between August 9-25th. Activity will be limited to his spare time with a focus on 6 meters and some HF (160-10m) operations. QSL via his home callsign, direct or LoTW.
W3, UNITED STATES (Special Callsign)
The Montgomery County (Maryland) Amateur Radio Club (MARC) will use the special callsign W3M during its Field Day operations on July 23-24th. The operation will take place from Davis Airport in northern Montgomery County, MD (FM19kf).
W9DXCC CONVENTION
Jim, N7US, reports: "The Northern Illinois DX Associ- ation invites you to join us at the

60th annual W9DXCC DX convention, to be held Friday and Saturday, September 14th and 15th, at the Holiday Inn in Elk Grove Village, IL.
New this year is a four session class, 'DXing from the Black Hole', preceding the convention, from 1-5 PM on Friday. Targeting beginning DXers, each session will cover a different aspect of DXing, including operating practices, station design, chasing awards, QSLing, and pro- pagation from the Black Hole.
The convention kicks off at 7:30 Friday evening with registration/ packet pick-up and an open bar, followed by a hospitality suite hosted by the Northern Illinois DX Association at 10 PM. Registration on Saturday starts at 8 AM, followed by the program at 9 AM.
Program highlights include HK0NA Malpelo Island by W0GJ, T32C Christmas Island by G3SVL, K9AJ's IOTA update, and propagation by K9LA. The CW copying contest is at 5 PM, followed by a reception and the banquet at 6:30 featuring noted DXer and contester Fred Laun, K3ZO. The audio/visual setup is top notch, making it easy to see and hear the programs.
A hospitality suite hosted by the Greater Milwaukee DX Association is at 10 PM.
The Holiday Inn is conveniently located just west of O'Hare Inter- national Airport and just off Interstate 90. The hotel offers a free airport shuttle and low room rates.
Complete convention details are available on the Web site at:
http://www.w9dxcc.comNOTE: We will NOT be mailing flyers and registration forms this year. Please save a copy of this E-mail and register on the Web site. You can pay by check or PayPal for your convenience. Discounts will be available for those signing up for both the class and the convention and for registrations received by September 6th. We look forward to seeing you."

EFC 2012 on the Air

In 2012, both Poland and Ukraine will be the joint hosts of the European Football Championship which is called 'EURO 2012'.
This great football sporting event is the third largest sports event in the world, and it is the first time the event will be held in Poland and Ukraine.

Sixteen European football nations were selected after the tournament qualifiers, representing all European countries. Each National football team will be playing for the magnificent European Trophy and of course to win in the four stadiums in Poland and the four stadiums in Ukraine.
The stadiums hosting EURO-2012 tournament are located in the following cities:
- Poland: Gdansk, Poznan, Warsaw and Wroclaw
- Ukraine: Kharkiv, Donetsk, Kiev and Lviv

The opening ceremony and the first football match of EURO 2012 will take place on June 8th 2012 at the National Stadium in Warsaw, Poland, with the final match taking place at the stadium in Kiev on July 1st 2012.

As radio amateurs operating around the world, we can take an active part in the promotion of various cultural, academic and sporting activities on the "airwaves of amateur radio'. As we recall, such radio activities took place in 2006 by German radio amateurs in connection with the World Cup football games. And again in 2008, both Austrian and Swiss radio amateurs organized and operated many special event stations in EURO 2008 with a special event Award program offered.

In 2012, Polish and Ukrainian amateurs, affiliated with PZK and UARL, are promoting the EURO 2012. The Awards program, held from 1 June to 5 July 2012, will activate many special event amateur radio stations and special certificates will be offered.

Details of the individual special event stations "EFC2012 on the Air" and their operators, with whom QSOs are valid for Awards, can be seen in the "EFC2012 Stations" subpage.

We invite all amateur radio operators, as well as SWL's, to participate in our diploma program promoting EURO 2012 and football sporting events on the airwaves of amateur radio.

73!
"EFC 2012 on the Air" Team
Polish Amateur Radio Union (PZK)
and Ukrainian Amateur Radio League (UARL)

Awards

In the "EFC2012 on the AIR" award program you can earn three diplomas:
Requirements of diplomas are presented below.

Polish EFC2012 Award - issued by the PZK
Ukrainian UR-SP EFC2012 Award - issued by UARL
Second Ukrainian 2012 EFC Award issued by (KRARS) Kharkiv Regional Amateur Radio Society, EM2012L

Universal application for EFC2012 awards

Application MS Excel 2003 format
Aplication PDF format

European Football Championship
2012 Award
Award Rules

1. The Polish Amateur Radio Association (PZK) issues an award in collaboration with the Ukrainian Amateur Radio Association (UARL), in a joint effort during the European Football Championship EURO 2012 which takes place in Poland and in Ukraine.

2. This activity is carried out under the honorary auspices of The Polish Football Association (PZPN).

3. This activity takes place from June 1st to July 5th, 2012. During this period, radio amateurs may collect points needed to obtain the Award.

4. To obtain the award, the following number of points need to be collected:

40 points - SP and UR stations;
25 points - European stations;
15 points - DX stations.

5. QSOs with the following organizing stations are 2 points each:
* PZK: SN2012PZPN, HF2012EFC, 3Z2012EFC, SN2012GD, SN2012PO, SN2012WA, SN2012WR
* UARL: EM2012EFC, EN2012EFC, EO2012EFC, EN2012L, EN2012I, EN2012W, EN2012U

while QSOs with any other station operating in the "EFC-2012 on the air" program are 1 point.
• It is allowed to repeat a QSO with a given station once on another band or mode.
• A special distinction in the form of an "EXCELLENT" sticker will be provided for QSOs with all organizing stations listed above and additionally with 60 other stations from Poland and Ukraine taking part in the "EFC-2012" program.

6. Short wave listeners are also eligible for the award after meeting the same point requirements as amateur radio operators.

7. Certificate fees.
• The award in electronic form (in .pdf form) is free.
• The award in paper form is free for PZK and UARL members and club stations from Poland and Ukraine.
• The cost for a paper award for other stations is: 20 złoty/ 5 Euro/ 6 USD/ 6 IRC.

The fee should be paid to the PZK HQ bank account: PL 33 1440 1215 0000 0000 0195 0797, Nordea Bank Polska S.A. with the annotation: „EFC2012” and one's own call-sign.

8. Applications for the Award should be made by electronically by submitting a form from the Internet web page or by sending a standard application which should be sent to the following address: DOT PZK, Box 1977, 53-316 Wroclaw 14, Poland.
E-mail address: ot01@...

QSL cards are not required - the verification of the application is based on electronic logs of organizing stations, after having received the award fee (if required).

9. Award applications shall be made before December 31st, 2012.

http://manihiki2012.de/report.html

Manihiki 2012
Author, Hawa, DK9KX
Just imagine that we seven ops, (from l to r)DK9KX Hawa, DJ9KH Werner, SP3DOI Leszek, DL6JGN Hans, DH9HX Uwe,PA3EWP Ronald and DJ8NK Jan, who took the picture,setting out on a Dx-Pedition to Manihiki, Northern Cook Islandswith only 58 kg of equipment.Well, that is exactly what we did.

Due to the weight restriction on the flight Rarotonga > Manihiki
and Manihiki > Rarotonga we packed our transceivers, amplifiers,
band pass filters, headsets and log books into cardboard boxes.
We carried nothing else on the flights.
Since our last expedition was in 2009 (3D20CR)we began in Feb. 2011 to find a new target for 2012.After doing much research we decided to choosethe Northern Cook Islands for various reasons.Since 2001 there had been no big operation from there.Only several one man operations since then had taken place.North Cook was not highly ranked on theMost Wanted Lists for the America’s nor Asia,but it was on the Top 10 in Europe.Most of the Conway Reef Op’s agreed to go out again.Then in June 2011 the hard work began.
After a short while I was in contact with Nancy Kora,she and her husband Kora renting two bungalowson Manihiki. In one of endless e-mails she wrotethat they have now power 24/7 on the Island.One of the most difficult problems was over come.In August 2011 I made a reservation for sevenpeople for March 27 to April 10 2012.
Also in August 2011 I booked and paid all seven seatson Air Rarotonga just to make sure to be on board.These flights are biweekly and only for seven passengers,with a maximum baggage allowance of 10 kg each.
Beginning September 2011 I collected all the personal belongingshere at home. Everything was packed into vacuum sacks.We also bought everything needed for our station set-up.Antennas, fiber glass poles, coax, connectors, wire, rope, tools, etc.
The belongings and the station set-up (246kg) was packed into 5 bigaluminium boxes and sent October 7, 2011 per Air Freightto Rarotonga, South Cook.It arrived there October 14 and fortunately Nancy Kora, our host onManihiki, was on Rarotonga at that time. She cleared customs and broughtall the boxes for storage home.
On November 3, 2011 Mr. Katoa Banaba issued theE51M license.It was very kind of him to issue us a short call-sign.
Now we had to wait for transport from Rarotonga to Manihikiwith a supply vessel.I was told that the SV Kwai was sail Nov. 12 from Rarotonga to Manihiki.As time is not important there, our equipment was loadedDecember 2 on board the SV Kwai and reached safely Manihiki onChristmas day.
After having the confirmation that all equipment was on Manihikiwe booked the international flight from Europe to Rarotonga.
By the end of December we made our plan known tothe public.
Most of us flew with Korean Air from Frankfurt to Seouland then to Auckland where we met Leszek, who was onhis way coming from Tonga (A35YZ). We then flew withAir New Zealand to Rarotonga.Within all of these flights we never ran into luggage problemsas we only carried

the transceivers etc. and some personalbelongings for our stay in Rarotonga.
On March 27 at 19:00z we flew out from Rarotonga andarrived 4 hours later at our home for the next 14 days.

Parking lot at Manihiki Airfield.
Left the drums for refuelling.

Left: 40m vertical
Right: 12/17/30m vertical
During two weeks we were able to work48052 QSO’sAppr. 24 % are European contacts.
Only 4 qso’s on 6 meter but 26 qso’s on 60 meter.
We want to say thank you to all Organisations and to allIndividuals for their outstanding support.Special thanks to K2EWB, N7NKG, N7OU, E51JD and to thewonderful people on Manihiki.“MEITAKI”
BTW:We left ALL STATION EQUIPMENT on Manihiki.If someone is interested to go and operate from Manihikijust drop me an E-Mail e51m@... I’m happy to advise.

The 60th W9DXCC DX Convention and Banquet
Friday-Saturday
September 14-15, 2012
Holiday Inn-Elk Grove Village
1000 Busse Rd.
Elk Grove Village IL 60007
847-437-6010
W9DXCC is pleased to announce that W9DXCC 2012 will feature presentations on the recent T32C and upcoming HK0NA DXpeditions as part of our program. Please be sure to visit the website and our Programslink for updates.
Thank you for visiting our website. The W9DXCC convention has a rich tradition, dating back to 1953 when 35 DXCC certificate holders met at the Sheraton Hotel in Chicago for a short program and dinner. The conference has grown to over a full day of DX activities, and registrations now exceed 200. 2012 will mark the 60th annual W9DXCC Convention. We are pleased to announce that Paula Uscian K9IR wil chair this year's event.
New this year - "DX'ing From the Black Hole" - a series of presentations for the beginning DX'er on Friday afternoon. Click here for details.
Convention activities begin with a welcome reception in the atrium of the hotel, followed by a hospitality suite hosted by the Northern Illinois DX Association, the sponsoring organization. On Saturday morning, the registration desk opens at 8 AM, and the program begins promptly at 9 AM, led by our own inimitable Jim O'Connell W9WU, who has now been introducing our speakers and providing an entertaining day for over 30 years.
There will be a break around noon for lunch. There is an attractive restaurant in the hotel, and other food opportunities are available nearby. The W9D Special Event Station will also be available during the break.
Following a full day of programs, we will have the Raffle Prize Drawing. Tickets are $5 each and may be purchased with your registration or at the convention. All proceeds are used by the Northern California DX Foundation and the Northern Illinois DX Association to fund significant DXpeditions. At 5 PM we will again hold a CW pileup contest. Many of us find this to be a humbling experience, as the callsigns come flying at you off the tape. See how you compare to some of the best CW operators in our hobby! The 2011 pileup contest was won by Jon WO9S. Congratulations Jon!

To see items with this graphic, click here

Next is socializing in the Atrium, followed by the Grand Banquet. We are honored to have as our 2012 banquet speaker noted DX'er and contester Fred Laun, K3ZO. The banquet also features the presentation of the W9DXCC Ham of the Year Award. The 2011 recipient was Jerry Rosalius WB9Z (pictured here at K5D in 2010), who has been on many DXpeditions to the rare ones - most recently at HK0NA Malpelo inJan/Feb.2012.

Following the banquet, head to the Late Saturday Hospitality Suite, sponsored by the Greater Milwaukee DX Association.

A word about the location - since 2004 the W9DXCC convention has been held at the Holiday Inn in Elk Grove Village, Illinois. This site is conveniently located just a few miles west of O’Hare International Airport, and easily reached by auto, only a mile south of I-90, on Illinois Route 83. Free parking is available as well as free shuttle service to and from O’Hare. Reservations at our special rate can be made through the on-line link.
Please review the other tabs for more information. You won’t want to miss this one!
We look forward to seeing you in September.
73 – The 2012 W9DXCC Committee

DX Basics
DXing from the "Black Hole"
Presented by the Northern Illinois DX Association in conjunction with the 2012 W9DXCC.
Presentations will be given in four sessions during the afternoon of Friday September 14, prior to W9DXCC.
Presentations are intended for inexperienced but “eager” DX’ers. Dxing basics will be covered, including what is DXing, stations and antennas, QSLing and record keeping, awards and of course how to work DX.
Registration and cost details are here.
Presentations by*:
Mike K9AJ
Ray WA9YYY
John K9EL
Jack W9MU
*Presenters may change due to unforeseen circumstances

Schedule of Events
Friday September 14
1:00 - 5:00 PM - DX Basics Class
7:30 PM - Registration Open
7:30 PM - Welcome Reception
10:00 PM - Hospitality Suite Hosted by Northern Illinois DX Association

Saturday September 15
8:00 AM - Registration Opens
9:00 AM - Program Begins - Master of Ceremonies - Jim O'Connell, W9WU
12:00 PM - Lunch
1:00 PM - Program Resumes
4:45 PM - Raffle Prize Drawing
5:00 PM - CW Copying Contest
5:30 PM - Reception - Hosted by Northern Illinois DX Association
6:30 PM - Grand Banquet and Grand Prize Drawing
- Banquet Speaker - Fred Laun K3ZO
>- Presentation of 2012 W9DXCC Ham of the Year Award
10:00 PM - Hospitality Suite Hosted by Greater Milwaukee DX Association

2011 Prizes

GrandPrize

FT-2000
HF/50 Mhz Transceiver
Donated by

Yaesu Vertex Standard

Raffle Prize
IC-7000
HF/VHF/UHF Transceiver
and RMK7000 Mounting Kit

Donated by ICOM America

Hundreds of Prizes Given Away Throughout the Program Saturday!

http://www.arrl.org/field-day

ARRL Field Day Overview
ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. Each year over 35,000 amateurs gather with their clubs, friends or simply by themselves to operate.
ARRL Field Day is not a fully adjudicated contest, which explains much of its popularity. It is a time where many aspects of Amateur Radio come together to highlight our many roles. While some will treat it as a contest, most groups use the opportunity to practice their emergency response capabilities. It is an excellent opportunity to demonstrate Amateur Radio to local elected community leaders, key individuals with the organizations that Amateur Radio might serve in an emergency, as well as the general public. For many clubs, ARRL Field Day is one of the highlights of their annual calendar.

ARRL Field Day!Field Day is June 23-24, 2012
Is Field Day a contest, an emergency preparedness exercise, a public relations demonstration, a great event for clubs, or just a fun way to get on the air? Field Day is ALL these things! Hams set up away from commercial power and normal installations for 24 hours in June

Objective-
To work as many stations as possible on any and all amateur bands (excluding the 60, 30, 17, and 12-meter bands) and to learn to operate in abnormal situations in less than optimal conditions. Field Day is open to all amateurs in the areas covered by the ARRL/RAC Field Organizations and countries within IARU Region 2. DX stations residing in other regions may be contacted for credit, but are not eligible to submit entries.

Dates-
Field Day is always the fourth full weekend of June, beginning at 1800 UTC Saturday and running through 2059 UTC Sunday. Field Day 2012 will be held June 23-24, 2012.

Bands-
Any Amateur Radio band except 12, 17, 30 and 60 Meters

Log Submission Deadline-
Entries must be postmarked, emailed or submitted by 2059 UTC Tuesday, July 24, 2012. Late entries cannot be accepted.

Contact Information-
For Field Day information contact ARRL Field Day Manager Dan Henderson, N1ND
at fdinfo@... or by phone at (860) 594-0236.

Awards-
Field Day is not a contest; no certificates are awarded.

ules, Entry Forms And Information Packets-

Samaaa..... sih caranya, gak pake koordinasi dulu, jebrettt aja ARRL nentuin tanggal, padahal ODJ selalu ditanggal itu punya acara tahunan.
ARRL mungkin cuma ngitung hari baik bulan baik propagasi baik, gak tanya2 lagi apakah ada FD di tempat lain.

Hushh..... ngomong opo iki si qiriq (QR).

yg blm bisa on air krn boomnya mlintir kena angin.

Dear kawan-kawan YBDXC ...

Di beritahukan, bahwa YBDXC akan membuka stand pada event Jakfox di Lapangan IRTI (tempat Jakarta Hamfest tahun lalu) pada tanggal 23 - 24 Juni 2012.

Adapun kegiatan yang akan di lakukan pada event tsb adalah:

1. Eyeball QSO ..

Temu kangen dan sharing ttg kegiatan DX ing.

2. Private Workshop
Buat kawan-kawan yang ingin di install kan software logger 32, software contest N1MM dan aplikasi Lotw, harap membawa notebook/laptop nya berikut donggel modem nya.

3. Bursa QSL Card

Kawan-kawan yang ingin mencetak QSL Card dgn harga terjangkau dan kwalitas, bisa menghubungi om Djoko YB1TJ di stand YBDXC. Nantinya akan di perlihatkan sample QSL Card yang pernah di cetak oleh YBDXC.

Demikian pemberitahuan ini

Regards:

Karsono Suyanto (YB0NDT)

Om Eddy sepertinya tidak seperti itu. Yah sekedar ngobrol ngobrol saja.

Temu kangen.. Trus sharing ttg dx ing sesama kita aja. Bagi yg selama ini dx ing menggunakan log papper bisa kita bantu utk installkan softaware logger 32. Lalu di beritahukan cara cara menggunakan logger 32...

Dari mengisi log qso sampai export ke adifile.

Yang blm ada lotw, bisa di bantu.. Downloadkan trusted qsl nya... Lalu di bantu install ... Minimal sampai file tq.5 nya di kirim via email ke ARRL...

Begitu om Eddy...

Regards:

Ndut

2843. DXNL 1784 - Jun 13, 2012

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-13 02:06:38 UTC
From: Yb land Dx club
Topic: 2843 Message: 2843

DXNL 1784 - Jun 13, 2012
DX Newsletter

Visit us at the HAMRADIO in Friedrichshafen
Europe's largest amateur radio meeting HAMRADIO takes place from
Jun 22-24 at the Convention Center in Friedrichshafen on Lake Constance
We would be pleased to meet the DXNL subscribers at the booth of the
DARC Committee "DX and HF contesting" (hall A1, booth 462).

9K, KUWAIT
The "Kuwait Amateur Radio Society" activates the special event station
9K2KCBB from Jun 13-15 to mark the World Blood Donor Day on June 14.
The will work in SSB/CW/RTTY. QSL via 9K2RA, unfortunately only direct.

CT, PORTUGAL
Joao,CT1BWU, is licensed for 30 years now and celebrates this with the
special callsign CR6BWU. QSL via homecall.

CY0, SABLE ISLAND, NA-063 (update)
Alan has put down his 40m/80m/160m antenna but he can still work on
30m/20m/17m/15m/12m/10m in PSK and BPSK31 using his TS-690s and a
Hygain AV-18VS 10m high. His stay will last until the end of the year.

KH0, MARIANA ISLANDS, OC-086
Tony,JA6CNL, will visit the Northern Mariana Islands (OC-086, USi
NI002S, WLOTA 1333, Loc QK25uf) again from June 15-18. He works as KH0N
in CW only on 80m-6m. QSL via homecall.

OD, LEBANON
Gaby,OD5NJ, has been spotted on 15m from 1430-1600 UTC. QSL via EA5BYP.

ON, BELGIUM
The radioclub of Binche (ON7RY) commemorates the Belgian resistance
fighters of World War II on the historic spot Bruly-de-Pesche by using
the special callsign ON44WAR on Jun 17. They will use a Whaddon MK VII
PARASET for this purpose. QSL via ON7RY.

PA, THE NETHERLANDS
The special event station PA300BPM draws attention on the 300th horse
market in Numansdorp until June 28. QSL via PD2GSP.

SM, SWEDEN
Richard,SM2TOS, Urban,SM2SXA, Gunnar,SM2IUF, Patrick,SA2BDO,
Mats,SA2AWO, Rune,SM2EKA, and Maria,SA2YLM, are planning an expedition
to a Lancaster bomber which crashed on Oct 29, 1944, at Porjus (JP97ua)
using the special callsign SE2EE on June 16/17. The Avro Lancaster
bomber Mk1 NF920 "Easy Elsie" was one of 37 with the mission to sink

the Tirpitz in Norway. QSL via SM2TOS.
See also: http://www.sm2tos.se/easyelsie/eng

SV, GREECE
The Greek special event station SX135HRC is active until July 31 on the occasion of the 135-year old existence of the Greek Red Cross. QSL via SV1EOS.

TF, ICELAND, EU-168
Volkmar,TF/DL4AOJ, will be QRV from the island of Grimsey (EU-168) working mainly on SSB and maybe some CW with his IC 706 (100 watts) and GPA 404 (40m/20m/15m/10m) from June 15-19. He travels and operates alone so the restriction for all his luggage (tech/clothing/food/etc..) is what he can carry along. He still hopes to make a good number of QSOs, though.

UA1, EUROPEAN RUSSIA
Members of the RZ1CWC team (Victor,R1CBN, Vladimir,UA1CIO Andrew,RN1CW) and other OPs will show up from Annenskoe Fortification (WCA UA-00024, COTA-RU C-124) and from Vyborg Castle (WCA UA-00004, COTA-RU C-104, ARLHS ERU-231, RLHA RLE-new) on Jun 16. They also plan to activate Vysotsk Fortress (WCA UA-00022, COTA-RU C-122) on Jun 16/17. Listen for RZ1CWC/p in CW/PSK/SB on all bands. The log will be uploaded also to WCA E-Log. QSL via RN1CW. See also: http://www.rz1cwc.qrz.ru and http://www.wcagroup.org/ENG/main.html
---
The new award program "Gallery of the Great Genius of Russia" (GGGR) was launched in Russia. Following special event stations will be active until Aug 30:
R11GGGR Op: RK1AN
R12GGGR Op: RZ1AWZ
R22GGGR Op: UA2FDM
R44GGGR Op: UA4LAQ
R66GGGR Op: RU6BS
R73GGGR Op: UA6MM
R77GGGR Op: RK6AH
All QSLs via UA6MM.

UA9, ASIATIC RUSSIA
The city of Komsomolsk-on-Amur celebrates its 80th anniversary. The local HAMs participate in this event with the special event station UE80C from June 1 until August 31. QSL via bureau.

V7, MARSHALL ISLANDS, OC-028
Steve,G3ZVW/ZD8N, will be QRV as V73/AF6SU from the clubstation V73AX on Kwajalein atoll (Ralik chain, OC-028, Loc RJ38ur) until the end of June. He has been worked on 20m CW already. QSL via G3ZVW.

VE, CANADA
The Burnaby Amateur Radio Club (VE7BAR) was assigned the special call CG7CWPC in celebration of the 100th anniversary of the "CW Parker Carousel" (shown in "Burnaby Village Museum"). They will work in all

modes on all bands from Jun 15 until July 15. QSL via VE7ESS.
See also: http://www.ve7bar.org

The Kitchener Waterloo Amateur Radio Club (KWARC) celebrates its
90th anniversary with the special callsign VC390IC from June 18 until
July 2. The station consists of a Viking Pacemaker transmitter and
a Gonset G63 receiver. Operations will take place in SSB on 40 and 80m.
They have also other equipment for the higher bands.
QSL unfortunately only direct via VE3NQK.

The Laval-Laurentides Amateur Radio Club celebrates its 30th jubilee
by activating the special call VC2L in all modes on all bands from
June 15 until July 15. QSL via VE2NHK.

Mike,VE3NOO, may use the special callsign VX3ROYL from Jun 15 to Jul 15
to mark the 200th anniversary of the escape of the British corvette
"Royal George". He plans to work in all modes on all bands.
QSL via VE3NOO.

Not only WPX friends will be interested in the special callsign VX3T
operated by Pete,VE3IKV, on the occasion of the Calgary Stampede
centennial on June 15. QSL unfortunately only direct via VE3IKV.

W, USA
Andy,N8OFS (SMIRK 6737), will be QRV as N8OFS/p from EN91 for the
SMIRK 50MHz QSO Party running 50 watts in FM on 52.525 MHz from
Jun 15-17. QSL unfortunately only direct via homecall or eQSL.

AWARDS PROGRAM: The Activity Group of Belarus (AGB) draws attention to their
Award trophy and contest programs: http://ev5agb.com

DXCC: The XX9E operation was approved for DXCC credit. QSL cards for the
DXCC and all other ARRL awards can be (re-)submitted for confirmation
at the HAMRADIO in Friedrichshafen.

IOTA: EU-155 was deleted from the list. The further development of the
Po river delta will be monitored continuously. QSOs before October 2011
will be accepted on all applications arriving prior to Sep 1.

Following IOTA expeditions are accepted for credit now:
AT2DW (AS-175), XF1AA (NA-189), 4A3RCC (NA-200), KL7RRC/p (NA-240),
4W0VB/p (OC-232), CW5GI (SA-039), 7O6T (AF-028)

4U1ITU, 4U1UN and 4U1WRC: QSL cards of 4U1ITU, 4U1UN and 4U1WRC will be
available at the booth of the "Swiss DX Foundation" at the HAMRADIO.
Please refer to the time schedule announced at the booth and bring your
QSO information with you.

TCSWAT: The winner of the World Kidney Day Award are: ES1IP, OK2JS, DL1MDU,
EA2DNY, EA7IZZ, EB5CS, EI3CTB, G0TRB, G0WOU, G3OCA, M0TQR, OZ4Z,
RA3PCI, SWL I3-65709

OP wanted: Members of the "West OZ DX Group" are planning a DXpedition to
    Woody Island (OC-170) this year. See also: http://www.westozdx.net
    If you are interested please send an e-mail to webmaster@...

TOPBAND: All 160m enthusiasts are invited to participate in the survey of
    Garry,NI6T, and Larry,K8UT, until Aug 31. The results will be published
    in September. See also: http://survey.hamdocs.com/?sid=11389 and
    http://k8uttw81.k8ut.com/tiki-list_file_gallery.php?galleryId=11

EURAO: The visitors of the HAMRADIO can meet representatives of the European
    organization of radio amateurs in hall A1 at booth 769.
    See also: http://www.eurao.org/de and http://eurobureauqsl.org

INTERNATIONAL MUSEUMS WEEKENDS: The International Museums weekends will be
    held on Jun 16/17 and Jun 23/24 this year. Radio amateurs are invited
    to join the IMW by operating their stations from a local museum.
    The organizer Harry,M1BYT, asks for registration at:
    http://www.ukradioamateur.co.uk/imw

SILENT KEYS: Gene Zimmerman, W3ZZ, passed away at the age of 71 on June 3.
    He was responsible for the QST column "The World Above 50 MHz" from
    2002 to 2011. He was a member of the "ARRL Contest Advisory Committee",
    editor of the "VHF Contesting Column" in CQ Contest magazine, Director
    of the CQ VHF Contestes from 2000-02 and an early adopter and advocate
    of aggressive contestlog checking. Other HAMs who passed away are:
    Peter Kallfelz,DL8YR, Luciano Montanari,I4MNK, Joel Oulie,F6FHP, and
    Abel Aguirre,LU8EDK (who has spent 18 summers and 6 winters as a radio
    operator in the Antarctic between 1953 and 1997).
    Our condolences and sympathy are with their families and friends.
    We do not want to be sad that we lost them, but grateful that we could
    get to know them as a radio friend. We will always keep them in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
    http://www.sotawatch.org

    Detailed information about current VHF activities can be found on the
    VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jun 13   DIG Spring Contest
Jun 14   DIG Spring Contest
Jun 16   AGCW-DL VHF/UHF Contest
Jun 16/17 JARL All Asian DX Contest
Jun 16/17 Ukrainian Classic RTTY Contest
Jun 17   DIE Contest

Starting in 2012 the "World Castle Weekend" is moved to the third weekend
in June following a request of Spanish HAMs who want to avoid any possible
interferences with the "His Majesty The King of Spain Contest" on Jun 23/24.

IOTA compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
AN-013, several, Trinity Peninsula group: LU4ZS is working from the
Marambio station on Seymour Island (AN-013, AA LU-03, WAP ARG-21,
WFF LUFF-056) at the moment. QSL via LU4DXU.

AS-147, JA8, Hokkaidos Coastal Islands: Taka,JA8COE/8, is going to visit
Yagishiri Island (WLOTA 2512, Loc QN04QK) again from Jun 16-18. The
activity will be postponed by one week if the weather is not suitable.
QSL via homecall.

EU-005, G/GM/GW, Great Britain: The special event station GB0BON will be QRV
from Naseby on Jun 16/17 to remember the Battle of Naseby (June 1645).
They will work on 80m-70cm as long as their generators provide power.
QSL via G4XEX (bureau/direct/eQSL).

EU-021, TF, Iceland: Bill,W4TAA, and Pete,VE3IKV, will show up as TF/VX3T
from the south coast of Iceland (WLOTA 2975/Loc HP83SU) from Jun 17-30.
They will work only on 6m with 100 watts and an 8-ele-yagi. They will
also try to activate other Loc fields. QSLs only direct via VE3IKV.

EU-023, 9H, Malta group: Jeff,N6GQ, is going to spend his holidays on
Malta (MIA MM-001, WLOTA 1113). He will work in holiday style signing
9H3ZZ on the HF bands from Jun 17-29. QSLs direct or via LoTW to N6GQ.

On the occasion of the International Museum weekend in 2012 the special
event station 9H9IMW will be active from the historic city of Valetta
on Jun 16-24. They have an exhibition showing old radio technology
which was provided by Fortunata,9H1ES, and others. More information
about the radios can be found on http://gorga40.tripod.com
QSL direct via 9H9IMS (see QRZ.com).

EU-039, F, Chausey Islands: Chausey Island (DIFM MA-004, DDFM 50, DPF 04,
WLOTA 0424) will be the last stop of Keith's trip from Jun 16-22.
He will work holiday style as F/G3TTC in SSB on 80m/40m/20m/15m.
QSL via G3TTC (bureau/direct).

EU-043, SM6, Goteborg och Bohus/Halland County group: Bernd,DL8AAV, will
show up from Orust Island signing SD1B/6 from Jun 18-30. Listen for
him on the usual IOTA frequencies. QSL via DL8AAV.

EU-048, F, Bretagne (Morbihan) Region group: Keith,G3TTC, is handing out
IOTA points from Ile d'Houat (DIFM AT016, WLOTA 1105) signing F/G3TTC/p
in SSB on Jun 14. QSL via G3TTC (bureau/direct).

EU-112, GM/MM, Shiant Islands: Members of the "GMDX Group" will activate
the Shiant Islands as GB5SI from Jun 15-22. They plan to work in CW,
SSB and RTTY on 80m-6m. QSL via MM0BQI.

EU-125, OZ, Jylland West group: Rico,OZ/DO6EBB, will be active on HF from
Fano Island (DIA NS-002, Loc JO45EK) from Jun 17-30.
QSL only direct or via eQSL to DO6EBB.

NA-092, W5, Texas State West: Dave,AC0QG/5, plans to show up again from
    South Padre Island (USi TX007S) between Jun 18 and Jul 13. Listen for
    him on the usual IOTA frequencies. QSL direct via homecall.
    The log will be uploaded also to the LoTW and eQSL.

Lighthouse activities

KH0N   LH 1333 Jun 15-18

WFF activities

DLFF: Ric,DL2VFR, provided following information:
    The new WFF Directory was published on Jun 1, 2012, and now there are
    also these new DLFF areas:
        DLFF-138: Nature Reserve Esterweger Dose
        DLFF-139: Nature Reserve Duvenstedter Brook
        DLFF-140: Nature Reserve Bislicher Island
        DLFF-141: Nature Reserve Koenigsbruecker Heide
        DLFF-142: Nature Reserve Doeberitzer Heide
        DLFF-143: Nature Reserve Waldnaabtal
        DLFF-144: Nature Reserve Charlottenhofer Weihergebiet
        DLFF-145: Nature Reserve Stadtwald Augsburg
        DLFF-146: Nature Reserve Rotwildpark Stuttgart
    The special event station DQ125HSB is working in SSB on 2m from the
    nature park Harz (DLFF-063) on Jun 16 (1200-1700 UTC). QSL via bureau.

ONFF: The clubstation ON6WL/p will be active on 40m and 20m from the ONFF
    area "De Buylaers Lokeren" (ONFF-065) on Jun 17 (0700-1100 UTC).
    This activity counts also for the BCA (Belgian Castle award) with the
    reference OV-006 and WCA ON-00338. QSL via ON5JE.

SPFF: Zbig,SP2IU/p, plans to activate following WFF areas:
        SPFF 129: Nature reserve Szaniecki   (Jun 17, starting 0800 UTC)
        SPFF 065: Nature reserve Nadnidzianski (Jun 17, starting 1300 UTC)
        SPFF 052: Nature reserve Kozubowski   (Jun 18, starting 0800 UTC)
    Zbig works in CW and SSB mainly on 20m and 40m. QSL via homecall.
    The logs will be uploaded also to the WFF LogSearch.

YOFF: YP7P and YR7WFF are working in CW, SSB and digital modes on HF/50 MHz/
    VHF/UHF from YOFF-373 (2228m a.s.l., Loc KN15TI) from Jun 14-19.
    QSL via homecall (bureau/direct).

DXer arrested on espionage (update)

According to Baldur,DJ6SI, himself, he was not accused of espionage.
He was accused of
1) making radio communications without the consent of the Greek authorities
2) operating a transceiver which can receive also non-HAM frequencies.
Later they added a point this he was not willing to hand over his laptop
for the contents to be checked. In the hearing of June 8 they only kept the
charge up of destroying his notebook for the purpose of destruction of
evidence. This point is judged later.

Many thanks for contributing to this issue of the DXNL are going to:
Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DH5NBK, DJ5AV, DJ5IH, DJ9ZB, DK7YY, DL1SBF, DL4AOJ, DL7MAE, DL7VOA, EU1EU, NG3K, F6AJA & Les Nouvelles DX, VA3RJ, VA3TET and others.

Om eddy.. YD itu gak banyak yg punya prestasi spt anda lho... Om Joz YD1JZ juga good cw contester...

Saat ini private workshop bertujuan untuk mengubah kebiasaan dx er yg msh menggunakan logpapper agar terbiasa menggunakan logger.

Jika ada yg mau ikut contest... Bisa pergunakan N1MM.. Mudah dan simple sekali...

Setelah bisa mengerti adifile dan cabrilo, nah baru deh lotw...hehhehehe..

Regards:

Ndut

Dear kawan-kawan YBDXC ...

Di beritahukan, bahwa YBDXC akan membuka stand pada event Jakfox di Lapangan IRTI (tempat Jakarta Hamfest tahun lalu) pada tanggal 23 - 24 Juni 2012.

Adapun kegiatan yang akan di lakukan pada event tsb adalah:

1. Eyeball QSO ..

Temu kangen dan sharing ttg kegiatan DX ing.

2. Private Workshop
Buat kawan-kawan yang ingin di install kan software logger 32, software contest N1MM dan aplikasi Lotw, harap membawa notebook/laptop nya berikut donggel modem nya.

3. Bursa QSL Card

Kawan-kawan yang ingin mencetak QSL Card dgn harga terjangkau dan kwalitas, bisa menghubungi om Djoko YB1TJ di stand YBDXC. Nantinya akan di perlihatkan sample QSL Card yang pernah di cetak oleh YBDXC.

Demikian pemberitahuan ini

Om Eddy sepertinya tidak seperti itu. Yah sekedar ngobrol ngobrol saja.

Temu kangen.. Trus sharing ttg dx ing sesama kita aja. Bagi yg selama ini dx ing menggunakan log papper bisa kita bantu utk installkan softaware logger 32. Lalu di beritahukan cara cara menggunakan logger 32...

Dari mengisi log qso sampai export ke adifile.

Yang blm ada lotw, bisa di bantu.. Downloadkan trusted qsl nya... Lalu di bantu install ... Minimal sampai file tq.5 nya di kirim via email ke ARRL...

Begitu om Eddy...

http://www.1a0c.com/

1A-DXCC.

With this telegram, ARRL added the Sovereign Military Order of Malta as a DXCC Award eligible entity. Starting January 1st, 1982 the cards of QSOs with 1A began to be checked and approved to the great pleasure of all who would pursue DXCC. Now, some 30 years later thist the prefix is still quite needed by DXers from the amateur Radio community.
The Soverign Military Order of Malta is not a high priority most wanted entity for DXCC but it is an interesting contact for many radio amateurs around the world, especially as a new one on certain bands for a DXCC challenge or as a new one for a lof of OMs in Asia and in the western part of the United States.
The Dx Magazine

ClubLog
North America – 1A DXCC – Breackdown

Asia – 1A DXCC – Breackdown

Europe – 1A DXCC – Breakdown

SMOM.

The Sovereign Order of Malta is a sovereign body as provided by international law. The Order – based in Rome, on via Condotti, has its own government, an independent magistracy, bilateral diplomatic relations with 104 countries and is granted the status of Permanent Observer in many international organisations such as the United Nations. Its operational activities are managed by the six Grand Priories, six Subpriories and 47 National Associations of Knights on five continents. The Order issues its own passports and stamps and creates public institutions, endowed with judicial autonomy. The Order’s day to day life is governed by a Constitution and Code, reformed in 1997.

The Grand Master governs the Order both as sovereign and religious head. He is elected for life, within the professed knights in perpetual vows. He is assisted by and presides over the Sovereign Council, which is composed of four high offices – Grand Commander, Grand Chancellor, Grand Hospitaller, and Receiver of the Common Treasure – as well as six other members, all elected by the Order’s Chapter General for a five-year term. The Council of Government and the Board of Auditors, whose compositions reflect the international character of the Order, assist the Grand Master and the Sovereign Council. The Chapter General also elects these two bodies for a five-year term.

The legal system of the Order is expressed by the usual division into three powers:

Legislative power
Rests with the Grand Master and Sovereign Council for non-constitutional matters; with the Chapter General, representing the Supreme Assembly of Knights, as far as constitutional rules are concerned.

Executive power
Rests with the Sovereign Council, chaired by the Grand Master and composed of ten Knights elected by the Chapter General.

Judicial power
It is exercised by the Magistral Courts of First Instance and of Appeal, composed of judges appointed by the Grand Master and the Sovereign Council from Order members of legal expertise. Rests with the Grand Master and Sovereign Council for non-constitutional matters; with the Chapter General, representing the Supreme Assembly of Knights, as far as constitutional rules are concerned.

More info on www.orderofmalta.int

CISOM.

The Order of Malta's Italian Relief Corps (CISOM), counts some 3000 volunteers (medical, paramedical staff and assistants) in the three North-Centre-South units into which the corps is divided in Italy. Founded in 1970, it carries out rescue and assistance operations during natural disasters. It intervened during the earthquakes in Irpinia, Umbria, Puglia, Basilicata and Abruzzo.
In addition to its work in Italy, the Corps has also participated in international humanitarian initiatives such as the consignment of food aid for children in Hungary after the collapse of the Soviet bloc (1990) and, more recently, in Kosovo and in the entire Balkan region.

Since 2005 it has been part of the organizational unit of the Italian Civil Defence. During this year, the Corps also entered into cooperation agreements with the Italian Coastguards, the Forestry Corps and ARES 118 (regional health emergency service).

On the Italian Coastguards' patrol boats, the Corps' doctors and specialist volunteers assist immigrants fleeing from hunger, wars and persecutions on unseaworthy vessels in the Sicilian sea.

More recently it has been in the front line in dramatic scenarios such as the earthquake in the Italian region of Abruzzo (2009), the earthquake in Haiti (2010) and the earthquake in the Italian region of Emilia (2012).

Become a member (in Italian Language)

QSL Info.

General Information

Please check the log online and wait for the end of the DXpedition before sending your QSL request.

Follow the instructions below to request a QSL card quickly and frustration free.

Remember, this DXpedition has a humanitarian side. After kind consideration, please make a donation, it will be entirely devoted to the emergency communications project.

Note that if you donate more than 30 euro and if your address is in the list of countries where there is a postal agreement in place, you will receive a QSL directly from the post office of the Order of Malta with their stamps. If your Country is not listed, we will send your QSL from Italy.

OQRS

The faster and preferred way to obtain a QSL card is via OQRS (Online QSL Request System) through the on-line log.

The contribution for a QSL request via OQRS is 5 USD. All QSL requests via OQRS will be processed as soon as the QSL cards arrive from the printer. All QSOs via OQRS will be confirmed on LOTW on a weekly basis.

Check your QSOs on the on-line log, then proceed with the QSL request. Fill in the correct UTC of your QSO(s)s and follow the Paypal instructions to complete the request.
Direct QSL

You can also send in your QSL request with an SAE along with the standard contribution (or a donation for the charity project) to complete the request. Standard contributions are:
for EUROPE: 2 USD + SAE
for OUTSIDE EUROPE: 3 USD + SAE

In Italy the cost of postage was recently increased along with the exchange rate of the US Dollar. Thus we have had to modify our donation requests.

Please note: NO STAMPs and NO IRCs.

IRCs are often used as currency in the amateur radio world. This is not the case as would attest a quick visit to the post office. IRCs may not be exchanged for cash, only for stamps. It is also popular to send old IRCs which are no longer valid.

Note for Italians: As Italy is in Europe also, the minimal contribution for Italian radio amateurs is 2USDs + SAE. Please do not send SASE (no stamps please).

Direct QSL card requestswhich do not observe these policies will be processed via the BURO. Direct QSL requests with expired IRCs will not be NOT be processed.

Direct requests with an appropriate contribution will be processed after an appropriate request is made via OQRS.

The address of the QSL manager is:

FRANCESCO COZZI

Via Nazionale 8/o

70128 – BARI (ITALY)
Bureau

It is not necessary for us to receive you card via the bureau! You may request a QSL via the bureau. However, such QSL requests must be initiated only via the OQRS system. We will ship the card directly to the IARU Bureaus.

All on-line bureau requests will be processed within 12 months of submission. Please do not send any QSLs to the bureau, The QSL manager does need or require your card.
LOTW

1A0C’s log will be uploaded in it’s entirety to LOTW within 1 year from the end of the DXpedition.
Please be patient, if you cannot wait for the LOTW confirmation, please consider OQRS or a direct request.
QSL Semi-Direct

Associations, Clubs and sponsors in general may negotiate directly with the QSL Manager in order to establish dedicated QSL service for their members or affiliates.

Donate.

Donate to an Emergency Communications Project

Operations from 1A, in next July, aim to achieve a goal beyond amateur radio. Funds collected thanks to this DXpedition (particularly, from donations and QSLing) will finance a project related to the Order of Malta’s Italian Relief Corps (CISOM) . We all know what an emergency is, and the way CISOM can handle it, and we are aware of how much communications are a crucial issue. The project by CISOM – that lately moved a significant first step ahead, by issuing few Malta Order licenses to its volunteers – is to buy a vehicle to be set-up as a mobile radio station, to be used in disaster areas. A project deserving your QSO with 1A!
Where will my money go?

Your donation will be used for things like:
Comms vehicle
Radios and antennas
Feedline, amplifier; various gear
Auxiliary AC generator
How to donate
Paypal

You can easily donate with paypal. Select the level of sponsorship you wish to choose for this project and click on the “donate button.” Donations of 100 Euros and over will be listed on the QSL card. Other donations (all are greatly appreciated) will be published on the activity section of the website.
Donations

Call-Sign

Bank transfer

If you prefer to use you bank account, you can donate via bank transfer to:
IBAN: IT30C03069676845103235
Beneficiary: Mr. Antonio Giacomo Scauso

Koq saya terima posting di YBDXC ini gak urut ya ?

- Usulan OM Hari didukung oleh OM Ndut = posting OM Ndut sudah masuk tapi usulan OM Hari blom masuk.
- Belakangan, beberapa saat kemudian baru posting OM Hari tentang usulan itu masuk.

Beberapa posting yg lain begitu juga.

hen

Dear kawan-kawan YBDXC ...

Di beritahukan, bahwa YBDXC akan membuka stand pada event Jakfox di Lapangan IRTI (tempat Jakarta Hamfest tahun lalu) pada tanggal 23 - 24 Juni 2012.

Adapun kegiatan yang akan di lakukan pada event tsb adalah:

1. Eyeball QSO ..

Temu kangen dan sharing ttg kegiatan DX ing.

2. Private Workshop
Buat kawan-kawan yang ingin di install kan software logger 32, software contest N1MM dan aplikasi Lotw, harap membawa notebook/laptop nya berikut donggel modem nya.

3. Bursa QSL Card

Kawan-kawan yang ingin mencetak QSL Card dgn harga terjangkau dan kwalitas, bisa menghubungi om Djoko YB1TJ di stand YBDXC. Nantinya akan di perlihatkan sample QSL Card yang pernah di cetak oleh YBDXC.

Demikian pemberitahuan ini

Dear Om Hen...

He..he... Lama2 jadi biasa kok Om... Yang penting kalau saya yakin... Ya udah nyebur saja saya he...he...

Ada 2 Om Hen saya punya #1 world... Yang pertama Rookie 15m waktu pakai YD1HUH, yang kedua #1 world 15m qrp pakai YD1XUH. Semuanya CW dan 15m (saya punya banyak variasi antena 15m homebrew) juga kebeneran saja lawannya sedikit, bahkan di OC dan INA gak ada saingannya. He...he...

Salam dan tetap semangat

73 Edy

http://www.hrdlog.net/News.aspx

News

HRDLOG.net Major news (Apr-Maj 2012)Email alias, Facebook, WikiHamRadio
Press the link below to read details.

Email aliasNow there is the opportunity to create an e-mail alias on HRDLOG.net.
The alias allows anyone to send a message to you without knowing your real e-mail address.
For example, if you send an email to iw1qlh @ hrdlog.net , the email will be automatically forwarded to the real mail inbox even if the sender is not required to know it.
This function can be useful if you want an e-mail address easy to remember (callsign @ hrdlog.net) or if you don’t want to let your real address be known or if you want an address which doesn’t change during the time.
To activate the function Login -> Modify profile -> Mail alias.

FacebookThe integration with the social network Facebbok has been completely updated.
Now, once you have activated the link between HRDLOG.net and Facebook, it is possible:
* To use an application on Facebook in order to see your own QSO and the ones of your friends;
* To allow the view of your own logbook on a Facebook page;
* To publish automatically the number of countries working in on your own Facebook home page.The complete instructions are available at the following address:http://www.hrdlog.net/docs/Facebook.aspx

---

WikiHamRadioHRDLOG.net is enriched with a web-site reachable at the following address:http://wiki.hrdlog.net Through this site, which is similar to WikiPedia, it is possible to make available for the community your own radio experiences (electronic,experiments, etc).
So if you are an amateur radio or an electronics enthusiast, remember to share your knowledge and experience on WikiHamRadio.

Other news (Apr-Maj 2012) * Possibility for the web site to remember your last login and not to ask again your password(Keep me logged in)
* It has been optimized the update of the ViewLogbook.aspx page,which now is able to visualize also the hour of the last changes to the logbook and the program used.
* We are preparing HRDLabel version 6, which will allow to print the QSL just drawing the data directly from HRDLOG.net.

DropboxIt has been completed the integration with Dropbox so it is now available. Dropbox is the virtual box which make available for free 2 GB of space, attainable from all your own PCs and mobile devices.
From the page Backup & restore-Dropbox is possible to follow an easy guided procedure that allows HRDLOG.net to publish a daily copy of your own logbook on a Dropbox folder .
At this point, installing the client of Dropbox on your own computer, we will have a daily version of the logbook automatically aligned.

TwitterIt has been implemented a new page that allows the integration with the social network Twitter.
Once the integration has been activated, it will be possible to update automatically your status on Twitter (sending a Tweet) each time that :
* Every new QSO
* On a new country worked
* When you are "On-Air"
* Every band changeThe function will be active and it can be configured from the page Modify profile-Twitter.

Display of QSO - New type of scriptOne of the function more appreciated of HRDLOG.net is the one that allows to publish the own QSOs on the personal web site or on the own page of QRZ.com.
Furthermore, it is possible to publish information on the "OnAir" status, to enable the search of QSO, to visualize the results of the research divided for bands.
In addition to the two mode already present (Text and Image), it has been added the IFRAME mode which is compatible also with QRZ.com; I remind you that the "Text" mode is not functioning anymore within QRZ since the java scripts has been deactivated on the pages.
The code can be produced through the graphic interface at the page Login-Create Script; once you have decided the graphic aspects (dimension, color, etc) it is sufficient to copy and paste the script in the web page desired.

Server infrastructureIncreasing security problems lead us to abandon the previous architecture in order to move to a mixed cloud environment based on HyperV and VMware.
The HRDLOG.net server web has been moved to this new infrastructure.

Entities PageNext to the "QSO map" page, it has been located a new page called "Entities", from which it is possible to see the list of the countries we worked on.
The visualization occurs through a list of flags, an image presenting the number of countries confirmed and a graph from which you can see the progression during time of the countries in which we worked.
The last 2 representations can be uses also in external web sites (for example the own web-sites or QRZ.com).
As you can do for the "QSO map" page, you can deactivate this page from the Login page -> Privacy.

Quick linksFrom the new page "Quick links", it is possible to visualize the list of links useful in external web-sites (for example the own web-site or on QRZ.com)
To access the page, it is necessary to log in with your own username.

Instant QSLOn the page "Quick link", it can be find an advice regarding the insertion of a macro in DM780. By inserting this macro in the 73 message, it is given the possibility for our receiver to see his/her electronic QSL practically in real time (at the saving of QSO).
Many thanks for the QSO
Your instant QSL on http://iqsl.hrdlog.net/<his:callsign>
My paper QSL card is sure via ...
The best 73, ..
As described in the message, this iQSL doesn't want to substitute the traditional transmission system but it just would like to make our conversation more kind.
The name Instant QSL (iQSL) substitutes the previous "QSL Deluxe".

Dropbox integrationThe experiment on the integration with Dropbox has started.
Dropbox is a virtual box which makes available for you 2GB of disk space accessible from every PC and mobile devices.
As soon as this first step will be completed, it will be possible to activate a daily copy of your own logbook in a Dropbox folder, increasing in that way the availability and security of your data.
By doing this experiment, the backup and restore voices have been reorganized and put under the menu "Backup and restore".

QRZ.COM has disabled javascript inside its pagesIf you are using javascript to display your logbook inside your QRZ page then you have to change the script.
To create the right script Login -> Create the script -> select "View image (no javascript)".
Now copy this script inside your biography page on QRZ.

New languages: catalan and chineseNow catalan and chinese languages are available. Thanks to EB3MA (EB3CML) and BD4UJ.
Write me if you would like to translate HRDLOG.net into your language. Your contribution will be helpful to the HRDLOG.net community!

New languagesThese new languages are available: German, French, Norwegian, Slovenian. I would like to publicly thank EA5HEF, F0GRC, LA2YSA and S52UF for their great work.
Write me if you would like to translate HRDLOG.net into your language. Your contribution will be helpful to the HRDLOG.net community!

HRDLOG.net translation is startedI am preparing HRDLOG.net for the translation. I am starting with the italian language.
Write me if you would like to translate HRDLOG.net into your language. Your contribution will be helpful to the HRDLOG.net community!

Service down on 29 AprilDue to technical issue (fire in UPS room), HRDLOG.net has been down on 29 April from 05:17 until 14:37 UTC.
During this time QSOs were not stored. So, if you want to store your QSO on the server you have to resubmit it.

HOT changes- OQRS Get your QSL through the Online QSL request
- Statistic Follow most interesting Dxpedition using the statistics
- POI Share your Point of Interest with the Hamradio community

---

Japan Earthquake - Emergency frequenciesMarch 11, 2011 - A series of earthquakes has struck off the coast of Honshu Japan around 05:46UTC today causing extensive damage to the country and also triggering Tsunami waves and warnings across the Pacific.
At this time there are no reports of amateur radio involvement in the disaster response but it would be appreciated if extra care was taken to avoid any emergency traffic. The IARU Region 3 Emergency Centre of Activity frequencies are
3600 kHz
7110 kHz
14300 kHz
18160 kHz
21360 kHz
The situation is developing as it can take many hours for a tsunami wave to cross the Pacific ocean, more information will be provided when it is available.

Ham Radio Deluxe build 2816Ham Radio Deluxe build 2816 is able to send to HRDLOG.net also information about QSL status (sent/received).
Now you can use the page "Login -> View DXCC list" to have a list of your confirmed country.
To use this feature follow these steps: a) download and install Ham Radio Deluxe build 2816 - b) Clean you logbook (Login -> Utilities -> Purge logbook) - c) Upload your full logbook
In order to syncronize logbook data, using the new build the changes made on a QSO will be notitied and updated in HRDLOG.net

---

Display your logbook into Facebook and QRZ.COMRead instructions on HRDLOG.net Resources (http://www.hrdlog.net/Resources.aspx)

Display your logbook into QRZ.COMNow it's possible to display own recent QSO into QRZ.COM page. Open http://www.hrdlog.net/LogQrz.aspx to read the instructions.

HRDLOG.net is now mobileHRDLOG.net is now mobile. Try http://mobile.hrdlog.net on your mobile device to stay always tuned!

HRDLOG.net is returnedAt last we have a new server dedicated to HRDLOG.net. Many thanks to all donors, without them this result could not be reached. Please leave me a week (more or less) to perform the optimization of the new server.

New Vista Gadget''Current Activity Gadget'' is a Vista Gadget usefull to show current activity in the HF bands, solar image, solar flux, sunspot number. Follow the link "Links - HRDLOG.net Resources" to download it.

Webcam utility''HRDLOG.net utility'' is a small program used to send live images of your webcam on the site HRDLOG.net. Follow the link "Links - HRDLOG.net Resources" to download

it.

AlertsAlerts are now active. You can receive e-mail or SMS notification when a selected event is active. To select events Login -> Modify profile -> Alerts

---

Public chatNow you can communicate with your friends in the new public chat. You must log in to send a message.

More details in user profileNow in the page 'Login -> Modify profile' you can insert a short description of your activities, manage the Facebook integration, delete or modify your picture, set privacy options on your logbook.

Facebook integration (beta)Integration between HRDLOG.net and Facebook is started. To activate -> Login -> Modify profile -> Connect to facebook

---

GraphsAdded the page 'View graphs' containing these graphs: 'Number of QSO per hour' and 'Number of QSO per week'

New featuresThese features are now available: Webcam, Locator and QSO map (see HRDLOG.net Forum for furher information)

''On Air'' Vista GadgetOnAir is a Vista Gadget usefull to show all "on air" user. Follow the link "Links - HRDLOG.net Resources" to download it.

New versionVersion 0.3.0 is online. (Friends list - Web site bug)

http://n1mm.hamdocs.com/tiki-index.php?page=General+RTTY+and+PSK+Information

2.6.1 General RTTY and PSK Information

2.6.1 General RTTY and PSK Information
1. RTTY Information
1.1. Common RTTY Frequencies
1.2. General RTTY Information
2. PSK Information
2.1. General PSK Information
2.2. Common PSK and Digital Frequencies

Digital mode contesting is growing rapidly. N1MM Logger supports digital mode contesting, not only RTTY but also other digital modes, with a flexible interface.
1. RTTY INFORMATION

This section contains some general information about operating in RTTY that is not directly related to N1MM Logger. If you are new to digital mode contesting in general and RTTY in particular, this information may be helpful. If you are an old-timer at RTTY, you can probably skip this section.

Before the spread of personal computers, RTTY was the most prevalent digital mode (other than CW, that is!), and was done using surplus teletype equipment - mechanical teleprinters. This equipment posed severe constraints on the RTTY mode that are still evident today. Despite these constraints, RTTY has proven to be quite well-adapted to contesting, and it is still by far the most common digital contesting mode.

More recently, these mechanical teleprinters have been replaced by other devices. The first of these terminal units were self-contained microprocessor devices (modems) that converted the 5-bit Baudot code used in RTTY into ASCII characters to be sent to a terminal (keyboard and CRT display). The most popular of these units were multi-mode TNCs (Terminal Net Controllers) that supported RTTY in addition to packet radio and other digital modes. TNCs are still in use today, and N1MM Logger supports the use of TNCs for RTTY.

However, with the advent of the ubiquitous sound card-equipped PC, it became possible to perform the modulation and demodulation directly in a personal computer, and the majority of RTTY today is done using a sound card in a PC. N1MM Logger, of course, also supports this method of modulating and demodulating RTTY and other digital modes, using a sound-card based digital-mode "engine".

An RTTY signal is a single carrier (like CW), but instead of being modulated on and off like CW, the transmitted power is kept constant, and modulation is imposed by changing the frequency by a preset amount; in amateur usage, the historical practice is to use a "shift" of 170 Hz. That is, RTTY is modulated using frequency-shift keying (FSK). The frequency shifting can be done either at RF, in radios which support this method, or at audio

frequencies.

The first method (usually called FSK) requires an on-off keying signal to be applied to a keying input to the radio. This keying is very similar to CW keying, except that instead of turning the carrier on and off as in CW, closing the key input shifts the transmitter's frequency. FSK therefore requires an on-off keying interface between the computer and the radio, and the radio must have the internal circuitry required to perform the frequency shifting. Radios that support this FSK mode usually have other features that assist RTTY operators, such as specialized filtering.

The second method, using audio tones fed into an SSB transmitter which converts the tones to RF in exactly the same way that SSB converts audio voice frequencies to RF, is called Audio Frequency Shift Keying (AFSK). AFSK can be used with any SSB transmitter. Because the optimum filtering and other settings for RTTY operation are different from those for voice communication, some transceivers offer special AFSK or digital-mode modes, but fundamentally these are the same as SSB.

Digital modes are harder on transmitting equipment than CW and SSB because of the higher duty cycle (sustained periods of full-power transmitting). As a result, it is important not to overstress the transmitter. It is also important to take steps to avoid transmitting extraneous noises or spurious signals.

Here are some tips for RTTY setup and operation:

Hardware interfacing:
Unless your radio has a USB Codec built in (e.g. IC7200 and 7600), in order to receive RTTY you will need to connect the audio output from your radio to the input of the sound card being used with your computer, or if you are using a TNC or TU, to its audio input (see the manual for your TNC/TU for details)
To transmit:
For AFSK, you need to connect the audio output from your sound card or TNC/TU to an audio input on your radio (exception: radios with a built-in USB Codec), either directly or via a sound card interface
For FSK, you need a keying circuit from a serial port to your radio's FSK keying input. If you are using a USB-to-serial adapter, you will probably need to use the EXTFSK plug-in in MMTTY
For either AFSK or FSK, you need some way to control PTT (TX/RX switching). If you use PTT control from N1MM Logger in other modes, the same method can be used in digital modes. Alternatively, you can control PTT from a serial port with a keying circuit. In FSK, the same port can be used for PTT and FSK

On the radio make sure:
Audio processing is off
Speech processing is off
Hi boost is off (Kenwood radios)
If the radio does not have an RTTY-specific mode, it should be in LSB mode
RTTY-specific modes may also be called FSK, AFSK, LSB-D, PKT-LSB, ...
The most often used speed is 45.45 Baud (60 words/min)
Some contests use 75 Baud (100 wpm)
The standard shift is 170 Hz
Some TNCs use 200 Hz shift
When using a TNC set 'Mark' to 2125 Hz and 'Space' to 2295 Hz
Don't overrun your finals from the transceiver and/or amplifier

50 percent duty cycle is mostly ok, but some transmitters may require reduced power in digital modes
See the Interfacing chapter for url's and tips on interfacing
The BAUDOT character-set does not have all ASCII characters so some special characters such as (~ * _ @ # =)? can not be printed/transmitted
During contests narrow filters are normally used (250 - 500 Hz)1.1. Common RTTY Frequencies

Contests USA (kHz) USA (kHz) Europe/Africa (kHz) Japan (kHz)
Common Common DX frequency Common Common
1800 - 1810/1835 - 1845 1800 - 1810 1838 - 1843 1838 - 1843
3570 - 3600 3580 - 3600 3590 3580 - 3620 3520 - 3530
7025 - 7100 7025-7050/7080 - 7100 7040 7035 - 7045 7025 - 7040
10120 - 10150 10140 - 10150
14060 - 14120 14080 - 14100 14080 - 14100
18100 - 18110 18100 - 18110
21060 - 21150 21080 - 21100 21080 - 21120
24910 - 24930 24920 - 24930
28060 - 28150 28080 - 28100 28050 - 28150

1.2. General RTTY Information

There are two aspects of RTTY which are often confusing to newcomers to the mode.

The first of these is the "polarity" of the signal. In FSK, there are two frequencies, conventionally called "mark" and "space". In amateur RTTY, the mark frequency is the higher of the two RF frequencies. Someone who is transmitting with the opposite polarity is said to be transmitting "upside down". His signal will be gibberish at the receiving station, unless the operator there inverts his receive polarity. When first setting up for RTTY, if you appear to be unable to decode any signals you receive, try inverting your receive polarity (in MMTTY, use the "Rev" button; in MMVARI, switch between RTTY-L and RTTY-U settings).

In FSK, getting the polarity right involves arranging things so that the switching conventions (does closing the keying input result in mark or space?) match between the radio and the computer. Unfortunately, the switching conventions are not universal. Fortunately, almost all radios affected by this have a menu item in the radio to reverse the keying polarity. Once this option is set correctly, the radio's transmit RTTY polarity will be correct from then on. On receive, most if not all radios in FSK mode receive RTTY on the lower sideband. If software is used to demodulate the received signal, it must be set so that the lower of the two audio tones is converted to mark and the upper tone to space. This is the default configuration in software that supports FSK keying (like the MMTTY engine used in N1MM Logger). Note that in FSK, the transmit and receive polarities are determined independently, i.e. it is possible to receive correctly and yet to transmit upside down.

In AFSK, getting the polarity right involves coordination between the choice of audio frequencies generated in the sound card and the choice of sideband on the radio. The most common combination is to use lower sideband on the radio, combined with an audio tone pair in which the mark tone is the lower of the two audio frequencies (e.g. the most common pair is mark = 2125 Hz, space = 2295 Hz). The use of the lower sideband inverts these tones at RF to match the standard amateur convention. Software that uses the opposite convention (mark tone higher than space) is used with the radio in upper sideband. Fortunately, once

the receive polarity is correct in AFSK, the transmit polarity will also be automatically correct.

The second sometimes puzzling aspect is related to the RTTY character set. The digital code used in RTTY predates the ASCII code used by modern computers. Instead of 8 bits, which allows for 256 different characters, the Baudot or Murray code used in RTTY has only 5 bits. This 5-bit code only has enough different characters for 26 letters plus 6 control codes, so to get numbers and punctuation the text has to be preceded with a special "FIGS" character (one of the 6 control codes) to get a second set of 26 characters (10 numbers plus 16 punctuation marks). FIGS is "sticky", so there is another special "LTRS" character to switch back to the letters case.

Just like any other character, these FIGS and LTRS characters can be damaged by noise, QRM, QSB, etc., and if they are, the received info is displayed wrongly until the next LTRS or FIGS character (or in some situations, the next space character) comes along and sets things right. Sometimes the opposite happens - a text character is converted by noise into a FIGS or LTRS code, with similar results.

The most common problem that results is numbers being printed as letters, so with a bit of experience, many RTTY operators will get used to interpreting TOO as 599 and UE as 73. Serial numbers are slightly more difficult; PQW in the input data is most likely 012, and so on. You can see which letter corresponds to which number by comparing the top (QWERTY) row of letters on the keyboard with the numbers immediately above and to the left. Letters can also be printed as numbers and punctuation; for example, CQ TEST when converted to FIGS case becomes :1 53'5 .

Various software has different ways of helping out with this. When you run MMTTY stand-alone, if you right click on a "word" (delimited by spaces), the entire word changes to the opposite case. So, for example, VE4AEO is changed to ;3R-39 and vice versa. N1MM's digital window has a box titled Letters/Figs for opposite-case display, that shows text that the mouse "hovers" over (no click necessary) in the opposite case. This requires you to move the mouse over the text that you want to convert; the unconverted text is displayed in the MouseOver box.Unshift on Space
There is a common feature called Unshift on Space (UOS or USOS) whose purpose is to deal with the lost {FIGS}/{LTRS} problem. It was designed for normal text, where the majority of information is alphabetic.

MMTTY has two UOS options. One of these is a button on the MMTTY main window that affects what you see in the receive window; the other is a setup option (under the Tx tab in the MMTTY setup) that affects what you transmit.

The receive option in the main window simply changes the receive window's case back to {LTRS} at the beginning of every new "word", i.e. after a space, unless of course the new "word" starts with {FIGS}. This takes no extra time, but improves reliability of receipt of alphabetic text.

The transmit option, on the other hand, actually transmits extra {FIGS} characters at the beginning of every numeric "word" to try to ensure greater reliability. It does not transmit an extra "LTRS" at the beginning of every alphabetic word, because using UOS on receive is a more efficient way to achieve the same end result.

When you are ragchewing, you should always use UOS on both receive and transmit. UOS assumes that the majority of "words" are alphabetic, which is true of normal text.

During contests, the receive UOS option is still helpful, especially when the exchange includes letters, and it does not cost anything. The N1MM Logger DI window's "Letters/Figs" line can be used to deal with those cases where receive UOS converts an intended numeric field to letters.The transmit UOS option achieves greater reliability of numeric exchanges at the cost of some extra {FIGS} characters. If you are concerned about the slight speed penalty it imposes, you can leave transmit UOS on and use dashes ("-") instead of spaces between all-numeric fields, e.g. 599-123-123 . The downside of using dashes in this way is that if the initial {FIGS} character is lost, the entire exchange will be in the wrong case, e.g. TOOAQWEAQWE. Sending spaces with transmit UOS on costs two extra {FIGS} characters but is more reliable (our example with an initial lost {FIGS} character becomes TOO 123 123). On the other hand, turning transmit UOS off results in 599 QWE
QWE in any receiver using UOS, even with no errors at all. A compromise among all of these possibilities is to turn transmit UOS on and use a hybrid exchange: 599-123 123 (a dash instead of a space after the signal report, but spaces after that). A single {FIGS}/{LTRS} error will not prevent at least one copy of the exchange from being decoded correctly regardless of whether the receiving station is using UOS or not.

2. PSK INFORMATION
2.1. General PSK Information

PSK31 (and its higher-speed versions, PSK63 and PSK125) is an example of a "sound-card digital mode", i.e. a digital mode that was made possible by the use of sound cards in PCs. The advent of sound cards in PCs made these sound-card modes available for anyone to use with a minimum of expense. All that is needed is an SSB transceiver, an audio interface (which can be as simple as patch cables, or can include isolation and attenuation controls) and a means of controlling PTT.

Conventionally, sound-card digital modes are communicated using USB, regardless of the band. Many PSK31 users set their radio's dial to a standard frequency (14070.0 kHz is the most common) and then look for signals anywhere within their SSB filter bandwidth (e.g. from 250 Hz to 2750 Hz or so, which would correspond to transmitted frequencies from 14070.25 kHz to 14072.75 kHz). PSK31 signals are narrow-band, so there can be many different PSK31 signals simultaneously copyable within the available frequency range without changing the radio's dial setting. Tuning is often done simply by clicking on the desired signal in the waterfall display.

PSK31 is short for "Phase Shift Keying, 31.25 baud". There are also higher-speed versions, PSK63 (62.5 baud - seen fairly often) and PSK125 (125 baud - rare). Actually, in addition to using phase shift keying for modulation, PSK31 also uses amplitude modulation ("waveform shaping") to minimize the bandwidth occupied by a signal. As a result, PSK31 places great requirements on the linearity of the equipment used, from the sound card generating the signal to the transmitter, and also the receiver. The peak power of a PSK31 signal can be approximately twice as high as the average power. If a transmitter is operated near its power handling capacity, it can clip these peaks, resulting in "splatter", which shows up on the waterfall as extra "tracks" in addition to the two main modulation tracks that are normally visible. To avoid having this happen, the audio levels in the sound card and in the transmitter's input audio stages must be controlled to avoid
reaching power levels that would result in clipping. In most transmitters, this is equivalent to keeping the power below the level that would result in ALC action, and often this means powers below approximately half the transmitter's maximum power rating.

Standard PSK31 (sometimes also called binary phase shift keying, or BPSK31) is sideband-independent. There is a rarely-used variation called QPSK31 (or QPSK63 for the 62.5 baud speed) that uses four phases instead of two (quadrature phase shift keying). This allows for some error correction while still delivering the same text speed. QPSK31 is sideband-dependent, i.e. the transmitting and receiving station must both be using the same sideband in their radios (by convention, upper sideband).

PSK31 works well even at low powers. In fact, once the transmitted power is sufficiently high to give an acceptable level of copy, there is no advantage to be gained by increasing power further. Unlike analog modes, where increasing power may make your signal louder relative to QRM and therefore easier to copy, increasing the power in PSK31 does not improve your signal's readability. It can even degrade copy by overloading the other station's receiver and creating splatter within the receiver. More importantly, a very strong signal will affect the AGC in every receiver that picks it up, causing the receiver gain to decrease and making copy of signals on other frequencies more difficult. For this reason, high-power operation is unpopular in PSK31.

When you plan to run PSK:
Keep your macros short.
PSK is about 1/3 slower than RTTY; you can really impact your rates with wordy macros
Use lower case letters wherever possible
PSK is a varicode mode. That means that characters contain a variable number of bits, unlike ASCII characters that have a fixed number of bits. Most lower-case PSK characters have fewer bits in them than their upper-case equivalents, so lower-case (in general) transmits faster

On the radio make sure:
Audio processing is off
Speech processing is off
Hi boost is off (Kenwood radios)
Radio should be in USB mode
Some radios have modes designed for digital sound card modes, e.g. PSK, DATA A
Transmitter linearity is extremely important in PSK
Keep power below 1/2 the transmitter rating to avoid clipping peaks
Avoid any visible ALC action (except in radios with ALC designed for PSK, e.g. Elecraft K3)
See the Interfacing section of this help for url's and tips on interfacing
Using lower case letters instead of all caps will increase speed and reduce TX time
Only 100 Hz is needed as channel separation
Example filter usage:
Available 2.4 kHz / 250 Hz /100 Hz filter bandwidths
2.4 kHz is used for monitoring the PSK area of band when in search and pounce mode
250 Hz and 100 Hz filter bandwidths are used when in run mode
2.2. Common PSK and Digital Frequencies

PSK31 activity generally starts from the bottom edge of the IARU RTTY bandplan, expanding upwards as activity increases.

Band Digital Frequencies (kHz) PSK Frequency (kHz) Remarks
160 meter 1800 - 1810 / 1838 - 1843 1807 / 1838 1807 in Region 2
80 meter 3575 - 3585 3580
40 meter 7030 - 7040 / 7060 - 7085 7035 / 7080 7080 in Region 2
30 meter 10130 - 10145 10142 WARC, no contesting

20 meter 14065 - 14090 14070
17 meter 18100 - 18110 18100 WARC, no contesting
15 meter 21060 - 21090 21080
12 meter 24920 - 24930 24920 WARC, no contesting
10 meter 28110 - 28125 28120

DX-Stations Guide to RTTY Operations
What is this?
Watching some DXpeditions early in 2002 working RTTY, and participating in the following discussions on the RTTY email reflector on contesting.com the idea was born to write up what experienced RTTY ops think on how to do RTTY during a dxpedition. This is the result. This guide is work in progress, it is probably never finished and will change over time. If you think something is wrong, should be expressed better or have enhancements, please drop me a line at ep (at) plicht.de
Thanks to Phil (GU0SUP), Richard (VE3IAY), Don (K2XF) and many others, especially on the RTTY mail reflector at contesting.com.

* 4.3 Is it worthwile at all? How many RTTYers are there?
1. Equipment
The question on hand is whether to use an external TNC or TU (Terminal Unit) a la KAM, PTC (TBD: other brands???) etc. or use the soundcard of the notebook you have with you anyway. There is no easy answer, but here we go.
Probably the best advice is: Take the equipment your are most familiar with! You have to handle it in stressful, uncomfortable situations and should know it very well.
1.1 RTTY Hardware (TU, PC, Soundcard)

TNC vs Soundcard (SC) comparision table, in no particular order

TNC
Soundcard
Does more than one mode Yes, maybe helpful in other situations (e.g. Pactor link to back home, WinLink network) RTTY mostly, rest depending on software. MixW does most, except ARQ modes
Requires extra power supply Yes, but you could probably draw power from the rig with just one cable for power and data. No
Redundancy Only if you take more than one (preferrably of the same model) Most likely in each notebook you have with you anyway
Required PC Performance No to very little requirements on the PC side, just a serial cable port.
If you have only pure DOS machines with you, TNCs are the only practical solution, there is no support for soundcard solutions under DOS. Can make intense use of resources on the PC under Windows(tm). Recommended speed of PC is something around 300 MHz and above, 32 MB RAM or more. Make sure that all system sound events are turned off. Make sure that resource consuming processes are stopped (virus scanners, scheduler, power management etc.) Fine tuning the performance of soundcard solutions often requires a somewhat deeper knowledge of the PC and OS.
Special hint on MMTY: If you experience lockups, try adjusting the "Priority" setting in MMTTY. Set to "Highest",do not use "Critical". Adjust the souncard buffer size, lower values (512) can help.
Receive Performance
(decoding) Up to date DSP TNCs decode RTTY very well. AF Filters no configurable AF filters are configurable, but a sound understanding of signal analysis is helpful. Some information hints that MMTTY (and probably other soundcard software) decodes RTTY better than many expensive TNCs, under certain conditions. This may apply to 5% or less of all contacts. (TBD: how does other sc software compare?)
Repairing If broken, forget it. Take two or more TNCs of same model with you. Just a cable, could be done on site. If the soundcard itself or the operating system integration fails - forget it. Take OS CD ROMs with you, just in case.
Ease of Use Depends on the software (RTTY program) which makes use of the TNC. Configuration of the TNC can be tedious. Take handbook with you. Depends on the software (RTTY program) which makes use of the soundcard driver (MMTTY or other). Most have meaningful default settings. If you decide to play with the filter configurations, a degree in Signal Analysis is helpful. Make sure the helpfile is installed.
Cost Mid to high
Hardware costs money. Zero to Mid range.
Some programs are for free, others, which are more suitable for a contest or DX-pedition, do cost serious money. Consider asking the author for a donation for your DX-pedition.
Weight, Size Around 500 grams (excluding cables), size approx.: x by x by x centimeters
[TBD] Weight: cables only, Size: none
Automated operations (mailbox, winlink) Yes, most No
Interfacing to Transceiver Requires AF in (or FSK), AF out, PTT. Does support FSK vs AFSK in most cases
Both solutions require very careful adjustment of AF levels, otherwise severe overmodulation and bad HF transmission can occur. This applies to AFSK ops, FSK is easier here. Requires AF in (or FSK), AF out, PTT. Some SC solutions support FSK (MMTTY). PTT requires a minimal interface with one or two transistors, fits in the serial cable jack.

Depending on which input you use on the rig, VOX operation may be possible. Some programs supply a method to key the rig via a control command to the rig (serial cable required then).
Both solutions require very careful adjustment of AF levels, otherwise severe overmodulation and bad HF transmission can occur. This applies only to AFSK ops, FSK is easier here.

Conclusion Hardware
From the above it seems that soundcard solutions wins hands down, at least from the point of view of a DXpedition. It's nearly free, wheighs nothing, easy to repair.
Downside: All soundcard software requires Windows and a somewhat more powerful PC.
Extensive testing before the expedition is highly recommended, but you know that anyway.
Recommended Hardware (TNCs):
(TBD)
Other Hardware
(by Phil, GU0SUP)
I would like to suggest the possible use of an external audio filter. I use one in my shack primarily for contesting and for (trying) to work dxpeditions. The one I use has switched capacitor filters, and is essential if the band is crowded. It simply sits between the rig and the soundcard, and I can also monitor the filtered audio through a seperate speaker. Seperate DSP filters are also available. I know many rigs have DSP built in, but for the type of people you are aiming this guide at, they may not know how to get the best out of a built-in DSP filter on RTTY.
1.2 RTTY Hardware (Transceiver)
Since RTTY is continuos in its output, as opposed to SSB or CW, make sure the rig and linear you are using can sustain that full load over extended periods. If not, reduce power to 50% to 70% of maximum.
Special notes on various models: (If you have anythingto contribute, let me know!
FT-1000 (D, MP, MkV)
The FT-1000 supports FSK and AFSK. Recommended use is FSK. Don't use (or only very carefully) the E-DSP on receiver, it can only limit and distort the digital signal. Use of narrow filters (250 Hz to 500 Hz) is a must. Use high or low tones as desired, make the appropiate adjustments in the menu. Make sure that RTTY keying polarity is correct if using FSK (see menu). Shift is 170 Hz, not 200 Hz (see menu).
FT-900:
Phil (GU0SUP) writes:
The FT900 does NOT have FSK. It isn't an ideal rig for RTTY (despite the fact that I use one!), but it is small and easily portable. Filtering isn't ideal either, but is adequate.
IC-756Pro/Pro2/Pro3:
Supports FSK and AFSK, FSK recommended. Supplies power to TNC on same jack. Adjust for hi or low tones in menu when using FSK. Hi tones has the benefit that the built-in RTTY decoder can be used concurrently with the PC. Program suitable DSP filters of 250, 350 and 500 Hz before operation in RTTY mode. Since each mode has an own filter set, this does not affect SSB or CW operation.
The band scope is very handy to see where the pile-up is, shows problematic areas (automated stns).
IC-706xxx
Supports AFSK and FSK, FSK recommended. Supplied power to TNC on same jack. Supports Hi- or Low-Tones (menu). Narrow filter (250Hz, 350Hz) optional and highly recommended.
Other rigs:
[TBD]

1.3 SOFTWARE
Probably the most popular soundcard program is MMTTY by Mako, JE3HHT. Others are listed below. Probably the most important aspect to a dxpedition is the integration with a logging program and the ease of use, to allow for rapid handling of many qsos per hour.
Here MMTTY has a benefit. MMTTY consists of two parts - the "engine" and the user interface. Since Mako, the author of MMTTY made the interface of the engine public to other programmers, they could include the MMTTY engine in their program.
Software List (always incomplete...)
* Zakanaka (http://www.qsl.net/kc4elo/) by Bob, K4CY - uses the MMTTY engine
* WinWarbler (http://www.qsl.net/winwarbler/) by AA6YQ - uses the MMTTY engine
* HamScope (http://users.mesatop.com/~ghansen/) by KD5HIO - uses the MMTTY engine
* N1MM Logger (http://pages.cthome.net/n1mm/) - uses the MMTTY engine
* RCKRtty (http://www.rckrtty.de) by Walter, DL4RCK - uses the MMTTY engine
* MixW (http://mixw.net) by UT2UZ and UU9JDR - uses own soundcard module
* TrueTTY (http://www.dxsoft.com/mitrtty.htm) by UA9OSV and RZ4AG - uses own soundcard module.
* Writelog (http://www.writelog.com) by Ron, K5DJ- uses own soundcard module
(TBD: more detailed discussion of programs, esp. suitability for DX-peditions)
2. Frequencies
Depending on the rarity of your dxpedition, the classical bands (20, 15, maybe 10) are most important. Nevertheless, more and more RTTY happens also on the WARC bands. Please note that some countries have special band segments for digital modes (e.g. Japan on 40m). (TBD: does this apply?) 80m and 40m are heavily used during RTTY contests, less so under normal conditions. The usual problems of operation on low bands apply (noise, antennas etc.). 160m is rarely used with RTTY.
General note
Although a dxpedition is the most important event to you and many dxers around the world, some people are not interested in it. Yes, indeed. In CW and SSB that is easily recognized by the width of the respective band segments, enough room left for people not working you. Not so in RTTY: due to the small digital segments not used by automated stations (mailboxes), a major dxpedition can easily take up the full band segment, making other, non-dx contacts impossible. Perhaps its a good idea to leave 1 or 2 kc on the lower edge of the segment free.
Automated stations:
All digital segments are full (some say infested with) of automated stations (mailboxes, forwarding etc.), at least on 20 and 15m. Since these are in your listening window, they will make your life harder. Try to avoid these segments.
Split operation and listening window size
It should go without discussion that split operation is mandantory. As usual most dx-operations do split up. Due to the limited size of the RTTY segment on 20m a listening window of up to 8 kHz seems to be most practical. 15m is better but collides with segments for automated stations, see below.
If you mention the listening window (range, e.g. up 1 to 9) in your exchange is your decision. But if you do - please stick to it, people will use it. As in CW and SSB, RTTY dxers seeking you are listening in on the station you are currently working and will call you on the same spot. That's ok, but after a while you will have a solid wall of pile up and decode nothing - if you don't move. So move your receiving frequency after each two three contacts, make full use of the intended listening window range.
Bandplans
All following segments are IARU recommendations as of 1998. All frequencies in kHz.

20m
IARU recommended digital segment: 14070 to 14112
20m real world usage:
14065 to 14069: automated stations (Pactor)
14069 to 14073: PSK31
14073 to 14079: automated stations (Pactor)
14080 MFSK16 center of activity
14080 to 14090: RTTY
14091 to 14099: automated stations (Pactor)
14100 NCDxF beacons, do not transmit
14101 to 14112: automated stations (HF Packet)
During a major contest, RTTY activity goes from roughly 14075 up to about 14110.
Recommendation 20m:
Transmit on 14082, listen from 14083 to at least 14089, maybe up to 14098. Although this includes partially a segment where mailboxes are, you can make contacts since these are not active at all times.
15m:
IARU recommended digital segment: 21080 to 21120
15m real world usage:
21065 to 21070: automated stations (Pactor)
21070 to 21073: PSK31
21074 to 21079: automated stations (Pactor)
21080 MFSK16 center of activity
21080 to 21090: RTTY
21091 to 21120: automated stations (HF packet)
During a major contest, RTTY activity goes from roughly 21075 up to about 21115.
Recommendation 15m:
Transmit on 21082, listen from 21083 to 21099.
Although this includes partially a segment where mailboxes are, you can make contacts since these are not active at all times.
10m:
IARU recommended digital segment: 28050 to 28150
10m real world usage:
28080 to 28090: RTTY
28080 MFSK16 center of activity
28120 PSK31 center of activity

During a major contest, RTTY activity goes from roughly 28070 up to about 28115. Few automated stations are also active on 10m, but more seldom than on 20m and 15m.
Recommendation 10m:
Transmit on 28082, listen from 28083 to 28100.
Other bands
On most other bands the assignments for digital modes vary with the ITU Region. Three regions are defined:
* 1 - Europa, Africa, former USSR states, Middle East (excl. Iran), Mongolia
* 2 - North- and South-America, incl. Hawaii, Johnston, Midway Isl.
* 3 - Rest of Asia, Oceania
160m:
Varies depending on ITU Regions 1,2,3.
ITU Region Digital segment

1 1838 to 1840 Digimode (exc. Packet), CW
1840 to 1842 Digimode (exc. Packet), Phone, CW
2 1800 to 1830 CW, Digimode
1830 to 1840 CW, Digimode (CW DX window)
3 1830 to 1834 RTTY, CW Dx
Recommendation 160m:
[TBD]
80m:
Varies depending on ITU Regions 1,2,3.
ITU Region Digital segment
1 3580 to 3590 Digimode, CW
3590 to 3600 Digimode, Packet preferred, CW
3600 to 3620 Phone, Digimode, CW
2 3580 to 3620 Digimode, Phone permitted (NIB), CW
3620 to 3635 Digimode, Packet priority, Phone permitted (NIB), CW
3 No data on digital segments
Recommendation 80m:
[TBD]
40m:
Varies depending on ITU Regions 1,2,3.
ITU Region Digital segment
1 7035 to 7040 Digimode (exc. Packet), SSTV, CW
7040 to 7045 Digimode, (exc. Packet, SSTV), CW
2 7035 to 7040 Digimode with other regions, CW
7040 to 7050 Packet with other Regions, CW
7100 to 7120 Digimode, Phone, CW
3 No data on digital segments

Recommendation 40m:
[TBD]
2.2 WARC bands
30m:
Varies depending on ITU Regions 1,2,3.
ITU Region Digital segment
1 10140 to 10150 Digimode (exc. Packet), CW
2 10130 to 10140 Digimode, CW
10140 to 10150 Digimode, Packet preferred, CW
3 No data on digital segments
Recommendation 30m:
[TBD]
17m:
Varies depending on ITU Regions 1,2,3.
ITU Region Digital segment
1 18100 to 18109 Digimode, CW
2 18100 to 18105 Digimode, CW
18105 to 18109.5 Digimode, Packet preferred, CW
3 No data on digital segments

Recommendation 17m:
[TBD]
12m:

Varies depending on ITU Regions 1,2,3.
ITU Region Digital segment
1 24920 to 24929 Digimode, CW
2 24920 to 24925 Digimode, CW
24925 to 24929.5 Digimode, Packet preferred, CW
3 No data on digital segments

Recommendation 12m:
[TBD]
3. RTTY operation
Basically RTTY operation is not too different from CW or SSB. The problem is with QSB, that the listener can't really make out whether you sent him a report or not. Ok, that applies to other modes as well, but probably is more of a problem in RTTY.
The key to efficient RTTY operation on a DXpedition are the buffers, the contents of the exchange. With the right buffers working RTTY becomes a matter of a few (best case: 2) mouse clicks per qso. Since you have one hand free most of the time, eating or having a cool beer in the other hand becomes possible. Another strong reason to do RTTY on a dxpedition :-)
ImportantDo yourself a favor - use an external mouse, not the mouse pad or knob integrated into the notebook. These may be ok for occasional use, for hectic dxing they are worthless. Don't forget a mouse pad, even if you use an optical mouse.

You probably never need more than four buffers
* CQ
* report exchange
* QSL & QRZ
* QSL route info
Optional
* QRZ with callsign fragment
* wrkd b4, no dupes pse
* QRX x minutes
* QRT, QSY etc.
* multiple CQ buffers for different bands with different listening windows.
All above mentioned software offers placeholders or variables which can be used in the buffers. Since the notation of these variables vary from program to program, we use the generic variable <hiscall> for the call of the station calling you, <CR> is carriage return. DX1DX is the dx-peditions callsign in the examples.
Important:
Start each buffer with a space and a carriage return <CR>. This helps the receiving station to synchronize on your signal. Do this at least for the report and qsl/qrz buffer.Buffer 1 - CQ:

<SPACE><CR>CQ CQ de dx1dx dx1dx up<CR> or
<SPACE><CR>CQ CQ de dx1dx up 1 to 5<CR>
Buffer 2 - report:

<SPACE><CR><hiscall> ur 599 599 qsl? <hiscall><CR> or shorter
<SPACE><CR><hiscall> 599 599 <hiscall> bk<CR> It is important to send <hiscall> twice, at the start and end of your transmission. With this scheme, a calling station can identify his call even if his transmission overlapped with yours or if QSB hit at one or other end of your transmission.

Buffer 3 - QSL & QRZ:

<SPACE><CR><hiscall> QSL TU QRZ de DX1DX up<CR> or
<SPACE><CR><hiscall> QSL 73 qrz de DX1DX up 1 to 9<CR>
Since you waited with your transmission until you have received the report of the caller, an overlap occurs rarely, it is sufficient to send the callers callsign only once at the beginning. Hopefully he sees it. Repeating the callers callsign more often seems unescessary [TBD: other opinions?]Buffer 4 - QSL route and other info:
<SPACE><CR>QSL via XX1XX XX1XX, iota XX-000<CR>now qrz de DX1DX up<CR> or what ever you think nescessary for the world to learn about your dxpedition. Send every ten minutes or so.

Other optional buffers
[TBD]

Q: How often should the report be sent if no reply is heard?
Twice.
Well, how often do you give them a chance in CW or SSB? No repetition at all seems unfair and produces only additonal traffic. One repetition is probably sufficient, two is gracious. Everyting above two repetitions is too much, the caller should get his act together and buy a receiver.

Q: What to do when even after two repetitions no reply is heard?
Just use your buffer #1, CQ. Don't just pick another call and send a report to him. This confuses the callers, they don't know if the previous qso has ended or was aborted. A CQ call is a clear message to everyone. Maybe use an extra short CQ buffer for this purpose:

<SPACE><CR>nil hrd - CQ de DX1DX up<CR>

Q: Just two mouse clicks for a complete QSO? How?
Provided you have a suitable software, configured for optimum. Say you have been calling CQ, callers plenty. Select a frequency, find a call on the screen, wait until the end of his transmission - (click #1) on callsign (ok, double click in most cases). This sends out the report buffer. You receive a correct reply from the station you sent the report to. Click (#2) on buffer QSL&QRZ, this stores and logs the callsign and sends out the QRZ call. Next one...

---

4. Miscellaneous
4.1 How about other digital modes?
Assuming you are interested in high QSO rates also in digital modes, RTTY seems to be the most practical mode. RTTY Dxers are used to DX-op style working. Although other (HF) digital modes have been done from DX-peditions, most seem to be too slow or unpractical.
PSK31
PSK31 is nowadays the most popular digi mode. There have been Dx-Peditions working in PSK, and there is certainly some interest in that. On the other hand, some DXpeditions reported that PSK31 is just too slow, an exchange takes somewhat longer than in RTTY. Furthermore the culture for DXing doesn't seem to be as widespread as in RTTY, people tend to chat. For which (chatting) PSK31 is ideal...
Phil (GU0SUP) writes:
However, it is worth remembering that PSK will often work when RTTY will not. It is also now heavily used by the QRP brigade, this bringing more ops into the digital world. We are

now entering the decline of conditions, so it may be worth considering PSK. Many dxpeditions HAVE used PSK successfully :- D68C was probably the first to make the most use of PSK, but others have used this mode.
SSTV is also quite popular, as per PW0T recently, but as you say, it is a slow mode. However, if it is a major dxpedition, then it may be worthwhile at the end of the trip.
Richard, VE1IAY writes:
I think you're writing PSK31 off a bit prematurely. (Ekkis comment: I had much more unfriendly wording here on PSK31 in the first version :-). When I look at NG3K's web site of announced DX operations, I see quite a few that announce they are going to do PSK in addition to other modes (the earliest one I found was in June 1999, back when PSK31 was still new).
As a personal example, I have PSK31 QSOs verified with D68C on three bands, RTTY on only two. ZK1NDS is another one - from him I have PSK31 from N. Cook (my only QSO ever in any mode with ZK1/N), and RTTY from S. Cook (only semi-rare, at least in my log). I also have several PSK31 QSLs from visitors to not-so-rare places like ZD8, PJ5, TI, TG, EA6, HB0, P4 - not exactly rare DX, but people going there on "casual" DXpeditions might like to read your guide too. According to my log, there are also resident hams operating PSK31 from places like C31, ZD7, V51, TF, OY, FR, PZ - these guys might also like to benefit from your advice. Besides, most SC RTTY programs (except for MMTTY) will also do PSK31, so it costs nothing to include both modes in your repertoire. I think your advice for RTTY carries over to PSK31 pretty directly, although there might be some special techniques for split operation in this mode.
Pactor, Amtor
It seems as if ARQ modes have been relegated to automated operations (Mailboxes), for which they are certainly very suited. Keyboard to Keyboard QSO rarely happen, so using it as an DX-pedition mode seems like a waste of time.
MFSK16
(TBD) No information at hand. Anybody volunteering?
Clover
(TBD) No information at hand. Anybody volunteering?
Throb
(TBD) No information at hand. Anybody volunteering?
Hell
(TBD) No information at hand. Anybody volunteering?
SSTV
Although not strictly a digital mode, often mentioned together. Seems attractive if you have a digital camera and can send pictures from your DX-pedition on the spot. But high rates are unachievable with tx times of 60 seconds per picture minimum.
If you decide to do SSTV, stick to the recommended band segments and negotiate contacts in SSB before and after the actual SSTV transmission. That's at least what the SSTV people told me on the reflector.
4.2 DX during an RTTY contest?
Happens frequently, maybe there are too many dx-peditions? (just joking). Or too many RTTY contests? (No!). Well, we all have to live with it. Try to avoid the crowded RTTY segments, specially on 15 and 10 go to the extreme ends of the digital segment.
Phil (GU0SUP) writes:
This is probably the BEST time for a dxpedition to run RTTY, as there is no need to operate split, and a high QSO rate can be achieved. It also gives you a solid 24 hours or 48 hours of RTTY, thus making the most of the time on that mode.
4.3 Is it worthwile at all? How many RTTYers are there?
Yes, it is. Besides being a comparatively relaxing way of dx-ing, there are a lot of RTTY

dxers and growing. A discussion in April 2002 for the VK9ML dxpedition brought the rough concensus that there are about 5.000 to 7.000 active RTTYers worldwide, probably more. With a rate of 3 per minute (vy good!) you work 180 per hour, 1.000 in 6 hrs (roughly). Realistically - if you provide about two hours per day per major region (NA, EU, Pac) you can work a lot of the RTTY community. If you can provide more time to RTTY, the better. http://www.plicht.de/ekki/rtty/dxguide.html

Product Review: Hexhub KEN-tenna
By Gatot Dewanto YE1GD in ORARI (Organisasi Amatir Radio Indonesia)

Akhir-akhir ini semakin marak penggunaan Wirebeam Antenna, yaitu antena pengarah yang terbuat dari kawat dengan rangka berbahan batang PVC atau Fiberglass. Harga material pipa allumunium yang menjulang tinggi, menjadikan banyak Dx'ers mulai mempertimbangkan menggunakan wirebeam. Membuat antena wirebeam memang dapat menghemat biaya hingga 50-70 % dibanding antena pengarah berbahan pipa allumunium, dalam jumlah elemen yang sama dan faktor penguatan yang setara. Berbagai desain wirebeam bermunculan di intenet mulai dari yang sederhana hingga yang paling rumit. Diantaranya yang sangat populer, adalah desain Hexbeam, antena berbentuk rangka segi-enam yang terdiri dari 6 batang jari-jari. Antena ini bisa dibuat untuk 5 band amatir (bahkan lebih) dalam satu rangka. Rangkanya sendiri bisa menggunakan bahan terbuat dari bambu, batang PVC atau fiber glass. Sedangkan untuk dudukan rangkanya harus dibuat konstruksi Hexhub, yang tentu saja harus mampu menahan beban antenna keseluruhan dari terpaan angin.

Antenna Hexbeam 5 Band

Ramainya pembahasan antenna Hexbeam menginspirasi OM Soetedja Wihardja – YB1KEN memproduksi Hexhub, sebagai dudukan rangka antena Hexbeam. Penasaran dengan posting foto Hexhub hasil buatan YB1KEN ini, maka saya pun mendatangi rumahnya. Awalnya saya mengira bentuk dan ukuran hexhub versi YB1KEN ini mirip dengan quadhub produk lama buatan YD1COR, yang dulu lebih dikenal sebagai dudukan radial antenna 5/8 Lambda. Dudukan radial tersebut berukuran garis tengah 17 cm, tinggi 4 cm dengan berat 300 gram. Dalam benak saya bentuk Hexhub ini tidak akan jauh berbeda, paling hanya jari-jarinya saja yang dibuat 6 buah.

Dudukan radial antena 5/8 λ

Terus terang, ketika pertama kali melihatnya saya dibuat terkaget2 melihat Hexhub versi YB1KEN ini, ternyata sangat berbeda dengan yang saya bayangkan. Bentuk piringan yang cantik mirip kristal salju memiliki ukuran yang cukup besar dan rada berat. Teknik pengecoran yang baik membuat Hexhub nampak sangat solid, tidak terlihat lubang pori-pori yang akan mengurangi kekuatan struktur. Dapat dikatakan hex hub ini memang dibuat menyerupai Hexhub yang dibuat oleh DX Engineering. OM Tedja sendiri mengakui bahwa desain hexhub ini memang diinspirasi dari produk DX Engineering, dengan beberapa modifikasi.

Hexhub buatan DX-Engineering

Pada gambar Hexhub buatan DX Engineering memang terlihat ukurannya yang cukup besar, kokoh dan agak berat. Menurut OM Tedja beberapa modifikasi dilakukan sebagai penyempurnaan desain, atas pertimbangan segi mekanis yang lebih baik.

Pada Hexhub buatan DX Engineering, batang jari-jari yang dapat dipasang berukuran maksimal 1 inci, sedangkan buatan OM Tedja dipersiapkan agar bisa menggunakan batang berdiameter lebih besar, hingga 1,5 inci. Dengan demikian maka Hexhub buatan YB1KEN ini juga dirancang untuk dapat digunakan pada band-band yang lebih rendah (40m dan 80m). Karenanya agar lebih

kokoh terikat di tiangnya, poros Hexhub juga dibuat lebih besar dan tinggi. Ketinggian poros dibuat lebih tinggi daripada produk DX Engineering, dimaksudkan sebagai penyesuaian bisa digunakannya batang jari-jari yang lebih besar. Bonggol poros juga dibuat lebih tebal, dengan lubang yang cukup untuk pemasangan pada tiang pipa berukuran 2 inch, namun masih bisa diperbesar lagi dengan cara membubutnya bila ingin menggunakan ukuran tiang yang lebih besar, hingga 2,5 inch. Dengan poros yang lebih tebal dan tinggi ini maka dipastikan hexhub ini akan duduk lebih kokoh pada tiangnya. Untuk rangka antenna
bisa menggunakan batang pipa PVC ataupun batang fiberglass. Batang-batang rangka akan terikat pada 6 jari-jari hexhub sepanjang 15 cm menggunakan masing2 dua buah U-bolt. Pada setiap jari-jari masih diperkuat dengan 3 tulang, yang tentu saja membuat hexhub ini sangat kokoh dan kuat menahan kuatnya terpaan angin, sangat cocok bagi yang menginginkan antena murah Wirebeam namun dengan konstruksi yang lebih kokoh dan mapan.

Hexhub KEN-tenna

Hexhub buatan YB1KEN yang berbahan dasar allumunium cor ini dibandrol seharga 500 ribu rupiah (DX Engineering menyediakan Hexhub berikut Kit lengkap HexBeam 5 band dengan harga US$ 600). Sayapun mulai berhitung, apa saja komponen biaya yang membuat harganya sedemikian. U-Bolt baja ukuran 1,5 inci Rp. 7.500,-/buah sebanyak 12 buah , bahan serbuk allumunium seberat 7,5 kg (perkiraan bobot sebelum dicor dan dibubut) , ditambah biaya pengecoran, pembubutan, finishing dll. rasanya sebanding, mengingat produk ini masih dikerjakan handmade dalam jumlah terbatas.

Kalkulasi pun dilanjutkan, berapa biaya total yang diperlukan bila ingin membangun antena HexBeam 5 band (20-17-15-12-10 meter). Apabila menggunakan rangka berbahan pipa PVC :
- Pipa PVC Ukuran 1”, ¾” dan ½ “ masing-masing 2 batang @ 4meter, perkiraan harga Rp. 250.000,- (setiap pipa PVC ini dibagi 3 bagian lalu disambungkan secara teleskopik)
- Kawat tembaga 2mm panjang 100 meter, perkiraan harga Rp. 300.000,-
- Material bantu, perkiraan harga Rp. 50.000,-

Maka perkiraan anggaran biaya pembuatan antena Hexbeam 5 band adalah Rp. 1.100.000,- Anggaran yang relatif murah untuk sebuah antenna beam 5 band, dengan desain konstruksi yang kuat dan indah dipandang. Angka tersebut masih bisa ditekan dengan penurunan kualitas material. Bisa juga menggunakan Hexhub yang dibuat sendiri dari plat baja dan besi siku yang dilas, namun tentu mengurangi segi kualitas konstruksi dan estetika.

Spesifikasi Hex Hub buatan YB1KEN:
- Diameter keseluruhan : 36 cm
- Tinggi poros : 11 cm
- Ukuran lubang poros : 2 Inci (bisa diperbesar hingga 2,5 inci)
- Ukurang batang jari-jari : 0,5 sd. 2,5 inci
- Bahan utama : allumunium cor
- Berat total (lengkap U-bolt) : 4 kg

Saat ini YB1KEN baru menyediakan Hexhubnya saja, dan belum tersedia antena Hexbeam dalam bentuk Kit lengkap. Namun rencana kedepannya akan dipasarkan juga dalam bentuk Kit.

Sebagai perbandingan, produk impor antena Yagi 4 elemen untuk 3 band harganya rata-rata diatas US$ 1000, sedangkan harga second di Indonesia berkisar Rp. 4-5 juta. Yagi 3 band buatan lokal dipasarkan Rp. 4-5 juta, dan bila membuat sendiri memerlukan biaya berkisar Rp. 1,5- 3 juta. Lalu apabila kita bisa mendapatkan antena beam untuk band yang lebih banyak (5 band) dan harga yang lebih murah, mengapa tidak ? ... Hexbeam adalah pilihan terbaik.

SB DX @ ARL $ARLD024
ARLD024 DX news

ZCZC AE24
QST de W1AW
DX Bulletin 24 ARLD024
From ARRL Headquarters
Newington CT June 14, 2012
To all radio amateurs

SB DX ARL ARLD024
ARLD024 DX news

This week's bulletin was made possible with information provided by AH6EZ, CT1FHI, NC1L, WB3IGR, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

PORTUGAL, CT. Look for station CR5OIT to be QRV June 16 and 17 from the S. Jorge de Oitavos Fortress. Activity will be on all HF bands, including 6 meters, using CW, SSB, SSTV and PSK31. QSL via operators' instructions.

TAJIKISTAN, EY. Koji, JE1CAQ is QRV as EY8JA and has been active on 20 meters using CW around 0300z. QSL to home call.

SARDINIA, IS0. Patrick, ON7ARQ is QRV as IS0/ON7ARQ until June 21. This includes a side trip as IM0/ON7ARQ to Antioco Island on June 16 and 17 where he'll be QRV during the WAB 50 MHz contest. QSL to home call.

MARIANA ISLANDS, KH0. Tony, JA6CNL is QRV as KH0N until June 18. Activity is on 80 to 6 meters using CW. QSL to home call.

NETHERLANDS, PA. Special event station PA300BPM is QRV until June 28 during the 300th horse market in Numansdorp. QSL via PD2GSP.

GREECE, SV. Special event station SX135HRC is QRV until July 31 in commemoration of 135 years of the Greek Red Cross. QSL via SV1EOS.

TURKEY, TA. Berkin, TA3J is QRV as TA3J/0 from Yassica Island, IOTA AS-099, until June 17. Activity is on 40 to 10 meters using SSB. QSL to home call.

ICELAND, TF. Volkmar, DL4AOJ is QRV as TF/DL4AOJ from Grimsey Island, IOTA EU-168, until June 19. Activity is on 40, 20, 15 and 10 meters using mainly SSB and possibly CW. QSL to home call.

CHAD, TT. Phil, F4EGS is QRV as TT8PK for the next two months.
Activity is on 40 to 10 meters using CW, SSB and possibly RTTY. QSL
to home call.

EUROPEAN RUSSIAN, UA. Members of the RZ1CWC team will be QRV as
RZ1CWC/p from the Annenskoe Fortification and from Vyborg Castle on
June 16 and 17. Activity is on all HF bands using CW, SSB and PSK.
QSL via RN1CW.

ASIATIC RUSSIA, UA0. Special event station UE80C is QRV until
August 31 in celebration of the 80th anniversary of the city of
Komsomolsk-on-Amur. QSL via bureau.

MARSHALL ISLANDS, V7. Steve, G3ZVW is QRV as V73/AF6SU from the
club station on Kwajalein Atoll, IOTA OC-028, until June 30.
Activity of late has been on 20 meters using CW. QSL to home call.

CANADA, VE. Operators AH6EZ and K9DXA will be QRV as VY0/home calls
from Nunavut Province from June 21 to July 2. Activity will be on
40 to 6 meters using all modes, with a 6 meter beacon on 50045 kHz.
They will also be active as VY0RAC in the upcoming ARRL Field Day
and the upcoming July 1 RAC Canada Day contest. QSL to home calls.

BERMUDA, VP9. George, WB3IGR and Katherine, WB3LTH will be QRV as
home calls/VP9 from June 18 to 21. Activity will be mainly in the
evenings and mornings on 160 to 6 meters using SSB and various
digital modes. QSL to home calls.

ALBANIA, ZA. Sven, LA6IKA is QRV as ZA/LA6IKA and has been active
on 20 meters using CW around 0400z. QSL to home call.

THIS WEEKEND ON THE RADIO. Kid's Day SSB Contest, All Asian DX CW
Contest, NCCC RTTY Sprint, NCCC Sprint CW Ladder, SMIRK Contest,
SARL Youth Day SSB Sprint, Ukrainian DX Classic RTTY Contest, AGCW
VHF/UHF CW Contest, Stew Perry Topband CW Challenge, QRP ARCI QRP
Shootout, West Virginia QSO Party, Feld Hell Sprint and the WAB 50
MHz Phone will certainly keep contesters busy this upcoming weekend.
The Run for the Bacon QRP CW Contest is scheduled for June 18.
Please see June QST, page 79, and the ARRL and WA7BNM Contest Web
Sites for details.

SB PROP @ ARL $ARLP024
ARLP024 Propagation de K7RA

ZCZC AP25
QST de W1AW
Propagation Forecast Bulletin 24 ARLP024
From Tad Cook, K7RA
Seattle, WA June 15, 2012
To all radio amateurs

SB PROP ARL ARLP024
ARLP024 Propagation de K7RA

Solar activity was lower this week, although for the past few days sunspot numbers and solar flux were rising.

Average daily sunspot numbers declined over 14.3 points to 116.1, and average daily solar flux was off by 14.5 points to 115.9. There were five new sunspot groups this week, two each on June 9-10, and one more on June 13.

The latest prediction has solar flux at 150 on June 15-16, 145 on June 17-18, 140 on June 19-20, 130 and 120 on June 21-22, 110 on June 23-26, 105 on June 27-28, followed by a climb back to 120 on July 1-12.

Predicted planetary A index is 5 on June 15-16, 18 on June 17, 8 on June 18, and 5 on June 19-25. The next peak of geomagnetic activity is predicted for June 30 to July 4 with planetary A index at 8, 15, 12, 10 and 8. Following that is a similar peak on July 15-17 of 15, 12 and 8. Looking further out, planetary A index of 8, 15 and 12 is predicted for July 27-29.

The geomagnetic forecast from OK1MGW has quiet to unsettled conditions June 15-17, quiet to active June 18, active June 19-20, quiet to unsettled June 21, mostly quiet June 22-23, quiet to unsettled June 24-29, quiet to active June 30, and active conditions July 1-3.

The most active days over the past week were June 11-12, when the planetary A index was 14 and 13. The high latitude college A index was 22 and 8 on those days, but the mid-latitude A index numbers from Fredericksburg, Virginia were only 11 and 10.

We often get messages about Cycle 19, the huge solar cycle which peaked in 1959, but not so often about the peak of Cycle 18. W7LTQ, who lives on Fidalgo Island (IOTA NA-065) in the San Juan

Archipelago and signs his messages "Old Chief Lynn" wrote, "Indeed Cycle 19 was hot, and perhaps even hotter, judging by 10 meter operations, was Cycle 18! There were a couple of weeks in the spring of 1948 when the 10 meter phone band was just one howling mess of heterodynes (AM was king). During Cycle 19, working the Tucson local 10 meter 'short skip' net, there were a couple of early evenings when stations across town in Tucson, AZ, were working short skip AND long path propagation simultaneously. That was a strange echo sounding mess. Turning our beams towards a short skip contact and 180 degrees away confirmed the phenomenon. I think we were probably on the so-called Grey Line."

Yes, in the days before SSB phone, a pile of AM signals could sound quite messy. By the way, 1948 was the year W7LTQ turned 16 years old. You can have a look at Cycles 18 and 19 and many others on the WM7D Historical Solar Charts at http://wm7d.net/hamradio/solar/historical.shtml. Cycles 18 and 19 are the fifth and sixth cycle peaks from the left side of the page in the chart of "Monthly Sunspot Numbers 1900 to 1999."

Regarding the link in last week's Propagation Forecast Bulletin to the researcher who believes modern sunspot numbers are inflated, Ken Grimm, K4XL of Amherst, Virginia wrote, "Regardless of what Prof. Svalgaard's charts and tables show, those of us who lived through the late 50s and enjoyed the benefits of something that he thinks didn't happen, know what we experienced. Nothing since has come even close to the conditions on the HF bands during those wonderful days. Fifty watts of AM on 10 meters was enough to work the world with honest 5x9 sigs! Twenty meters was open 24 hours a day and DX was commonplace, etc. Nothing can convince me that the late 50s weren't unusual!"

An interesting article in the popular press appeared this week, suggesting that long term prediction of solar cycles is impossible. Read it at, http://www.telegraphindia.com/1120612/jsp/frontpage/story_15600043.jsp.

Also note toward the end of the article that the student, Bidya Binay Karak, authored a paper explaining why sunspots disappeared for a time in 2008-2010. When I look at his curriculum vitae I see a paper about the Maunder Minimum, but not about the more recent quiet Sun. You can check Karak's CV at http://www.physics.iisc.ernet.in/~bidya_karak/.

Don't miss Carl Luetzelschwab's interesting article in the current (July 2012) issue of QST, "Our Recent Solar Minimum and Sunspot Cycle 24 Progress." You'll find it on page 33.

Phil Platt, of the Bad Astronomy blog has a link to a video of an active sunspot, complete with dramatic music at, http://blogs.discovermagazine.com/badastronomy/2012/06/14/what-a-dramatic-sunspot/.

Also check
http://cosmiclog.msnbc.msn.com/_news/2012/06/14/12227124-incoming-solar-storms-on-the-way
for a piece on upcoming solar storms.

On June 12, Jeff Hartley, N8II of Shepherdstown, West Virginia reported, "12 meters has been open to unexpected areas on F2 and combination Es/F2 paths recently. On the June 9 at 2317 I worked OM3EY with a S9 CW signal followed by HL2WP S7 at 2321Z. CQs towards Europe and Asia didn't result in any other contacts. 12 meter activity is pretty low.

"15 meters has been open all night to the west/NW for EU stations quite often lately. It was 0041Z (0341 in Latvia) when Alex YL3GAX answered my CQ, he was S7. Also worked around the same time were VK5BC on 10 meter SSB, FO8WBB on 12 CW, CT2HTM on 12 SSB, and TA, JA, DO1, and E70T on 15 SSB. Still the same evening June 10 UTC in the 0200Z hour on 15, ZL3TE, SU9VB, UR8GZ, EM2012MH, RZ0AF, and ZL4PW were logged on CW and UA9MA, OE6MDF, SV9ANK, and VK3HF on 15 SSB.

"Nothing much was happening above 15 meters towards EU on June 10 around 2000Z, but by 2052Z MD0CCE was logged 599 on 12 meter CW followed by IZ2BHP and G0GKH on 10 CW. Then CQs on 10 SSB resulted in a run of about 20 EU stations from 2112-2126Z the most distant being SV2FLM and 9A6JOY. Many Italians and British were logged along with GM, GW, EI, and F. This was a good Es opening with typical spotty coverage on the EU end. Quite a few stations were running 100W or less to verticals or low dipoles; they were typically S5 or less but Q5 with bigger stations mostly S7.

"On June 11 EA7JZ was worked peaking 59 on 10 meter SSB at 2225Z, no other EU heard or worked. He reported just making 3 LP QSOs with VK."

James French, W8ISS of Lincoln Park, Michigan wrote to ask if there were any reports of unusual propagation during the recent transit of Venus event. I did not receive any, nor did I expect them. But James got a great response when he set up a public viewing of the recent transit. He wrote, "had great viewing of the transit here in Lincoln Park (EN82jg). Helped out at the high school's observatory with the local astronomy club. Had about 400 turn out as it happened which was better than I really expected with no publicity that we were doing it other than a sign out at the road."

Steve Pulley of Stoughton, Wisconsin sent in an SWL report after copying last week's bulletin from W1AW using BPSK31 over a Radio Shack DX-392 general coverage shortwave receiver. Looks like perfect copy, using fldigi, which he read about in an ARRL License Manual. He was excited, waiting for his ham license in the mail. I see that on the same day he wrote, he was issued KC9WDH.

Don't know when we last had a look at this, but note the OVATION Auroral Forecast at http://helios.swpc.noaa.gov/ovation/. They

display a handy red line indicating the furthest south points where aurora might be visible after dark.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 7 through 13 were 98, 90, 107, 127, 114, 132, and 145, with a mean of 116.1. 10.7 cm flux was 128.2, 124.2, 128.3, 128.3, 133.9, 141.3 and 142.8, with a mean of 115.9. Estimated planetary A indices were 8, 8, 8, 6, 14, 13, and 6, with a mean of 9. Estimated mid-latitude A indices were 8, 9, 9, 6, 11, 10, and 7, with a mean of 8.6.

 Ham Radio Deluxe and ROC for TNCs now available in a bundled package
Tampa FL, St. Paul MN– June 16, 2012
>
>HRD Software, LLC and W4PC software today announced a bundle package for Ham Radio Deluxe and Radio Operations Center Software for Timewave/AEA and Kantronics TNCs.
>
>Many hams want to use the ARQ modes in Pactor, AMTOR and GTOR that are supported in hardware TNCs but not in soundcard software modes. Now W4PC Software's Radio Operations Center 3.99 for the TNCs synchronizes with the HRD DM-780 soundcard mode program so either ROC or DM-780 can key the radio through the TNC. If the TNC has a built-in soundcard (PK-232SC) or soundcard interface (PK-232PSK, PK-900PSK and DSP-232+), no radio-TNC-computer interconnection changes are necessary to switch between soundcard modes and the TNC modes.
>
>"The old meets the new", said Rick Ruhl, W4PC, owner of W4PC software and an owner of HRD, " W4PC Software, HRD and Timewave programmers and engineers have combined to make TNCs and soundcard mode software compatible for the first time.
>
>Randy Gawtry, owner of Timewave Technology and also an owner of HRD said, "Timewave has added a USB soundcard and rig control board to the legendary PK-232 to give the new PK-232SC a single USB cable connection to the computer from the TNC. Even with rig control, precision-timed hardware CW and FSK, there are only four connections from the TNC to the radio. Using only AFSK modes requires just two connections"
>
>The bundle price for ROC and HRD is $99.95.
>
>HRD 5.2X is free, but will include a no charge upgrade to version 6.0 with the purchase of 5.X support for $59.95. The retail version of HRD will be $79.95 when it is released in August 2012. Those that have purchased or will purchase the 5.X support will still get one year of support from the date of the 6.0 release.
>
>You can purchase and download the Ham Radio Deluxe/ROC bundle at http://www.ham-radio-deluxe.com.
>
>Radio Operations Center information: http://www.w4pcsoftware.com

>
>PK-232SC information: http://www.timewave.com
>
>HRD Forum: http://forums.hrdsoftwarellc.com
>
>HRD on YouTube: http://www.youtube.com/HRDsoftware
Ham Radio Deluxe 5.22 is here and its FREE. http://www.ham-radio-deluxe.com
>
>Radio Operations Center for your AEA/Timewave or Kantronics TNC, Now sync's with DM-780
>
>EmComm Ops for Packet TNCs, be ready.
>
>Check it out at http://www.w4pcsoftware.com

Dear All,

Wah, JAKFOX 2012 rupanya di samping barengan sama ARRL Field Day 23-24 June di Niagara, juga amprog/berbarengan sama “Dia de Campo” alias Field Day-nya EL CUERPO DE RADIOAFICIONADOS VOLUNTARIOS DE PUERTO RICO (ARES-nya Puerto Rico), spt info yg sy sunting ulang berikut (aslinya dlm bhs Inggris yg kaya’nya juga sekedar pake Google translate nyomot dr text asli yg habla espana/bahasa Spanyol)

==========

Public Demo of Emergency Communications from 23 to 24 June 2012

THE AMATEUR RADIO VOLUNTEERS CORPS OF PUERTO RICO

EL CUERPO DE RADIOAFICIONADOS VOLUNTARIOS DE PUERTO RICO

Despite the Internet, cell phones, email communications and other technologies, each year entire regions might left without communication. Tornadoes, fires, storms, rain and even the occasional drop of fiber optic cables, leaving people without the media.

In these cases the amateur radio service is the only one who has never failed, so Amateur Radio provide emergency communications for free to all agencies, from the American Red Cross, FEMA, the Salvation Army and even the International Space Station (ISS).

"The Amateur Radio Volunteers Corps Puerto Rico" will join thousands of amateur radio groups and radio operators around the world to demonstrate the capabilities of emergency communications. Since the past years, the news has been full of information on radio amateurs providing emergency communications during disasters that occured, including the California wildfires, winter storms, tornadoes and other events worldwide.

When trouble is brewing, Amateur Radio groups are often the first to offer its communications equipment to provide information and help communities across the world.

On the weekend of June 23-24, 2012 the public will have the opportunity to meet and talk with hams and see for themselves why the Amateur Radio Service is so important to the U.S. and Puerto Rico.

This annual event, called "Día de Campo" or "Field Day" is a test of how to use alternative power sources like portable genset, solar cell, batteries and other equipment. All group and radio operators will set up emergency stations in parks, malls, schools and recreational flights around the world.

Their motto "Cuando todo falla, están los radioaficionados"/When all else fails, there are the amateurs are more than words to Amateur Radio. Radio amateurs send messages in many forms without the use of telephone systems, internet or any other infrastructure that can not be compromised in emergency situation ■

OM Bambang,
Mungkin setelah mereka itung2an wetonnya amatir radio dunia (SWR, impedance, sunspot cycle dll) hari2 itu adalah hari terbaik untuk melaksanakan hajat. (Maaf bukan buang hajat lho..!)

Kalo dihitung pakai wetonnya ORARI secara nasional, mungkin tgl 8-11 Juli 2012 adalah hari yang terbaik, sehingga terpaksa ada 3 hajatan yg tumbuk waktunya. ;)

http://www.arrl.org/news/view/yasme-foundation-announces-awards-expanded-list-of-eligible-call-signs
Yasme Foundation Announces Awards, Expanded List of Eligible Call Signs

The Yasme Foundation currently offers two awards. The Yasme Award, in the form of a handsome plaque, is offered to those radio amateurs who submit proof of 30 QSOs with Yasme officials and DXpeditions that have at least one Yasme official as a participant. The Yasme Supreme Award is in the form of a representation of the YASME boat used by Danny Weil in his around-the-world DXpedition. It is available to those who submit proof of 60 QSOs with Yasme officials and DXpeditions with a Yasme official as a participant. These awards are available to qualifying applicants at no cost. After a year-long evaluation of the rules, the Yasme Board of Directors has revised the rules for those call signs that may be used to qualify for the two awards, with many new ones added to the list. The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing and the introduction and promotion of Amateur Radio in underdeveloped countries.
http://www.yasme.org/

The YASME Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in underdeveloped countries.

"Danny Weil was a pioneer of what is now known as the 'DXpedition.' While not the first to DXpedition, Danny was one of the first to travel to more than one location to operate, and to travel from place to place - often solo in a sailboat and lugging hundreds of pounds of radio equipment - specifically to provide DXers with a 'new one.' Lloyd and Iris Colvin perfected the DXpedition and took it into the modern age in the 1970s and 1980s, with operations from more than 100 countries, using modern transport methods and state-of-the-art radio equipment.

"YASME was both the name of Danny Weil's boat, and the name of the not-for-profit foundation that was created in 1959 to provide financial and logistical support for the travels of Weil, the Colvins, and others." --Scott Robbins, W4PA

The YASME book: YASME--The Danny Weil and Colvin Radio Expeditions
By James D. Cain, K1TN

Foundation Awards

The Yasme Plaque

The Yasme Trophy

The Yasme Foundation offers a beautiful plaque to anyone who submits QSL cards showing contacts with 30 different call signs of YASME officers, directors and/or operations. For

proof of 60 contacts, a trophy in the shape of the sailboat "Yasme" is awarded. Eligible call signs are contained on the list under the Award Callsigns tab on the home page.Award application should be made by letter to the Awards Manager:
Randy Wright, W6CUA
18432 Milmar Blvd.
Castro Valley, CA 94546 USA

The application must include your name, call, mailing address, shipping address, e-mail address, and a list of the stations with dates and bands, along with the cards for verification. There is no charge for the Yasme Awards, however, if you wish to make a donation towards their cost, please feel free to do so with our thanks.

The awards are sent via UPS or FedEx, so please be sure to provide a shipping address for "ground delivery."
(NOTE: Ground delivery is made to a street address, not to a PO Box.) If you have a personal log record which shows contact with a station in our DXpeditions Call Sign Directory, but you do not yet have a QSL card confirming that contact, you may request cards from the QSL Manager. Cards are only available if the DXpedition call is marked with an asterisk (*).

Request QSL cards from:
The Yasme Foundation, PO Box 20578, Castro Valley, CA 94546 (not from W6CUA, the Awards Manager). For more information you may write (send SASE):
The Yasme Foundation
PO Box 20578
Castro Valley, CA 94546

or E-mail: yasmeqslmgr@... (Yasme QSL Manager)

Yasme Awards Call Sign Directory

This is a directory of YASME call signs/operations/operators, listing the call sign, date of operation, and the principle operator. The original version of this list appeared in the K6PBT SH/INFO database for PacketCluster.

Many of the DXpeditions were done by Lloyd (W6KG) and Iris (W6QL) Colvin. Lloyd, W6KG, became a Silent Key in December 1993, (see call TA1/W6QL). Iris, W6QL, became a Silent Key February 18, 1998. Lloyd and Iris logged more than a million contacts during their world travels, collecting one of the largest QSL collections in the world.

* Logs for certain DXpeditions are held by the Yasme QSL Manager. If you have worked a DX call marked with an asterisk (*), you may request a QSL card for your records and the YASME Awards. (See Awards page)

Verified contacts with the following will count for credit toward the YASME Awards:►Open Call Sign Directory List in New Window

HAM RADIO: the leading European exhibition for the vibrant amateur radio scene
16,300 attendees at amateur radio exhibition in Friedrichshafen – Morse code technology highlighted among numerous attractions

Friedrichshafen, Germany – Around 16,300 attendees from across the globe came to HAM RADIO 2011 to meet other amateur radio enthusiasts, exchange information, stock up on the latest products, and gain new impressions. The three-day exhibition featured new products from 184 exhibitors, a flea market with a variety of treasures to discover, and informative presentations. Numerous exhibitors indicated that they were pleased with the number of sales made during the exhibition. “The German Amateur Radio Club focuses on a given topic in detail every year, and is an important partner for the exhibition,” says Messe Friedrichshafen CEO Klaus Wellmann. This year, the 36th international amateur radio exhibition highlighted Morse code technologies through various attractions.

“With a constant turnout of exhibitors and 16,300 attendees from around the world, including countries such as Italy, England, Malaysia, Japan, Qatar and the United States, HAM RADIO has once again demonstrated its leading position in Europe,” says project manager Petra Rathgeber. “The amateur radio exhibition has an outstanding reputation throughout the international industry, which inspired us to work together with the German Amateur Radio Club (DARC) to develop an exciting supporting program featuring a high degree of technical expertise.” One of the top attractions for attendees was the balloon mission on Saturday. The 184 exhibitors on hand at the exhibition offered an overview of the market and attracted attention from amateur radio enthusiasts, and the flea market featuring 300 vendors was also a popular attraction.

“The top highlight for me this year was the Morse code competition,” says DARC spokeswoman Stephanie Heine. “The entire range of products was represented, from small Morse keys to large ones for knees. The fascination shown by the participants and observers demonstrated what this hobby is all about: having fun with building things and taking on the challenge of mastering Morse code.” Efforts to educate the next generation of amateur radio enthusiasts were also successful at HAM RADIO: 146 teachers who participated in the training session (last year there were 105 participants) were interested in including technical topics in their curriculum. The HAM RALLY attracted 124 children and young people (last year there were 101 attendees) who immersed themselves in the topic of amateur radio, gained insight into radioing and soldering, and learned how to transmit their own names in Morse code.

The next HAM RADIO will take place from June 22 to 24, 2012 in Friedrichshafen.

Morse code lives: 36th HAM RADIO puts the spotlight on telegraphy
2011 edition of the Amateur Radio Exhibition with courses and presentations on the topic of transmitting Morse code - Balloon mission on Saturday - Amateur radio station on board the zeppelin

Transmitting from Lake Constance to the entire world: From Friday to Sunday, June 24-26, 2011, HAM RADIO offers an international platform for telegraphy and Morse code and a meeting place for amateur radio operators from around the world. The theme of the 36th edition of the Amateur Radio Exhibition is "Morse code lives," putting this technology in the spotlight with everything from Morse code courses for beginners to presentations by telegraphy professionals. Approximately 180 exhibitors provide an overview of their current products. There will also be a Contest University to train amateur radio operators. On Saturday a balloon will be launched carrying an amateur radio transmitter, and it will be possible to establish radio contact with a zeppelin. The 62nd amateur radio conference at Lake Constance also features a comprehensive program of presentations.

In 2011, the 36th HAM RADIO will once again be held in conjunction with HAMtronic, and is the top European event in the sector. In three exhibition halls, amateur radio operators and electronics fans will find exhibitions of technology and equipment, with everything from measuring devices, antennas and electrical technology to hardware, software, electronics and accessories. "Market leaders like boger electronics, Hilberling, Icom Europe, Kenwood Electronics, hofi, Waters & Stanton, Wimo, YAESU, Luso and Conrad Electronic will be on hand along with large and small retailers, hobbyists and inventors," says project manager Petra Rathgeber. "At the HAM flea market, which extends across two exhibition halls, tinkerers and hobbyists will find second-hand accessories and replacement parts along with affordable new goods that are no longer available on the market." A total of approx. 180 exhibitors provide an overview of the latest technology and equipment.

DARC motto: Morse code lives
The German Amateur Radio Club (DARC) will be exhibiting in Foyer West under the motto Morse code lives: "Morse code is as indispensable as ever: Even today there is no other internationally functioning communications technology that works so effortlessly and requires so little energy," says Stephanie Heine from DARC, the organization behind HAM RADIO. "Particularly in emergency situations, Morse code can save lives." An exhibition in the Foyer West allows visitors to discover the fascination of Morse code. Furthermore, Morse code courses for beginners offer a playful opportunity to learn at least eight Morse signals, and there is a wealth of activities for telegraphing professionals. In October, the DARC chapter in Bielefeld, Germany will host the ninth High-Speed Telegraphy World Championship. An important aspect of the supporting program is the 62nd annual Lake Constance conference of DARC e.V., which features a wide range of presentations and meetings.

Balloon mission and radio contact with a zeppelin
On Saturday a weather balloon will be launched with an amateur radio transmitter and camera on board. During the entire flight, digital sensor data, position and voice information will be transmitted. A pursuit team on the ground will attempt to track the balloon and recover the payload undamaged. Radio contact with a zeppelin will be possible on Friday and Saturday when the airship takes off with an amateur radio station on board. Afterwards, all amateur radio operators will have an opportunity to make contact with the zeppelin and collect a coveted QSL card.

Radio contact for young people
Morse code, radio transmissions, soldering and tinkering: On Friday and Saturday, 24-25 June, young visitors between the ages of eight and 18 can log their first amateur radio sessions during the HAM-RALLYE. Children and young people can gain insights into amateur radio at countless stations in Rothaus Hall/A1. Participants will gather every morning at

10:00 a.m. at the promotional stage in Foyer West.

HAM campground on the open-air grounds
From 24 June to 26 June 2011, the HAM campgrounds offer up-and-coming young amateur radio operators far more than just overnight accommodation: The young radio enthusiasts can take part in an attractive supporting program and transmit to their heart's delight at the club stations. Information and registration forms are available online at www.hamcamp.de. There are a limited number of spaces available and it costs €45 per night, including a parking spot, trade show admission fee and breakfast. All young people up to the age of 27 can participate.

Teacher training courses - amateur radio at schools
This is the fourth time that HAM RADIO offers continuing education activities for teachers from Baden-Württemberg, Bavaria and Switzerland. Under the motto "from amateur radio operators to engineers," teachers learn in presentations and workshops how during natural science classes and technical instruction they can create practice-oriented approaches to electronics and information technology. The main topic this year is energy and communications - from the sun thanks to energy harvesting. The term "energy harvesting" refers to the generating of electricity from sources like ambient temperature, air currents, vibrations and electromagnetic fields. This usually involves tiny amounts of energy that, with the right equipment, can nevertheless be used as a source of electricity for electronic applications. Presentations will cover diverse principles and include simple relevant experiments. The continuing education program for teachers has been created by
DARC e.V. in cooperation with the Working Group on Amateur Radio and Telecommunications in Schools (AATiS). Questions and registrations can be submitted by e-mail to schule@....

Contest University for beginners and professionals
Following last year's successful event, the Contest University will be held once again within the scope of HAM RADIO in Friedrichshafen. This educational initiative aims to motivate beginners to engage in radio contests and help them build a solid knowledge base. In addition, amateur radio operators who love the thrill of radio competitions will gain further expertise and receive tips on how they can improve their performance at contests.

Opening hours
HAM RADIO is open on Friday and Saturday, 24-25 June 2011, from 9:00 a.m. to 6:00 p.m., and on Sunday, 26 June, from 9:00 a.m. to 3 p.m. On Saturday, HAM-NIGHT will take place starting at 6:00 p.m. Daily passes cost €9.00 and the reduced admission fee is €6.50. Three-day passes are available for €17. Parking spaces for motor caravans are available at the East 2 parking lot, which provides direct access to the exhibition halls.

HAM RADIO invites amateur radio operators to a worldwide convention
Amateur Radio Exhibition 2010 with activities for young people and teachers – Contest University – Balloon mission on Saturday – DARC anniversary with a special exhibit commemorating 60 years of club history

From Friday, 25 June until Sunday, 27 June 2010, HAM RADIO is the place to be for amateur radio operators from all over the world. For the first time as part of the international radio operator exhibition, there will be a Contest University dedicated to training beginners and professionals. Other featured events are HAM RALLYE, HAM CAMP and teacher training. The 35th annual HAM RADIO event also happens to coincide with the 60th anniversary of the founding of the German Amateur Radio Club (DARC). The 61st annual gathering on Lake Constance has something for everyone with over 40 speakers and 13

meetings. On Saturday, a balloon with a radio transmitter will be launched from the open-air grounds.

HAM RADIO is the premier event of its kind in Europe and is once again being held in concert with HAMtronic in 2010. In all, about 200 exhibitors from 29 countries will provide an overview of the latest technology and equipment. In four halls, amateur radio operators and electronics enthusiasts will be bombarded with ideas and will get plenty of opportunities to buy everything from antennas, electro- technology and measuring devices to hardware, software and electronics to peripherals and accessories. “As in past years, a lot of market leaders are returning to Friedrichshafen,” says project manager Thomas Grunewald. The HAM flea market is spread out over three halls, where enthusiasts and hobbyists can purchase exclusive, used accessories and spare parts from private individuals.

DARC celebrates its 60th anniversary
HAM RADIO is marked by DARC’s anniversary in 2010. The German Amateur Radio Club currently has 43,000 members and a 60-year history. Among other things, DARC will trace its history in Foyer West with an exhibit entitled “60 Years of DARC – Turning back the clock”. The 61st annual DARC convention on Lake Constance with over 40 presentations and 13 meetings is an important part of the overall program. “True to its motto, ‘By amateur operators for amateur operators’, the main purpose of the event is to promote dialogue and an exchange of ideas, as well as to share the joy of communication and technology,” says Stephanie Heine of DARC, the ideal sponsor of HAM RADIO. “One of the main topics is digital, wireless voice transmission. Four presentations deal specifically with this topic, for example, future developments and trends in D-STAR digital transmission, and monitoring and alert notification through D-STAR gateways.”

Contest University for beginners and professionals
For the first time in connection with HAM RADIO Friedrichshafen, there will be a Contest University, which is jointly sponsored by the DARC Committee for DX and HF Radiosport, the Bavarian Contest Club (BCC) and the Rhein Ruhr DX Association (RRDXA). The goal of this training is to infuse beginners with a passion for radiosport and help them build a solid knowledge base. The contest experience is designed to provide amateur radio operators with useful knowledge and suggestions to improve their skills. The Contest University consists of two blocks. The first, under the direction of Michael Höding, DL6MHW, will cover six topics for beginning and intermediate operators on Friday afternoon. In the second block on Saturday, Helmut Heint, DK6WL, will expand the contest forum to include topics for advanced contest operators.

Hands-on experience for young people
Sending Morse code, transmitting, soldering and tinkering - Over two days, young trade show visitors between the ages of eight and 18 will make their first foray into amateur radio at HAM-RALLYE. At the numerous stations in the Rothaus Halle/ A1, children and young people will experience first-hand that ham radio is more than just talking on the radio. “Radiotelegraphy, developing and building devices, exposure to the latest technology, satellite transmission, direction finding, expedition, athletic competition as well as emergency assistance are all part of this wide-ranging hobby,” says Stephanie Heine. The meeting point is the activity stage in Foyer West at 10 am.

HAM CAMP on the open-air grounds
From 25 - 27 June 2010, HAM CAMP will give up-and-coming radio operators more than just an overnight experience. A wonderful program is in store for the young radio operators, who

will be able to practice their skills at the club stations to their hearts' content. Information and application forms are available on the Internet at www.hamcamp.de. The number of slots is limited. The overnight stay costs 39 euros, which includes parking, admission to the trade show and breakfast. Anyone 27 years of age or younger may participate.

Teacher training – Amateur radio in the classroom
For the fourth year running, HAM RADIO will provide training for teachers from Baden-Württemberg, Bavaria and Switzerland. Under the motto, "From amateur operator to engineer", educators can attend presentations and workshops to learn how to incorporate practical activities in electronics and information technology into their science and technology lessons. For instance, Michael Matthes and Jens Mundhenke will discuss opportunities for students and youth groups to participate in the European Balloon Project. DARC and Amateur Radio and Telecommunications in the Schools (AATiS) have teamed up to put together the teacher training. Please email inquiries and applications to schule@darc.de.

Balloon mission on Saturday
In keeping with the presentation by Michael Matthes, DL2SEK, on the European Balloon Project, two weather balloons with a radio transmitter and a camera on board will be launched on Saturday.
The project is being organized by a European team. The local Taubertal-Mitte club will be in charge of the first balloon and payload. A Polish team will launch the second balloon. The flight plan will be overseen by French ham radio operators. During the entire flight, digital sensor data, position and voice information will be transmitted. A pursuit team on the ground will try to track the balloon and recover the payload undamaged.

Opening hours
HAM RADIO is open from 9 am to 6 pm on Friday, 25 June and Saturday, 26 June 2010, and from 9 am to 3 pm on Sunday, 27 June. A day tickets are 8 euros, and discounted tickets are 6.50 euros. A 3-day badge is available for 15 euros. RV and camper parking is available in the east parking lot directly adjacent to the exhibition halls. Radio operators can set up their tents there.

http://www.sm7wt.n.nu/

The photo above shows 3D2AG operating as FO5RK. As long as there is space for an antenna and a power outlet or a battery, a ham can operate. Who said you need a table?

ENCYCLOPEDIA OF HAM RADIO
We meet thousands of hams on the bands, knowing no more about them than their callsigns and first name. We don´t know if the guy at the other end is old or young; if we have other common interests than ham radio; if we are talking to a YL or an OM in CW or that this might be someone with a remarkable story to tell us.
Encyclopedia of Ham Radio is a project by hams for hams where we
* get to know the guy at the other end - not just 599 TU.
* read about hams actively participating in rescue operations
* read how we can get youngsters interested in ham radio
* read about recent DXpeditions
* follow the development of Amateur Radio since 1912
If you are an active ham, I would be happy to have your presentation here among the more than 500 hams presented on the new edition which will be presented in 2012.
I will be happy to send you examples of presentations from the first edition of this project.
Encyclopedia of Ham Radio is written like a book, but the huge amount of information (more than 1600 pages) would demand five books. That´s why it comes as a PDF-file where you can easily search for information and magnify a photo to look at details.
I will be very happy to hear from you and if you have any questions, please contact me at sm7wtstan@... !
We all like to find more young hams on the bands. Here you find hams who tell you how they succeed and how you can become a mentor for new hams.
"CQ - Welcome to the adventure!" is a Power Point presentation, I have made to get youngsters interested in ham radio. It´s available free of charge in English, Spanish, German, or Swedish. If you like to have it, just send me an e-mail and I will send it via file transfer.
Since 2005, I have spent more than 6000 hours on this project and I expect to need at least another 1000 hours before I present the next edition – where I hope to find your presentation!
The project is presented on page 37 in the April 2011 issue of QST.
Amateur Radio gives you 2 Million Friends - here you get to know 500 of them!
Warning! If you receive a mail marked WAYN, pretending to be sent by me (or anyone else) don´t open it! It is SPAM and has not been sent by me or any other ham!

What can be found on the PDF-file?
The callsigns of several hams are familiar to us, but in most cases we know very little about the interesting person behind that call. Getting to know him/her can add a new dimension to ham radio.
In the first version, 347 active hams from all parts of the world tell personal stories you will not find on the Internet.
Among the hams we meet here are 3D2AG; 4Z4DX; 5R8FU; 5X1Z; 9K2HN; A61M; CT3FT; CU2JT;

DK2WV; DL4KQ; DL7DF; G3KMA; G3XTT; HB9MX; HP1XX; HS0ZEE; IT9TQH; JA1BK; JA9BOH; JH1KRC; JH1RES; K3ZO; KH6OO; N1DG; N7NG; N7RO; OE6MBG; SM0AGD; SP3DOI; SV9CVY; TF4M; UX5UO; V85SS; VE3XN; VK2IA; VU2RBI; W4DR; W6OAT; XE1KK; XE1L; XE2K; XE2MX; ZB2EO; ZL3NW, etc, etc….
How to get more youngsters interested in Ham Radio;
Hams who lived behind the Iron Curtain tell us why they lost their licenses;
Hams tell how they were robbed with guns to their heads after a DXpedition;
Doctors tell how they use ham radio to help doctors in Africa and the Pacific;
Hams who are always prepared to assist the authorities in case of a disaster;
Hams who met their loved ones on the air;
Hams who have built enormous antennas;
What has happened in ham radio since the first spark transmissions and much more!

Who is SM7WT?
I was born in 1939 and became a ham in 1956. I have been active ever since and I like to work DX on CW and SSB on all bands from 2 to 80 Meters. Lack of space makes it impossible for me to have an antenna for 160 so I have to go the club to look for new ones on top band.
Since 2006, I use the call SF7WT.
For DXCC I have 367 entities worked and I need Pratas and North Korea to have all of them.
A nice rag-chew is also always a pleasure, exchanging QSLs via the bureau is as natural as having a QSO.
Personal contacts are the most interesting ones of them all. Traveling has brought me to the USA 17 times and to Mexico City once. Always happy to meet hams! Being invited by Thor, TF4M in 2009 and allowed to use his outstanding station was another highlight in my life!
Another highlight was my visit to the DX-convention in Visalia in 2010, meeting so many of the guys I knew from the bands!
Getting to know other hams made me understand how interesting "the guy at the other end" really is. He/she is much more than a callsign and a name! This made me start to assemble information and write my book, "Thanks to Amateur Radio" in 1994, presenting 178 hams along with stories about hams helping the world and DXpeditions.
In 2005, I began to assemble information for another book, but after a while I had so much information that it would cover five books. That´s the reason for presenting this as a PDF-file, which I´m now expanding.
I hope this expanded edition will include your presentation!
A PDF-file makes it very easy to look for specific information.
You can magnify photos to look for details.
I hope to present the new edition in 2012 and if you are an active ham, I would be happy to see your presentation on it!

2904. Stand YBDXC

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-21 06:05:40 UTC
From: karsono_suyanto@yahoo.com
Topic: 2904 Message: 2904

Bersama ini di umumkan bahwa:

YB Land DX Club akan membuka stand pada Event Jakfox yg akan di laksanakan pada:

Hari : Sabtu dan Minggu
Tanggal: 23 - 24 Juni 2012
Tempat: Lapangan Irti Monas (tempat Hamfest tahun 2011 yg lalu).

Kegiatan:

1. Eyeball QSO
2. Private Workshop (logger 32, N1MM dan LOTW).

Kepada kawan2 DXer member YBDXC yg ingin di installkan software logger 32, N1MM dan LOTW, harap membawa laptopnya berikut donggel modem nya, charger.

Kepada kawan2 yg sudah expert di harapkan ikut membantu dan membagi pengalaman nya dalam hal penggunaan logger, software contest , dan Lotw.

3. Bursa QSL card.

Kepada kawan2 yang ingin mencetak QSL card full Colour dan di vernish dengan harga terjangkau dan kwalitas baik, bisa melihat sample sample QSL card yg pernah di design dan di cetak oleh YBDXC.
Pencetakan QSL card ini akan di koordinir oleh om Djoko YB1TJ.

Demikian pengumuman ini saya sampaikan. Terima kasih atas perhatian nya.

Regards:

Karsono Suyanto (YB0NDT)

Oh terima kasih banyak OM Yongki atas kebaikan OM Yongki mengirimi saya du lbr. sticker YB LAND DXC. Bangga juga rasanya punya sticker itu dan langsung saya tempelkan di muka/belakang car saya OM Yongki, sekali lagi terima ksih ya OM Yongki dan mohon maaf terlambat mengirimkan ucapan terima kasih ini, karena satu dan lain hal. Rasnya kepengen juga untuk bergabung di stand YBDXC hari minggu mendatang itu, tapi hari itu juga ORARI lokal Bandar Lampung yang baru dimunculkan akan mengukuhkan kepengurusanya, termasuk saya. Jadi urung deh ke 0 nya. Salam untuk keluarga OM Yongki dari YB4TRY di Bandar Lampung.

Thanks & regards,
Annes Samah (YB4TRY)

Subject: [YBDXC_News] Sticker

Selamat malam semua rekan2ku. Tadi siang saya mendapat kiriman 2 pcs sticker logo YB LAND DXC dari sesorang, namun saya tidak tahu siapa yang mengirimkan itu untuk saya,karena diaplop pengiriman tidak dituliskan namanya. Kepada rekanku yang telah berkenan mengirimkan sticker tsb, dengan segala senang hati saya terima dengan ucapan terima kasih sekali, moga2 kebaikan saudarakun itu dibalas berlipat ganda oleh Allah SWT, amin. Sekali lagi, terima kasih ya kawan. de YB4TRY

Thanks & regards,
Annes Samah (YB4TRY)

http://www.arrl.org/poor-man-s-dxpedition

Mike Horvat, W7ASF

A DXpedition doesn't have to be expensive and complicated to be a great time.

In November of 2009, Jerry Ball, N7FYP, and I did something that most other old hams would not do: We rented a contest station in another country and went on what I consider a "poor man's DXpedition." Neither Jerry, age 69, nor I, age 64, are serious contesters; also, like many of you, we avidly read about DXpeditions. It often seems that only the younger hams can have adventures like these.

Back around Christmas of 2008, Jerry, from Washington State, and I, from Oregon, were pondering what we could do in Amateur Radio that would be exciting and new. I was wandering around on the Internet a couple of days later and stumbled on Prince Edward Island DX Lodge. Ken Widelitz, K6LA/VY2TT, had a house, an ultramodern station and 2 acres of antennas available for rent on Prince Edward Island (PEI) in eastern Canada. Say, now this would be something: fancy equipment we will never be able to afford ourselves that is already in place and an antenna field that will reach out and touch millions. Jerry and I decided that this would be our adventure.

We checked the house schedule and the first convenient time was November 16-24 2010, the ARRL Sweepstakes Contest. This was almost a year away — plenty of time for planning and anticipation.

Touring and Traveling

Six days in the house working the radios sounded great, but we figured that we should do some sightseeing, too. Our flight left Portland, Oregon, at 6:30 PM and got to Charlottetown, PEI, at 1 PM the following day. We allowed that afternoon to go to book stores, then to a bed and breakfast to rest. The second day was the tourist day and we spent hours at the Provincial Museum. We know that there is more to traveling than just Amateur Radio, but everything else took a definite second place.

We headed out early the next day, following Highway 2. The DX Lodge was supposed to be about an hour's drive from the town of Summerside. Jerry and I were both a little concerned as the directions said to follow Highway 2 until we saw the antennas. It is often easy to miss antennas.

We had just passed St Anthony, when we topped a ridge and saw an array of antennas a few kilometers away. You couldn't miss them. Our conversation boiled around us in the car, Are those ours? They looked too commercial to be ham antennas. They were huge!

We got to the turn, took it and sure enough, there was the house and those were our antennas.

We timidly drove up and parked. The first tower was 145 feet tall with a full size 40 meter M2 (48 foot, 4 inch boom), a 2 element 402BA at 95 feet fixed on South America and the southwest USA and at 81 feet a TH6DXX also fixed and aimed at South America. The second tower was 150 feet tall and set up for 20 meters (6/6/4 element Yagis at 151/87/60 feet, respectively). Tower three is 84 feet high with three 10 meter antennas (7/7/4 element Yagis at 90/60/30 feet, respectively). Tower four is a little guy at 48 feet with a 6 element M2 and a 2 meter Ringo vertical. The fifth tower is 140 feet tall, set up for 15 meters (6/6/4 element Yagis at 150/100/50 feet, respectively). The feed line for these beauties is 7/8 inch hardline.

Mission Control

The next thing we did was go into the operating room. Beautiful equipment. Jerry and I both felt more than a little in awe. We looked around the room a bit more, saw all the rotator guides for the antennas, the four radios, the amplifiers, one whole wall filled with certificates that Ken had won from this location. We decided that we had better unload the car, find our rooms and try to bring our hearts back under control.

About a half hour later, we went back into the operating room. Jerry liked the IC-7800, so he took that station; I liked the Elecraft K3, so I took that one. Following Ken's appreciated instructions, we got the power turned on to the units and figured out how to get which antenna hooked to which radio.

It was still early in the day and 20 meters was hot. I could hear England, Slovakia, Italy and Turkey. It seemed like all of Europe was thundering through. On 40 meters with the beam pointed south, we could hear many, many American hams —so very many more than we could hear at home on the West Coast. It took me a while to figure out how to use the console microphone and to "discover" the PTT foot switch. Soon our heads were capped with earphones and signals were coming in.

I had to read the Alpha Power 87A amplifier manual to give me confidence to use it. The manual said to just start talking – the amplifier was microprocessor controlled and would tune itself to the right band and the right frequency. Wow, hard to believe. My old amplifier at home has to be tenderly coaxed to perform.

Some of the equipment that Ken made available to us were two Elecraft K3s, an ICOM IC-7800 and IC-756 Pro III. There were two Alpha Power 87As, an Alpha Power 91B and a Dentron MLA2500. He had various antenna tuners and a fantastic custom-built antenna switch by WXØB that allowed any of 12 antennas to be selected at any of four operating positions. I will probably never have a chance to use such exotic gear again.

I sat down at the operator's table, turned on the K3 and 87A amplifier, aimed the antenna along the great circle line to Europe and Africa and called CQ. There was no answer on my first call, but on the second one a fellow in Wales answered. He gave me a strong signal report and we exchanged names and locations, and chatted a bit. After about 10 minutes we signed. Egad! There were 20 stations calling me! I was instantly giddy as I recognized calls from France, the Netherlands, Scotland, etc. I replied to one, we talked a minute, then he said that it looked like I was generating a pileup and he would turn me loose to work some more fellows. I sat there for 40 minutes, talking to one station after another. In my 45 years of hamming this was the first time I was on the "inside" of a pileup.

I was done in – but more and more hams called me. Sorry fellows, I said, but I am an old man and can't keep up a pace like this. I'll be back later. This said, I turned the volume

down on the radio, pushed the chair back and let out a loud hurrah! Now, this was real radio operating! It was outstanding what could be done with a fine antenna system and maximum legal power.

The band conditions on 20 meters were such that international communication was possible from 8 AM to about 3:30 PM. Every time I got on the air for the 3 days prior to the Sweepstakes, I found myself at the heart of a pileup. What a thrill! Other bands were open to the East Coast all the time. Anytime we wanted to talk, we could.

Plan of Attack

There are two basic ways to operate in a contest. One is the Search and Pounce method, where the operator tunes over a frequency range looking for another station that is calling “CQ Contest.” The other way is to be the station that sits on one frequency and calls CQ, waiting for others to respond.

All of the big winners use the CQ technique. It is possible to talk to many more stations if you just sit on the one frequency and let the masses come to you. A typical station will work 60+ others in an hour. I chose the Search and Pounce system for some pretty good reasons.

For one thing, not only does the CQ station have to talk to as many stations as possible, he has to maintain a log with the stations’ calls and other contest stuff that verifies that the contact was made. I can’t do this; it is too stressful for this old guy. I decided to go with search and pounce, call a station, work him, then take as long as I want to make a log entry, search out another CQ station and start again. I can average (on a good day) 20 contacts per hour. As you can see, this does not compare very favorably with the CQer’s 60 or 70.

It is evident that I did not get in this contest to win, but rather to have fun.

I came out of the Sweepstakes with a score of 25,000 points. The winning station will have about 6,000,000 points. Ken, VY2TT, placed second last year. This station had the capacity for being a winner with better contesters at the helm.

Even search and pounce operators were expected to run two radios at a time, searching for the next station to work simultaneously with working the current station. Phooey; no can do. I read an article about how to operate with two radios. It explained how you could be tuning at the same time the other station was talking– at the same time you were typing his log information into the computer. I just can’t do it. It was one radio at a time for me. I made about 205 contacts and had fun.

The contest wasn’t everything. In fact, as it turned out the peak of our excitement was in the 3 days we had to prepare for the contest, getting to know the radios and working DX stations. A trip like this is possible for older hams. We, too, can have new experiences in Amateur Radio.

From: Yb land Dx club
Topic: 2907 Message: 2907

http://www.arrl.org/too-old-for-contesting
Gene Bartsch, WI7N

It takes more than a big-gun station to make a top operator.

The club meeting was nearly over, but Charlie hadn't uttered a single word all evening. He was sitting in the rear of the room, which was also unusual. After 15 years of attending Lakes-of-Utah Contest Club meetings with him, I knew he always arrived early and raced inside as soon as the doors opened to get a front-row seat. The unhappy frown on his face worried me the most because Charlie was a cheerful person and that scowl was so out of character for him.

I casually glanced over my shoulder again. Charlie had been one of the club founders many decades ago, long before I'd even heard of ham radio, but I'd gotten to know him rather well during my time in the club. We'd been on several committees together and had both taken part in the same club DXpedition to Aruba. I'd never really thought about his age, but he had to be in his late 70s or early 80s and maybe he was having health problems.

As soon as the club president slammed down the gavel to end the meeting, I hurried to the back of the room. Charlie was still seated and gazing quietly at his fellow hams, some of whom were already leaving while others had gathered in groups to chat. I dropped into an empty chair next to Charlie. "Hey, are you okay tonight?"

"I'm going to miss it," he said.

"Miss what?"

"Ham radio contesting."

"What do you mean? What's wrong? You aren't sick, are you?"

"No, but I guess I'm simply too old for the hobby."

"What makes you say that?"

He gave a long sigh. "There was a 160 meter contest last weekend."

"I knew about it, but I was out of town on a business trip and didn't operate. How were conditions?"

He didn't answer me but instead stared off into space. Finally he said, "I've been a ham for 64 years and have always enjoyed contesting. I have a modest station and didn't need to rank in the top-tier to have fun. I always enjoyed giving points to other people and watching signal propagation change from hour to hour."

"Me, too. So?"

"I had measles when I was a child and have been stone deaf in my left ear ever since."

“I didn’t know that.” Bringing up his childhood illness wasn’t a good sign and I couldn’t imagine where he was taking our conversation.

Charlie nodded slowly. “It was before a measles vaccine had been developed. I was bedridden for weeks and nearly died. I eventually pulled through, but lost my hearing in one ear and always sat in the front row at club meetings because I couldn’t hear otherwise. I especially have difficulty when there’s background noise.”

“I always thought you sat in front because you were interested in the club programs and didn’t want to miss anything.”

He smiled. “That, too” he replied, “but the hearing in my good ear has worsened as I’ve gotten older, especially for sounds in the high-frequency range.”

“That happens with everyone. What does that have to do with you giving up contesting?”

Charlie frowned. “Something happened during the 160 meter contest last weekend that really bothered me.”

“What’s that?”

“I found a clear frequency and asked if it was in use. Nobody replied, so I called CQ and soon began working stations. I spent the next 2 hours operating on that same frequency.”

“Okay, so?”

“At about 3 AM, a weak signal popped out of the noise. The guy was slightly above my frequency, but we exchanged information and then I immediately called CQ again.”

I shuffled in my seat. “I still don’t understand the problem.”

Charlie rubbed his face and gazed into the distance. “The next morning I found an e-mail in my inbox from that weak station. The operator called me a jerk, a lid and several other names for calling CQ on his frequency. I looked up the guy in an online call book and it showed his photo. He’s a fairly young fellow, but a big-gun DXer with expensive modern equipment and incredible antennas.”

Charlie’s face had turned red and I thought he might be on the verge of a heart attack. “Easy, Old Man,” I said.

He nodded and took a deep breath. “I considered explaining to the guy that propagation had probably changed and caused interference when none had existed before, or maybe he could still hear me when I couldn’t hear him because his station was so superior to mine, but I didn’t do that.”

“What did you do?”

“I sent him an e-mail and apologized for being a jerk and a lid.”

“Oh, I wish you hadn’t done that.”

“Why not? I don’t want to ruin another ham’s fun and I don’t want to get more nasty e-mails like that one in the future. I’m probably just too old for contesting, especially with my bad hearing and modest station. I’m sure going to miss it, though. Maybe I should just quit ham radio completely.”

“Charlie, don’t do that! Lots of older hams have poor hearing and you know that people with average equipment can’t match the capabilities of those big-gun stations. Now, just imagine the impact that getting an e-mail like the one you received could have on a newcomer to ham radio, perhaps a young and inexperienced fellow trying contesting for the first time.”

“I hadn’t considered that. All I could think about was how much that e-mail had ruined my day.”

“And besides, that other guy doesn’t own the frequency. He could have moved if he was experiencing interference. If there was a jerk on the frequency, it wasn’t you.”

Charlie brightened a bit. “Hmmm.”

“And another thing – were you operating from your cabin in Wyoming during the contest?”

“No, I decided to stay at home this weekend and operate from here in Salt Lake City.”

“Charlie, you’re often the only Wyoming station I work during some contests and I know you provide that multiplier to many other people. You would sure be missed if you gave up contesting.”

He rubbed a hand slowly along his chin. “Well, I’ll consider that before making a final decision about quitting the hobby.”

“Please do and I sure hope you decide to remain active.”

During my drive home later that night I tried to imagine why any ham would want to ruin the enjoyment of Amateur Radio by anyone else. The ego, selfishness or anger issues that I mulled over as the possible answer reflected so poorly on the other operator that I finally gave up and concluded that his behavior was simply beyond my comprehension. Ham radio is a hobby that should be fun for allparticipants regardless of their equipment or skill level. If those unwilling to play nicely with others succeed in driving people away, the eventual result will be a few big-gun stations that quickly work each other and then spend the rest of the contest weekend calling CQ endlessly without being answered because the operators who might have replied have quit the hobby.

http://www.arrl.org/field-day-basic-training

Robert Logan, NZ5A

A little Elmering will turn that confused first-timer into a Field Day fanatic.

I just finished my 50th Field Day. It is as fresh now as it was then, operating on Rattlesnake Point with my
Novice set dead even with the high-tide water of Corpus Christi Bay. My mentors in the Corpus Christi Amateur Radio Club set up heavy tube rigs on sturdy tables nestled in flimsy tents. We fired up large, loud generators and snaked thick extension cords and black coax across the little island of broken sea shells. We talked all across the nation and Canada all weekend to the cries of sea gulls and the tooting horns of shrimp boats passing by at dawn on Sunday morning. I was hooked.

As the weekend drew nearer back then, I remember becoming more apprehensive. Field Day, although an incredibly fun weekend, can be a little scary as well. I would be operating with the older guys who already had DX Century Club (DXCC), Worked All States (WAS), Worked all Continents (WAC), Brass Pounders League (BPL) and Rag Chewers Club (RCC) awards on the wall. The guys who could carry on a conversation on CW or SSB without hesitation, stammering or saying “Uhhh” about every fifth word. The guys who could pass traffic and break pileups with equal ease. They knew how to fix equipment and build antennas, from scratch, in 15 minutes then work the world with them. They had worked as net control operators in severe domestic and international emergencies, been recognized by the ARRL® and written up in QST®.

Here I was, a 14 year old Novice with barely 3 months of experience, having to set up and operate my little inverted V, Heathkit DX-20 transmitter (with one crystal) and Hallicrafters S-85 receiver in front of them in the middle of the Field Day chaos. I was not exactly filled with confidence. Somehow, I made it through, with a lot of help, advice and ribbing from “the guys.” Oh, and did I say encouragement as well?

Field Day 2011

In 2011, I introduced Field Day to two excited local hams. The party had started and stations filled the air. Each guest operator seemed a bit hesitant to hit the microphone or pound the key. “There’s a CQ,” I would point out repeatedly or tell them, “Call CQ, there’s an open frequency.” Though they would hunch forward toward the key or microphone each time, they wouldn’t transmit. Other times they would start transmitting and then stop before completing a call.

I called a time-out to discuss what was happening. Their first problem was that almost all they could hear was noise. Second, not being familiar with the Field Day exchange, they did not know what to send or understand what the other station was sending. To help them make successful Field Day contacts, I needed to address these two concerns.

I also drew a broader conclusion: They were feeling exactly the same feelings I had experienced on my first Field Day. Due mainly to a lack of knowledge and limited experience, they felt a little fear perhaps, a bit of embarrassment maybe and real confusion. These were enhanced by a genuine, powerful, gut-based desire to join the fray. The latter made them grab the microphone or key; the former stopped them from starting or completing contacts. They really wanted to join in but they just did not know how. From our conversation and my memories of my first Field Day, I realized that there must be thousands of new hams who feel the same apprehension yet have the same strong desire to participate in Field Day.

As a result, I quickly created the training activity described below. It seemed to resolve their concerns since they both started enthusiastically making contacts that afternoon and continued operating into the night. One operator sent me a nice thank you note telling of his new-found joy at making contacts and improving his CW operating skills. The other operator said the experience was a topic of lively conversation with friends the next day. The confidence these two hams achieved in a few short hours suggest that this basic training might help others have a successful Field Day.

Getting Down to Basics

Separating Signals from Noise
To start with, I explained that, yes, there was noise — and lots of it — but within the noise were signals. When there are many signals on the air at the same time, as in Field Day, the signals, too, could sound like noise. I explained that the nonrandom noises were signals and had them listen for the differences between the actual noise and the CW and SSB signals.

Next, I corrected a bit of receiver mistuning explaining that signals needed to be placed within the filter’s passband to come in clearly. We briefly discussed what filters were, how the passband was shaped and how to use it. I reminded them that detailed information and graphics showing how to place a signal in a passband were in The ARRL Handbook and in many equipment operator manuals. After a number of minutes, they were able to tune and pick out specific signals from the overall noise and peak those signals within the passband. They began to hear the words and CW tones much more clearly but still didn’t understand what the messages were.

The Field Day Exchange

Their second concern was not knowing what they were listening to or how to respond to the station who answered their call. That led to a certain amount of hesitation in calling or responding to stations. What they heard seemed to be gibberish.

I explained that the exchange has certain parts that follow a particular sequence. For example, answering CQs on Field Day follows this sequence:

1. Call the CQing station
2. Receive the station’s acknowledgment
3. Receive the station’s message
4. Transmit your message
5. Receive the station’s acknowledgment
6. End the contact

In practical operation, I told them, this is how the sequence works:

1. Call the CQing station — After completing a contact, the other station will either call CQ again, say “QRZ” or “Field Day.” He is asking for another station to call him. I pointed out to both hams that it might as well be you. Send your call just once. Use the standard phonetic alphabet on SSB when calling the station.

2. Receive the station’s acknowledgment — if the other station hears you, he will reply with your call. If he can read you but doesn’t quite understand your call, he will reply with whatever part of your call he copied. Using the call W5ABC as an example, on CW he may send the letter “A” or the letters “AB” or even simply a “W5.” A question mark could follow any of these responses, depending on the operator’s style and band conditions. In these cases, if he is answering you, send your call once again immediately when he stops sending. In poor conditions, the other station may repeat his request several times till he has your complete call, which he will send back to you. The information required by Field Day rules will follow. Get ready to listen for it.
On SSB, exactly the same thing occurs but with a little more plain language such as “the letter A, please” or “the Alfa Bravo?” or “who’s the Whiskey 5?” Don’t get flustered or mixed up by the partial reference. Simply respond with your whole call once again in standard phonetics and be ready for his message, as in a CW contact.

3. Receive the station’s message — Field Day has its own requirements for the exchange between stations. The required exchange is your station’s operating class, such as “25A” or “1B” and your section or province such as “STX” on CW or “South Texas” on SSB. Stations outside the United States or Canada will send “DX” as their section. Exchanging your two pieces of information with his two pieces makes a valid Field Day contact.
The Field Day Packet (www.arrl.org/field-day) explains what the numbers and letters of the various operating classes mean and provides a list of abbreviations for each section and province. So, listen for the number-letter combination of the station’s class followed by the abbreviation designating his section. If you didn’t quite get all the information, it’s time for you to ask for a repeat (known as a “fill”) of what’s missing. That’s all there it is to it. After you copy it correctly and fully, get ready to send your information.

4. Transmit your message — When the other station sends her exchange and pauses, it is time for you to send your information back to her, so send it without hesitation. After you transmit, she may ask for fills. For example, on CW she may ask for a repeat of your section by sending “sec?” or for your operating class by sending “class?” or “cl?,” which stands for “class.” On SSB, she will just ask you for it in words. In the crowded, fast pace of Field Day contacts, it is no shame to ask for fills more than once on either side. Remember, a valid contact in any major operating activity, including Field Day, is a full and complete exchange of required information between two stations. That’s the rule, so do not be afraid to ask for fills yourself. Otherwise, both your efforts are wasted. Only stop asking when you get his information or when he calls someone else — sometimes the band changes and he loses your signal at his location. He might also think it’s time to move on and make other contacts that are easier and quicker to complete. Sometimes the time and effort spent in trying to complete a partial contact simply aren’t worth the benefit. If so, just let it go and move on the next station.
No harm was intended if the other station moves on. In reality, in a major contest or noncontest activity like Field Day, stations do compile scores based primarily on the number of contacts made in a given amount of time. In Field Day, it’s not the score itself that matters. More importantly, the score represents a personal measure of how effective and efficient you and your station are in an emergency or adverse situation. Take solace in the fact that you both did your best at the time.
Try not to be disappointed too long if the station finally goes on to someone else. After

all, he wanted your contact in his log as much as you wanted his. It's no personal slight to you that the contact is incomplete. Instead, it should be a motivator to improve your operating habits and station capabilities for that emergency we hope never comes. Besides, the band may change in your favor later on and you can try again.

5. Receive the station's acknowledgment — When the other station receives your full information, he will acknowledge it by sending an "R," "X," "QSL" or "TU" on CW or saying the voice equivalent on SSB. That means the contact is complete. It's over. Log it and move on. Nothing further needs to be done except to give yourself a quick little pat on the back.
Occasionally, the other station might not acknowledge. He may say nothing and just resume calling CQ or answer another station. I call that "acknowledgement by default" with the default being that if he doesn't come back to you for more information, then he has got it all. It has come to be an acceptable practice more often than not, so don't be alarmed if the other station doesn't give you a fond farewell.
You get a better sense of when "acknowledgement by default" happens as you gain operating experience. Just wait a second and if he resumes operating with someone else or calls CQ, you're done. If he is not finished, believe me, he will let you know and continue to work with you until the contact is complete.
One variation in acknowledgement that confuses newer operators is to copy "NIL" on CW or hear "NO QSO" on SSB. "NIL" means "Not In Log." The other station is saying he tried his best but couldn't quite copy your full information and, therefore, will not include the contact in his log. If he says that, you cannot claim the partial contact as a valid contact either. When you hear either of these two responses, try again later when conditions may be better.
View "NIL" or "NO QSO" as a courtesy to you, not as a rude remark, since it helps improve the accuracy of your log and lets you both move on to other contacts. Rules are getting stricter regarding logging errors, with some organizations penalizing operators for submitting logs with large numbers of such errors. You don't want to find yourself in that situation.

6. End the Contact — Sometimes you will hear the station you just worked say "73" or "GL" (for good luck) or "Good luck and thank you from W…." The practice is more frequent now with programmable keyers and automatic voice devices. You may be tempted to respond the same way. Some view it as being courteous while others feel it just takes up time in which another station could make a call or contact. So if you feel the need to send one last thing, keep it short. The other station and those waiting to work him appreciate the brevity. Being brief also allows you to move on more quickly and work someone else.

Practicing With Actual On-air Messages

After explaining Field Day exchanges, I demonstrated, in real time, the exchange with several Field Day stations, both on CW and SSB. The two hams began to understand when and what was being said. After only a few minutes, they didn't need my prompting and assistance in copying Field Day exchanges. Then I had them tune around on their own, place signals in the receiver filter passband properly and copy messages through the clamor. As a last exercise, they operated independently and started making and logging contacts for themselves. I helped only when a station was talking or sending too fast or slipping away in a deep fade.

In summary, I was very pleased with the process and with the skills and confidence these two hams demonstrated following the training session. I enjoyed seeing them both quickly

become enthusiastic and even competitive on the air. Other clubs and individuals may wish to use similar exercises to train their newer operators so that they too can make successful Field Day contacts in the midst of all that beautiful “noise.” They might even get hooked on it, as I did, and join the fray with you for years to come.

http://www.qsl.net/wg4y/

Hi,
My name is Rebekah and my callsign is WG4Y. I am eleven years old and am an amateur extra class radio operator. I got my technician license in July of 2001 when I was eight. My first callsign was KG4OPC (Kangaroos Go 4 Odd Purple Cows). It took me a year to upgrade to extra, but I finally made it.
I love talking on the radio and had been hoping to make DXCC before I turned 10. I didn't make it, but I did at least work DXCC while I was still 9. I finally got my DXCC in August of 2003 at ten years old. Thanks to all of those who have returned qsl cards so quickly. I have worked over 150 countries. I am currently working on my 5 band DXCC, I have a feeling that is going to take longer than the first one though. :0)

My dad (NN4C) was the one who got me interested in ham radio. My mommy (WN4C) got her first license on the same day that I did. I was actually the one who got her interested. That makes me her Elmer. I have two older brothers and an older sister. Only my older sister, Christal, is licensed though. Her call is KG4WYN.

I am a member of the Birmingham DX Club and the Birmingham Amateur Radio Club (BARC). I am also the net control for the BARC Kid's Net. If there are any kids in the Birmingham area that would like to check-in, the kid's net meets on 146.880 at 7:00pm on Monday nights.

I was appointed to a new position in January 2004. I am now the ARRL Alabama Assistant Section Manager for Youth Activities. I am excited about this position. I am hoping to get more kids involved in amateur radio. Not only do I try to involve kids with my kid’s net, but I will also be holding youth forums at some of the hamfests coming up in Alabama this year. I have helped out with demonstrations for the scouts and tell everyone who will listen how much fun amateur radio is. I would also love to hear any suggestions on other ways to involve kids in amateur radio.

I have discovered some very good books for kids involving amateur radio this year. A good book for the younger kids is "Radio Rescue" by Lynne Barasch. This book was written about her dad, Bob Marx, who was licensed in 1923 at the age of ten. I have had a chance to communicate with both Mrs. Barasch and Mr. Marx and they are both very sweet people. I have also been fortunate enough to communicate with another author who writes stories about amateur radio. Her name is Cynthia Wall and her books are great for all ages. She has several books that she has written. Her most current books are "Night Signals", "A Spark to the Past", "Easy Target", "Disappearing Act", and "Hostage in the Woods". "Night Signals" has even been translated into Thai. She was kind enough to send me a copy of it, which I will always treasure even if I can’t read it. :0) She also wrote one called "Firewatch!", but it is out of print.

My other hobbies include reading, writing, painting, chess, ballet, photography, football, singing in the choir, collecting stamps and qsl cards, of course.
I hope to talk to you on the air soon!
73, Rebekah

http://www.qrz.com/db/kg4opc

Hi, my name is Rebekah and I am sixteen years old. I got my technician license in July of 2001 when I was eight. My first callsign was KG4OPC (Kangaroos Go 4 Odd Purple Cows). It took me a year to upgrade to extra, but I finally made it. :-) I love talking on the radio and have finally confirmed 110 entities. I finally got my DXCC certificate in August of 2003, now I have to work on 5 band DXCC. :-) Thanks to all of those who have returned qsl cards so quickly. I have worked over 150 countries, if only I can get them all confirmed now. :-)

My dad (NN4C) was the one who got me interested in ham radio. My mommy (WN4C) got her first license on the same day that I did. I was actually the one who got her interested, so I am her elmer. I have two older brothers (Jeffery and Joey) and an older sister (Christal). My sister's callsign is KG4WYN.

I am a member of the Birmingham DX Club and the president of the Perry County Amateur Radio Club.

I also have a new appointment that I am very excited about. I am the ARRL Assistant Director for the Southeastern Division, working with Greg Sarratt, W4OZK. I served as the ARRL AL ASM for Youth Activities for 4 years with him.

My other hobbies include reading, writing, painting, chess, ballet, photography, collecting stamps, drama, volleyball and singing in the choir.

I would like to go on a dxpedition some time. I think it would be a lot of fun.

Check out my website at http://www.qsl.net/wg4y/.

I hope to talk to you on the air soon! :-) 73, Rebekah

A nice collection of Photos and News Stories with Mikaila made into a Slideshow with some really cool music we found. Thank you each and everyone for visiting Mikaila's YouTube Channel for those in Central Florida that is interested, Mikaila will be helping to teach a Amateur Radio where testing will be offered for whom ever would likw to get their Amateur Tech License. Free Classes will be held at Civil Air Patrol #259 in Orlando on July 9, 2011, July 16, 2011 and August 13, 2011 Starting at 1pm. Must Pre-Register by sending to EMail HamClasses@NoWireHams.Com for registration. Don't be afraid to leave a comment, I like to hear what you think!

2911. DUF

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-06-22 01:56:51 UTC
From: hendro s.joedho
Topic: 2911 Message: 2911

OM,
Mau tanya - apakah DUF award yg dari REF - Perancis masih ada, masih diterbitkan.

Saya dapat info dari REF, yg memberitahukan alamat email penanggungjawabnya - tapi setelah saya kirim email ke ybs -> no reply at all

Apakah ada rekan yang tahu kemana/ke siapa bisa didapatkan informasi utk klaim award DUF ini.

thanks,
hen-yc0qr

SB DX @ ARL $ARLD025
ARLD025 DX news

ZCZC AE25
QST de W1AW
DX Bulletin 25 ARLD025
From ARRL Headquarters
Newington CT June 21, 2012
To all radio amateurs

SB DX ARL ARLD025
ARLD025 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Members of the Nicosia Amateur Radio Club will be QRV as C4MG from Agios Georgios Island, IOTA AS-120, on June 23 and 24. Activity will be on 80 to 6 meters, with three stations, using mostly SSB with some CW. QSL via 5B4KH.

MAURITANIA, 5T. Jean is QRV as 5T0JL and usually can be found on 15 meters using CW around 2200z. QSL via ON8RA.

MALTA, 9H. Jeff, N6GQ is QRV as 9H3ZZ until June 29. QSL to home call.

SOUTH COOK ISLANDS, E5. Murray, ZL1MGA is QRV as E51MGA and has been active on 20 meters using SSB. His length of stay is unknown. QSL to home call.

SCOTLAND, GM. Paul, 2E1EUB will be QRV as 2M1EUB from June 26 to July 9. Activity will be on 160 and 80 meters, 2 meters SSB and on Satellite AO-7. QSL via operator's instructions.

HAITI, HH. Chris, W3CMP is QRV as HH4/W3CMP until June 29. Activity is primarily on 6 and 2 meters, with some possible activity on 20 meters as well. QSL to home call.

JAPAN, JA. Operators Kan, JE1SCF and Yoshi, JG4IQC will be QRV as homecalls/6 from the Daito Islands, IOTA AS-047, from June 27 to July 2. Activity will be on 40 to 10 meters using mainly CW. QSL to home calls.

AMERICAN SAMOA, KH8. Operators Yuri, N3QQ and Dick, N7RO will be QRV as either KH8PPG or KH8RRC from Pago-Pago, IOTA OC-045, from

June 27 to July 3. Activity will be on the HF bands using CW, SSB and RTTY with two stations. The callsigns may change in the middle of the operation. QSL via operators' instructions.

LITHUANIA, LY. Special event station LY200NB is QRV until June 30 in commemoration of the 200th anniversary of the Napoleon Army crossing the Nemunas River in Kaunas. QSL via LY5W.

ARUBA, P4. Herman, ON4QX is QRV as P4/ON4QX until July 2. Activity is on all bands using mostly RTTY. QSL to home call.

SWEDEN, SM. Bernd, DL8AAV is QRV as SD1B/6 from Orust Island, IOTA EU-043, until June 30. Activity is on or near the usual IOTA frequencies. QSL to home call.

VIET NAM, XV. Andy, P29CS is QRV as XV3C for the next few weeks while on work assignment. Activity is in his spare time on the HF bands. QSL via M0URX.

SERBIA, YU. Operators Milan, YU5CW, Miso, YU1GU, Miro, YT1UM and Mirko, YU3MMM will be QRV as homecalls/p from the Special Nature Reserve Obedska Bara on June 23 and 24. Activity will be on the HF bands. QSL via the bureau.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Central African Republic, TL8ES, 2011 operation; Chad, TT8ES, 2012 operation.

THIS WEEKEND ON THE RADIO. ARRL Field Day, His Majesty King of Spain SSB Contest, Ukrainian DX DIGI Contest and Marconi Memorial HF CW Contest are all on tap for this weekend. The CWops Mini-CWT CW Test and SKCC CW Sprint are scheduled for June 27. Please see June QST, page 79, and the ARRL and WA7BNM Contest Web Sites for details.

Degree from the French speaking world
Wednesday, February 18, 2009 4:11 p.m. f5len
Departure Date 1 April 1946. For some countries this is no longer valid (before ...) or started (after ...) on the date indicated in the list of countries DUF. This diploma can be obtained by any station of the French-speaking or foreign Official licensed amateur and SWL in the same conditions. The DUF consists of four parts, allotted according to the following provisions: * DUF, Part 1, letter D in blue: justify an affair with five different countries including 3 continents , * DUF, Part 2, letter G in white: justify an affair with eight different countries with 4 continents * DUF, third party, red letter F: justify an affair with 10 different countries including 5 continents * DUF, Part 4 Educational Special: justify an affair with 20 different countries including six continents. The first three parts are the DUF of honor and the fourth part is the DUF excellence.the special diploma holders can apply for the medal of DUF, has hit the code
holder and bearing the number of award of diploma. In all cases, the evidence must necessarily be submitted with the application and indicate clearly the country of station.

Subject: [YBDXC_News] DUF

OM,
Mau tanya - apakah DUF award yg dari REF - Perancis masih ada, masih diterbitkan.

Saya dapat info dari REF, yg memberitahukan alamat email penanggungjawabnya - tapi setelah saya kirim email ke ybs -> no reply at all

Apakah ada rekan yang tahu kemana/ke siapa bisa didapatkan informasi utk klaim award DUF ini.

thanks,
hen-yc0qr

General Rules
The following general rules and conditions apply to all certificates and awards issued by the REF-Union and should be read in conjunction with the conditions which govern the award of individual certificates.
* All REF-Union certificates and awards will be issued to transmitting and/or SWL stations.
* In agreement with the I.A.R.U. Region 1 rules, each claim must be accompanied by a QSO list and by a statement from the applicant's national DX-AWARD-MANAGER that correctly filled in QSL's are really in possession of the applicant. If it's not possible the applicant must submit all the QSL's concerned
* In the case of any dispute concerning a claim the decision of the council of the REF-Union shall be final.
REQUIREMENTS :
1- DDFM : " Diplôme des Départements Français de la Métropole "

May be claimed for having contacted (heard) and received QSL cards from French amateur stations. Contacts must be done either on HF, VHF, or mobile operation and either CW, Phone, Mixed or special requirements.
On HF : 40 different departments are required.
On VHF : 20 different departments are required.
Endorsements possible in increments of 10 departments. A special sticker " Excellence " will be delivered for all 96 departments contacted.
2- DPF : " Diplôme des Provinces Françaises "

May be claimed for having contacted (heard) and received QSL cards from French amateur stations.
Modes : CW or phone or mixed.
On HF : All 22 provinces are required.
On VHF : Only 16 provinces are required.
3- 5BDDFM : " Diplôme des Départements Français de la Métropole sur 5 Bandes "

Same general conditions as for the DDFM, but using only 5 HF bands until 30 Mhz or 5 VHF bands from 30 Mhz.
On HF, a total of 300 QSL cards with at least 10 different departments per band are required.
On VHF, a total of 250 QSL cards with at least 5 different departments per band are required
Endorsements possible in increments of 10 departments. A special sticker " Excellence " will be delivered for all 96 departments contacted.
4- 5BDPF : " Diplôme des Provinces Françaises sur 5 bandes "
Same general conditions as for DPF, but using only 5 HF bands until 30 Mhz or 5 VHF bands from 30 Mhz.
On HF and VHF, a total of 110 QSL cards (22 per band) are required.

Degree from the French speaking world
Wednesday, February 18, 2009 4:11 p.m. f5len
Departure Date 1 April 1946. For some countries this is no longer valid (before ...) or started (after ...) on the date indicated in the list of countries DUF. This diploma can be obtained by any station of the French-speaking or foreign Official licensed amateur and SWL in the same conditions. The DUF consists of four parts, allotted according to the following provisions: * DUF, Part 1, letter D in blue: justify an affair with five different countries including 3 continents , * DUF, Part 2, letter G in white: justify an affair with eight different countries with 4 continents * DUF, third party, red letter F: justify an affair with 10 different countries including 5 continents * DUF, Part 4 Educational Special: justify an affair with 20 different countries including six continents. The first three parts are the DUF of honor and the fourth part is the DUF excellence.the special diploma holders can apply for the medal of DUF, has hit the code
holder and bearing the number of award of diploma. In all cases, the evidence must necessarily be submitted with the application and indicate clearly the country of station.

OM Busan,
Terima kasih infonya, tapi saya belum menemukan kemana aplikasi harus dikirimkan - apalagi QSL cardnya harus dilampirkan bersama form aplikasinya. Kalau sampai hilang - bisa bikin stress dan berhenti jadi amatir radio. ;-(

Oh, sorry di email OM Busan berikutnya ternyata sudah ada info baru termasuk award fee-nya.

Berarti cukup GCR list tanpa QSL card yang dikirim kesana dan GCR (plus QSL card) perlu diverifikasi oleh OM Yoyo (YB0ECT), begitu khan OM ?

Email sebelumnya yg saya peroleh dari sono menyebutkan bahwa utk DUF manajernya adalah F5IL-Jean Claude - f5il@... tapi saya coba korespondensi dulu tapi gak ada jawaban.

73 es tnx

OM Busan,
Terima kasih infonya, tapi saya belum menemukan kemana aplikasi harus dikirimkan - apalagi QSL cardnya harus dilampirkan bersama form aplikasinya. Kalau sampai hilang - bisa bikin stress dan berhenti jadi amatir radio. ;-(

Oh, sorry di email OM Busan berikutnya ternyata sudah ada info baru termasuk award fee-nya.

Berarti cukup GCR list tanpa QSL card yang dikirim kesana dan GCR (plus QSL card) perlu diverifikasi oleh OM Yoyo (YB0ECT), begitu khan OM ?

Email sebelumnya yg saya peroleh dari sono menyebutkan bahwa utk DUF manajernya adalah F5IL-Jean Claude - f5il@ref-union.org tapi saya coba korespondensi dulu tapi gak ada jawaban.

beberapa waktu yg lalu saya kirim copy-scan qsl card sy ke Om Hans YB2DX
sebagai syarat tuk menjadi anggota,
tapi sampai sekarang belum ada tanggapan, apa perlu sy kirim aslinya???
memang hasilnya agak kotor karena pernah kena banjir, seperti yg di upload
Om Nur YB8EL pd akun FBnya
demikian penyampaian saya, kiranya mendapat tanggapan, sebelumnya sy
ucapkan terima kasih.

OM Uun,
Sekarang ada format standard GCR gak dari ORARI, kalo dulu sih ada, lalu alamatnya apakah masih sama, yaitu dikirim ke :

-> REF-Union,
Service des Diplomes, 32 Rue de Suede, B.P. 77429, F-37074 Tours Cedex 2, France.

Ada perbedaan nomor BP yg satu 77429, sedangkan yg satunya 7429, kelebihan angka 7 atau memang ada perubahan.

OM,
Mau tanya - apakah DUF award yg dari REF - Perancis masih ada, masih diterbitkan.

Saya dapat info dari REF, yg memberitahukan alamat email penanggungjawabnya - tapi setelah saya kirim email ke ybs -> no reply at all

Apakah ada rekan yang tahu kemana/ke siapa bisa didapatkan informasi utk klaim award DUF ini.

thanks,
hen-yc0qr

OM Hendro,
Kalau saya tiap kali klaim award selalu buat GCR sendiri. Waktu klaim DUF dulu saya alamatnya berdasarkan yg ada di buku Award Directory, disana tertulis 7429, dan ternyata award nya datang...

OM Uun,
Sekarang ada format standard GCR gak dari ORARI, kalo dulu sih ada, lalu alamatnya apakah masih sama, yaitu dikirim ke :

-> REF-Union,
Service des Diplomes, 32 Rue de Suede, B.P. 77429, F-37074 Tours Cedex 2, France.

Ada perbedaan nomor BP yg satu 77429, sedangkan yg satunya 7429, kelebihan angka 7 atau memang ada perubahan.

OM Busan,
Terima kasih infonya, tapi saya belum menemukan kemana aplikasi harus dikirimkan - apalagi QSL cardnya harus dilampirkan bersama form aplikasinya. Kalau sampai hilang - bisa bikin stress dan berhenti jadi amatir radio. ;-(

Oh, sorry di email OM Busan berikutnya ternyata sudah ada info baru termasuk award fee-nya.

Berarti cukup GCR list tanpa QSL card yang dikirim kesana dan GCR (plus QSL card) perlu diverifikasi oleh OM Yoyo (YB0ECT), begitu khan OM ?

Email sebelumnya yg saya peroleh dari sono menyebutkan bahwa utk DUF manajernya adalah F5IL-Jean Claude - f5il@ref-union.org tapi saya coba korespondensi dulu tapi gak ada jawaban.

SB PROP @ ARL $ARLP025
ARLP025 Propagation de K7RA

ZCZC AP26
QST de W1AW
Propagation Forecast Bulletin 25 ARLP025
From Tad Cook, K7RA
Seattle, WA June 22, 2012
To all radio amateurs

SB PROP ARL ARLP025
ARLP025 Propagation de K7RA

Sunspot numbers seemed to be in a free-fall this week. Average daily sunspot numbers declined over 29 points to 87. Average daily solar flux fell 6.2 points to 126.2. (We erred in last week's bulletin when we said the average daily solar flux for the week of June 7-13 was 115.9. It was really 132.4).

The outlook for Field Day weekend, June 22-23, is for low sunspot numbers and quiet geomagnetic conditions. The progression of daily sunspot numbers in the past five days (June 17-21) was 96, 66, 64, 29 and 13.

Predicted daily solar flux is just 95 for June 22-29, 125 on June 30 through July 7, then 130, 135, and 140 on July 8-10, then 145 on July 11-12.

Predicted planetary A index is 5 on June 21-29, then 8 on June 30, 15 on July 1-3, 8 on July 4-5, 5 on July 6-7, 8 on July 8-9, and 5 on July 10-14.

The solar flux forecast improved slightly from June 20-21. On June 20, a flux value of 90 was predicted for June 21-28. Then the next day, June 21, the predicted solar flux was changed to 95, predicted for June 22-29.

The sunspot number at 13 on June 21 was the lowest since August 15, 2011. On the same day the solar flux dropped to 98, the lowest value since April 13, 2012, ten weeks ago today.

OK1MGW sent a geomagnetic forecast for July 22 to July 9, 2012. Mostly quiet, June 22-23, quiet to unsettled, June 24-29, quiet to active June 30, active on July 1-3, quiet to unsettled July 4-7, and quiet to active on July 8-9.

Last week two more solar videos accompanied by dramatic music appeared at http://www.universetoday.com/95831/sun-spews-earth-directed-flares/.

Also check http://space.brevardtimes.com/2012/06/giant-sunspot-fires-two-solar-flares.html and http://www.dailydisruption.com/2012/06/giant-sunspot-fires-two-solar-flares-toward-earth/.

It is also interesting to see how tabloids in the UK present science articles: http://www.dailymail.co.uk/sciencetech/article-2161626/.

And last, http://revmodo.com/2012/06/20/sun-spot-activity-unleashes-solar-flares-geomagnetic-storms-and-stunning-northern-lights/.

Jim Williams, K5NN of Wichita, Kansas wrote in response to last week's bulletin: "Some of the comments on the 1950's 10 meter propagation were interesting. I was first licensed as a teenager in 1952. My first equipment was a Command receiver/transmitter so I could only get on 80/40 meter CW. In 1953 I built a 6L6 Heising modulated rig that could run 6 watts on 10 meters. I was using a borrowed Hallicrafters S20R receiver with a pre-amp. The antenna was a ground plane made out of military surplus steel rod.

"I worked the world! I forget my country total but it was well over 100 by the time I graduated from high school and joined the Air Force. I was not able to return to ham radio till the mid 60s and 10 meters was still very good then. At that time I was able to run many scheduled phone patches from Antarctica and the Military installations in the Pacific on 10 meters into West Texas and New Mexico."

The Command set that K5NN mentioned refers to a huge number of radios available on the surplus market for next to nothing after World War II. With a little modification these could be put on the air, and if you look in old copies of QST and especially (if I recall correctly) CQ magazine in the 40s and 50s, there were many conversion articles based around these radios. I even recall seeing one which converted a command set transmitter to SSB, which involved gutting the unit and using a few key components.

An article on these radios, with nice photos at the bottom is at http://en.wikipedia.org/wiki/AN/ARC-5. A unique image is at http://aafradio.org/flightdeck/arc5-1.htm and another is at http://www.iarc.org/~4z5to/arc.php.

Also check this photo at http://radios4fun.net/index.php?p=1_26_St-Julians-Massacre which I think might be of surplus radios ready to be dumped in the ocean after WWII. There were just too many to haul back to the United States. At this same site, check http://radios4fun.net/index.php for many more photos of military radios from that era.

Rob Gregory, KD7H wrote about Fidalgo Island, mentioned in last week's bulletin. Actually I noticed that W7LTQ is in Anacortes, Washington, which is separated from the mainland by a very narrow channel. When you drive there, it is not obvious that you are on an island.

KD7H wrote: "I am a big IOTA fan and I wanted to give you a correction, regarding W7LTQ's QTH. Fidalgo hasn't qualified as being part of IOTA NA-065 for quite some time because it doesn't meet the 'distance from shore' requirement (it's too close to the mainland, of course). The same holds true for Anderson, Camano, Fox, and McNeil islands.

"Regarding propagation, this past week I couldn't get to sleep so I was on HF between 1 and 2am, and was very surprised to be able to work into Europe, including the UK, on 20 and 17 meters (both CW and SSB) and the ZL/VK/JA areas were coming through at the same time. I was running about 400 watts, but only using a G5RV up about 30 feet in fir trees alongside the house. Oddly, during the daylight hours the bands seemed pretty dead in my neighborhood. However, yesterday, Friday, June 15, OD5NJ had quite an amazing signal on 17 meter CW in the late afternoon and it was well past dark at his house. If I can hear good DX on my wire then I can determine that the bands are open - HI! At our latitude, that hasn't happened much since last October. Thankfully, the DX gods smiled when I worked 3C0E, 7O6T, 9N7MD, and A5A (being retired with tons of time helps, too)."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 14 through 20 were 114, 113, 110, 96, 66, 64, and 46, with a mean of 87. 10.7 cm flux was 148.6, 144.9, 134.5, 124, 118, 109.9 and 103.7, with a mean of 126.2. Estimated planetary A indices were 4, 4, 19, 39, 15, 3, and 4, with a mean of 12.6. Estimated mid-latitude A indices were 4, 4, 19, 36, 13, 5, and 4, with a mean of 12.1.

23 June 2012 A.R.I. DX Bulletin

No 1103

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

5B - A team of nine operators from the Nicosia Amateur Radio Club will be active as C4MG from Agios Georgios (AS-120) on 23-24 June. They hope to be on the air by 6 UTC on Saturday and operate through Sunday at 14 UTC with three stations. Look for them on 80-10 metres SSB plus some CW, and on 6 metres. QSL via 5B4KH. [TNX 5B4AHJ]

9A - Feri, HA4BF will be active holiday style as 9A/HA4BF/p from Vir Island (EU-170) on 8-21 July. He will operate SSB only. QSL to home call (direct), LoTW and e QSL. [TNX rsgbiota.org]

E5_sc - Once again Andy, AB7FS will be active holiday style as E51AND from Rarotonga (OC-013), South Cooks between 2 July and 25 August. Usually he operates straight key slow CW and also he oftens check into the ANZA net (05.15 UTC on 14183 kHz). QSL via AB7FS.

F - The Association des RadioAmateurs de la Cote d'Emeraude (F4KIR) will operate special event station TM0TSR from Saint-Malo on 2-8 July for the Tall Ship Race 2012. QSL via F4FJH.

F - F5SKJ, F6FAI, F4EJW, F4ELJ, F0GWK and F0GXK will be active as TM9LF from the lighthouse on Ile Noire, in the Bay of Morlaix, on 21-22 July. QSL via F0GWK (bureau only) and eQSL. [TNX F4ELJ]

FP - Mike, VE2XB will be active as FP/VE2XB from St. Pierre et Miquelon (NA-032) on 10-20 August. He will operate SSB and CW on all bands, with a special effort on 6 metres. QSL via home call, direct or bureau. Further information at http://fp-ve2xb.jimdo.com/ [TNX VE2XB]

GM - GM0EGI, GM0ELP, GM0LIR, GM0OQV, GM4ZNC, MM0BQI and MM0GPZ will be active as GB5SI from the Shiant Islands (EU-112) on 15-22 July. They will operate CW, SSB and RTTY on 80-6 metres. QSL via MM0BQI and LoTW. [TNX NG3K]

GU - A group of operators from the Hamtests Club will be active as MU0HTJ from Guernsey (EU-114) on 26-31 July, including an entry in the IOTA Contest. QSL via 2E0SQL. [TNX rsgbiota.org]

I - Simon, IZ7ATN reports he will be active as IZ7ATN/p from Scoglio Portonuovo di Fuori (not IOTA, IIA FG-015) on 22-23 June.

IS0 - Claudio, IZ0KRC will be active holiday style as IS0/IZ0KRC from the main island of Sardinia (EU-024) from 23 June to 15 July. He will operate SSB, CW and digital modes on the HF bands and 6

metres. QSL via home call, bureau preferred. [TNX rsgbiota.org]

KH8 - Dick, N7RO and Yuri, N3QQ [425DXN 1099] will be active as KH8PPG and/or KH8RRC from Tutuila (OC-045), American Samoa from 27 June to 3 July. They will operate CW, SSB and RTTY on 40-10 metres with two stations. QSL via N7RO. [TNX DX World]

KP4 - Special event station K4O will be active on 30 June and 1 July from the headquarters of the Puerto Rico Olympic Committe in San Juan to celebrate the Flag Bearing of the Puerto Rico delegation to the Olympic Games in London. QSL via NP3O. [TNX OPDX Bulletin]

LA - Glenn, LA8XRA and Trond, LA9VDA will be active as LA6Q from Jonsholmen Island (EU-079) on 10-13 August and from Sandoya (EU-056) on 13-17 August. They will operate CW, SSB and RTTY on 80-10 metres. QSL via LA9VDA, direct or bureau (email requests for bureau cards can be sent to la9vda[@]gmail.com). [TNX LA9VDA]

OZ - Ric, DL2VFR will be active as OZ0FR/p from Vendsyssel-Thy (EU-171) on 7-20 July. He will operate mostly CW. QSL via DL2VFR, direct or bureau. [TNX rsgbiota.org]

TY - Pat, LA0HF will be active again as TY2BP from Cotonou, Benin starting on 28 June. He plans to be QRV on 20, 15 and 10 metres. QSL via IK1IQD. [TNX IK2IQD]

VE - Look for KC0VEU/VY0 to be active in his spare time from Eureka, Ellesmere Island (NA-008) between 22 June and 5 July. He recently passed his Extra class exam and is expecting a new call sign in the AD0 block, but will still sign /VY0. He might also try to be QRV from the Polar Environment Atmospheric Research Laboratory, located in the rare ER grid (ER60) for those who chase the CQ Grid Fields Award, and the rare ITU Zone 75. QSLvia home call, direct or bureau. [TNX WC6DX]

VP2M - Gordon, G3USR will be active as VP2MSR from Montserrat (NA-103) from 29 June to 9 July. He plans to concentrate on 20-6 metres, SSB only. QSL via G3USR, direct only.

W - The following stations will be active during the "Original 13 Colonies Special Event", which will be held on 1-5 July: K2A (New York), K2B (Virginia), K2C (Rhode Island), K2D (Connecticut), K2E (Delaware), K2F (Maryland), K2G (Georgia), K2H (Massachusetts), K2I (New Jersey), K2J (North Carolina), K2K (New Hampshire), K2L (South Carolina) and K2M (Pennsylvania). Further information on the event and the relevant certificate can be found at www.13colonies.info

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

DXCC NEWS ---> TL8ES (Central African Republic, 2011 operation) and TT8ES (Chad, 2012 operation have been approved for DXCC credit. [TNX NC1L]

HEARD ISLAND 2014 ---> The initial operators for the 2014 expedition to Heard Island (www.heardisland.org) include KK6EK, ON6TT, DL1MGB, N6MZ, DJ9ZB, NP4IW, AD6E, N4GRN, DJ5IW, N6PSE, W3WL, W0GJ and AA7XT. The next round of team members will be announced on 15 August.
IOTA EU-117 & EU-133 GROUPS ---> This is an abridged version of the official announcement dated 16 June that can be found on the RSGB IOTA's website.
Following the decision by the ARRL to delete Malyy Vysotskiy Island (MVI) from the current DXCC list as of 17 February 2012, the IOTA Committee has considered action to be taken with regard to the future of EU-117. A consultation conducted by an enlarged IOTA management group produced a clear majority in favour of splitting EU-133 to form two groups within the Gulf of Finland, North and South. The dividing line has been set at 60 degrees, 15 minutes north. The islands now constituting the two groups can be seen via the Search facility on www.rsgbiota.org. The change has an effective date backdated to 17 February 2012. Past credits for MVI will continue to stand and new opportunities are created for contacting EU-117. Record-holders need take no action regarding existing credits as they will not be deleted as a consequence of this change, nor in the case of EU-133 credits need they be transferred unless requested.

OH10X/MM ---> Kristina Cruises Ltd with Radio Arcala, OH8X of Finland, are in the process of testing whether a permanent Amateur Radio station will suit the maritime environment and serve DXers in their leisure time, whether cruising in the Mediterranean or off West Africa or just doing island-hopping in the Caribbean.
The onboard station will be active at the peak propagation hours to various continents on 14267 kHz on 20-24 June. The test cruise will take the ship to Estonia (ES), Gotland, Sweden (SM1), Aland Islands (OH0), and back to Finland. The objective for the first run is to look at potential interference issues both ways - from the Amateur Radio station to the ship's navigation system and from the ship's advanced PC networks to the reception of Amateur Radio transmissions.

YASME AWARDS ---> The Yasme Foundation has for many years offered two Yasme Awards, available at no cost to qualifying applicants. The first Yasme Award, in the form of a handsome plaque, is offered to those amateurs who submit proof of 30 QSOs with Yasme officials and DXpeditions that have at least one Yasme official as a participant. The second, the Yasme Supreme Award, is in the form of a representation of the YASME boat used by Danny Weil in his around-the-world DXpedition and is available to those who submit proof of 60 QSOs with Yasme officials and DXpeditions with a Yasme official as a participant.
After a year-long evaluation of the rules for qualifying call signs, the Board of Directors is pleased to announce that the rules for qualifying call signs have been revised. As a result, many call signs have been added to the list. The revised list of call signs eligible for both awards is available at http://www.yasme.org/DXpeditions.html

+ SILENT KEYS + Sayed Abdel Samei (SU1SA) passed away on 13 June. He was the President of the Egyptian Radio Amateurs Society for Development (ERASD) and succeeded SU1GS, who died in January.

Vertical Antennas, Ad Hype and Technobabble
(A Self-defense Primer for the Beginner)

By Donald R. Newcomb W0DN

If you're still waiting for your first ham ticket you'll soon be putting together your first station and looking for an antenna system for the bands on which you can operate; if you've been at it for a while you probably have a clearer idea of what it's all about. In either case, at some point you'll get around to choosing a new antenna system and, like everything else in this world you'll learn (perhaps the hard way) that some antennas are better than others for some purposes. You'll also find that some models are vastly overrated and cost more than competing models that deliver superior performance. This is true of so many other things in our daily lives that it should come as no surprise.

Unfortunately or otherwise, amateur radio is a technical hobby, and many of the marvelous new devices in our ham shacks didn't exist only a few years ago. It's the rare individual who understands in detail the operation of all his equipment, and even many "old timers" don't have the specialized knowledge or test equipment (or patience) to troubleshoot their own gear. Antennas, however, are different in that their basic principles of operation have been known for well over
50 years. There have been very few "breakthroughs" in recent years (in spite of lavish multicolor ads shrieking a contrary message), and much of what passes for "innovative" amateur antenna design involves pouring old wine (or vinegar) into expensive new bottles. Indeed, there are very few amateur antennas in use on our HF bands that are NOT derived from the basic dipole of almost a century ago.
This is not to say that there haven't been interesting developments over the years, but the fundamentals haven't changed significantly. We might even say that antennas are relatively low tech passive devices, at least when we consider the relative complexity of the latest solid state multi band HF transceiver. On the other hand, the relative simplicity of antennas allows the beginner to become
reasonably familiar with the subject in a fairly short time and that is all to the good IF one can keep the fundamentals straight. That most amateurs seem to ignore them once they get on the air is something of a mystery, for there is no single
item of station equipment that will have a greater influence on your signal than your antenna system. If that is properly designed and adjusted and installed correctly your other equipment can function at maximum effectiveness; if your antenna system isn't doing the job the other gear may not do its job either.

So how does the beginner learn about the different antenna types and models? Usually, by word of mouth and from the ads in the ham magazines. Most manufacturers spend large sums of money to advertise their products, so it goes without saying that theirs are automatically the best buy or the most efficient models available anywhere, though the documentation provided may be nonexistent or even laughable. In theory at least, every magazine employs at least one "expert" to look at the ad copy submitted and to reject anything that's clearly fraudulent or simply off the wall, but some of it slips through from time to

time, even in those places where we wouldn't expect to see it. Magazines depend for their existence on advertising revenues, so we mustn't expect them to crack the whip too hard on major advertisers who stray over the line. The best defense against today's overblown antenna technobabble is a little basic knowledge of the

subject, but this can be acquired by anyone who's willing to devote a little time and thought to the matter.

In recent years several manufacturers have produced a “new” kind of vertical antenna for the ham bands, one that supposedly requires no ground or radial system at all. Other manufacturers have been claiming for years that their more conventional designs don't really require ground systems, and in a limited sense, they're right: a “cheap and dirty” ground rod will often be enough to allow a ground mounted vertical to accept power with reasonably low SWR and to radiate some of it if local ground conductivity is not too poor. Unfortunately, it's very
poor in most places, at least in the HF range, and most applied power will usually be lost as heat in the local real estate unless one is willing to run out a number of radial wires to improve the conductivity. The earth exerts a great effect on RF in the HF range, and one needs to know something about this effect before he decides which kind of antenna stands the best chance of doing what he wants it to do in the light of his particular circumstances.

In general, we can say that the effect of lossy earth on vertically polarized energy is to absorb most of it, as noted. Horizontally polarized RF, on the other hand is affected in a different way: only a few percent of the applied power will be lost in the earth itself, but the radiation from a horizontal dipole will be directed upwards at the higher elevation angles that are useless for long distance communication in the HF range unless the horizontal antenna is a half wavelength or so above the earth. In short, it's a trade-off between high earth losses for a vertical antenna and high wave angles for a low horizontal antenna. A vertical may be quite a bit less efficient than a horizontal if nothing is done to reduce earth losses, but most of its radiation will still go out at the lower angles with respect to the horizon regardless of its height above ground. The upshot is that even a “lossy” vertical
at ground level is often a more effective antenna for long-haul DX work than a full-size horizontal dipole which can't usually be placed high enough to provide much low angle radiation.

As an example of the kind of propaganda to which you can expect to be exposed we've prepared a simple little quiz borrowing here and there from some of the more startling claims and statements we've noted in recent antenna ads. If you're just getting started and don't have many answers don't feel too bad. A few hours spent reading the ARRL Antenna Book will help to put everything into perspective and to innoculate you against some of the more nonsensical notions that have found their way into print in recent years.

Mini Quiz on Vertical Antennas, Ground Systems and Loss

Q1 One manufacturer claims that it's possible to elevate the feed point of a 1/4-wave ground-mounted vertical, feed it as a loaded dipole and achieve efficiency approaching 90% with only three short radials or maybe none at all. This procedure, he assures us, virtually eliminates earth losses and increases the radiation resistance. What's wrong with this?

A1 What's wrong with this? Almost everything Earth loss (also known as plain old ground loss) has been the limiting factor in vertical antenna performance since the days of Marconi, and it still is. The earth, in effect, becomes part of the total antenna circuit because current applied to the antenna necessarily flows in and along the earth, and there's no way to keep that from happening. If the earth were a perfect conductor there would be nothing to worry about, for nothing would be lost. But even the bent earth is such a poor conductor at radio frequencies that most of your applied power will be lost in the earth as heat unless something is done to make the local earth more conductive.

Anyone who can come up with a simple and effective technique to reduce earth loss resistance will easily revolutionize antenna design for the HF amateur bands and commercial MW broadcasting, but at least one company that makes vertical antennas for the amateur bands claims to have achieved just such a breakthrough. Their technique is to break a 1/4 wave vertical radiator in the center in order to feed it as a kind of dipole, This "center launch technology, it is claimed, "virtually eliminates earth losses", AND, it is further claimed, also increases the antenna radiation resistance to approximately 50 ohms, whereas the "conventional" 1/4 wave base fed vertical has a radiation resistance of only 35 ohms. So then, higher radiation resistance plus very greatly reduced earth loss resistance must mean much higher efficiency, so why run out thousands of feet of wire for a radial system? Why indeed? The ARRL Antenna Book tells us that something like 100 half wave radials are needed to do away with significant earth less, but this thrilling new design supposedly gets 90% efficiency from the elevated feed point alone! Yes, this "radically different vertical" certainly "gets it all out!" Does it really?

The ARRL Antenna Book (16th edition) tells us that "a center fed antenna having an overall length of one quarter wavelength has a radiation resistance of 14 ohms" (page 2-43). That's quite a bit less than the center launch people claim for THEIR antenna of this description, so who is right? 14 ohms is less than HALF the radiation resistance of a "conventional" (base fed) vertical of the same size, "the most inefficient antenna available for amateur use," or so the center launchers assure us. But if ARRL is right, their antenna must be even more inefficient! They further claim that they get a near perfect match to 50 ohm cable, so if we know the total antenna feed point impedance (50 ohms) and the antenna radiation resistance (14 ohms) we simply divide the latter by the former to arrive at the overall efficiency of the antenna

So then, efficiency = radiation resistance divided by total feed point impedance, or 14/50 ohms in the case of the center fed quarter wave vertical. That's 28%, a far cry from the "approximately 90%" claimed!

If we can believe the ARRL Antenna Book about radiation resistance we still have to wonder where the remaining 36 ohms of the center launch feed point impedance comes from. What is not radiation resistance MUST be loss resistance of one kind or another! An antenna of this size constructed of tubing has negligible conductor loss, and any loading devices shouldn't account for more than a few ohms, so most or those 36 ohms must represent earth loss. It appears, therefore, that this exciting new "technology" is no more effective in reducing earth losses than it is in raising radiation resistance. That should come as no surprise to anyone who stops to think for a moment, for if we ask ourselves where earth losses reside and why they're called earth losses rather

than something else it’s obvious that they occur in, along and under the earth beneath the vertical radiator and not in the radiator itself.

For most of this century the classic technique for reducing or eliminating earth losses has been to lay out a number of radial wires on or slightly under the earth around the vertical antenna. If earth losses were present in the radiator and could be affected by changing the feed point we'd have had a totally different theory of vertical antennas for the last half century! If someone comes up with a new and better technique that really proves effective in reducing earth losses or improving radiation resistance the MW broadcasters will adopt it, dig up their huge copper wire radial systems to sell as scrap, and the last place we'll read about it will be in the ham antenna
ads!

Q2 A certain “no radial” 12 ft. “half wave” vertical supposedly achieves MAXIMUM efficiency through end loading and NEVER requires radials, counterpoises or ground planes because you don't have the kind of ground loss that’s common with a quarter-wave vertical. “Maximum efficiency,” presumably, means something approaching 100%, in which case earth and loading losses must be almost zero. How many doubtful or clearly false statements can you spot?

A2 Everything is doubtful. This little excerpt comes from an ad for a new entry on the “no-radial” vertical antenna scene, but it illustrates better than most some of the problems that confront the new amateur as he tries to make head or tail of what he sees in the antenna ads. This one is only 12 ft. tall, but it's supposedly a “half wave,” even on 40 meters. On 6 meters, however, it becomes an “efficient full half wave” that provides “low angle radiation for lots of DX.” What? Isn't it efficient and doesn't it provide
low-angle radiation for lots of DX on ALL bands? Let's stick with efficiency and run a few simple calculations using the information the ad provides. The information in the ARRL Antenna Book indicates that a center fed vertical of this size has a radiation resistance of a bit under 4 ohms on 40 meters, the same as for a mere “quarter wave” of the same height. SWR, we learn, is
1.5 at resonance, in which case the feed point impedance will be either 33.3 or 75 ohms. Let's put the best possible face on things and assume 33.3 ohms, or 4 ohms of radiation resistance and only 29.3 ohms of loss resistance, whether from loading or from earth losses. So then, efficiency
4/33.3 = 12%--not very impressive, but much better than for a 75-ohm feed point impedance which would mean the same 4 ohms of radiation resistance and 71 ohms of loss resistance, in which case E 4/75 = 5.3%, enough to turn your 100 watter into a dandy little flea-power rig!

It would appear that on 40, meters “maximum efficiency” for a center fed antenna of this type and size means something well under 15%, but then we should probably not expect manufacturers to spell everything out in too much detail! Nor should we demand daily miracles from something that can’t
reasonably be expected to deliver them, and it's up to the buyer to have enough knowledge to know which questions to ask and how to read between the lines in order to answer them for himself when the promotional information provided is sketchy, irrelevant, misleading or just wrong for whatever reason. The suggestion that no radials or ground planes are ever needed because earth losses are somehow less for this kind of antenna than for a quarter wave vertical is simply wrong, unless you're reconciled to losing most of your applied power before you even start. On the other hand, it's possible to argue that with

such low radiation resistance and/or massive loading losses the overall efficiency will be so low anyway that earth losses won't affect a basically hopeless situation. Whatever the ease, earth loss
has everything to do with the conductivity of the earth at the antenna site
and nothing at all to do with the antenna itself. Both the quarter-wave vertical
and a much shorter “half wave” will have to contend with the same amount of earth loss resistance in a given installation, but the no-radial antenna may be unable to deal with it because the addition of radials, even when space permits, can de-tune a “ground independent” antenna.

What does “ground independent” mean anyway? At most it can mean that an antenna is independent or the earth for its resonance; to say that it's independent of the earth insofar as losses and wave angle are concerned (at least in the HF range) is certainly untrue. Perhaps the eagerness of some manufacturers to use the term “half wave” to describe an antenna that is barely a quarter wavelength tall on ANY HF band represents a conscious attempt to persuade the buyer that he's getting “more,” though more of what (other than hype) is much less clear. Hype is a staple of the ad game, but its use in advertisements intended for technically literate customers indicates a basic contempt for their intelligence. Whatever the case, it certainly won't hurt you to know a bit more about antennas than you re likely to learn from the antenna ads! How long (or tall) is an antenna in terms of wavelength? Simply divide 468 by the
length (or height) in feet to find the frequency at which an antenna is an honest half-wavelength. A 12 ft. antenna, for example is a real half wave at 468/12, or at 39 mHz. And how long (tall) is an honest half wave for 7 mHz? Simple: divide 468 by the frequency in mHz to get the length (or height) in feet, so 468/7 = 88.87 feet. The
fundamentals are not at all hard to grasp, and they haven't changed
significantly in living memory, so when people who manufacture ham antennas play fast and loose with words, their meanings and even basic units of measure it's wise for us to examine their other claims more carefully.

In the case of other vertical antennas you'll be exposed to more subtle inducements to part with your change. How can you tell when someone's dancing around the facts or building you an expensive snow job? One indication is a reluctance to say much-- or anything--about earth losses or how to avoid them, particularly where “no radial” vertical’s are involved. Nor, probably, should we expect anyone to state flatly or even hint that his marvelous new creation may just have to swallow whatever earth losses it might encounter. Far safer to talk about the thrill of working DX and the joy of dispensing with unsightly radials, although avoiding radials is usually a good way to avoid DX. Another manufacturer even goes so far as to talk
about the “user friendly features” of his no-radial model, among which he lists “compact size” immediately after claiming “exceptional HALF WAVE performance,” as if the two characteristics were not fundamentally incompatible. Is this one a real half wave? It’s 22.5 ft tall, so it might look like one at 21 mHz (466/22.5) except for the fact that a large portion of the radiator is “trapped out” or loaded on that and all successively lower frequency bands so that the total amount of radiator used on any band is well short of a half wavelength or even a mere quarter wavelength. This same manufacturer produces a throughly conventional vertical (uses radials) that stands taller than his no radial “half wave” and sells for quite a bit less. That one, he tells us, is merely a quarter wave! One might suspect that the recent
tendency to label everything a “half wave” is an attempt to persuade the new ham that some great new operating experience awaits him when it almost certainly does not.

Q3 More than 100 l/2 wavelength radials under a quarter-wave vertical antenna at ground level will allow it to operate at over 90% efficiency and 15 1/8 wavelength radials will allow the same antenna to operate with an efficiency of about 50%. But with only two 1/8 wave radials (or none at all) the quarter wave will not operate much more efficiently than about 25%. A much shorter “half wave” vertical, however, will perform more efficiently without radials in the same situation because it's “ground independent.” True or false?

A3 The radial information is taken from the ARRL Antenna Book, so that much is true. The part about short “half waves” outperforming taller quarterwaves, however, is total nonsense, as is the notion that even real halfwaves are unaffected by--or “independent” of--the earth beneath them.

Q4 One manufacturer claims that a 60 radial system that reduces earth loss to only four ohms will destroy a vertical's multi band operation because a multi band vertical MUST have earth loss to work! That's why a multi band vertical mounted on your roof won't work all the bands. Is there anything here that we should believe?

A4 This statement is totally devoid of sense and so chock-full or error that we can only wonder what, if anything, it is supposed to mean. There are thousands, perhaps tens of thousands of multi band vertical antennas playing quite well on rooftops all over the world. And why must multi band vertical antennas have earth loss to work? Perhaps you'll come across this ad in full in your search for an antenna. If you can make head or tail of it please explain it to us.

Q5 If you can avoid using radials and still achieve low SWR you can be sure that your vertical antenna is operating efficiently because the lower the SWR the greater the efficiency, always. True or false?

A5 We've already seen in the discussion of Question 2 that there's absolutely no necessary connection between low SWR and high efficiency. Flip back to Question 2 and recalculate the efficiency when the feed point impedance is exactly 50 ohms rather than 33.3 ohms. Our radiation resistance stays at four ohms or so, so our new efficiency is 4/50 or only 8% even though the new SWR is 1:1--down from 12% when the SWR was l.5! On the other hand,
1.5 SWR with a feed point impedance of 75 ohms is even worse. What
matters is NOT the value of the feed point impedance and SWR but how much of the feed point impedance cones from loss resistance and how much from radiation resistance. Radiation resistance, unfortunately, depends on the size of the antenna and little else, and a short “stick” will remain a short stick with low radiation resistance, even when it's re-christened a “half wave.” If large values of earth loss resistance and/or loading resistance are required to raise the feed point impedance to the 50 ohm range for the sake of low SWR you've gained nothing. In short, low SWR all by itself tells us next to nothing about efficiency. If, however, we can look up the radiation
resistance for a vertical antenna of a known height from a standard reference text such as the ARRL Antenna Book we can use our SWR information to calculate the probable efficiency. No, the ads won't give you that
information (not the right information anyway) or invite you to figure it out for yourself, but anyone who has mastered 7th-grade math and is willing to learn a few basic principles can do it easily for himself.

It's the rare amateur who has the real estate, the time and the finances to install the PERFECT antenna system, so as a practical matter one usually has to make do with the

available resources, A 100 ft tower is more desirable than a 40 footer, and 100 long radials are better than four or five shorter radials run out wherever they will fit, but on the typical short-haul rag-chew contact on the HF bands the difference often won t be significant. The people who designed the more expensive “no radial” vertical certainly know about earth losses and that their creations at or near ground level can't perform as efficiently as a conventional vertical over even a modest radial system, but you can hardly expect them to put that into their expensive ads! There are relatively few situations where vertical polarization is desired and where one simply can't find the room for any short radials at all. Perhaps in such rare cases a no radial vertical may be the beginner's only salvation, but usually a little experimentation and study will yield the same or better results with less wear and tear on your bank account!

What is the smallest radial system one can use and still get low SWR on most HF bands? That's a difficult question to answer with any precision because the earth's natural conductivity can vary considerably from one location to the next. In parts of the Midwest a simple ground rod will often suffice, whether any radials are used or not. Sandy or rocky soil is usually the least conductive, so count on needing at least a few radials (each as long as possible) at ground level to reduce the SWR to an acceptable level. Radials need NOT be buried, so where there's no danger of tripping up pedestrians they may simply be left on the surface. Remember that the primary reason for putting down radials is to enhance surface conductivity, reduce earth losses and thus increase overall efficiency. Lower SWR is merely a bonus.

To recapitulate briefly, if you want to guesstimate the probable efficiency of a vertical antenna on any particular band first find out how much of the antenna is really used on that band. Trap models use only the portion of the vertical radiator BELOW the trap for that band. Once you have the length in feet you'll need to convert that length to electrical degrees in order to use the information in the ARRL Antenna Book. Suppose, for example, that the vertical portion beneath the 15 M trap is 9 ft. tall. A full quarter-wavelength for 21 mHz = 234/21, about 11 ft. or 90 electrical degrees, so 9 ft. must be less than 90 degrees. How much less? 11 ft is to 90 degrees as 9 ft. is to x, so we can that 90/11 = x/9, so x = 73.6 electrical degrees. Right? Next, we look up the radiation resistance for 73.6 electrical degrees in Chapter 2 (Antenna Fundamentals) of the ARRL Antenna Book and read 20 ohms, more or less. Kid stuff! Now that we have the radiation resistance to a fair approximation, all we need to know is the loss resistance that makes up the rest of the feed point impedance. That's the hard part, but if we have some reliable SWR information we can figure that out too, although we won’t be able to tell exactly how much is earth loss, how much is loading loss and so on. Put a little SWR indicator at the antenna feed point are run just enough power to get full scale deflection in the FORWARD position. If SWR reads 1:1 without any attempt at matching the line to the antenna you'll know that your 50 ohm impedance at resonance consists of 20 ohms of radiation resistance and some 30 ohms of loss resistance from whatever source or sources. To find overall efficiency simply divide the radiation resistance (20 ohms) by the total feed point impedance (50 ohms). In this case, we can see that our efficiency is 40%. That’s not enough? OK. Just run out more radials. When the SWR begins to change you'll know that the earth loss resistance is dropping and the efficiency is going up It's just that simple. Remember, however, that SWR might go UP as the efficiency improves.

Suppose, however, that our lowest SWR is no lower than 1.5 with 50 ohm line? All that means is that the feed point impedance is either 50/1.5 or 50 x 1.5, and we’re back to the situation we noted in the discussion of Question 2 where only the SWR information (1.5:1) was given. In that example, recall, feed point impedance was either 75 ohms or 33.3 ohms, and for a fixed value of radiation resistance the efficiency will depend on the loss resistance component of the feed point impedance.

If you've been able to follow this little discussion you’re well on your way to becoming your own antenna expert, even if you've had to go back and read some passages several times. With a little more study and experience you'll be able to hack your way through the thickets of technobabble that are designed more to confuse than explain. Above all, don't hesitate to question and challenge claims that make little sense or seem to contradict one another. Reputable manufacturers will usually be happy to restate their sales pitch in simpler terms whenever they see a chance to do so, and if someone is proposing to trade his (or her) hard-earned shekels for his wares they can't do anything less.

The ARRL Antenna Book will help you enormously, even if you have to read some sections several times, and for lighter (but no less serious) reading we suggest Kurt N. Sterba's AERIALS, a compilation of antenna articles from the pages of Wordradio, and well as OM Kurt's monthly column in that publication. Contact Worldradio, P.O. Box 189490, Sacramento, CA 95818.

Whither Vertical Antenna Design?
(Trap and Loading Coil Losses With Vertical Antennas)

By Donald R. Newcomb, W0DN

In an earlier piece we talked about earth losses and their baleful effect on vertical antenna performance. In spite of much nonsense to the contrary, the only way to avoid earth losses is to make the earth below and around a ground level installation far more conductive than it is normally. As a practical matter this entails installing a number of radial wires on or slightly under the earth. 120 such radials, each 1/28 long and more or less uniformly distributed are supposedly ideal. As you might imagine, as the radials are made shorter and less numerous earth losses increase and the system becomes less efficient. The ARRL Antenna Book (16th Edition) sums it up well enough:

“It has also been found that as the number of radials is reduced, the length required for optimum results with a particular number of radials also decreases; in other words, if only a small number of radials can be used, there is no point in extending them out l/28 . With 15 radials, for example, a length of 1/8 is sufficient. With as few as two radials the length is almost unimportant, but the efficiency or a 1/48 antenna with such a grounding system is only about 25% (It will be considerably lower with shorter antennas [Ch.3-36]).”

Note in particular the remark about antennas physically shorter than .25 8. Some of the popular no-radial vertical types are touted as electrical “half waves,” although the same manufacturer may produce an even taller quarter wave for the same bands. But how can a quarter wave be taller than a half wave? Easy! An electrical half wave is not necessarily the same as a physical half wave, and if you don't yet understand the difference it might a good idea to review some basic definitions. A physical wavelength in free space is always so many feet and inches and is never less than 964 feet divided by the frequency in mHz. A physical wavelength at 7 mHz is therefore 984/7=140.6 ft. and a mere half wave is only a little over 76 ft. An electrical half wave may be as tall as a physical half wave (70 ft.) or as short as anyone dares make it before the antenna stops radiating altogether. Know the difference! It's an unfortunate
fact of modern life that new amateurs look for enlightenment in the Newspeak of antenna ads and that some of the experts who review these for technical accuracy and misleading statements don’t blow the whistle loud enough to be heard by the advertising crew. Make it a point to insist on explanations for statements that don't seem to make sense or seem to contradict basic theory! If the manufacturer can oblige, fine. If not, seek elsewhere.
So much for earth losses and dimensions except to add that an antenna that is physically much shorter than .258 without any radial system at all will probably show so little radiation resistance that it will be a poor performer in most installations

At times we may have little choice. An antenna for 75 meter mobile work just can't be 60 ft. tall, so we load it seven ways from Sunday, accept the resulting low efficiency, and don't lose much sleep over it. But we expect somewhat better performance from a much

taller fixed antenna. And if we can run out a few good radials we may be able to do much better than the worst-case situation cited above. If we're using one of the “no-radial” so-called half waves we're probably out of luck because radials supposedly de-tune the antenna on some or all bands, in which case we’ll probably need some kind of expensive antenna tuner to deal with the higher SWR. At this point we have to start to worry about loading and trap losses, especially if we're already losing some 75% of our applied power to earth losses, so just what magnitude or additional loss are we talking about? It's hard to be precise, because of the wide variation
in materials and dimensions used in most trap and loading-coil construction, but at least one expert (G4ZU) has reckoned that each trap in one of the popular so-called “half wave” designs contributes 1.0 dB or so of loss resistance on the band for which it's designed. That may not sound like much, but let’s take that as a starting point and start tallying up all our lost dBs. Most trap coils are wound on small diameters and use fairly light wire (typically #12 or smaller). Worse, their diameter/length ratio is usually poor, larger coil diameters being preferred (see the ARRL Handbook for a more thorough discussion of trap Q in relation to loss). Most trap and loading coils used in commercial designs are long and skinny low-Q (typically 100 or less) affairs, so perhaps 1.0 dB of loss per trap is overly generous.

Most vertical antennas are physically shorter than .258 at the lowest operating frequency and use less than a quarter-wavelength of the available radiator on any band, the traps for the higher frequency bands acting as loading coils on all lower frequency bands. A 25-ft. radiator, for example uses only the lower 6 ft. or so of the antenna to produce radiated field on 10 meters while the rest of the antenna above the 10 meter trap goes along for the ride and contributes nothing. It might seem a bit wasteful to have most of the antenna waving about uselessly, but that's one of the prices that some of us are willing to pay for low SWR operation on more than a single band. The 10 meter trap acts as a loading coil on 12 meters, so we can’t use a full quarter wavelength or the radiator on that band either. This necessary shortening entails a slight reduction in the radiation resistance on that band, so the next trap (for 15 meters) has to be
inserted at an even lower point on the antenna in terms of wavelength. And so it goes, right down to the lowest frequency of operation on 80 meters where all seven (!) traps contribute both loss resistance and inductive reactance to the antenna circuit
even as the progressive radiator shortening necessitates a progressive decrease in radiation resistance. Remember, the only part of an antenna's feed point impedance that does us a bit of good is the radiation resistance, which is called a “resistance” at all only because that designation provides a convenient way to account for power “lost” as radiation instead of heat. All other components of the feed point impedance represent power that is truly lost and can never become available for radiation. Therefore, if we start out with 100 watts into such an antenna we should assume that ve’ll lose a good 6 dB to earth losses and another 1.0 to 7 dB to trap and loading losses, depending on the frequency of operation. Luckily, all traps don't come into play on all eight bands, so the loss may not be too noticeable above 21 mHz where only the first two traps are “active”. At 14 mHz however, cumulative trap and loading loss
from the 10, 12 and 17 meter traps could exceed 3 dB, in which case the loss could become quite noticeable.

Assume too that we're using one of the ultra-short no-radial types that ignore earth losses. Earth losses will probably cut our 100 watts down to 25 watts or less before our signal leaves our property, and if we take 3 dB or more from what's left for trap and loading losses we’re down to only a dozen watts or so. Grim? Perhaps, and it only gets worse as we QSY down to 30, 40 or 80 meters. Another disturbing thought! Some of the

no-radial designs use more than one trap per band to form what looks to be a single short and heavily loaded radial which can do next to nothing to reduce earth losses, but will certainly give us a few
more dBs of loss to work into our calculations.

There is no simple device such as a SWR bridge or analyzer that will allow us to separate antenna radiation resistance from loss resistance, something that must be done if we are to say anything meaningful about antenna efficiency. If we know the physical height of a vertical, however, it's a simple matter to find the radiation resistance from Chapter 3 of the Antenna Book, and measure the antenna SWR at the feed point with an accurate instrument. That done, we then calculate the total feed point impedance at resonance. If, for example, we find that our vertical is 1/88 tall (45° or about 18 ft at 7 mHz), we'll see that it should have a radiation resistance of about 7 ohms. If our SWR measures 1.5 we'll know that the total feed point impedance is 1.5 X 56 or 75 ohms. That's everything: earth loss, trap loss, loading loss and maybe even a fair amount of feed line loss that won't show up on the SWR meter if we're using long
runs of ancient coax. That's why it's a good idea to measure SWR as close to the antenna as possible. Our 7 ohms of radiation resistance is in there too, so the other 68 ohms of feed point impedance are down the drain forever. To calculate the efficiency of our poor little antenna we have to pull out our precious 7 ohms of radiation resistance and divide it by the total feed point impedance. That's 7/75 or 9.3333%. In other words less than one watt in 10 ever gets radiated.! But cheer up! Efficiency may be a little better above 7 mHz and, alas, a lot worse below 7 mHz as the antenna becomes ever shorter in terms of physical wavelength At 14 mHz the same antenna would use nearly a full 1/4 of the available radiator for a radiation resistance approaching 35 ohms and the trap and loading losses should waste only about half of our 100 watts. Earth losses would probably stay about the same, but overall efficiency might rise
quite a bit. The same 16 ft. antenna would probably not be designed to play on 80 meters because the radiation resistance would drop to only 2 ohms or so and efficiency would be no more than about 5% because of the additional required loading and its accompanying loss.

It seems that multi-band vertical antenna design in recent years has proceeded along several paths, all of which are ultimately dead ends. The multiple-trap design approach of the 50's has just about run its course. Before 1980 or so there were three fewer HF bands to worry about, so we could often swallow several dB of trap loss in exchange for the convenience of operating on four or five bands with a single antenna and when conditions were good often no one was the wiser. Along came three WARC bands in the early 80's and three more trap circuits with another few dB of loss resistance and what was formerly tolerable became much less so as the sunspots petered out.

It could not have come as a surprise to any designer or manufacturer that additional traps for additional bands would necessarily mean additional loss and generally inferior performance, but most of them had been plodding down the same old road for years, so it was probably an easy decision to stick with what had always worked (sort of) and hope for the best. Is there nothing that can be done to reduce trap and loading losses? There certainly is and an obvious first step would be to get rid of traps altogether or at least reduce their number to the point where they won't soak up half our applied power. Oddly enough, one of the designs from the late 70's took this design approach with a five-band (80-10 M) vertical that used only three tuned circuits, only one of which functioned as a trap. More remarkable still, the Q of the two non-trap circuits was well over 300, and because neither choked off current flow on any amateur
band and thus allowed the entire antenna to operate on all bands but 15 meters where,

however, it still functioned as a full physical .258 radiator. The improvement in 20 meter radiation resistance, in particular, was striking: from less than 35 ohms for a loaded quarter wave to over 100 ohms for the whole 26-ft. radiator. It's risky to make predictions concerning the kind of aerial that anyone will want in five or ten years, but I think it safe to say that in a few years virtually everyone will want something that incorporates the main features of this design which is now the property of the Bencher Inc. of Chicago, IL. Traps may still have a place in multi band antenna design, but they're increasingly recognized as an unnecessary source of loss.

Another design approach (from the mid 80's) purported to have realized the same objectives (increased radiation resistance and decreased loss resistance). This design showed some promise in that it avoided traps entirely in favor of linear circuit elements and used a sufficiently tall radiator (31.5 ft) for good radiation resistance on most bands, but, paradoxically, treated earth loss as a minor inconvenience that could safely be ignored because the antenna feed point (not the antenna itself) had been elevated some 18 ft. This simple expedient, it is claimed, "virtually eliminated" earth losses so that only three short (25 ft.) radials would permit a ground-mounted antenna to play with an efficiency of "about 96%". We have not seen such a startling claim since the heyday of CB, so we perhaps should examine this one carefully. What is earth loss and where does it reside? Earth loss is simply the resistance offered to RF
as it flows along or through the earth. Conductive earth favors current flow and lossy (highly resistive) earth opposes current flow at RF. At any rate, that's what all the textbooks have been saying for nearly a century, so to ask where we encounter earth loss is akin to asking who is buried in Grant's tomb. Yet, we're asked to believe that earth loss is somehow concentrated in the antenna conductor and that we can reduce or eliminate it by changing the feed point! Eagerly, we search the promotional and other literature for a key to unlock the mystery of this extraordinary breakthrough, but it seems to have passed almost unnoticed!

In a review article in Radio Communications in December 1991 G3SJX examines this design, accepting the claim for reduced earth losses largely at face value. Apart from minor problems involving RF on the feed line (for which the manufacturer suggests an additional 65 feet of coaxial feed line as a cure) assembly was straightforward, and comparative tests could begin against a much shorter antenna, an 8-band version of the "no- trap" design discussed earlier over a dozen short (1/8 to 1/48) radials.

The results? G3SJX reported the following: on 80 meters the taller antenna's bandwidth was 130 kHz between the 2:1 SWR points compared to 32 kHz for the shorter antenna. However, signals were as much as 1-1/2 S-units below those from the shorter antenna, a situation that he attributes to the "lower Q inductive loading" provided by a quarter wave coaxial stub and capacitor arrangement for 3.5 mHz stuffed inside the radiator. Apart from the external tuning rods the internal stub and capacitor appear to be the only loading device used in this antenna which supposedly operated at approximately 90% efficiency, or roughly the performance that one might expect from a ground-level antenna over 100+ long radials. A 31.5 ft. antenna should deliver at least the same performance as a shorter one, particularly if it's operating at that level of efficiency. Clearly, something was wrong, at least on 80 meters! GSSJX tends to blame
a lossy loading stub and capacitor. This is disappointing, for it does little good to get rid of lossy traps only to replace them with even lossier circuit elements.

G3SJX continues, observing that "on 7, 14 and 24 mHz there was no perceptible difference between the antennas." The obvious question here is why not? The taller antenna,

supposedly operating at 90% efficiency, ought to have been markedly superior to the shorter one on these bands, but it wasn't. G3SJX again: “On 21 mHz the [taller antenna] was 1 to 2 S-points down and on 28 mHz generally similar but up to 1/2 S-point down on some signals. These results were remarkably consistent and independent of direction or whether the signals were local or DX (p. 53).”

Perhaps it's time to consider the basic assumptions that underlie this particular design. That they're unusual is something of an understatement in the light of all that has been written about earth loss and vertical antennas over the last 60 years. What is really odd is that those assumptions have largely gone unchallenged, until recently. VE2CV's long Technical Note in QST for January 1995 is perhaps a long-overdue step in the right direction, for this design was widely bally-hooed as the ne plus ultra of vertical design. Quoth VE2CV:

“The purpose of this technical note is to clarify some of the statements made about the performance of vertical antennas. Some companies claim outstanding or amazing DX performance, low radiation angle, low noise, no ground loss and other attention-grabbing text in their product advertisements. Some of these need to be examined carefully. I'll comment particularly on the following statements: Elevated feed reduces--even eliminates--earth loss; Raising the antenna off the ground improves performance; A vertical's DX performance is superior to that of a horizontal dipole at a practical height. It's my opinion that the first statement is not true. The second and third statements need qualification...(p.76) Although a great fuss is made about reducing ground loss with elevated feed, such a claim, as I've discussed earlier, is not true. To improve performance, the entire antenna has to be lifted off the ground by a significant amount, not just the feed point (p.79)”

For this design to show appreciable gain over a ground-mounted base-fed antenna VE2CV suggests antenna heights of 50 ft. or more for 14.150 mHz and notes that for equivalent performance at 7 mHz the antenna should be twice as tall, further noting that:

“A grounded vertical antenna with an elevated feed makes a better multi-band DX antenna than does a vertical antenna with base feed, but this is not because ground induced losses are reduced, but because the antenna's current distribution is changed, as is the radiation pattern. For multi band performance, judged by pattern change with change in frequency, the feed point should be at a height of about 1/3 the total height (h) of the radiator and the height of the radiator should not be greater than 1 wavelength (8) at the highest frequency used (p. 78).”

At any rate, we should not imagine that an elevated feed point will do anything at all to reduce earth losses or that efficiency can begin to approach 90% in most installations. Moreover, we might suspect that the unexpectedly poor results that G35JX noted on 21 and 28 mHz were due to changes in current distribution along the radiator. Suffice it to say that the elevated-feed design in question still has problems with earth and loading losses (even after eliminating all traps) and that a good deal of re-design will be required before it can live up to the startling claims that have been made for it.

In general, we might say that over the last dozen years or so antenna design has tended to stress compactness, ease of installation and overall convenience at the expense of more basic design considerations. That’s certainly understandable enough from the manufacturer's point of view, because he's merely reacting to market pressures: if enough customers want a 160 meter DX antenna that will fit inside a basement broom closet and put S-9 + 40 dB signals into Nepal 24 hours per day (no ground radials needed, of course) you

may be sure that someone will offer one. True, it may not work very well, but creative advertising has been conquering the laws of mere physics for longer than any of us have been alive.

Unfortunately, what works (or seems to work) well during periods of maximum sunspot activity may not work at all as the same sunspot cycle declines. If you're willing to sacrifice 90% of your power to earth and trap losses because you're too lazy or too decrepit to run out a few pieces of wire under the nose of the neighborhood antenna Gestapo, there's probably no hope for you to begin with, in which case we have to wonder why anyone would want to blow a small fortune on an overpriced dummy load in hopes of daily miracles. Years ago, H.L. Menoken once observed that no one ever went broke under-estimating the intelligence of the American public. And Menoken didn't even have a ham ticket!

We can only guess what commercial vertical HF aerials for HF will look like in coming years, but if we extrapolate from current design trends the outlook is worse than bleak. Perhaps it will be possible to add still more traps for still more bands, although that road is not only rutted but heavily mined, particularly where it merges with the highway leading to tinier and tinier radiators for ever lower values of radiation resistance and efficiency. It's clear that we can't count on Cycle 23 for any relief at this point because it won't even begin for another two years and 10 meters may not open regularly for another year or two after that. Perhaps the people with the “90% efficient” design will discover ground systems and low-loss loading? Perhaps others will drop some of their traps and start using taller radiators. Don't bet on it!

One hopeful sign of a possible change of heart comes from Kurt Sterba's favorite BFAC (Big Famous Aerial Company). They've announced a “special” 36 ft. tall vertical for 80/75 meters that sports a huge capacitive hat at the top. That's still not a full physical quarter-wave, so presumably the black box at the base houses some sort of loading coil. It's strictly an 80/75 meter affair, but that's all to the good because we don't need a string of traps for higher-frequency bands sucking up power that might otherwise help us to establish a commanding presence in the next hemisphere. And, wonder of wonders, this BFAC has the audacity to recommend that we use radials with it! Daring? You bet! When did you last see an ad for something that requires radials? Have these people started to worry about performance all of a sudden? Are conditions really that bad? Someone must think so!

Anyway they're to be complimented for seeking to make something a little better rather merely smaller and lossier. It would certainly be ironic if the QRMing masses, having been taught by the BFAC’s to look upon “ground radials” with undisguised horror, decide to give this one a miss! Too bad, but that's one of the
risks that go with dancing out on the cutting edge of aerial design!

LEARN MORSE CODE in one minute !

Rob KB3BYT

This is a code listening tool. Print it on your printer.
Place your pencil where it says START and listen to morse code.
Move down and to the right every time you hear a DIT (a dot).
Move down and to the left every time you hear a DAH (a dash).
Here's an example: You hear DAH DIT DIT which is a dash then dot then dot.
You start at START and hear a DAH then move down and left to the T and then you hear a DIT so you move down and RIGHT to the N and then you hear another DIT so you move DOWN and RIGHT again and land on the D
You then write down the letter D on your code copy paper and jump back to START waiting for your next letter.
The key to learning the code is hearing it and comprehending it while you hear it.
The only way to get there is to practice 10 minutes a day.
Listen to code tapes or computer practice code while tracing out this chart and you will find yourself writing down the letters in no time at all without the aid of the chart.
The chart brings repetition together with recognition, which you don't get from any other type of code practice aid.

HEAR slow morse code This code speed is slow enough to follow the chart above.

LEARN the DITs and DAHs with these MP3 files:

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z 1 2 3 4 5 6 7 8 9 0

And the character to emphasize that there she was, she was walking down the street, is : do-wah-diddy-diddy-dum-diddy-do

Goto DOWNLOADS page for hours of MP3 code practice

Goto LINKS page

How to learn morse code. And enjoy it.

Morse code is not a chore. Its a challenge.Its a challenge of your ability to learn a new language.And it is truly a language.There are millions of people who successfully learn a foreign language so you can be certain that its not so farfetched to think that you too may learn a new language.The secret to learning a language is to jump into the pool, over your head, totally emerse yourself in your new language.If you want to speak Chinese then the best way to learn Chinese is to go to China and only hear Chinese.We all can't do that.But we can come real close with today's recording technologies with cassette tapes and DVD and CD and MP3 recordings.Morse code is the same. Listen to it. All the time. It doesn't matter if its just slow or just fast.It doesn't matter if you do not understand a single word at first.There are a dozen methods to practice and get your brain to retain what the

letters are.Practice reinforces and recognition will come with practice.Then... one day ... you start hearing entire words and sentences that make sense..at speeds that you never dreamed you would understand.Some peple say that you should never use a chart or any visual aid to learn morse code.All people are created a bit different and what works for some people , does not always work for everyone else.So don't try just one method to learn morse code. Try a few and decide what works best for you.This chart at http://www.learnmorsecode.com is just one of many methods to learn morse code.This particular method will work for all ages to immediately put together the noise of morse code with the meaning of the noise. It does not matter if it is a slow process. All that matters is that your brain gets a chance to connect the dots and make some meaning out of it all.Many people give up trying to learn morse code beacuse they do not ever get the noise to stick in their brain and recognise what letter they just heard. This method will sew together that recognition if you practice this method for 10 minutes every day with the SLOW code A-Z file.After you no longer need the chart...then...and only then....move on to the faster code practice download files.There are computer programs that can make morse code to teach you.I like the software at http://www.g4fon.net/I highly recommend you use that software to learn the letters and also to make your own practice audio files.If you can not make a computer do recordings and carry around MP3 files then use cassette tapes. They are cheap to make and WALLMART sells casette players for $5.00 now.The computer programs that generate practice morse code are great and FREE so have fun with it.One method to learn morse code is called CODE QUICK.CODE QUICK has you listen to a letter and associate small sentences with the sounds of the morse code. An example of this method is to hear the letter K in morse code which is made up of the sounds DAH DIT DAH.You hear the DAH DIT DAH and it actually sounds like KANG ga ROOOOO.So your brain hears the DAH DIT DAH and injects KANGAROO into your minds eye and you say AH HAA!!!! KANGAROO begins with a K so what I just heard was a K !!!!!You write down the K and along comes the next letter.There are SOUND ALIKES for every letter of the alphabet and numbers too.You are encouraged to make up your own sound alikes for the letters if you have trouble using the CODE QUICK sound alikes.CODE QUICK taught me morse code at a time where no other method worked for me.I did not learn about the LEARNMORSECODE.COM chart until years after I used CODE QUICK.You can BUY code quick at http://www.cq2k.com for around $30.The methods used at code quick are very straight forward and actually have been around for many many years before the code quick author published the first code quick casette tapes and work book course.I have an uncle that was a code listener during the Vietnam war and one day he visited me during a morse code contest and very fast morse code was playing on my radio and it was was too fast for me to understand and my uncle sat down next to me and asked me what I was doing and I told him I was trying to understand the hailing station but I was too new at it to understand.My uncle told me what the station was saying and then told me about his code listening days so I asked him to respond and he told me that he never sent a single dit in all those years.All they did was spy on the enemy.He understood the fastest of the code so I asked my uncle to explain to me the method that the army used to teach him the code in 1965 and he told me that the army made them memorise little phrases like a baby crying wants his mother to give him a drink of water and that sounds like MaWAWA and is the letter W ...DIT DAH DAH.That just blew my mind because that was precisely what CODE QUICK used to remember W also.This man was a high speed spy listener that got his first morse code training with this learning method.So this method truly works but you will have your sticks in the mud old farts telling you that CODE QUICK sound alikes will only slow you down from learning truly high speed morse code at 20 words per minute.Well to hell with sticks in the mud.If you learn morse code at 5 words per minute using sound alikes and have fun with listening to any morse code then moving up to high speed code will be another

challenge and practice is what makes perfect.You will find that if you know 5 words per minute slow speed morse code and you listen to ramp recordings where the letters are played slow at first and then ramp up to real fast code of the same letters, the ramped up speed will stick to your brain quite well because you already knew what the slow letters sounded like and you will enjoy the comprehension instead of being all
wrapped up in being lost in fast practice code.

So thats my 2 cents on learning morse code.

Have fun.

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 17th-June, through Sunday, 24th-June there were 204 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5R, 5T, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SV, SV5, SV9, T32, T5, T7, T8, TA, TF, TG, TI, TK, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV,
Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
5H, TANZANIA
Ro, DL4ME, will once again be active as 5H3ME between August 14th and September 3rd. Activity will be holiday style on the HF bands from 80-6 meters using CW and the Digital modes. QSL via his home callsign.
9H, MALTA
Zoltan, HA5PP, will once again be active as 9H3PP during the CQWW DX SSB Contest (October 27-28th) and CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (possibly 15 or 10m) entry. Activity outside of the contest will take place a few days before the contest and will be on 17 and 12 meters. QSL via HA5PP.
D6, COMOROS (Update/Dates)
A team of Europeon operators will be active as D64K from Ngazidja (Grande Comore), Comoros Islands (IOTA AF-007), between August 8-20th. The current list of operators mentioned are Salvador C31CT/EA3QS, Sigi/DL7DF, Josep/EA3AKY, Fabrizio/IW3SQY, Paolo/ IV3DSH, Franco/IZ8GCE and Les/SP3DOI. The team has already obtained all permissions, and the license has been sent to the DXCC Desk. Pilot station is Stan/KH6CG. Their license covers

from 160 to 6 meters, so the guys will be active on all bands and modes, and they are even considering the possi- bility of working on 60m and 6m. The QSL Manager will be Paolo, IV3DSH. More details will be forthcoming. Watch the following for updates: http://www.d64k.comhttps://twitter.com/#!/D64K

DXCC NEWS

Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:

TL9ES Central African Republic; 2011 Operation

>TT8ES Chad; 2012 OperationDXPEDITION VIDEOS OF THE WEEK (New Feature)

With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings, we thought to list and prepare you for the upcoming NH8S Swains Island DXpedition:

* Swains Island Aerial Assessment (an unlisted video):

>http://www.youtube.com/watch?v=nttO7LX-EAY

>* A team from National Marine Sanctuaries visit Swains Island:

>http://www.youtube.com/watch?v=z0piF9O-1OI&

>* 2006 KH8SI Swains Island DXpedition:

>http://www.youtube.com/watch?v=NZ-YBZT0W1s

>* Interesting documentary of Olohega or Swains Island. The island was annexed to the United States. Its former inhabitants were evicted almost sixty years ago from their island and long to return. They claim it belongs to the Tokelau Islands.

>Videos Part 1, 2 and 3:

>http://www.youtube.com/watch?v=0qt81PZHyU0

>http://www.youtube.com/watch?v=fdeIQJ8PI0o

>http://www.youtube.com/watch?v=YWmraGZfc4cE5, SOUTH COOK ISLANDS

Operators Wayne/N6NB and Carrie/W6TAI will be active as E51YNB and E51TAI, respectively, from Rarotonga Island (OC-013) for the IARU HF World Championship (July 14-15th). Activity is expected to start a few days before and after the contest. Operations will be on 40-15 meters SSB only. Wayne tells OPDX, " If all goes well we'll have an IC-7000 and a THP HL-550FX amp (500 watts), with a TH2 (Hy-Gain 2-element tribander) plus a dipole for 40. We may pass on 80 because the noise level there was extremely high when we were in Rarotonga for the ARRL Phone DX Contest." QSL both callsigns via N6NB. Read about their first operation at:http://commfaculty.fullerton.edu/woverbeck/e51ynb.htm

FP, ST. PIERRE & MIQUELON

Mike, VE2XB, will once again be active as FP/VE2XB from St. Pierre & Miquelon Islands (NA-032, DIFO FP-002, WLOTA 1417) between August 10-20th. Activity will have a special focus on 6 meters, but he will also be active on all bands from 80-6 meters. He states that he will be bring his THP amp for 500w, so his signals should be good with the Hexbeam. QSL via VE2XB (see).(QRZ.com)

IOTA NEWS

AS-120. Members of the Nicosia Amateur Radio Club were expected to activate the "Agios Georgios" islet off the coast of Akamas, Cyprus, as C4MG this past weekend. QSL via 5B4KH.

EU-016. Brani, OM2FY, will be active as 9A/OM2FY from Brac Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ DXpedition/CW-Mode/24H entry. QSL via OM2FY.

EU-031. Gian, IC8WIC, will be active from Capri Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via his home callsign or by the Bureau.

EU-038. Operators Paul/PA3FUN, Jerry/PH9HB, Jan/PD1AIQ and Bram/PE1OPK will be active as PA6NH from Texel Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Mixed-Mode/Low-Power entry. QSL via PA6NH (see(QRZ.com)).

EU-046. Wolfgang, DM2AUJ, will be active as LA/DM2AUJ from Senja Island between June 24-28th. Activity will be on the HF bands on or around the usual island and IOTA

frequencies. QSL via his home callsign, by the Bureau or direct.
EU-076. Wolfgang, DM2AUJ, will be active as LA/DM2AUJ from Lofoten Island between June 30th and July 10th. Activity will be on the HF bands on or around the usual island and IOTA fre- quencies. QSL via his home callsign, by the Bureau or direct.
EU-112. (Cancelled!) Members of the GMDX Group (Scotland's DX Associ- ation) planned to activate GB5SI from Shiant Isles [House Island) between June 15-22nd. Reason for it being cancelled was not provided.
EU-124. Members of the Strumble Head DX and Contest Group (SHDXCG) will once again be activating Ramsey Island between July 12-16th. Activity will be on all bands from 40-6 meters using 2 Hexbeams and a Windom. This year they are hoping to have a station dedicated to the Digital modes, mostly RTTY, using a TS480 at 200w and one of the Hexbeams. They have also analyzed their logs and seen that there is a shortage of contacts with North and South America, and also the countries around the Caribbean. They have looked at the terrain and the location of the antennas with a view to getting one Hexbeam a little higher to clear a small ridge that blocks the westernly direction allowing these contacts to be made. As usual, QSL via the manager Tim, M0URX,
(see www.m0urx.com)using his OQRS system for a speedy turn around. Logs will be uploaded to LoTW and Clublog as soon as they get back to the mainland. All details and (hopefully) a daily blog will be available on their Web site at:http://www.mc0shl.comThe team has also advised that they will operate from their farm HQ if they are unable to make the crossing to the island due to bad weather but will announce on air if this is the case.
EU-178. Operators Dominik/SQ7OXU, Constantin/RD1AR, Sergey/UA1ANA and Jack/SP7DPJ will be active as ES0W from Ruhnu Island between July 26-30th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Mixed-Mode/Dxpediton/Low-Power entry. Antennas will be a Hexbeam and Inverted Vs. QSL via SP7DPJ, direct or by the Bureau.
NA-029. Operator Ken, K6LA, will operate from Prince Edward Island in eastern Canada using the VY2TT superstation (Grid Square FN76vs, CISA PE-001) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/Mixed/24H entry. QSL via K6LA.
NA-129. John, VE8EV, will be active as VE8EV/p from Banks Island (Grid CQ71) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode entry. QSL via his home callsign, direct, by the Bureau or LoTW. Watch for possible updates on his Blog page at: http://ve8ev.blogspot.com
NA-136. Adam, W1ASB, will be active as W1ASB/P from Ram Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Low-Power/ Unassisted/ 12HR entry. QSL via the info on (QRZ.com).
OC-135. (Update to OPDX.1066) Han, SM6CVX, plans to be active as P29VCX from Bougainville Island (not Buka Island) between November 6-9th. QSL via his home callsign.
K2, UNITED STATES (Special Event)
Next weekend starts the 4th annual "Original 13 Colonies - Independence Week - Special Event", which begins 12:01 AM Eastern (0401Z), on July 1st, (That's one minute after midnight, early Sunday morning, July 1st) to 11:59 PM Eastern (0359Z July 6th) ending on July 5th (One minute to midnight, late Thursday night, July 5th). Recognizing that "Independence Day" (July 4th) comes in the middle of the week (Wednesday) and that some operators will be going to their work on the 2nd, 3rd and 5th, they have added a BONUS DAY on Saturday, June 30th, 2012!! Stations will operate from 09:00 AM Eastern (1300Z) right through until the 5th. Keep in mind that there may be fewer operators available on the work days, so PLEASE BE PATIENT! There will be at least two S.E. stations per colony state. Also included will be Super contest stations, multi-operator Club stations, and OM & XYL teams. Activity will be on 160-2 meters, except 60/30/17/12m, and using all modes (Satellites, CW, SSB and the Digital modes - but it is up to the individual colony state station). The Colony state stations to look for are: K2A (New York), K2B (Virginia), K2C

(Rhode Island), K2D (Connecticut), K2E (Delaware), K2F (Maryland), K2G (Georgia), K2H (Massachusetts), K2I (New Jersey), K2J (North Carolina), K2K (New Hampshire), K2L (South Carolina) and K2M (Pennsylvania). "ALL" Colony stations will issue a special event QSL card this year! Also, a special certificate is available. For complete details, visit their Web page at:
http://www.13colonies.info
KH6BZF PROPAGATION FORECAST/REPORT (June 25th-July 1st)
Jun/25th AN Jun/28th AN Jun/30th AN Jun/26th AN Jun/29th AN Jul/01st AN Jun/27th AN SOLAR REFERENCE KEYS/INDEXES AND GEOMAGNETIC REFERENCE

Look for special event station LJ2T to be active from "The Signals Museum of the Norwegian Armed Forces" near Lillehammer, Norway (locator JP51ED), between June 28th and July 1st. Activity will be on many bands and modes, most likely from 80 meters to 4 meters (70 MHz). QSL via LA5EAA. More info available at:http://www.qrz.com/db/lj2t
LY200/LY54, LITHUANIA (Special Events)
LY200NB - Will be on the air last ten days of June to celebrate the 200th anniversary of Napoleon Army crossing river Nemunas in Kaunas, Lithuania. For more details, see (QRZ.com). Also, see:
http://en.wikipedia.org/wiki/Napoleonic_Wars
LY54SOP - Will be on the air during July 1-31st, to celebrate the 54th anniversary of SOP (Sea of Peace), Baltic Sea. Every year in July the radio amateurs of Mecklenburg-Vorpommern district accomplish special activities supporting the application of the SOP. The SOP is awarded for contacts with different countries/areas bordering the Baltic Sea and Norway each year during the month of July. For more details, see:
http://www.amateurfunk-mvp.de/inhalte/sopdipl.htm
QSL both callsigns via LY5W (see (QRZ.com)). Working these stations, you have a good chance to work a new prefix for the LY WPX Trophy, LY WPX Trophy Honor Roll and the Baltic States WPX Trophy.
OH, ALAND ISLANDS
Czech senior operators Bob/OK2BOB, Franta/OK1HH and Jindra/OK1AMM will be active as OH0/homecall between June 24th and June 30th. Activity will be mainly CW and SSB on 160-6 meters. The WW LOC will be KP00AC on Aland Islands (EU-002). QSL via the OK Bureau or direct.

TY, BENIN
Pat, LA0HF, will be active as TY2BP from Fidjrossé, Cotonou, beginning June 26th, for a minimum of 30 days, up to 45 days. Activity will be on 20/15/10 meters. QSL via IK2IQD.
VK0H, HEARD ISLAND (Update)
On June 15th, the 2014 Cordell Expedition to Heard Island announced the initial team for the DXpedition. At this time this list is incomplete; it will be augmented in the coming months. The partial list of operators are Bob/KK6EK (Team Leader/Organizer), Peter/ON6TT (Co-Organizer), Christian/DL1MGB (Co-Organizer), Mike/N6MZ (Co-Organizer), Bill/AA7XT, Alan/AD6E, Gerd/DJ5IW, Franz/DJ9ZB, George/ N4GRN, Paul/N6PSE, Dr. Carlos/NP4IW (Logistics), Wes/W3WL and Dr. Glenn/ W0GJ (Physician). Non-operators from USA Dr. Jeffrey Bozanic (Co-Organ- izer, Environmental Science, Antarctic Diving) and Joan Boothe (Doc-umentation, Explorers Club). The support team (partial list) includes Rich/KY6R (Pilot/Software), Dean/N7XG (Software) and Peter/W6OP (Software). The next round of team members will be announced on August 15th. This project follows the very successful expedition to Heard Island carried out by this group in 1997. Details of that operation can be seen at:
http://www.cordell.org/HIThe Web site for the 2014 DXpedition is at:http://www.cordell.org/HD
YN, NICARAGUA
Mike, AJ9C, will be active as YN2CC from Granada, Nicaragua, between November 20-28th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, Mike will be in the CQWW DXCW Contest (November 24-25th) as a Sinlge-Op/Low-Power entry. QSL via LoTW or direct to his home callsign.
VY0, CANADA (Nunavut Territory)
Rob, KC0VEU, will once again be active as homecall/VY0 from Eureka, Ellesmere Island, Nunavut (NA-008, Grid Loc. EQ79ax) until July 5th. He is there on official business. Sometime during his stay, and weather permitting, he will attempt to operate from the PEARL facility 15km away which is located at 80°N - 86°25'W, and there- fore in the rare ER grid (ER60) for those who chase the CQ Grid Fields award and the rare ITU Zone 75. PEARL (the Polar Environment Atmospheric Research Laboratory) is also a separate base for the Arctic Challenge
www.french-polar-team.frThis is Rob's fifth time on Ellesmere.
PLEASE NOTE: KC0VEU recently passed his Extra class exam and is expecting a new callsign in the "AD0" prefix block, but will still sign / VY0. QSL direct or by the Bureau to his home callsign.

http://www.pisto.it/wordpress/log4om-en/

Log4OM Download [en]
Log4Om is a fast and simple software developed in C# for complete ham radio station management.
Some of the key functions are:
* Interfaced with QRZ.COM e HAMQTH.COM for rapid search and QSO data enhancements (massive update supported).
* Innovative graphic DX Cluster management, with SPOT real time view on world map and auto tuning of the radio with CAT support.
* Super Cluster: An alternative cluster based on online data sent by users to HRDLog.net
* MySQL support for large databases and multi operator operations.
* CAT support for numerous radios, through HAMLIB.
* Cluster integrated with propagation informations by HRDLog.net
* ADIF import and ADIF / Excel (csv) / PDF export of log
* Integrated with E-QSL, LOTW, ClubLog and HRDLog.net.
* Fast and simple forms for help OM’s to write old good paper QSL with ease.
* Complete log searching features, Log4Om enables the OM to update offline the QSO with updated informations.
* Optimized for “paper to electronic” log conversion, with features that drammatically speeds up the speed of inserting QSO (auto-time functions with predefined QSO separations, automatically set timings for fast pile-up management)
* Language selectable English and Italian
* Complete label print feature

Download (last version 1.10.2)
* Log4OM 1.10.2 (301)
* Log4OM 1.7.2 for Linux (MONO) (78)
* Log4OM 1.7 Manuale [ITA] (364)

http://www.arrl.org/qrp-dxcc

QRP DXCC

In recognition of the popularity of QRP, the ARRL is pleased to announce a new operating award--the QRP DX Century Club, or QRP DXCC. The award is available to amateurs who have contacted at least 100 DXCC entities (see the list on the Web) using 5 W output or less. The QRP DXCC award will be available beginning in January 2002. Contacts made any time in the past will count, and no QSLs are required.
The QRP DXCC is a one-time award and is non-endorsable. You do not have to be an ARRL member to qualify.
To apply for the QRP DXCC, just send a list of your contacts including call signs, countries/entities and contact dates. Do not send QSLs. The list must also carry a signed statement from you that all of the contacts were made with 5 W RF output (as measured at the antenna system input) or less.
Along with your contact list, include a $10 application fee in the form of a check or money order in US funds. Make sure to indicate your mailing address and your name as you want it to appear on the certificate. Mail everything to: QRP DXCC, ARRL, 225 Main St, Newington, CT 06111.

http://www.arrl.org/too-old-for-contesting
Gene Bartsch, WI7N

It takes more than a big-gun station to make a top operator.

The club meeting was nearly over, but Charlie hadn't uttered a single word all evening. He was sitting in the rear of the room, which was also unusual. After 15 years of attending Lakes-of-Utah Contest Club meetings with him, I knew he always arrived early and raced inside as soon as the doors opened to get a front-row seat. The unhappy frown on his face worried me the most because Charlie was a cheerful person and that scowl was so out of character for him.

I casually glanced over my shoulder again. Charlie had been one of the club founders many decades ago, long before I'd even heard of ham radio, but I'd gotten to know him rather well during my time in the club. We'd been on several committees together and had both taken part in the same club DXpedition to Aruba. I'd never really thought about his age, but he had to be in his late 70s or early 80s and maybe he was having health problems.

As soon as the club president slammed down the gavel to end the meeting, I hurried to the back of the room. Charlie was still seated and gazing quietly at his fellow hams, some of whom were already leaving while others had gathered in groups to chat. I dropped into an empty chair next to Charlie. "Hey, are you okay tonight?"

"I'm going to miss it," he said.

"Miss what?"

"Ham radio contesting."

"What do you mean? What's wrong? You aren't sick, are you?"

"No, but I guess I'm simply too old for the hobby."

"What makes you say that?"

He gave a long sigh. “There was a 160 meter contest last weekend.”

“I knew about it, but I was out of town on a business trip and didn’t operate. How were conditions?”

He didn’t answer me but instead stared off into space. Finally he said, “I’ve been a ham for 64 years and have always enjoyed contesting. I have a modest station and didn’t need to rank in the top-tier to have fun. I always enjoyed giving points to other people and watching signal propagation change from hour to hour.”

“Me, too. So?”

“I had measles when I was a child and have been stone deaf in my left ear ever since.”

“I didn’t know that.” Bringing up his childhood illness wasn’t a good sign and I couldn’t imagine where he was taking our conversation.

Charlie nodded slowly. “It was before a measles vaccine had been developed. I was bedridden for weeks and nearly died. I eventually pulled through, but lost my hearing in one ear and always sat in the front row at club meetings because I couldn’t hear otherwise. I especially have difficulty when there’s background noise.”

“I always thought you sat in front because you were interested in the club programs and didn’t want to miss anything.”

He smiled. “That, too” he replied, “but the hearing in my good ear has worsened as I’ve gotten older, especially for sounds in the high-frequency range.”

“That happens with everyone. What does that have to do with you giving up contesting?”

Charlie frowned. “Something happened during the 160 meter contest last weekend that really bothered me.”

“What’s that?”

“I found a clear frequency and asked if it was in use. Nobody replied, so I called CQ and soon began working stations. I spent the next 2 hours operating on that same frequency.”

“Okay, so?”

“At about 3 AM, a weak signal popped out of the noise. The guy was slightly above my frequency, but we exchanged information and then I immediately called CQ again.”

I shuffled in my seat. “I still don’t understand the problem.”

Charlie rubbed his face and gazed into the distance. “The next morning I found an e-mail in my inbox from that weak station. The operator called me a jerk, a lid and several other names for calling CQ on his frequency. I looked up the guy in an online call book and it showed his photo. He’s a fairly young fellow, but a big-gun DXer with expensive modern equipment and incredible antennas.”

Charlie’s face had turned red and I thought he might be on the verge of a heart attack. “Easy, Old Man,” I said.

He nodded and took a deep breath. “I considered explaining to the guy that propagation had probably changed and caused interference when none had existed before, or maybe he could still hear me when I couldn’t hear him because his station was so superior to mine, but I didn’t do that.”

“What did you do?”

“I sent him an e-mail and apologized for being a jerk and a lid.”

“Oh, I wish you hadn’t done that.”

“Why not? I don’t want to ruin another ham’s fun and I don’t want to get more nasty e-mails like that one in the future. I’m probably just too old for contesting, especially with my bad hearing and modest station. I’m sure going to miss it, though. Maybe I should just quit ham radio completely.”

“Charlie, don’t do that! Lots of older hams have poor hearing and you know that people with average equipment can’t match the capabilities of those big-gun stations. Now, just imagine the impact that getting an e-mail like the one you received could have on a newcomer to ham radio, perhaps a young and inexperienced fellow trying contesting for the first time.”

“I hadn’t considered that. All I could think about was how much that e-mail had ruined my day.”

“And besides, that other guy doesn’t own the frequency. He could have moved if he was experiencing interference. If there was a jerk on the frequency, it wasn’t you.”

Charlie brightened a bit. “Hmmm.”

“And another thing — were you operating from your cabin in Wyoming during the contest?”

“No, I decided to stay at home this weekend and operate from here in Salt Lake City.”

“Charlie, you’re often the only Wyoming station I work during some contests and I know you provide that multiplier to many other people. You would sure be missed if you gave up contesting.”

He rubbed a hand slowly along his chin. “Well, I’ll consider that before making a final decision about quitting the hobby.”

“Please do and I sure hope you decide to remain active.”

During my drive home later that night I tried to imagine why any ham would want to ruin the enjoyment of Amateur Radio by anyone else. The ego, selfishness or anger issues that I mulled over as the possible answer reflected so poorly on the other operator that I finally gave up and concluded that his behavior was simply beyond my comprehension. Ham radio is a hobby that should be fun for allparticipants regardless of their equipment or skill level. If those unwilling to play nicely with others succeed in driving people away, the eventual result will be a few big-gun stations that quickly work each other and then spend the rest of the contest weekend calling CQ endlessly without being answered because the operators who might have replied have quit the hobby.

http://www.rac.ca/en/rac/programmes/contests/files/2011%20Canada%20Day%20Rules%20-%20English.pdf

2012 RAC CANADA DAY CONTEST

Each year on July 1, the anniversary of Canada's Confederation, Radio Amateurs of Canada sponsors the Canada Day Contest. Amateurs all over the world are invited to Canada's Birthday Party on the air.

Contest Period: 0000 UTC to 2359 UTC July 1, 2012.

Bands and Modes: 160, 80, 40, 20, 15, 10, 6 and 2 meters, CW and phone (SSB, FM, AM, etc.)

Suggested frequencies: CW – 25 kHz up from the band edge and for SSB – 1850, 3775, 7075, 7225, 14175, 21250, 28500 kHz. Check for CW activity on the half-hour.

Exchange: Stations in Canada send RS(T) and province or territory. VEØ's and stations outside Canada send RS(T) and a serial number.

QSO's: Contacts with stations in Canada or VEØ's are worth 10 points. Contacts with stations outside Canada are worth 2 points. Contacts with RAC official stations are worth 20 points.
RAC official stations are: VA2RAC, VA3RAC, VE1RAC, VE4RAC, VE5RAC, VE6RAC, VE7RAC, VE8RAC, VE9RAC, VO1RAC, VO2RAC, VY0RAC, VY1RAC and VY2RAC. You may work any station once on each of the two modes, on each of the eight contest bands.

It is prohibited to make CW contacts in the conventional phone sub-bands and phone contacts in the conventional CW sub-bands. Contacts or soliciting QSOs through a repeater during the contest period is not allowed.

Multipliers: Thirteen in total, Canada's 10 provinces and three territories. Each multiplier may be counted once on each mode on each of the eight contest bands. The multipliers, with their postal abbreviations and prefixes are:

Nova Scotia [NS] (VE1, VA1, CY9, CYØ); Quebec [QC] (VE2, VA2); Ontario [ON] (VE3, VA3); Manitoba [MB] (VE4, VA4); Saskatchewan [SK] (VE5, VA5); Alberta [AB] (VE6, VA6); British Columbia [BC] (VE7, VA7); Northwest Territories [NT] (VE8); New Brunswick [NB] (VE9); Newfoundland and Labrador [NL] (VO1, VO2); Nunavut [NU] (VY0);Yukon [YT] (VY1); and Prince Edward Island [PE] (VY2). Certain special Canadian prefixes in use at the time of the contest may also apply; however there may be no more than 13 multipliers on each band/mode.
Please use the multiplier abbreviations, in square brackets, noted above.

Final Score: The total QSO points from all bands multiplied by the total number of multipliers from all bands.

Categories: The following 9 categories are eligible for plaque's or certificates as detailed in the Awards section of the rules.

. Single Operator All Bands High Power (>100 watts) – Radioworld
. Single Operator All Bands Low Power (max. 100 watts output) – Contest Club Ontario
. Single Operator QRP (max. 5 watt output) All Bands & Single Band ** – QRP Canada
. Single Operator All Bands CW only, any authorized power – Maritime Contest Club
. Single Operator All Bands PH only, any authorized power – Saskatchewan Contest Club
. Single Operator Single Band, any authorized power *** – Elkel Products
. Multi-Operator Single Transmitter High Power (>100 watts) * – Alfa Radio
. Multi-Operator Single Transmitter Low Power (max. 100 watts output) * – Tony Allsop VE3FTA Memorial by the Mississauga ARC
. Multi-Operator Multi-Transmitter, any authorized power – Radioworld
For the Canada Day Contest a special trophy is awarded for the highest Single Operator (no power classification) Foreign Entrant – Larry Kayser VA3LK Memorial by Alan Goodacre, VE3HX
Special thanks to our sponsors for their support of the RAC contests.
Category notes:
1. The contents of a log that is submitted for a specific category must reflect that category.
In the event of a conflict between the actual content of the log and the stated category in the Cabrillo header or contained in other elements of the entry material, the actual contents of the log will be used to determine the category of entry where possible. In the event this cannot be determined or in the event where a log does not identify the entry category, the entry will be classified into the Multi-Operator, Multi-Transmitter, any authorized power category.
Any entrant who wants to enter a specific category (i.e. Single band entry) but who also worked additional contacts outside that category may submit those additional contacts in a separate check log file. Do not include them in the main entered category log file.
2. Where the categories have a power class and the submitted log does not clearly identify the power class entered, then the log will be treated as if the highest power class for that category was entered.
3. Single operators who receive assistance from a DX spotting system, including Skimmer and similar technologies or any type of Packet Cluster network during the contest must classify themselves as Multi-ops.
4. *In the Multi-Single category only one transmitter and one band are permitted during the same time period (defined as 10 minutes). Exception: One, and only one, other band may be used during any 10-minute period, if and only if the station worked is a new multiplier. In other words the Multi-Single Transmitter class allows a second station to “hunt” and work multipliers only on a single separate band during any 10 minute period.
5. Multi-Multi category stations may operate on several bands simultaneously.
6. **Although there is only one QRP category, which qualifies for a plaque or certificate, it is intended that the published results would show All Bands or the Single Band of operation.
To facilitate this break out of the listings, your entry should indicate the band(s) or mode(s) operated.
7. *** Although there is only one Single Operator Single Band category that qualifies for a certificate or award, it is intended that the published results would show High Power or Low Power. To facilitate this break out of the listings, your entry should indicate the power class you used.
Awards: Plaques will be awarded to the top-scoring entrants in each category, as noted above in the category list. Special thanks to our sponsors for their ongoing

support! Certificates will be awarded to the top-scoring entrant in each category in each of:
. Canadian provinces or territories
. Continental U.S. call districts, W0 through W9 as well as Alaska and Hawaii.
U.S. Commonwealths, Territories and Possessions such as Puerto Rico, US Virgin Islands, etc will be treated as equivalent to a DXCC country
. DXCC country, excluding Canada and the US.
To facilitate the proper allocation of certificates, all U.S. stations should indicate their actual US call district based on their actual address, as provided in the Cabrillo header, if different than indicated by their call prefix. DX stations should indicate the actual country of operation if different than indicated by their call prefix by indicating the country as part of the portable call sign designator.
RAC stations will compete and be considered the same as any other entrant for eligibility to plaques and certificates.
Results: Will be published in The Canadian Amateur magazine published by the Radio Amateurs of Canada. The results will also be published on the RAC website at <www.rac.ca> in the contest section.
Entries: All entries (electronic or paper logs) must be postmarked or electronically submitted by July 31, 2011. Electronic entries will be confirmed by return email.
Send email entries to canadaday@...
Send paper entries to:
Radio Amateurs of Canada
720 Belfast Road, Suite 217
Ottawa, Ontario, Canada K1G 0Z5
We will be publishing a list of logs received and the categories entered on the RAC website during and/or after the submission period after the cut off date to assist in correcting any entry categorizations.
Paper mail entries must contain a summary sheet showing score calculation, a dupe sheet listing calls worked on each mode on each band, a multiplier check sheet and log sheets.
Logsheets must show time, band, mode, call of station worked, exchanges sent and received and points claimed for each QSO. New multipliers must be clearly marked in the log. Contest entry forms are also available on the RAC website at http://www.rac.ca/en/rac/programmes/contests

Any entry with 100 or more contacts should be submitted in digital form, either submitted by email or mailed in via 3.5" MS-DOS/ Windows formatted diskette. The preferred electronic format is the RAC Cabrillo format. The files must be submitted in plain ASCII/Text format.
While the contest committee prefers Cabrillo formatted submissions, we will continue to accept electronic logs from older versions of contest software, but your file must be in ASCII/Text format and have all the required information. Given there are several free programs that support the RAC contests and generate an acceptable Cabrillo entry, we encourage you to seek out one of these programs. The RAC Cabrillo format is described and its detailed layout is shown on the RAC website at http://www.rac.ca/en/rac/programmes/contests.

Electronic logs that do not have a complete Cabrillo header should provide a summary sheet with the same information as shown for the paper log entries. The standard summary sheet provided by the typical logging program is generally acceptable, but you should confirm that it contains the same information as shown for paper log entries.

A properly filled out Cabrillo header section will be a sufficient substitute for a summary sheet for logs submitted in that format. Please ensure that you review the header for accuracy and that it is completely fill out. Name your file with your Call Sign and the file extension .LOG (e.g., yourcall.LOG). If you email your log, please send the file(s) as attachments. Do not paste the log file into the text of your message as there may be issues with the formatting making it difficult to properly extract the log. Large files may be zipped if necessary.

If you need help with preparing or emailing your log, please contact Bart Ritchie at <ve5cpu@...>.

For the previous year's contest results, visit the RAC website (www.rac.ca) in the contesting section.

http://tomita.web.id/sesuatu-dari-puing-radio-malabar-bagian-4-akhir/
Sesuatu dari Puing Radio Malabar (Bagian 4 – Akhir)

Akhirnya saya harus menuliskan bagian akhir dari tulisan berseri ini. Dari sejak selesai saya tulis Bagian 3, sudah ada banyak perkembangan tentang apa yang saya lakukan tentang Radio Malabar. Yang terpenting dari semuanya adalah, saya sudah membuat sebuah blog baru yang isinya khusus tentang segala sesuatu yang berkaitan dengan radio bersejarah ini. Tempatnya adalah di http://radiomalabar.wordpress.com/ Harap maklum, isinya saya tulis 100 % dalam bahasa Inggris karena memang saya ingin menjangkau audience yang lebih luas. Sejauh ini sudah ada 17 entri tulisan.
Tidak hanya blog. Kalau diperhatikan di salah satu halaman blog itu, ada foto saya selesai makan siang dengan Pak Djaka Rubianto, mantan kepala bagian teknik stasiun Radio Rancaekek, yang ketika itu berperan sebagai stasiun penerima dari apa yang dikirimkan oleh Radio Malabar. Kemudian Pak Her Suganda, wartawan senior Harian Kompas yang juga pemerhati masalah sejarah Bandung dan sekitarnya, juga pernah menulis buku yang salah satu bagiannya adalah tentang Radio Malabar. Singkat cerita, ternyata sebelum ini pernah diadakan sebuah diskusi terbatas tentang Radio Malabar yang dihadiri oleh para mantan pejabat PT. Telkom. Ketika itu Pak Djaka hadir dan menuliskan laporannya di blognya. Dari blog itulah saya kenal Pak Djaka, dan akhirnya kopi darat. Dari kopi darat itulah saya baru tahu ternyata keberadaan Radio Malabar punya kaitan historis dengan PT. Telkom.
Lebih dari itu. Dari pertemuan yang bersamaan dengan makan siang itu tercetus pula gagasan untuk melakukan sesuatu ketika Radio Malabar tahun 2013 nanti berusia 90 tahun. Persisnya adalah tanggal 05 Mei 2013. OK, penentuan tanggal itu barangkali tidak sepenuhnya ideal. Kalau tanggal itu yang diambil, berarti awalnya adalah pada 05 Mei 1923, ketika Radio Malabar diresmikan oleh Dirk Fork. Padahal, awal pembangunan pemancar radio ini sudah dimulai tahun 1917. Pertimbangannya adalah, karena pada tanggal itu (pernah) ada momentum. Itu saja.
Kalau 90 tahun itu diperingati, apa signifikansinya ? Ini pertanyaan pentingnya. Tapi penting juga untuk dipertanyakan pula, penting untuk siapa ? Dengan tidak berusaha menjawab pertanyaan yang kedua, saya akan menuliskan sejumlah kemungkinan mengapa itu penting, atau sekurang-kurangnya, bisa punya makna :
1. Melengkapi catatan sejarah perkembangan radio dunia Seperti yang saya tulis di blog Radio Malabar itu, sejarah perkembangan radio ternyata banyak melewatkan apa yang ada di kawasan Gunung Puntang (lokasi Radio Malabar). Padahal yang terjadi dulu merupakan upaya awal komunikasi yang melintasi benua, dan dilibatkan penggunaan perangkat dan kelengkapan yang gigantik. Sangat layak untuk dicatat dalam sejarah dunia,
2. Awal mula kegiatan Amatir Radio di Indonesia
Tidak dapat dipungkiri, kegiatan amatir radio di Indonesia diawali oleh kegiatan amatir radio yang dilakukan oleh orang-orang Belanda di Indonesia. Seperti yang saya tulis pada bagian ke 3, besar kemungkinan Johannes Cornellius de Groot adalah orang pertama yang menunjukkan aktifitas itu untuk pertama kalinya. Dengan tidak melihat siapa Belanda, siapa Indonesia, … saya ingin menekankan bahwa fenomena keamatirradioan itu dimulai ketika ia sebagai pribadi melakukan eksperimen radio.
Sebagai sebuah organisasi, bukankah penting untuk mencatat awal dari adanya fenomena yang

menjadi ciri khas organisasi itu di negara ini ? Sekali lagi, dengan tanpa melihat siapa Belanda (yang ketika itu adalah penjajah) dan siapa Indonesia (yang ingin memerdekakan diri dari penjajah).
3. Sebuah titik ujung sejarah dari keberadaan PT. Telkom di Indonesia
Saya sendiri masih kurang jelas persisnya seperti apa. Tapi saya yakin sekali Pak Djaka Rubianto bisa menjelaskan ini. Sekilas saya mendengar berkaitan dengan lembaga yang disingkat PTT. Barangkali akan saya uraikan kelak di blog Radio Malabar.
Saya bilang “titik ujung sejarah” karena saya tidak bisa membayangkan sebelum Radio Malabar ada apa lagi yang mungkin berkaitan dengan PT. Telkom. Saya sekarang ini malah jadi penasaran, apakah ada buku yang menguraikan sejarah PT. Telkom ? Dan apakah di dalamnya ada tentang Radio Malabar ?
4. Momentum revitalisasi kawasan yang dimiliki PT. Perhutani sebagai obyek wisata Dengan cara apa khalayak secara luas bisa memiliki apresiasi tentang sejarah Radio Malabar ? Saya yakin salah satunya adalah dengan lebih mempertegas keberadaannya sebagai objek wisata. OK, sekarang ini memang sudah menjadi objek wisata, tapi seberapa optimalkah kawasan itu dieksplorasi sebagai objek wisata ? Terutama bila dikaitkan dengan sejarahnya ? Ada beberapa gagasan tentang ini dan itu akan dicoba diwujudkan melalui peringatan 90 tahun itu.
5. Peluang pemberdayaan masyarakat sebagai komunitas pendukung situs
Tidak ada sebuah objek wisata yang akan sustainable tanpa adanya pengelolaan terhadap masyarakat sekitar (community relations). Masyarakat sekitar kawasan Gunung Puntang harus diberdayaan sebagai sub-sistem yang akan menyangga keseluruhan ekosistem kepariwisataan di Gunung Puntang, yang point of interest-nya sebenarnya bukan hanya Radio Malabar saja. Ini juga sudah menjadi bagian pemikiran dalam rangka peringatan 90 tahun itu.
Sekurang-kurangnya ada lima hal itu, dan kelimanya akan saya uraiakan lebih lanjut tidak di sini, tapi di blog Radio Malabar.
Selain bertemu dengan pak Djaka dan Pak Her Suganda, saya juga dikenalkan via email (hmmm, saya lupa lagi persisnya gimana) ke seorang Jerman yang sudah menjadi warga negara Indonesia (karena menikah dengan orang Indonesia). Dia adalah (ternyata!) yang membuat kata-kata untuk plang Radio Malabar yang saya coba transkripsikan di bagian 2 seri tulisan ini. Namanya adalah Gamal Sugiono. Sekarang ia masih ada di Jerman, dan berencana untuk tinggal di Jogja mulai Agustus 2012. Ia ternyata punya minat yang besar juga untuk Radio Malabar. Saya sudah berkali-kali berkorespondensi via email. Beliau ini banyak mengkritik tulisan saya, … tapi kritiknya belum sempat saya masukkan ke tulisan. Barangkali nanti saya akan menuliskannya di bagian komentar saja.
Ada banyak detil lain sebenarnya. Tapi di blog ini akan saya cukupkan sekian. Saya akan teruskan lagi di blog Radio Malabar: www.radiomalabar.wordpress.com. Silahkan anda memberi komentar di sana. Dalam bahasa Indonesia pun tidak apa-apa. Terima kasih untuk perhatiannya sejauh ini.

http://www.cwops.org/index.html

The CW Operators's Club

Welcome !
Welcome to CWops! Our goal is to bring together Amateur Radio operators who enjoy communicating by Morse Code (CW). CWops encourages the use of CW in Amateur communications, and it supports CW activity through planned events. CWops promotes goodwill among Amateurs throughout the world, and it fosters the education of young people and others in matters related to Amateur Radio.

CWops is International in scope, membership and management. Its focus is the use of CW, whether for contesting, DXing or ragchewing. Moreover, it supports every form of sending -- if it's CW, CWops supports it!

The procedure for becoming a member is explained on the Membership page. See the Bylaws and the Articles of Incorporation for the details of how the Club is administered, its goals, and membership process.

To find CWops friends on the bands, look "on the 8's": CWops Primary Frequencies (MHz): 1.818, 3.528, 7.028, 10.118, 14.028, 18.078, 21.028, 24.908, and 28.028

CU on the bands soon!

CWops Awards
There are several awards available for contacting a certain number of different club members. Qualifying CW contacts can be made on any ham band at any time. Contacts during any contest will qualify as well as any QSOs made in non-contest time periods. These awards will be available on our web site and are individually administered using the honor system. Stations will be invited to post their cumulative totals to the appropriate listing on our web site.
> * Free programs are now available for download to make tracking for these awards easy.
> * You can print out your own award in PDF format, suitable for framing.
> * For more information see "Awards" in the Members Only section HereCWops ACA – This award is the Annual Competition Award. Only one contact per member per calendar year can be counted for this award. Contacts can be made on any amateur band. The award will be offered at five levels in 2010: ACA-100, ACA-250, ACA-400, ACA-600, and ACA-750.
>
>CWops CMA – This award is the Cumulative Membership Award. This award recognizes the total of the number of members contacted on each amateur band, beginning January 3, 2010 and continuing in perpetuity. Initially, we will recognize accomplishments at these levels: CMA-250, CMA-500, CMA-750, CMA-1000, CMA-1250, and CMA-1500.
>
>CWops WAS AWARD – This is the club Worked All States award for working the U.S. states. Every contact must be made with an active member of the club. Feel free to use all amateur bands. This is a once in a lifetime award; however, you can also add single band endorsements to your CWops WAS Award.

>
>CWops WORKED ALL EUROPE AWARD – This is the club award for contacts with the European countries. Each contact must be with an active club member. One contact per country is counted for this award, and every ham country in Europe counts. This award is available for ALL BANDS, or for any single band. There will be 2 levels of accomplishments recognized: QSOS with 40 European Countries and with ALL European countries (presently the WAE List is 72 countries). We will publish an annual standing of stations with their number of European Countries worked on our web site. Members will be directed when and where to submit information.
>
>CWops DX AWARD – This award is for working CWops members in all of the DXCC countries. One contact per country is counted for this award. The award will be awarded for ALL BANDS, or for any single band. This award will be available at levels of 50 and 100 countries worked, with endorsements at 25 increments thereafter. We will publish an annual standing of stations with their number of DXCC Countries worked on our web site. Members will be directed when and where to submit information.
The 2012 CW Open - Sponsored by THE CW OPERATORS' CLUB

CWops is grateful to Icom America for sponsoring the CW OPEN awards

CWops - CW OPEN COMPETITION
Scheduled for September 1 and 2, 2012

Background: The CWops club has sponsored fun, monthly one hour competitions at times thought to be optimum for members in ITU Regions 1, 2, and 3. For more information, seehttp://www.cwops.org/onair.html. The CW OPEN event (CWO) is aimed at the same idea, but expanded to be a more serious, annual competitive event.Object: Work as many CW stations as possible within the limited time frame(s). Each station may be worked once per band. There are three separate competitions at three separate times -- each is called a "Session". Entry can be made to any or all of these competitions. Each competition is scored separately. Entry into multiple Sessions will be added together for a combined score in a separate, additional aspect to this competition.
>Dates: September 1/2, 2012Sessions and Times:
>
>
>Session Date Time
>1 September 1 1200-1559Z
>2 September 1 2000-2359Z
>3 September 2 0400-0759Z
>
>
>
>Exchange: Sequential Serial Number and Name.
>QSO Points: One point for every valid two way QSO with correct exchange of information. May contact for points only once per band, per time segment. Note: do not remove dupes from your log.
>Multipliers: Each different call sign is a multiplier the first time it is worked on any band. Note that a busted call sign is not a multiplier.
>Score is simply the total QSO points times the total number of multipliers in a given time period. Note: If more than one time period is entered, a combined score totaling all time period scores will be reported separately in the results.

>Mode: CW only
>Bands: 160, 80, 40, 20, 15, 10 meters
>Class Entry: Single Operator only. Indicate power level of QRP, Low, or High;
>QRP is 5W or less; Low is 100W or less; High is any legal power above 100W
>Packet, Skimmer, and Reverse Beacon systems are allowed.
>Team Competition:
>1. Teams with up to ten members can be organized and compete against each other.
>2. There is no geographical restriction for a team.
>3. A Team consists of TWO or more operators.
>4. Team score is the sum of all team members' scores in all Sessions that they choose to enter.
>Example 1: Team A enters Session 1 + 2 + 3. Total Score is sum of all 3 Sessions.
>Example 2: Team B enters Sessions 1 and 3 only. Total Score is sum of just those two Sessions.
>Note: Since there is only ONE overall Team Competition winner for the entire contest, those who enter ALL 3 Sessions obviously have a much better chance of winning.
>Log Submission:
>1. All logs must be in Cabrillo format. See FAQ below for details.
>2. All logs must be submitted no later than 2400Z on 5 October 2012.
>3. You must submit a CWO Cabrillo log for each Session. Don't forget to start
>4. Name your logs for each Session by using 1, 2, or 3 after your callsign.
>
>Sample Log Names for K3XYZ:
>Session 1. K3XYZ1.log
>Session 2. K3XYZ2.log
>Session 3. K3XYZ3.log
>
>5. Logs must be submitted in electronic format. A customized log submission form for CWO is available here:
>http://www.b4h.net/cwops/
>Click on "Log Submission" and you will be taken to a Log Submission page, which you can use in either of two ways.
>
>Method A. Click "Browse": Let's you find and upload your Cabrillo file directly.
>
>Method B. Paste Area: You can copy the information from your CWO Cabrillo file, and paste it directly into the text area shown.
>After using either Method A or Method B mentioned above, simply click "Submit Log".
>6. Please submit separate logs for each Session -- do not try to combine them into one for submitting purposes.
>7. After the contest period ends, you can verify that your log has been received by returning to this page and clicking on "Logs Received".
>http://www.b4h.net/cwops/
>8. If you have any problems or questions, please contact us at: cwo@...
>
>Logging Software: Several common contest loggers have been tested and approved for CW Open.

>YFKtest by DJ1YFK; a Linux/Unix logger http://fkurz.net/ham/yfktest.html
>Refer to the Software Page for more information.
>Awards: (Sponsored by ICOM America)
>Trophy for 1st place in each time period.
>Plaque for 1st place in each power level in each time period
>Trophy for over all combined score of all three time periods.
>Plaque for 1st place for each power level in the combined score group.
>Note: if the same entrant wins multiple awards, they may be combined.
>Certificates for achieving more than 100 QSOs in any or all time periods.
>FAQ:
* Log format should be Cabrillo v3.
* QSO template is similar to NA Sprint, but without the QTH columns:
------info sent------------ -------info rcvd-----------
* QSO: freq mo date time call nr ex1 call nr
* QSO: ***** ** yyyy-mm-dd nnnn ********** nnnn aaaaaaaaaa ********** nnnn aaaaaaaaaa
* QSO: 14042 CW 2011-09-20 0000 N5TJ 1 JEFF N6TR 1 TREE
* There are no time off periods.
* Serial numbers should start with 001 at the beginning of each time period and not accumulate over multiple time periods.
* At present, there are no multi-operator categories.
* While Packet (and similar 'help' such as skimmer and/or reverse beacon networks) are allowed, please indicate use of such 'help' on a voluntary basis in the log. Entering as "S/O Assisted", or any multi-operator category will be taken to mean S/O with packet. Results may indicate this status.
* All entries are single operator only. No assistance by another operator is allowed, locally or remotely, except for the use of Packet which must be a cluster arrangement providing spots to others besides yourself. Packet data may be obtained by any means (telnet, VHF, etc)
* Duplicate contacts on the same band in the same time period count for zero points. Do not remove such contacts from your log. There is no penalty for duplicate contacts.
* Only one transmit signal allowed at any time.
* Multiplier: The first time you work a particular call sign, that is a multiplier. If you then work the same call sign on a different band, it adds to your points but is not a new multiplier. Thus, the total number of multipliers in your log is the number of different calls signs logged. If any call is determined to be busted (wrong copy) during log checking, that multiplier is removed.

YBDXC pada JakFox 2012, Lapangan IRTI-MONAS, 23-24 Juni 2012

Karsono Suyanto - YBØNDT
YBDXC#008

Event JakFox adalah kegiatan field day yang rutin di selenggarakan oleh Orari Daerah DKI Jakarta dalam rangka memperingati Hari Ulang Tahun DKI Jakarta. Tempat pelaksaaan pun masih seperti tahun-tahun sebelumnya yaitu di Lapangan IRTI MONAS.

Pada event tahun 2012 ini, YBDXC turut ambil bagian meramaikan event tersebut dengan membuka stand utk kegiatan eyeball qso, private workshop tentang logger,software contest maupun LoTW.

Tugu Monumen Nasional (Monas dari stand YBDXC)

Jam 09:00 WIB saya sudah tiba di lokasi. Stand YBDXC bersebelahan dengan stand OM Taufan YBØAI. Om Taufan YB0AI hampir tak pernah absen membuka stand pada acara-acara hamfest maupun field day. Stand Om Taufan sangat menarik, karena selain menjual peralatan komunikasi seperti radio HF, jumper Teflon, microphone homebrew, tuner, bracket antenna, antenna mobile dan antenna untuk base station.

Kali ini ada hasil karya om Taufan yang baru yaitu Antenna Log Periodic. Antena made in YBØAI turut serta di pamerkan pada acara ini. Dan Om Taufan pun dengan senang hati memasang radio HF ICOM IC 718 pada stand YBDXC. Antena hanya terpasang pada ketinggian kurang lebih 6 Meter.

Inilah Stand YBDXC, Om Djoko YB1TJ sudah tiba di lokasi .

Om Yongki YBØCOU, Om Djoko YB1TJ dan Om Taufan YBØAI memasang IC 718 pada stand YBDXC, Antena yang di pergunakan Log Periodik 5 Band (14 Mhz, 18Mhz,21Mhz,24Mhz, dan 28Mhz)

Om Taufan YB0AI sedang dial Frekwensi

Saya dengarkan pada band 15 M, sangat jelas sekali terdengar station-station dari JA,BD,HL yang sedang melakukan Dx ing, antenna log periodik buatan Om Taufan YB0AI sangat baik receive nya.

Hari semakin siang, satu persatu kawan-kawan member YBDXC hadir di stand. Yang surprise buat saya adalah kehadiran Om Budi YF1AR. Spesial untuk Om Budi YF1AR terima kasih sudah menepati janjinya. Hehehehehehehhehe

Om Budi YF1AR dan Om Yongki YBØCOU. Om Yongki YB0COU terima kasih yah Roti nya. Enak sekali lho.

 Om Djoko YB1TJ sedang menginstall Logger HRD di notebook nya Om Yongki YB0COU.

Om Har YBØMWM dan Uncle Bam YBØKO mampir juga di stand YBDXC

Om Hen YCØQR dan Om Mustafa YCØISE hadir juga di JakFox, membawa notebooknya untuk di install kan Logger32.

Suasana penuh tawa canda, saat menginstall Logger 32 pada notebook nya Om Hen YC0QR. Hehehehhehe

Menjelang petang Om Hotang YCØIEM juga menyempatkan diri untuk hadir di stand YBDXC

Saya pun berjalan mengelilingi arena JakFox, saya juga sempat mengunjungi stand ORARI DKI Jakarta

Inilah Stand Orari DKI Jakarta. Wow Ternyata ada juga spanduk team contest saya YEØX, dan ada juga sebuah mobil Land Rover untuk mendukung komunikasi jika terjadi bencana.

Karena penasaran saya hampiri mobil tersebut . Wow ternyata di dalamnya terdapat radio komunikasi repeater yang siap di pergunakan sewaktu-waktu bila terjadi bencana.

Ada juga gandengan mobile yang di lengkapi dengan tower. Jika terjadi bencana, maka gandengan tsb akan langsung bisa di operasikan ke lokasi bencana dan sangat menunjang dukungan komunikasi bencana.

Demo mendirikan tower . Luar biasa, dan sangat membantu pada saat terjadi bencana.

Tidak lupa juga saya mampir di Stand 7.070 Mhz. Ada Mbak Hani YCØUI di sana.

Mampir dahulu sebelum pulang. Nah ini dia… lomba The best mobile antenna ukuran 2x5/8 lamda. Masih ramai dan seru.

Hari sudah semakin gelap, lampu Monumen Nasional pun sudah menyala, waktunya saya berpamitan dengan teman-teman semua. Sungguh sangat berkesan Jakfox 2012 kali ini.

DXNL 1786 - Jun 27, 2012

1A, SOVEREIGN MILITARY ORDER OF MALTA
An international team of 13 operators will be active as 1A0C on HF and 6m from July 1-4. Special attention will be paid to non-European stations. With this campaign they intend to collect donations for the aid programs of the "Order of Malta's Italian Relief Corps" (CISOM). QSL via OQRS, LoTW. See also: http://www.1a0c.com

5B4, CYPRUS, AS-004
Some members of the Paphos branch of the "Cyprus Amateur Radio Society" plan to show up as P3EU to mark the first Cypriot presidency of the European Union from July 1 until Dec 31. QSL via 5B4AHO.

CT, PORTUGAL, EU-150
Several members of the "Portuguese DX Group" (GPDX) will be active as CT7/homecalls from Insua Island (EU-150, DIP MI-001, PIP NT-001, DCFP F-006, DCP CVC-046 and CVC-047, DMHP VC-017 and VC-061, DFP FM-101 DMP 1602, DDFP CMN-12) during the month of July. The team with German, Portuguese and Swiss OPs will be active in all modes on all bands. They will join the RSGB IOTA Contest (Jul 28/29) signing CR6W in the multi op/low power category. Some OPs will stay a little longer on the island and plan to activate the lighthouse ARLHS POR-028, WLOTA 2869. QSLs for CR6W via CS5DX. All other QSLs via the op's homecalls. See also: http://gpdx.netpower.pt and http://www.to-mk.com/neu

E5, SOUTH COOK ISLANDS
Andy,AB7FS, will be QRV again in holiday style signing E51AND from Rarotonga (OC-013) between Jul 2 and Aug 25. He is a member of the "Straight Key Century Club" (SKCC # 7723) and hopes to meet other SKCC members in CW on 14050 kHz. He has been spotted also in the ANZA net, daily at 0515 UTC on 14183 kHz. QSL via homecall.

Murray,ZL1MGA, is working as E51MGA in SSB on 20m. His length of stay is unknown. QSL via homecall.

ES, ESTONIA
Eddie,ES2TT, will use the special callsign ES2012ABCS on the occasion of the "American Beauty Car Show" from July 1-8. Activities will take place in SSB/CW/PSK on 40m-6m from his home QTH Keila (Loc KO29eh) and also from the the exhibition in Haapsalu. QSL via ES2TT.

F, FRANCE
From Jul 2-8 the "Association des Radio Amateurs de la Cote d'Emeraude" (F4KIR) will activate the special event station TM0TSR from Saint-Malo on the occasion of the annual Tall Ships Races. QSL via F4FJH.

See also: http://www.tm0tsr.fr

G, ENGLAND, EU-005
On the occasion of the "Armed Forces Day" the special event station GB0AFD announced to be active on July 1. They would be very pleased to make contacts with other members of RNARS, RAFARS or the "Royal Signals Association". QSL via G4KLF.

Members of the "Milton Keynes ARS" will be active on the bands with their club callsign GB2BP from Jun 30 until Jul 1. QSL via bureau.
See also: http://www.mkars.org.uk

GJ, JERSEY, EU-013
Ralph,MJ/DL9MWG, and his brother MJ/DL3VJG will be QRV from the island of Jersey (EU-013) between Jun 27 and Jul 4. Since their holiday QTH has much space they will use several wire antennas on 160m-6m working in CW and SSB. QSLs via homecalls.

GM, SCOTLAND, EU-005
Paul,2E1EUB, is active as 2M1EUB on 160m-80m, in SSB on 2m and via AO-7 until Jul 9. QSL via 2E1EUB.

KH8, AMERICAN SAMOA, OC-045
Yuri,N3QQ, and Dick,N7RO, will stay in Pago Pago from Jun 27 till Jul 3 for talks with the US Fish & Wildlife Service (FWS) about a future DXpedition to the Rose Atoll (OC-190). They want to work as KH8PPG or KH8RRC during their spare time. QSL via N7RO or UA9OBA.

KP4, PUERTO RICO, NA-099
The "Puerto Rico Amateur Radio League" will activate the special event station K4O from the headquarters of the National Olympic Committee in San Juan between Jun 30 and July 1 to mark the journey of the Olympic flag over the Atlantic Ocean. QSL via NP3O.

LA, NORWAY
The special callsign LJ2T will be activated from the Telecommunications Museum of the Norwegian armed forces (Loc JP51ed) from June 28 until July 1. QSL via LA5EAA.

LY, LITHUANIA
The special event station LY200NB is QRV until June 30 and remembers the crossing of the river Nemunas by Napoleon 200 years ago.
QSL via LY5W, LoTW.

The 54th anniversary of "Sea of Peace" is celebrated in July and some HAMs are using the special callsign LY54SOP. QSL via LY5W, LoTW.
See also: http://www.amateurfunk-mvp.de/inhalte/sopdipl.htm

OE, AUSTRIA
The special event club stations OE2XXM and OE5XXM (special ADL: 553) will be QRV from the "XXVIII International Amateur Radio meeting in Gosau at Dachstein" on 2m/70cm/80m/40m (sometimes also on other bands)

from Jul 1-31. QSL via bureau.
They will be QRV again on the occasion of the "XXVI International Fall Fielddays in Gosau" from Sep 1-30.

OZ, DENMARK
The Danish EU presidency ends on June 30. For this reason the OPs of the special event station 5P12EU will start their final sprint on Jun 29/30 and want to give everyone the opportunity to work missing band points in CW/SSB, maybe also RTTY/PSK and even on 160m.
QSL requests via OQRS, LoTW, eQSL, direct QSL via OZ0J, own QSL not necessary. Logsearch and awards program at: http://www.5p12eu.dk

SM, SWEDEN
Grimeton Radio (SAQ) sends in CW on 17,2 kHz at 0900 UTC and 1200 UTC on Jul 1. SK6SAQ will be QRV on 14035 kHz (CW) and 14215 kHz (SSB) from 0915-1130 UTC and 1215-1300 UTC and in SSB on 3755 kHz at 0700 UTC.
Reports can be sent via e-mail to info@... or with a QSL via bureau to SK6DK. Direct mail should be sent to: Alexander Grimeton Veteranradios Vaenner, Grimeton 72, SE-432 98 Grimeton, Sweden.
See also: http://www.alexander.n.se

SP, POLAND
The scout station SN0HAL will be on the air from July 1 until Aug 31.
QSL via SP5ZIP.

TA, TURKEY
The "TC Special Wireless Activity Team" and the "Giresun Radio Amateurs and Nature Sports Club" are going to visit some lighthouses of the western Black Sea:

Jun 30-Jul 1	TC6BLH: Boztepe Lighthouse, Sinop
Jul 27-29	TC2KLH: Kefken Ada Lighthouse, Kocaeli
Aug 18-20	TC2ELH: Karadeniz Eregli Oeluece Lighthouse
Aug 30-Sep 2	TC6ILH: Inebolu Lighthouse, Kastamonu
Sep 1-2	TC2AL: Amasra Lighthouse
Sep 15-16	TC6GLH: Gerze Lighthouse, Sinop
Sep 29-30	TC2ZLH: Zonguldak Lighthouse

QSLs via TA1HZ. See also: http://www.tcswat.org/awards/WEBLOTA

TY, BENIN
Pat,LA0HF, will be QRV as TY2BP from Fidjrosse/Cotonou on 20m/15m/10m for up to 45 days starting on June 26. QSL via IK2IQD (direct).

VE, CANADA
On the occasion of the 200th anniversary of peace between Canada and the USA in July Dave,VE3FOI, will activate the special event station CG3B from Niagara-on-the-Lake in Ontario. He also plans to join the RAC Canada Day Contest from Fort George in Niagara-on-the-Lake on Jul 1
This special callsign should be reminiscent of General Isaac Brock.
QSL via VE3FOI. See also: http://www.nparc.on.ca/content/home

W, USA
The following special event stations are active during the

"Original 13 Colonies Special Event" from July 1-5:

Call	QTH	Manager
K2A	New York	KU2US
K2B	Virginia	KI4TYK, KJ4DHF
K2C	Rhode Island	KE1JF
K2D	Connecticut	K1PL
K2E	Delaware	NY3C
K2F	Maryland	KB3IFH
K2G	Georgia	K4PHE
K2H	Massachusetts	K2H
K2I	New Jersey	N2RO
K2J	North Carolina	KI4VBA
K2K	New Hampshire	W1STT
K2L	South Carolina	KG4RUL (d)
K2M	Pennsylvania	via OP homecall (d)

Apollo Memorial Program: ARI Tortona (IQ1TW) remembers the Apollo Program (1961-1972) in July. A special award has been launched as well.
See also: http://aritortona.xoom.it

Hawaii IOTA Club: The Hawaii IOTA Club (KH6RRC) was founded by David,AH6HY, Merle,K5MT, Yuri,N3QQ, Dick,N7RO, and Lanny,W5BOS. Their targets are the exploration and activation of new IOTAs in the Hawaii archipelago. Interested people are welcome to join.

IOTA QRGs: Klaus,DL7UXG, has published an overview of IOTA frequencies at:
http://www.mydarc.de/dl7uxg/dt/seite17.html

Webinar: A webinar focuses on the comparison of average stations with Big Guns on June 30, 1900 UTC. Registration is required at:
https://www2.gotomeeting.com/register/179521850

YASME: The new rules of the YASME award program have recently been published
http://www.yasme.org
http://www.yasme.org/news_release/2012-01-02.pdf

DXCC: TL8ES (2011) and TT8ES (2012) were approved for DXCC credit.

DXCC QRP: Since 2002 the ARRL publishes a non-endorsable QRP DXCC. Output power is limited to 5 watts and QSLs do not have to be submitted.
See also: http://www.arrl.org/qrp-dxcc

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 1 RAC Canada Day Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
AF-004, EA8, Canary Islands: Members of the "Grupo DX Teide" will activate the Teide volcano "La Rambleta" from Jun 30 till Jul 2. This expedition will take place on the occasion of the 5th anniversary of its initial activation. With a height of 3555m this is the highest mountain in Spain and situated in the Teide National Park (EAFF-075). The station will be set up 163m away from the top (DIE S-012, WLOTA 1276, DME 38026 Loc IL18qg). Jose Antonio,EA8ARG, Luis,EA8AY, Miguel Angel,EA8BRW, Francisco,EA8CW, and Angel,EA8BFH, will be active in CW/SSB/RTTY/PSK31 on 6m-80m signing EH8TID with 100 watts, verticals and wire antennas. QSL cards will be sent automatically for each QSO in the log. Otherwise QSL via EA8NQ (bureau/direct).
See also: http://www.eh8tid.tk and http://ea8arg.ure.es

AS-004, 5B4/ZC4, Cyprus Island: Cyprus has the EU presidency for the first time from July 1 until Dec 31, 2012. The special event station P3EU (WLOTA 0051) will be active on the bands for this reason.
QSL via 5B4AHO (bureau/direct).

AS-047, JA6, Daito Islands: Kan,JE1SCF/6, and Yoshi,JG4IQC/6, may show up from Daito Islands (WLOTA 0928, Okinawa prefecture, Nansei archipelago, Kyushu region) between June 27 and July 2. They will use an HB9CV and long wires in CW/SSB on 40m-10m. QSLs via homecalls (bureau/direct).

EU-014, TK, Corsica: Peter,TK/ON8VP, spends his holidays on Corsica (DIFM TK-001, MIA MCO-001, WLOTA 1390) from July 1-6. He wants to transmit from the vicinity of Porto Vecchio mainly in SSB/CW on 40m and 20m running 100 watts into a wire vertical. QSL via homecall.

EU-015, SV9, Crete: The special event station SX9S will be active from Jul 1 until Dec 31 marking the 50th anniversary of the national park "Samaria Gorge" (SVFF-011). QSL via SV9AUE (bureau/direct).

EU-024, IS0, Sardinia Island: Claudio,IS0/IZ0KRC, is staying on Sardinia (IIA SD-001, MIA MIS-035, WLOTA 1608, Loc JN40tg) until Jul 15. He works holiday style in SSB/CW/digital modes on the HF bands and 6m. QSL via homecall (Buero/direkt).
See also: http://iz0krc.jimdo.com/new-2012-sardinia-is

EU-076, LA, Lofoten Islands: The second leg of his journey leads Wolfgang,DM2AUJ, to the Lofoten Islands. He will be active on the HF bands signing LA/DM2AUJ from Jun 30 until Jul 10. QSL via homecall.

NA-008, VY0, Nunavut (Ellesmere Island) group: Rob,KC0VEU/VY0, is active on HF from Ellesmere Island (Loc EQ79AX) until July 5. Depending on the weather, he may also activate the PEARL laboratory (Polar Environment Atmospheric Research Laboratory) from the rare locator ER60 and ITU Zone 75. QSL via homecall (bureau/direct).

NA-103, VP2M, Montserrat: Gordon,G3USR, will show up from Montserrat signing VP2MSR from Jun 30 until Jul 9. He will be QRV on all HF bands but his

main focus is on 12m and 10m. If the 6m band opens to Europe he will be QRV there also. Graham,M0AEP is also active as VP2MDD at the same time. QSL for VP2MSR via G0USR and VP2MDD via M0AET.

EU-112, GM/MM, Shiant Islands: The DXpedition to the Shiant Islands (EU-112) announced in DXNL 1784 did not become active for unknown reasons.

IOTA Forum at the HAMRADIO fair in Friedrichshafen: The altered rules for the IOTA Contest 2012 were announed again at the IOTA Forum as well. The current rules can be found at:
http://www.rsgbcc.org/hf/rules/2012/riota.shtml

Further information was given about the design of the website, especially about the download of ADIF files.

Enrico,DL2VFR, reported about the activities of DM50IOTA within the IOTA marathon.

There were two interesting lectures by Nigel,G3TXF, and Jacques,F6BEE, about the VP6T (OC-044) and TX6T/p (OC-063) DXpeditions and also by Harry,RA3AUU, about the activation of Socotra (AF-028) as 7O6T and how difficult it was to obtain a license (over 2 years of preparation).

Following the ARRL decision to delete Malyy Vysotskiy Island (MVI) from the current DXCC list as of Feb 17, 2012, the IOTA Committee has considered action to be taken with regard to the future of EU-117. The presence of MVI in the IOTA list as a separate group was originally justified by its separate DXCC Entity status, so the island's deletion now called for action from IOTA. Faced with the prospect of a straight deletion of EU-117 and incorporation of the island into the EU-133 list the Committee formulated an alternative course of action involving the transfer of a section of the EU-133 'box' to EU-117, so avoiding deletion. It put the alternatives to an enlarged IOTA management group involving the 22 checkpoints for the first time. The consultation produced a clear majority in favour of splitting EU-133 to form two groups within the Gulf of Finland, North and South. The dividing line has been set at 60 degrees, 15 minutes north. The islands now constituting the two groups can be seen via the Search facility on this page. This change, which has an effective date backdated to Feb 17, 2012, means that past credits for MVI will continue to stand and new opportunities are created for contacting EU-117. Record-holders need take no action regarding existing credits as they will not be deleted as a consequence of this change, nor in the case of EU-133 credits need they be transferred unless requested. The Committee believes this to be an imaginative solution in the best interests of the programme.

Russian IOTA/Arctic stations/RFF areas(preliminary information):
Victor,RW0BG (RRC #869), and Igor Petlin plan a trip along the river Yenisei to the north from the beginning of July. They want to visit a few islands of the Russian Robinson Program: Kazan Island (RR-06-32), Mininskie Island (RR-06-33), Nikandrovskie Island (RR-06-34),

Deryabinskie Island (RR-06-35) and Island of Golchikha (RR-06-36).
They also plan to visit the Arctic station Sopochnaya. The second part
of their trip leads them to the Kara Sea to activate following islands:
Deer Island (RR-06-06) and Shokalski (RR-06-05, IOTA AS-083, RFF-030).
If possible, they want to join the IOTA contest as well. In the third
part, an activation of the IOTA group AS-109 is planned. Last not least
they plan to stay in the Tsentralnosibirsky (RFF-096) biosphere reserve
More detailed information will follow hopefully.

Lighthouse activities

GB0AFD LH 1841 Jul 1
K4O LH 2802 Jun 30-Jul 1
KH8PPG LH 4385 Jun 27-Jul 3
KH8RCC LH 4385 Jun 27-Jul 3

WFF activities

The collection of logs for the online query shall be simplified. In the
future, the logs will be collected nationally and then sent to Igor (EW4DX)
two or three times a month. This makes his work much easier.

SPFF Award Program: Information about the SP9YFF award can be found at:
http://www.sp9yff.pl/dyplom/ff.php?

YOFF: YO3FVR is working from the areas YOFF-149 and YOFF-381 from Jun 27-29.
He works with 5 watts. QSL via homecall (bureau/direct).

Gene Bartsch, WI7N

It takes more than a big-gun station to make a top operator.

The club meeting was nearly over, but Charlie hadn’t uttered a single word all evening. He was sitting in the rear of the room, which was also unusual. After 15 years of attending Lakes-of-Utah Contest Club meetings with him, I knew he always arrived early and raced inside as soon as the doors opened to get a front-row seat. The unhappy frown on his face worried me the most because Charlie was a cheerful person and that scowl was so out of character for him.

I casually glanced over my shoulder again. Charlie had been one of the club founders many decades ago, long before I’d even heard of ham radio, but I’d gotten to know him rather well during my time in the club. We’d been on several committees together and had both taken part in the same club DXpedition to Aruba. I’d never really thought about his age,

but he had to be in his late 70s or early 80s and maybe he was having health problems.

As soon as the club president slammed down the gavel to end the meeting, I hurried to the back of the room. Charlie was still seated and gazing quietly at his fellow hams, some of whom were already leaving while others had gathered in groups to chat. I dropped into an empty chair next to Charlie. “Hey, are you okay tonight?”

“I’m going to miss it,” he said.

“Miss what?”

“Ham radio contesting.”

“What do you mean? What’s wrong? You aren’t sick, are you?”

“No, but I guess I’m simply too old for the hobby.”

“What makes you say that?”

He gave a long sigh. “There was a 160 meter contest last weekend.”

“I knew about it, but I was out of town on a business trip and didn’t operate. How were conditions?”

He didn’t answer me but instead stared off into space. Finally he said, “I’ve been a ham for 64 years and have always enjoyed contesting. I have a modest station and didn’t need to rank in the top-tier to have fun. I always enjoyed giving points to other people and watching signal propagation change from hour to hour.”

“Me, too. So?”

“I had measles when I was a child and have been stone deaf in my left ear ever since.”

“I didn’t know that.” Bringing up his childhood illness wasn’t a good sign and I couldn’t imagine where he was taking our conversation.

Charlie nodded slowly. “It was before a measles vaccine had been developed. I was bedridden for weeks and nearly died. I eventually pulled through, but lost my hearing in one ear and always sat in the front row at club meetings because I couldn’t hear otherwise. I especially have difficulty when there’s background noise.”

“I always thought you sat in front because you were interested in the club programs and didn’t want to miss anything.”

He smiled. “That, too” he replied, “but the hearing in my good ear has worsened as I’ve gotten older, especially for sounds in the high-frequency range.”

“That happens with everyone. What does that have to do with you giving up contesting?”

Charlie frowned. “Something happened during the 160 meter contest last weekend that really bothered me.”

“What’s that?”

“I found a clear frequency and asked if it was in use. Nobody replied, so I called CQ and soon began working stations. I spent the next 2 hours operating on that same frequency.”

“Okay, so?”

“At about 3 AM, a weak signal popped out of the noise. The guy was slightly above my frequency, but we exchanged information and then I immediately called CQ again.”

I shuffled in my seat. “I still don’t understand the problem.”

Charlie rubbed his face and gazed into the distance. “The next morning I found an e-mail in my inbox from that weak station. The operator called me a jerk, a lid and several other names for calling CQ on his frequency. I looked up the guy in an online call book and it showed his photo. He’s a fairly young fellow, but a big-gun DXer with expensive modern equipment and incredible antennas.”

Charlie’s face had turned red and I thought he might be on the verge of a heart attack. “Easy, Old Man,” I said.

He nodded and took a deep breath. “I considered explaining to the guy that propagation had probably changed and caused interference when none had existed before, or maybe he could still hear me when I couldn’t hear him because his station was so superior to mine, but I didn’t do that.”

“What did you do?”

“I sent him an e-mail and apologized for being a jerk and a lid.”

“Oh, I wish you hadn’t done that.”

“Why not? I don’t want to ruin another ham’s fun and I don’t want to get more nasty e-mails like that one in the future. I’m probably just too old for contesting, especially with my bad hearing and modest station. I’m sure going to miss it, though. Maybe I should just quit ham radio completely.”

“Charlie, don’t do that! Lots of older hams have poor hearing and you know that people with average equipment can’t match the capabilities of those big-gun stations. Now, just imagine the impact that getting an e-mail like the one you received could have on a newcomer to ham radio, perhaps a young and inexperienced fellow trying contesting for the first time.”

“I hadn’t considered that. All I could think about was how much that e-mail had ruined my day.”

“And besides, that other guy doesn’t own the frequency. He could have moved if he was experiencing interference. If there was a jerk on the frequency, it wasn’t you.”

Charlie brightened a bit. “Hmmm.”

“And another thing — were you operating from your cabin in Wyoming during the contest?”

“No, I decided to stay at home this weekend and operate from here in Salt Lake City.”

“Charlie, you’re often the only Wyoming station I work during some contests and I know you provide that multiplier to many other people. You would sure be missed if you gave up contesting.”

He rubbed a hand slowly along his chin. “Well, I’ll consider that before making a final decision about quitting the hobby.”

“Please do and I sure hope you decide to remain active.”

During my drive home later that night I tried to imagine why any ham would want to ruin the enjoyment of Amateur Radio by anyone else. The ego, selfishness or anger issues that I mulled over as the possible answer reflected so poorly on the other operator that I finally gave up and concluded that his behavior was simply beyond my comprehension. Ham radio is a hobby that should be fun for allparticipants regardless of their equipment or skill level. If those unwilling to play nicely with others succeed in driving people away, the eventual result will be a few big-gun stations that quickly work each other and then spend the rest of the contest weekend calling CQ endlessly without being answered because the operators who might have replied have quit the hobby.

Saya kepikir betapa sedihnya dia (Charlie) yg sudah puluhan tahun aktif ikut kontes bukan utk cari kemenangan, tapi jadi galau/gundah merasa bersalah - sehingga sempat memutuskan utk berhenti dari hobinya itu.
Mungkin situasi emosi lawannya itu lagi tinggi/tegang karena sedang "berjuang" utk menang dalam kontes itu.

Mungkin ada kejadian yg mirip2 juga disini, tapi juga banyak kejadian yg sebaliknya.
Ada pemula yg galak kepada seniornya yg sudah tua, yg perangkatnya juga gak secanggih si pemula sehingga tidak zerobeat - tapi ada juga senior yg merasa lebih pengalaman, lebih jago dan meremehkan amatir radio pemula.

Sebenarnya ada keinginan juga untuk tahu siapa OM Charlie itu dan siapa yang telah kirim email itu, tapi gak mungkinlah diinformasikan.

It takes more than a big-gun station to make a top operator.

The club meeting was nearly over, but Charlie hadn't uttered a single word all evening. He was sitting in the rear of the room, which was also unusual. After 15 years of attending Lakes-of-Utah Contest Club meetings with him, I knew he always arrived early and raced inside as soon as the doors opened to get a front-row seat. The unhappy frown on his face worried me the most because Charlie was a cheerful person and that scowl was so out of character for him.

I casually glanced over my shoulder again. Charlie had been one of the club founders many decades ago, long before I'd even heard of ham radio, but I'd gotten to know him rather well during my time in the club. We'd been on several committees together and had both taken part in the same club DXpedition to Aruba. I'd never really thought about his age, but he had to be in his late 70s or early 80s and maybe he was having health problems.

As soon as the club president slammed down the gavel to end the meeting, I hurried to the back of the room. Charlie was still seated and gazing quietly at his fellow hams, some of whom were already leaving while others had gathered in groups to chat. I dropped into an empty chair next to Charlie. "Hey, are you okay tonight?"

"I'm going to miss it," he said.

"Miss what?"

"Ham radio contesting."

"What do you mean? What's wrong? You aren't sick, are you?"

"No, but I guess I'm simply too old for the hobby."

"What makes you say that?"

He gave a long sigh. "There was a 160 meter contest last weekend."

"I knew about it, but I was out of town on a business trip and didn't operate. How were conditions?"

He didn't answer me but instead stared off into space. Finally he said, "I've been a ham for 64 years and have always enjoyed contesting. I have a modest station and didn't need to rank in the top-tier to have fun. I always enjoyed giving points to other people and watching signal propagation change from hour to hour."

"Me, too. So?"

"I had measles when I was a child and have been stone deaf in my left ear ever since."

“I didn’t know that.” Bringing up his childhood illness wasn’t a good sign and I couldn’t imagine where he was taking our conversation.

Charlie nodded slowly. “It was before a measles vaccine had been developed. I was bedridden for weeks and nearly died. I eventually pulled through, but lost my hearing in one ear and always sat in the front row at club meetings because I couldn’t hear otherwise. I especially have difficulty when there’s background noise.”

“I always thought you sat in front because you were interested in the club programs and didn’t want to miss anything.”

He smiled. “That, too” he replied, “but the hearing in my good ear has worsened as I’ve gotten older, especially for sounds in the high-frequency range.”

“That happens with everyone. What does that have to do with you giving up contesting?”

Charlie frowned. “Something happened during the 160 meter contest last weekend that really bothered me.”

“What’s that?”

“I found a clear frequency and asked if it was in use. Nobody replied, so I called CQ and soon began working stations. I spent the next 2 hours operating on that same frequency.”

“Okay, so?”

“At about 3 AM, a weak signal popped out of the noise. The guy was slightly above my frequency, but we exchanged information and then I immediately called CQ again.”

I shuffled in my seat. “I still don’t understand the problem.”

Charlie rubbed his face and gazed into the distance. “The next morning I found an e-mail in my inbox from that weak station. The operator called me a jerk, a lid and several other names for calling CQ on his frequency. I looked up the guy in an online call book and it showed his photo. Ya OM Salmin,

Semoga ke depan semuanya akan semakin membaik - semua anggota ORARI bisa kompak saling bantu, salahsatunya adalah dengan bergabung dengan club - seperti YBDXC ini.

Yang lebih pengalaman akan menularkan ilmunya kepada yg masih greenhorn, yang pemula juga gak sungkan untuk bertanya.

Saya merasakan sekali manfaatnya YBDXC ini, saya banyak tanya apa2 yg saya belum tahu dan ingin saya ketahui dan alhamdulillah banyak info yg saya dapat.
Waktu JakFox kemarin, saya dibantu upload beberapa software dan set upnya seperti Logger32, HRD, N1MM oleh OM Karsono-YB0NDT, OM Djoko-YB1TJ, OM Budi-YF1AR.

http://www.arrl.org/too-old-for-contesting
Gene Bartsch, WI7N

It takes more than a big-gun station to make a top operator.

The club meeting was nearly over, but Charlie hadn't uttered a single word all evening. He was sitting in the rear of the room, which was also unusual. After 15 years of attending Lakes-of-Utah Contest Club meetings with him, I knew he always arrived early and raced inside as soon as the doors opened to get a front-row seat. The unhappy frown on his face worried me the most because Charlie was a cheerful person and that scowl was so out of character for him.

I casually glanced over my shoulder again. Charlie had been one of the club founders many decades ago, long before I'd even heard of ham radio, but I'd gotten to know him rather well during my time in the club. We'd been on several committees together and had both taken part in the same club DXpedition to Aruba. I'd never really thought about his age, but he had to be in his late 70s or early 80s and maybe he was having health problems.

As soon as the club president slammed down the gavel to end the meeting, I hurried to the back of the room. Charlie was still seated and gazing quietly at his fellow hams, some of whom were already leaving while others had gathered in groups to chat. I dropped into an empty chair next to Charlie. "Hey, are you okay tonight?"

"I'm going to miss it," he said.

"Miss what?"

"Ham radio contesting."

"What do you mean? What's wrong? You aren't sick, are you?"

"No, but I guess I'm simply too old for the hobby."

"What makes you say that?"

He gave a long sigh. "There was a 160 meter contest last weekend."

"I knew about it, but I was out of town on a business trip and didn't operate. How were conditions?"

He didn't answer me but instead stared off into space. Finally he said, "I've been a ham for 64 years and have always enjoyed contesting. I have a modest station and didn't need to rank in the top-tier to have fun. I always enjoyed giving points to other people and watching signal propagation change from hour to hour."

"Me, too. So?"

"I had measles when I was a child and have been stone deaf in my left ear ever since."

"I didn't know that." Bringing up his childhood illness wasn't a good sign and I couldn't imagine where he was taking our conversation.

Charlie nodded slowly. "It was before a measles vaccine had been developed. I was bedridden for weeks and nearly died. I eventually pulled through, but lost my hearing in one ear and always sat in the front row at club meetings because I couldn't hear otherwise. I especially have difficulty when there's background noise."

"I always thought you sat in front because you were interested in the club programs and didn't want to miss anything."

He smiled. “That, too” he replied, “but the hearing in my good ear has worsened as I’ve gotten older, especially for sounds in the high-frequency range.”

“That happens with everyone. What does that have to do with you giving up contesting?”

Charlie frowned. “Something happened during the 160 meter contest last weekend that really bothered me.”

“What’s that?”

“I found a clear frequency and asked if it was in use. Nobody replied, so I called CQ and soon began working stations. I spent the next 2 hours operating on that same frequency.”

“Okay, so?”

“At about 3 AM, a weak signal popped out of the noise. The guy was slightly above my frequency, but we exchanged information and then I immediately called CQ again.”

I shuffled in my seat. “I still don’t understand the problem.”

Charlie rubbed his face and gazed into the distance. “The next morning I found an e-mail in my inbox from that weak station. The operator called me a jerk, a lid and several other names for calling CQ on his frequency. I looked up the guy in an online call book and it showed his photo. He’s a fairly young fellow, but a big-gun DXer with expensive modern equipment and incredible antennas.”

Charlie’s face had turned red and I thought he might be on the verge of a heart attack. “Easy, Old Man,” I said.

He nodded and took a deep breath. “I considered explaining to the guy that propagation had probably changed and caused interference when none had existed before, or maybe he could still hear me when I couldn’t hear him because his station was so superior to mine, but I didn’t do that.”

“What did you do?”

“I sent him an e-mail and apologized for being a jerk and a lid.”

“Oh, I wish you hadn’t done that.”

“Why not? I don’t want to ruin another ham’s fun and I don’t want to get more nasty e-mails like that one in the future. I’m probably just too old for contesting, especially with my bad hearing and modest station. I’m sure going to miss it, though. Maybe I should just quit ham radio completely.”

“Charlie, don’t do that! Lots of older hams have poor hearing and you know that people with average equipment can’t match the capabilities of those big-gun stations. Now, just imagine the impact that getting an e-mail like the one you received could have on a newcomer to ham radio, perhaps a young and inexperienced fellow trying contesting for the first time.”

“I hadn’t considered that. All I could think about was how much that e-mail had ruined my day.”

“And besides, that other guy doesn’t own the frequency. He could have moved if he was experiencing interference. If there was a jerk on the frequency, it wasn’t you.”

Charlie brightened a bit. “Hmmm.”

“And another thing – were you operating from your cabin in Wyoming during the contest?”

“No, I decided to stay at home this weekend and operate from here in Salt Lake City.”

“Charlie, you’re often the only Wyoming station I work during some contests and I know you provide that multiplier to many other people. You would sure be missed if you gave up contesting.”

He rubbed a hand slowly along his chin. “Well, I’ll consider that before making a final decision about quitting the hobby.”

“Please do and I sure hope you decide to remain active.”

During my drive home later that night I tried to imagine why any ham would want to ruin the enjoyment of Amateur Radio by anyone else. The ego, selfishness or anger issues that I mulled over as the possible answer reflected so poorly on the other operator that I finally gave up and concluded that his behavior was simply beyond my comprehension. Ham radio is a hobby that should be fun for allparticipants regardless of their equipment or skill level. If those unwilling to play nicely with others succeed in driving people away, the eventual result will be a few big-gun stations that quickly work each other and then spend the rest of the contest weekend calling CQ endlessly without being answered because the operators who might have replied have quit the hobby.

WCA - World Castles Award

The International Award program “World Castles Award - WCA” devoted to work on the air from castles, fortresses and other fortification works. It's founded on January, 14th, 2009 by group of Russian radiohams, members of RZ1CWC Radioclub under the aegis of the International Organization “Castles On The Air - COTA”.

The program goal is consolidation of radiohams from different countries for activation and popularization of historical objects – castles, fortresses etc all over the world, learning and maintenance of the historical Heritage in our countries including monuments and architectural constructions relating to fortification.
World Castles Award program includes 11 diplomas, 1 award plate and E-Awards series for QSOs/SWLs with radiostations working from world castles, fortresses etc all over the world.

At present time World Castles Award program cooperates and keeps up a friendly relations with such well-known national castles' and fortresses' award programs as:
- “Belgium Castles Award” (BCA), Belgium
- “Castles and Palaces of Belarus Award” (CPBA), Belarus
- “Castles and Stately Homes On The Air” (CASHOTA), England
- “Castles and Stately Homes On The Air - Ireland” (CASHOTA-EI), Ireland
- “Castles and Stately Homes On The Air - Northern Ireland” (CASHOTA-NI), Northern Ireland
- “Castles On The Air - Croatia” (COTA-9A), Croatia
- “Castles On The Air - Netherland” (COTA-NL), The Netherlands
- “Castles On The Air - Russia” (COTA-RU), Russia
- “Castles On The Air - Kazakhstan” (COTA-UN), Kazakhstan
- “Castles On The Air - Latvia” (COTA-YL), Latvia
- “Castles On The Air Team - Germany” (COTA-DL), Germany
- “Czech Castles Award” (CCA), Czech Republic
- “Diploma Castillos de Catalunya” (DCC), Spain
- “Diploma Castillos de Espana” (DCE), Spain
- “Diploma Castillos de Espana 1.0” (DCE 1.0), Spain
- “Diploma dei Castelli d’Italia” (DCI), Italy
- “Diploma dos Castelos e Fortalezas de Portugal " (DCFP), Portugal
- “Diploma Monumentos Historicos Portugueses” (DMHP), Portugal
- “Diplome des Chateaux de la Suisse-Romande” (DCSR), Switzerland
- “Diplome des Forts et Chateaux de France” (DFCF), France
- “Hungarian Castle Series” (HCS), Hungary
- “Imperios do Divino Espirito Santo” (IDES), Azores islands, Portugal
- “Le Diplome des Chateaux Suisse” (DCS-SSD), Switzerland
- “Slovakia Castles Award” (SCA), Slovakia
- “Slovenia World Castles Award” (S5 WCA), Slovenia
- “Romanian Historical Objectives” (RHO), Romania
- “Ukrainian Castles and Fortress Awards” (UCFA), Ukraine

- “Zamki w Polsce” (ZWP), Poland

Monuments and architectural constructions relating to fortification from countries of Asia, Europe and the South America are present in lists of Historical objects for World Castles Award program.
For the first time the diploma relating to fortification has appeared more than 10 years ago. Now this theme becomes more and more popular. Even more often we hear on the air amateur radio stations working from fortresses. Diplomas, clubs, web-sites of fortresses radiohams-activators are created.

In April, 2009 the official site of World Castles Award program was created. The main goal of them are:
- Information support and announcement of forthcoming expeditions;
- Selection of radio amateur diplomas, references relating to theme of fortification;
- Publication of articles and photoreports about expeditions.
We invite to cooperation the radio amateur organizations, radioclubs, radiohams of all countries to accept active participation, express an interest to historical places within the limits of our hobby. To learn history, to receive good unforgettable impression of work on the air from world fortresses!
Welcome!
de RZ1CWC team.

73 & 11! from Castles and Fortresses in the World!

WCA - World Castles Award. Rules

1. International Program “World Castles Award” (WCA) has been instituted by group of the Russian radiohams, members of Radioclub RZ1CWC, founders of "Castles On The Air-Russia” (COTA-Russia) award program.
2. The Purpose of the program is joining of efforts of radiohams in different countries for activation and popularization historical objects relating to fortification (fortresses, castles, forts e.t.c) and attract attention to historical and architectural heritage as well as visiting extant historical monuments all over the world .
3. Fortifications are military constructions and buildings designed for defense in warfare and military bases. Humans have constructed defensive works for many thousands of years, in a variety of increasingly complex designs.
The term is derived from the Latin fortis ("strong") and facere ("to make").Fortification is usually divided into two branches, namely permanent fortification and field fortification. Permanent fortifications are erected at leisure, with all the resources that a state can supply of constructive and mechanical skill, and are built of enduring materials. Field fortifications are extemporized by troops in the field, perhaps assisted by such local labor and tools as may be procurable and with materials that do not require much preparation, such as earth, brushwood and light timber, or sandbags.4. Contacts with objects of permanent fortification such as castles, fortresses, forts, fortified areas (including their parts like gate, walls, towers etc) having obviously expressed signs of preservation or anew restored are valid for WCA.Contacts with anew restored objects of field fortification such as stockaded towns, fortified ancient settlement etc are valid too.5. World Castles Award Program (WCA) includes following diplomas:WCA 50 - for QSOs with 50 any objects in the world;WCA 100 - for QSOs with 100 any objects in the world;WCA 200 - for QSOs with 200 any objects in the world;WCA 300 - for QSOs with 300 any objects in the world;WCA 400 - for QSOs with 400 any objects in the world;WCA 500 - for QSOs with 500 any

objects in the world;WCA 600 - for QSOs with 600 any objects in the world;WCA 700 - for QSOs with 700 any objects in the world;WCA 800 - for QSOs with 800 any objects in the world;WCA 900 - for QSOs with 900 any objects in the world.The Award certificate “World Castles Activator Award - WCAA” is issued for work on the air form historical objects (activation) such as castles, fortresses, forts etc.
WCA HONOUR ROLL PLATE - for QSOs with 1000 any objects in the world.
E-Awards:WCA - Hunter - for QSOs for each 500 objects in the world beginning with 1500.6. For WCA 50 – WCA 900 need to have QSOs with not less than 3 countries from any continents.For WCA HONOUR ROLL PLATE need to have QSOs with not less than 10 countries from 3 continents.For WCA-Hunter there are no limitations by number of countries and continents.7. Object activation has to take place on a distance no more than 1000 meters (1km) from the object.It is permissible to activate two and more objects if they are located on a distance no more than 1000 meters (1km) from each other.* The exception from basic rules about distance from historical object are the criteria which were established earlier by some national award programs (DFCF, DCI, ...etc)It is not necessary to notify WCA Committee about object activation.. WCA Committee can require necessary data (photos, videos etc) if some activation gives rise to doubt.8. For WCA activators any activated object is valid for all awards of WCA series (WCA-50, WCA-100 etc) on conditions that made not less than 50 QSO. In this case in application for the award need to mark activated objects.
9. Recommended frequencies for work on the air during expeditions on fortresses and castles.
CW : 3.531; 7.031; 10.121; 14.031; 18.081; 21.031; 24.911; 28.031
SSB : 3.731; 7.131; 14.251; 18.131; 21.251; 24.951; 28.551
10. On the base of S50CLX Cerkno Linux DX Cluster http://s50clx.infrax.si was created WCA cluster to inform about expeditions on fortresses and castles.
11. WCA Committee have made a decision to institute greeting code during working from fortification objects.Code "11" ("Two towers") means "best wishes form castles and fortresses of the world". Thanks a lot to Sergey Beresnev UR7UT (WCAG # 002) for idea.
12. The new system of WCA identification numbers is constituted since November, 1st, 2009. All objects (castles, fortresses, forts etc.) are identified by an alphanumeric designation. Letters indicates the country according to prefixes, for example: DL - (Germany), I - (Italy), LY - (Lithuania) etc., and next digits indicates the serial number of object. For example: DL-00001, I-00002, LY-00003 etcOficial WCA - LIST (Excel ~ 6 Mb) is distributed by countries.WCA-List is not final and will be constantly updated.* It is permissible not to transmit superfluous zero during QSO to simplify transmission and receiving of identification numbers.** Correspondence between identification numbers of national award programs (BCA, CASHOTA, CASHOTA-EI, CASHOTA-NI, CCA, COTA-9A, COTA-DL, COTA-NL, COTA-RU, COTA-UN, COTA-YL, CPBA, DCE, DCE 1.0, DCFP, DCI, DCS, DFCF, DMHP, HCS, IDES, RHO, S5-WCA, SCA, UCFA, ZWP) and WCA identification numbers is in the table WCA - LIST (Excel ~ 6 Mb).13. Repeated QSOs are not valid. The object is valid only once regardless of bands and any kind of mode.14. The same award rules are for SWL.15. QSOs/SWLs are valid since January 1st. 1995 on any bands (including WARC) by any kind of modes.16. Application for diploma is based on the received QSL cards according to Application WCA form and must be signed by two radio hams. QSL-card must have identification number according to WCA-List. WCA Committee recommends to use WCA Aplication form DATABASE (EXCEL) download to register and apply for awards
QSL-card having object name or identification number according to national castles and fortresses award programs are valid for the diploma.
No QSLs, only certified application is required. The award manager can require QSL for check.17. Since 1st of September 2010 begun to work WCA E-LOG which allows to check up data

about made QSOs without QSL validation for all awards of WCA series and make application for awards online. Author and manager - Jiri Suchy OK 5 NN. 18. The award can be issued for separate MODE (optionally).19. The application should sent to award manager. By e-mail: rn1cw@rambler.ru or award@... Or by post: Andrey A. Petushkov, RN1CWP.O.Box 340/5, Sosnovyj Bor,Leningrad oblast, 188540Russia 20. - Since January, 1st, 2011 the order an issue of the “World Castles” Award (WCA) and “Castles On The Air – Russia” Award (COTA-RU) will change. Awards will be issue by two means:- in electronic form in JPG (free of charge);- in print form.The fee of WCA and COTA-RU in print form will be:- For Russia 200 Roubles, for the CIS countries - 7 EURO, 7 USD,
7 IRC.- For the others - 10 EURO, 10 USD, 10 IRC.- Fee of HONOUR ROLL please ask Award Manager at the moment of application21. Award certificate “World Castles Activator Award - WCAA” and WCA - Hunter are free of charge. You can obtain it in electronic form - JPG file completely ready for printing in A4 format (297x240) will send by e-mail.

OPDX Bulletin 1067.1 June 28, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1067.1
BID: $OPDX.1067.1
June 28, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and 1A0C for the following DX information.
1A, S.M.O.M. (Press Release - Thoughts about the magic band. Last press release before the kick off)
Posted on June 28th, by the 1A0C team [edited]:
"Roma is not precisely a remote place with scarce ham population! So we don't see the need of a beacon. Even more, we don't want to upset the local ham community with another broadcasting signal in the band, there is a nice beacon already (I0JX) and it will be more than enough. We will, of course, keep watching the early warning sites such as the 6m ON4KST prop pages and DXCluster.
>As it was intended from the beginning this operation is primarily focused on working North America and Asia. Our plan for 6m is to steer the beam to JA in the morning. All eastern EU will be covered in 1 hop as well. And turn the beam to NA past midday, giving a chance for the eagers in West EU. Last operations by 1A0KM has provided Sovereign Military Order of Malta to most of the EU 6m population, however there are very few dxpeditions planned for this season, therefore pileups from the old Europe can be large as people are idle looking for any prey to hunt.
>The 6m propagation, specially on Es skip, is unpredictable, but our experience of the last 20 years points that during the last week of June/1st of July conditions are best for Xatlantic contacts and long haul openings to the N. East. We need to be very observant for any possible multihop event, managing meanwhile the EU pileup smartly whilst looking for possible links across the Pond or Siberia. This is not easy, but we have done it successfully and recently from Algeria, Egypt, Morroco, Palestine, Andorra, etc.
>At the end, we are in Europe, hence, when working EU the so called "DX-windows" must be avoided, that is 50.100-50.130. We are thinking to stay fixed on one frq for all CW operation below it, between 50084-95, in order to not to disturb upwards the band to leak the pileup into the DX windows and choose a phone frq up in the band, away from the DX zone, e.g. 50180. We really hope the local operators, and even the European 6m fans, will appreciate this decision of the team.
BAND PLANS BAND CW SSB RTTY ------ ------ ------ ------- 6M 50.084 50.180 -- 10M 28.024 28.495 28.080 12M 24.894 24.945 24.921 15M 21.024 21.295 21.080 17M 18.074 18.145 18.100 20M 14.024 14.145 14.080 30M 10.104 --- 10.140 40M 7.004 7.065/7.160 7.035 80M 3.524 3.780
--50 MHz information and operating tips
• The 6 meter band will be included in this operation. We'll focus for long haul openings, as most of the Europe regions have been widely covered in the recent years.
• We plan to use the following frequencies: 50.084 for CW and 50.180 for SSB. Although they may be changed, depending on local noise/birdies. Split operation will be deployed when

needed.
• The main mode will be CW. If band conditions permit, SSB will be used to gain a higher QSO rate. Please do not ask for mode changing.
• Please avoid QSO duplication, give others a chance. Logs will be uploaded twice a day to our website. If it will work, we will provide the live log online (new are not sure 100% now).
• We don't find necessary to set a beacon station this time.
• Our Grid Locator is JN61FV. Please, DO NOT send your locator, it is not needed and we won't log it anyway, it wastes precious time."

ZCZC AE26
QST de W1AW
DX Bulletin 26 ARLD026
From ARRL Headquarters
Newington CT June 28, 2012
To all radio amateurs

SB DX ARL ARLD026
ARLD026 DX news

This week's bulletin was made possible with information provided by K1ZZ, NC1L, OZ4CG, XQ7UP, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, The Weekly DX, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SOVEREIGN MILITARY ORDER OF MALTA, 1A. A large group of operators will be QRV as 1A0C from July 1 to 14. Activity will be on all HF bands and 6 meters. QSL via operators' instructions.

CYPRUS, 5B. Some members of the Paphos branch of the Cyprus Amateur Radio Society plan to be QRV as P3EU from July 1 to December 31 to commemoration the first Cypriot presidency of the European Union. QSL via 5B4AHO.

BHUTAN, A5. Yuki, JH1NBN is QRV as A52W until July 5 while on business here. He is active in his free time. QSL to home call.

CHILE, CE. Special event station 3G90AA will be QRV from July 1 to 31 in commemoration of the 90th anniversary of the Radio Club of Chile. QSL via CE3AA.

MOROCCO, CN. Moroccan amateur radio operators may use the special 5C13 prefix from July 1 to 27 in celebration of Throne Day, the 13th anniversary of the crowning of Mohammed VI King of Morocco.

SOUTH COOK ISLANDS, E5. Andy, AB7FS will be QRV as E51AND from Rarotonga, IOTA OC-013, from July 2 to August 25. Activity will be on the HF bands using CW and SSB. QSL to home call.

CANARY ISLANDS, EA8. Operators from the Grupo DX Teide will be QRV as EH8TID from Tenerife Island, IOTA AF-004, from June 30 to July 2. Activity will be on 80 to 6 meters using CW, SSB, RTTY and PSK31. QSL direct to EA8NQ.

ESTONIA, ES. Eddie, ES2TT will be QRV with special event ES2012ABCS from July 1 to 8 on the occasion of the American Beauty Car Show. Activity will be on 40 to 6 meters. QSL to home call.

FRANCE, F. Special event station TM0TSR will be QRV from July 2 to 8 from Saint-Malo during the annual Tall Ship Race 2012. QSL via F4FJH.

JERSEY, GJ. Ralph, DL9MWG and Manfred, DL3VJG are QRV as MJ/DL9MWG and MJ/DL3VJG, respectively, until July 4. Activity is on 160 to 6 meters using CW and SSB. QSL to home call.

PUERTO RICO, KP4. Members of the Puerto Rico Amateur Radio League will be QRV as special event station K4O from the National Olympic Committee headquarters in San Juan from June 30 and July 1 to mark the journey of the Olympic flag over the Atlantic Ocean. QSL via NP3O.

ALAND ISLANDS, OH0. Bob, OK2BOB, Franta, OK1HH and Jindra, OK1AMM are QRV as OH0/home calls until June 30. Activity is on 160 to 6 meters using CW and SSB. QSL to home calls.

DENMARK, OZ. Special event station 5P12EU is QRV until June 30 in commemoration of the Danish Presidency of the European Union. Activity is on all HF bands, including 160 meters, using CW and SSB, and possibly RTTY and PSK. QSL via operators' instructions.

BRAZIL, PY. Special event station ZZ190GOB is QRV until June 30 in commemoration of the 190th anniversary of the Masonic Lodge Grande Oriente do Brasil. Activity is on all HF bands. QSL via PT2OP.

GREECE, SV. Nick, SV1EEX is QRV as SV1EEX/8 from Hydra Island, IOTA EU-075, until the middle of July. Activity is on 40 to 6 meters using CW, SSB and PSK. QSL to home call.

BENIN, TY. Pat, LA0HF is QRV as TY2BP from Cotonou until early August. Activity is on 20, 15 and 10 meters. QSL direct to IK2IQD.

INDONESIA, YB. Members of ORARI will be QRV as YE0M from Kaliage Besar, Seribu Island, IOTA OC-177, from July 6 to 9. Activity will be on 160 to 2 meters using CW, SSB and RTTY with 11 stations active. QSL via YB1GJS.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Equatorial Guinea, 3C6A, 2012 operation; Annobon, 3C0E, 2012 operation; Uganda, 5X1RO, 2012 operation; Djibouti, J28RO, 2010 operation; Djibouti, J25DXA, 2011 operation; Laos, XW4XR, 2012 operation. If you had any of these operations rejected in a recent submission, please send an email to bmoore@... to be put on a list for an update.

THIS WEEKEND ON THE RADIO. The QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, RAC Canada Day Contest and the WAB 144 MHz Low Power Phone are all on tap for this weekend. The RSGB 80-Meter Club CW

Championship is scheduled for July 2. The ARS Spartan CW Sprint is scheduled for July 3. The MI QRP July 4th CW Sprint runs from July 4 to 5. The 10-10 International Spirit of 76 QSO Party runs from July 2 to 8. Please see June QST, page 79, July QST, page 77 and the ARRL and WA7BNM Contest Web Sites for details.

http://forums.qrz.com/showthread.php?351847-New-Release-Ham-Radio-Deluxe-v5-23

New Release: Ham Radio Deluxe v5.23
Tampa FL, St. Paul MN, Pittsburgh PA – June 27, 2012
>
>HRD Software, LLC announces the release of Ham Radio Deluxe 5.23.
>
>HRD developers have been working to dramatically improve the callsign lookup function and address some maintenance items. HRD 5.23 and the preliminary manual are on the web site ready for download.
>
>Mike Carper, WA9PIE, said, “The feedback from our beta-testers indicates that this release is the best version ever of the Ham Radio Deluxe Suite.” This version of Ham Radio Deluxe features powerful new options for callsign lookup. Users can set the priority of lookup sources like QRZ.com, their logbook entries, CD databases, and Logbook’s country index. “Our users provided us valuable insight about how they’re more confident in the data in their logbook than the CD and online data sources. It only made sense to allow them to choose the priority,” Mike added. Users are also prompted when lookup sources don’t agree about the country location of stations they are adding to their log. This enables the user to make a choice about which country should be logged. The company invites hams to visit the company’s YouTube channel for a demonstration of these new features.
>
>Rick Ruhl, W4PC, said, “Erik Gawtry, KC0WWC, really showed his stuff in this release. I feel Erik is one of the best programmers in the country and I think the hams will be amazed at the magic he has done for this release. Hams also have been key players with both their input and support of our new company. Every hamfest that we attend we meet so many new friends and supporters.”
>
>This concludes development of the v5.x product roadmap. The company has also continued development of v6.0 and intends to release it by the end of summer 2012.
>
>Version 6.x will have many new features which will include FSK support, a new QSL and awards tracking interface, improved cluster filters, label printing, and the Super Sweeper in Digital Master. Super Sweeper will allow multiple signals to be decoded in a single window.
>
>A discounted pre-buy of version 6.0 is being offered for $59.95. This includes technical support for v5.2. Those that have purchased or will purchase the 5.X support will still get one year of support from the date of the 6.0 release.
>
>You can purchase and download the product at http://www.ham-radio-deluxe.com.
>HRD Downloads: http://www.ham-radio-deluxe.com

http://www.loudountimes.com/index.php/mobile/news_article/when_all_else_fails_ham_radio_operators_prepare_for_emergencies_during_2012/

‘When all else fails’: Ham radio operators prepare for emergencies during 2012 Field Day

Times-Mirror Staff Photo/Michelle StevensGene May of the Loudoun Amateur Radio Group writes down the call sign of another amateur “ham” radio operator for a 24-hour contest called Ham Radio Field Day in Lovettsville June 24.

Voices and static mingled on the airwaves as amateur radio operators baked in the heat Saturday. “QR-Zed.” “Kilo Echo Four, Oscar Kilo Yankee.” “Oscar Kilo Yankee?” With contact established, the Lovettsville radio operator repeats the full call sign to the voice that originates from a Canadian boat.

The operator made contact as part of Field Day, a 24-hour contest where thousands of amateur radio operators, called “hams,” practice communicating off the grid with other hams in the United States and Canada. Around 60 hams in Loudoun County participated in two Field Day events, one at Park View High School in Sterling and the other in Lovettsville.

On Field Day, each amateur radio club attempts to earn points by making contacts and logging “call signs” – the unique letter and number code the Federal Communications Commission (FCC) licenses to each ham radio operator.

The Loudoun Amateur Radio Group (LARG) in Lovettsville made nearly 4,500 contacts, and the Sterling Park Amateur Radio Club made around 2,000 contacts as radio operators worked in shifts through Saturday night into Sunday afternoon. The groups’ more unusual contacts included a 737 pilot over Utah and a ham in Puerto Rico.

Using ham radio satellites, a signal from Loudoun County can reach a radius of more than 1,000 miles. The hallmark achievement: making contact with the International Space Station, where many of the astronauts are also ham radio operators.

In an era of Facebook, cell phones and Skype, ham radio is a little-known form of communication. Yet hams pride themselves on being the first to contact the outside world after a large-scale natural disaster that knocks out the Internet and cell phone towers. Field Day allows hams to practice setting up their stations on solar, generator, and battery power. The National Association for Amateur Radio proudly asserts that amateur radio gets the message through “when all else fails.”

Ham radio attracts a fiercely loyal following, with around 700,000 operators across the country and 3 million around the world.

“Everyone’s experience getting into ham radio is different,” said Chris P., a ham who participated in the LARG Field Day event. (He requested his last name be withheld because he works for the federal government.)

Chris is proud to carry his great-grandfather’s call sign, though he says interest in ham radio “skipped two generations” in his family. He first became a ham in high school, when he got his license through the Boy Scouts.

When he was deployed overseas during the 1990s, he would travel to a Military Auxiliary Radio Service (MARS) station to call home. The MARS operator would radio a ham in his hometown and ask him to connect Chris to his family via telephone: “This was before the

days of video chat, and you'd call up for about five minutes and say, 'Hey, Mom, guess where I am?'"
Several years ago, he decided to get re-certified as a ham operator, and he's been involved ever since.
Through the course of a year, hams participate in a variety of events, from launching and chasing weather balloons to volunteering as trained weather spotters for the National Weather Service's Skywarn.
Hams provide vital information to Skywarn because they're able to communicate directly from the ground, said LARG Field Day Chairman Gary Quinn: "When a ham operator can look out the window and call the weather service and say, 'Yes that's a tornado,' it validates their data."
When a disaster strikes, Quinn said, "We know before the general public. We're the ones pushing out the information."

Field Day: What is it? Why Participate?

Hector Morales, NP3IR

Field Day 23 and June 24 at Parque Luis Muñoz Rivera, San Juan
As many know the Field Day is the last weekend of June, this year on 23 and 24 June and this is one event that draws more attention from amateurs. This event includes elements of nearly everything that makes amateur radio is the great love is, and we recommend that you make every effort to participate in Field Day .This event got its start in 1933 as an exercise in emergency communications. The amateur radio operators drag their team to an area somewhere and will work with emergency power sources and / or alternatives. The goal is to see how to prepare ham radio operators and see how it responds to an emergency and learn how to do their best. Preparing for emergency communications is still the main purpose of Field Day . Amateur radio operators put their gasoline generators or solar panels to ensure they will be ready in case of an emergency.Furthermore, that using different equipment in these conditions, we learn that radios work best under those conditions. Of course, the only way to know how good your equipment will work under these conditions is like that. That's where the competitive aspects of Field Day comes into play. The stations earn points through contacts with other stations, and those who manage to win more points, on equal terms, the stations that work better and make the most of the contacts is the one that gets the highest score. Many stations Field Day have multiple transmitters, and when you have multiple transmitters, multiple antennas will need. Setting up a multi-transmitter operation can be a lot of work. That's why the Field Day is often a club activity. For some clubs, is the biggest event of the year. Besides all the technical activities, clubs use Field Day as a social event. There is food and drink, and remember " Field Days "of the past or some other activity. For some hams, it's more fun to operate in the event. Finally, why the Field
Day is a big event?, the ARRL encourages us all to use the event to get public officials, elected officials, and agencies that offer their services during emergencies, such as the Office of Management Municipal Emergency and State, the Red Cross, among others and educate them about ham radio. Unlike many contests, in which to score points is just to make contacts, to the Field Day you get points for the celebration of its operation in a public place, by distributing leaflets to interested people that visit the area, and if Mayor gets to visit the area in the Field Day .
How to participate?
By participating in Field Day , you will learn more about amateur radio in a single day more than in almost any other activity. If you are a member of a club, ask how you can help organize the event for your club's Field Day . I'm sure you'll have one of the most fun and educational experiences of your life. Not yet a member of a club, or if you're going to be out of the country or to your city this week, you will find a Field Day by using the locator of the ARRL . The clubs listed insurance will welcome, especially if you arrive early, helps with the "set-up." I hope that has convinced you to participate in Field Day is coming. Not only will you have to learn a lot, you will also have a lot of fun. Do not forget to bring some sunscreen and mosquito repellent!

Topic: 2961 Message: 2961

Dear All

Sedikit banyak ada kaitannya (yg kemudian sy extend) dg subyek ini, ada bbrp points yg sy mau ☐angkat☐ ke ☐atas☐ (dan untuk itu sy mohon bantuan ☐moral☐ dr rekans):

1. ORARI (di semua strata: ORLOK, ORDA,ORPUS) bisa memprakarsai DX-pedition atau IOTA di/dr Mercu Suar/Lighthouses yg berada di pulau-pulau terdepan/terluar/perbatasan.

Di laman YBDXClub bbrp wkt yll OM Budi Santoso YF1AR prnh posting ttg WLOTA Contest 2011, tp kemudian tidak ada posting lanjutan-nya lagi (ato memang dr YB-land nggak ada yg ikut).
BTW, dr situs WLOTA/World Lighthouse On The Air sy dapatkan daftar pulau-pulau (dg lighthouses) di YB land, yg kalau memang ada yg berminat bisa sy e-QSP-kan di edisi mendatang ... atau brngkali juga bisa diminta dr OM Fachmi YBØMF, WLOTA repr./associate di Indonesia.

2. ORARI takes lead dlm upaya (efforts) utk mem"bebas"kan penggunaan 60m band (5 MHz) KHUSUS utk EmComm di IARU Reg. III.
Tentunya IARU Conv. 2012 di Ho Chi Minh City dan GAREC 2012 di Port Dickson, My ... merupakan forum yg tepat utk meretas jalan bagi "perjuangan" utk ini ☐ yg notabene tidak mudah (dg mengambil contoh Canada/VE-land yg perlu waktu selama 3 tahun dg/secara intens dan persistent memperjuangkan ini di berbagai forum di IARU Reg. II.

3. Anggota ORARI ☐yang mampu☐ lebih berperan serta secara aktip dalam kegiatan di forum regional, atau katakanlah yang paling dekat (dan bisa diikuti tiap hari) dg check in di SEA (South East Asia) Net di 20m.

Dalam mengenang kepergian OM Jos YB2SV (SK) ☐ ex DPPers pada berbagai Masa Bakti ke Pengurusan ORPUS dan salah satu penggiat di SEANet ini *), rasanya tidak berlebihan kalau para sahabat beliau menaruh obsesi dalam era kepengurusan ORARI PUSAT masa bakti 2011-2016 ini salah satu SEANEt Convention bisa digelar di YB-land.

*), quote: ☐ ... Dalam kaitannya dengan SEANET, yang sangat membanggakan beliau adalah keberhasilannya mengibarkan bendera ORARI (dan Merah Putih) di beberapa kali Konvensi SEANET, dengan menyabet Top Scorer pada SEANET WORLDWIDE CONTEST selama beberapa tahun berturut-turut: Kuala Lumpur (1975), Bangkok (1977), Singapore (1978), Penang (2x masing-masing pada tahun 1979 dan 1984) dan Jogjakarta (1981),.

Kemenangan berturut-turut selama beberapa tahun sejak 1975 itu akhirnya dipuncaki dengan mendapatkan sebuah Trophy ☐yang besar sekali☐ untuk katagori Overall Champion, yang diterimanya pada SEANET Convention di

Singapore (1983) ... dan :

... Pada scope nasional, kepengurusan ORARI Pusat di bawah Ketua Umum Soewondo YBØAT memberi mas Jos mandat untuk menjadi Ketua pada Konvensi SEANET (South East Asia Net Convention) di Yogjakarta (1981), sedangkan pada kepengurusan ORARI Pusat di bawah Atmodjo Brotoatmodjo YB2DAN beliau ditunjuk menjadi Liaison Officer untuk IARU (1982 ☐ 1986) ....☐ unquote

4. Pengurus ORPUS Masa Bakti 2011-2016 bisa meng-agenda-kan penyelenggaraan NATIONAL Field Day (vide SK 48/OP/KU/2000) sbg Kalender Tahunan, yang dari tahun-ke-tahun penyelenggaraannya dilakukan secara bergilir di bawah koordinasi ORDA(atau gabungan beberapa ORDA) yg mem-bawah-I lima Pulau/kelompok Pulau utama: Jawa (utk call areas Ø-1-2-3), Sumatra (utk call areas 4-5-6), Kalimantan (call area 7), Sulawesi (call area 8), NTB, NTT, Maluku, Papua (call area 9)

Itu dulu yg bbrp hari ini ☐terngiang☐ di benak saya, dan kebetulan bisa terpicu dg posting OM Adhi YB3MM di bawah ini.

73, es just wismilak ...

Hello IOTA Chaser di Indonesia,

Setelah diperiksa di direktori pulau-pulau yang diterbitkan oleh RSGB, ternyata pulau Miangas, pulau yang terletak di paling utara Indonesia digolongkan ke dalam OC-235 (DU8-9 Mindanao's Coastal Islands).
Koq bisa? Kenapa demikian?
Harusnya Pulau Miangas termasuk dalam Kabupaten Talaud OC-209.

Bahkan di wikipedia pun sudah dinyatakan Pulau Miangas adalah milik Indonesia.
Mungkin sudah banyak rekan-rekan kita yang protes ke RSGB atau langsung ke Roger G3KMA, tetapi buktinya hingga sekarang pun Pulau Miangas tetap lepas dari genggaman NKRI.

Tolong untuk Orpus yang bekerja sama dengan Metro TV dll yang katanya akan aktivkan memancar dari pulau terluar, mohon Pulau Miangas ini dimasukkan dalam prioritas utama.
Denger kabar, sekarang sudah ada kapal Pelni yang ke pulau Miangas?

Khusus untuk OM Yoppie, OM Martin, OM Kadek, saya siap diajak kesana looooh... (lupakan dulu Lucipara nya)

Direttore Responsabile I2VGW

1A - Announced frequencies for the 1-4 July 1A0C operation [425DXN 1102] from SMOM are:
CW 3524 7004 10104 14024 18074 21024 24894 28024 50084
SSB 3780 7065/7160 - 14145 18145 21295 24945 28495 50180
RTTY - 7035 10140 14080 18100 21080 24921 28080 -
Operating tips for 6m enthusiasts, as well general information on the activity, log search and QSLling instructions, can be found at www.1a0c.com

CE - Special event callsign 3G90AA will be in use on all bands and modes on 1-31 July to celebrate the 90th anniversary of the Radio Club of Chile. QSL via CE3AA.

CN - Moroccan amateur radio operators are allowed to use the special 5C13 prefix between 1 and 27 July to celebrate the 13th anniversary of the crowning of King Mohammed VI. [TNX The Daily DX]

DL - Look for Heinz, DL4AO/p to be active from Fehmarn Island (EU-128) on 10-20 July. He plans to operate CW, RTTY, PSK and JT65A on 30, 20, 17, 15 and 12 metres. QSL via home call, bureau preferred. [TNX rsgbiota.org]

E5_sc - Wayne, N6NB and Carrie, W6TAI will be active as E51YNB and E51TAI from Rarotonga Island (OC-013), South Cooks between 7 and 21 July. They will operate SSB only on 40-10 metres, and will take part in the IARU HF World Championship. QSL via N6NB. [TNX The Daily DX]

ES - Frank, DL1FT will be active holiday style as ES0FTZ from Saaremaa Island (EU-034) on 8-19 July. His preferred bands will be 40 and 20 metres. QSL via DL1FT, LoTW and eQSL. [TNX rgsbiota.org]

EW - The Borisov Amateur Radio Club (EW2WW) will operate as special event callsign EV910B on 1-31 July to celebrate the 910th anniversary of Borisov city. Look for activity on 80-10 metres SSB and CW. QSL via EW2EO. [TNX EW2EO]

FP - Once again Eric, KV1J will be active as FP/KV1J from Miquelon Island (NA-032) on 10-17 July. Plans are to operate SSB, CW, RTTY and some PSK31 on 160-10 metres ("generally on the highest frequency band open"), plus 6m "if indications of openings" and maybe satellites. He will also take part in the IARU HF World Championship (14-15 July). QSL via home call, direct or bureau, LoTW and eQSL. Further information at www.kv1j.com/fp/July12.html.

GM - The 15-22 July GB5SI activity from the Shiant Isles (EU-112) [425DXN 1103] has been postponed until next year.

GW - The Strumble Head DX and Contest Group (www.mc0shl.com) will be active as MC0SHL from Ramsey Island (EU-124) on 12-16 July. They will be QRV on 40-6 metres. QSL via M0URX (OQRS for direct and bureau cards at http://m0urx.com/oqrs/) and LoTW. [TNX DX World]

OZ - Philipp, HB9EYW will be active holiday style as OZ/HB9EYW from Falster Island (EU-029) on 10-19 July. Look for him especially on 40 metres. QSL via home call, bureau preferred. [TNX rsgbiota.org]

PY - Special event stations PW7FD (SSB and digital modes) and PQ7FD (CW) will be active on 1-30 July as a tribute to Brazil's Fire Departments. Look for activity on 40, 20, 17, 15 and 10 metres. QSL via PS7AB, direct and bureau, and LoTW. [TNX PS7AB]

TK - Laurent, F8BBL will be active as TK12IOTA from the main island of Corsica (EU-014) on 7-21 July. He will operate mainly CW with some SSB and digital modes on 80-10 metres. He also plans to operate as TK12IOTA/p from Lavezzi Island (EU-164) on 14 July starting around 8 UTC, and from the Sanguinaires Islands (EU-104) on 18 July starting around 10 UTC. QSL via home call, direct or bureau, and LoTW.

UA - Look for RT6A/p, R7AA/p, RU6AX/p, UA6YW/6, R7LP/6 and RU5D/6 to operate SSB and CW on 40-10 metres from IOTA group EU-185 from 29 June to 2 July. QSL RT6A/p via R7AA, others via home call. [TNX qrz.ru]

UA - Victor, RW0BG will participate in a three-month expedition which includes mainland sites, river islands, and IOTA groups AS-083 (possibly during the IOTA Contest) and AS-109. The expedition starts from Dudinka on 10 July and will be trackable on aprs.fi (RW0BG-8). Further information at http://n69p.ru/english

VE - AD0XA is the new callsign issued to Rob, KC0VEU [425DXN 1103]. He is operating in his spare time as AD0XA/VY0 from Ellesmere Island (NA-008) until 5 July. Look for him on 20 metres between 00.00-06.00 UTC.

VE - Celebrating the 100th aniversary of the Calgary Stampede, the Calgary Amateur Radio Association will be operating special event station CK6S on 5-15 July. QSL via VE6AO, direct or bureau. All amateurs within the City of Calgary can also use special prefixes CJ6 for VA6 and CK6 for VE6 for the same period.

YV - Members of the Grupo DX Caracas will be active as YW5B from Isla La Blanquilla (SA-037) on 11-16 July. They plan to be QRV on all bands and modes. QSL via DM4TI.

SB PROP @ ARL $ARLP026
ARLP026 Propagation de K7RA

ZCZC AP27
QST de W1AW
Propagation Forecast Bulletin 26 ARLP026
From Tad Cook, K7RA
Seattle, WA June 29, 2012
To all radio amateurs

SB PROP ARL ARLP026
ARLP026 Propagation de K7RA

Sunspot activity continued to drop until early this week. Average daily sunspot numbers were 26.3, down over 58 points from last week's numbers. Average daily solar flux declined to 92.8, down over 33 points from last week's average.

The weekly sunspot number average has declined since the May 31 through June 6 period, when it was 130.4, followed by 116.1 the next week, 84.6 the next and 26.3 this week.

In next week's bulletin we will have the latest 3-month moving average of daily sunspot numbers, for April-May-June, and it looks like it will be higher than the previous 3-month average, March-April-May. Also, yesterday was day number 180 for 2012, and sunspot numbers are running higher this year. The average sunspot number over those 180 days is 82.4. Previous years 2003-2011 had yearly sunspot number averages of 109.2, 68.6, 48.9, 26.1, 12.8, 4.7, 5.1, 25.5 and 29.9, so 82.4 is quite a jump.

In last week's bulletin ARLP025, we reported the average daily sunspot number as 87, but it was really 84.6. This is because we reported what may have been a preliminary sunspot number of 46 for June 20, but the sunspot number for that date was 29, recorded at http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt.

Geomagnetic conditions over the past week were quiet. Average planetary A index was 5.7, down from 12.6 last week, 9 the week before, and 13.4 before that. The quiet A index for this week was exactly as it was on the week of May 24-30, 5.7.

The latest prediction from USAF/NOAA is from June 28, and it differs very little from the June 27 forecast used in this week's ARRL Letter. It shows geomagnetic activity peaking on June 30 through July 3, probably from a coronal hole spewing solar wind. There is also a thirty-percent chance of M-class solar flares today.

Predicted planetary A index for June 29-30 is 10 and 18, followed by 15 on July 1-3, 8 on July 4, 5 on July 5-7, 8 on July 8-9, and 5 on July 10-25, and then on July 26-31, 10, 18, 15, 15, 15 and 8. This is an echo of the activity this week, based on the 27.5 day rotation of our Sun relative to Earth.

The predicted solar flux is 115 on June 29-30, 120 and 125 on July 1-2, 130 on July 3-5, 135 and 140 on July 6-7, 135 on July 8-9, 130 on July 10-11, 125 on July 12-13, then 120, 115, 110 and 105 on July 14-17. Solar flux may dip below 100 around July 19 and rise above 100 after July 28. But that is a long way out, and difficult to predict.

OK1MGW of the Czech Propagation Interest Group predicts quiet to unsettled geomagnetic conditions on June 29, quiet to active June 30, active July 1-3, quiet to unsettled July 4-7, quiet to active July 8-9, and mostly quiet on July 10-12.

Scott Woelm, WX0V of Fridley, Minnesota commented on the recent lack of sunspots, and may have discovered a correlation of some sort. He wrote, "I have found the reason for the recent decline in sunspots! My Dad, David Woelm, W0ELM, just got a new radio." Good thinking! He also wrote, "For those interested, I have some images of the recent Annular Eclipse in May, and the Venus Transit in June, on my web site:

http://bluelightpix.com/images/2012-images/june-1-5-moon-and-venus

http://bluelightpix.com/images/2012-images/may-2012-eclipse

The second link has a great shot of the Annular Eclipse that was taken in Texas by Bob Adams, KC0JJ, of Crystal, Minnesota."

Conditions were pretty good for 2012 Field Day last weekend, meaning there was some solar activity, and geomagnetic conditions were nice and quiet. Some past Field Days didn't have it so good.

At http://wdc.kugi.kyoto-u.ac.jp/kp/index.html you can download planetary K and A indices all the way back to 1932, and with a perpetual calendar you can find the fourth full weekend in June for any year. 1988 ARRL Field Day on June 25-26 looks particularly bad, and so does June 23-24, 1984. Either may have been the year I was out with the Western Washington DX Club, and a sudden ionospheric disturbance hit late Saturday morning, making all receivers appear dead. You can see by downloading the data for 1988 that the K index hit 4 and 5 on Saturday morning, then conditions recovered into the evening, only to have a repeat on Sunday morning, a double-whammy.

Bill Mader, K8TE, president of the Albuquerque DX Association sent a report on the W5UR Field Day operation at Torrance County Park in Edgewood, New Mexico:

"Conditions were generally very good for FD excluding 6 and 10 meters. Our 10 meter CW station made just one contact and 6 meters

made just 48 contacts with the majority during an opening to California Saturday evening. Propagation for both was disappointing compared with previous years."

"15 and 20 made up the bulk of the SSB and three CW stations QSOs and were hot! We ran 20 well into the night and started again early in the morning. Our GOTA operators ran stations on both 20 and 15 for hours in a row. 40 was good and we used 75 and 80 to advantage after running out of new ones on 40."

"Overall, Old' Sol helped this year, rather than hindering us. Getting up dipoles from 45 to 60 feet high took advantage of good propagation as did our A4S at 40 feet. We seldom had to search and pounce keeping our QSO rates up. Our last hour on 15 meters in the SSB tent produced 99 QSOs thanks to all three components: good propagation and antenna plus an excellent operator. We're looking forward to FD 2013, after we clean the desert dust off everything. Our preliminary QSO estimate is 5,100 and with lots of CW plus bonus points 2012 may be our best scoring FD ever."

Gabor Horvath, VE7JH reported on the Cowichan Valley Amateur Radio Society operation (VE7CVA) from Duncan, British Columbia, on Vancouver Island:

"20 meters was open till about midnight. We had a great run on 15 meters, 6-10 PM. 10 meters barely popped open, I think we made less than 10 QSOs. 40 meters seemed to be real good with action starting at about 7PM till dawn. 80 meters did not produce much long distance stuff, but was fairly quiet and we had many contacts out to about 2000 miles."

Walt Aulenbacher, WA5AU reported on the Hays/Caldwell Amateur Radio Club KE5LOT operation from San Marcos, Texas. "We found conditions on 15 meters to be very good (lots of contacts) and of course also on 20 meters, but 10 meters and 6 meters not great. We made some contacts on 10 meters and 6 meters despite conditions."

Jed Petrovich, AD7KG of the Utah DX Association reported on the K7UM operation, just east of Fairview, Utah in the mountains at 9,000 feet. "We operated three stations for the entire 24 hours. We only made two contacts on 10 meters. On Saturday, it didn't appear there was much activity on 15 meters. We checked this with a P3 panadapter and our 15 meter station was getting few responses to his CQs. The bulk of our nearly 3400 contacts (including dupes) were on 20 and 40 meters, both CW and SSB. On Sunday morning, we were still working 20 and 40. However, I switched over to 15 CW just after 10:00 AM MDT and found a lot of activity. I had some good runs going for nearly two hours until the end of the event. One of the other stations was also working 15 SSB during the same time frame Sunday morning. However, he didn't do quite as well. N1MM reported my run rates around 90 per hour, the SSB station was about 40 per hour. During the same time frame, the 20 meter phone op was going

strong with run rates over 150 per hour."

"We did have an antenna (dipole, up about 60 feet) for 80 meters, but the band seemed very noisy. Hence, very few contacts were made on 75 meter phone."

"All in all, propagation seemed fairly good. Last year, for example, one of our phone ops made 160 contacts on 10 meters during the last 2 hours of the event. We periodically checked 10 meters, but didn't find much going on."

Thanks, Jed!

Kevin Lahaie, K7ZS of Hillsboro, Oregon wrote: "VERY interesting band conditions. In a word, 10 meters was a big ZERO, 20 meter paths were very atypical, just never really opened up like you would expect. But, the big surprise was 15 METERS. It was open to the East Coast at the opening bell, and it stayed open to the EAST COAST all day, until around 10 PM. A little north south, but just an amazing, solid long skip that defied time of day! We made 950 contacts on that band, 200 more than 20 meters!"

"Overall I don't think propagation was very good, but the real anomaly to me was the solid and long endurance 15 meter opening to the east coast. I will be curious if east coast stations were able to work each other with the long skip?"

W5BCR, the Bosque County Amateur Radio Club, operated from Clifton, Texas. Danny Rymer, K5FDR reports: "I believe this was my best Field Day ever. I made a contact in Maui, Hawaii and I was able to have the contact talk to a few Cub Scouts who came to see what Field Day was all about. You should have seen their eyes and the smiles on their faces when they realized they were actually talking to someone in Hawaii. A reporter took a few pictures for the local newspaper while the boys were talking to the contact in Hawaii."

"Other members of the W5BCR club made numerous contacts throughout the U.S. and Canada, and several of the club members let the Cub Scouts talk to their contacts on the other end. Those contacts really made a big impression and made the Cub Scout's day."

"Conditions were very good here in Texas, as a club we worked all of the legal frequencies that were allowed per the rules. Most of the contacts were made on 20 meters and 40 meters (not too surprising) as well as a few other bands. We made a contact in Germany during the late evening and Slovenia at 0621 UTC on 14.272. All in all, this field day was better than any field day that I have ever participated in with any club, and that goes even for my first field day."

Six meters apparently didn't produce results for Field Day, but Julio Medina, NP3CW of San Juan, Puerto Rico (FK68wl) reported:

"On June 21, 2012 on six meters I worked TI5KD at 2306z, and HK4BKB at 2313z. On June 22, 2012 worked ON4GG at 1353z, F6GCP 1309z, PA2M and F6ARC at 1309z, F8DBF and OE1WWA at 1710z, FJ/W6JKV in St. Barthelemy at 1842z and WD4AB in EL95 at 1852z."

Last week we mentioned old military surplus Command radios converted to SSB, and John Laney, K4BAI of Columbus, Georgia wrote: "The conversion of a Command Set to SSB was called the 'W2EWL conversion'. I think a ham with that call wrote an article for QST about it. I bought one in the late 1950s or early 1960s that someone else had converted. It would work 75 meters well and worked a bit on 20 meters. I think I had figured out a way to use it on CW also."

At
http://smg.photobucket.com/albums/v652/ranickel/Cheap%20and%20Easy%20SSB/
you can see photos of the conversion.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 21 through 27 were 13, 13, 13, 24, 14, 28, and 79, with a mean of 26.3. 10.7 cm flux was 97.7, 88.4, 84, 85.3, 88.6, 99.2 and 106.3, with a mean of 92.8. Estimated planetary A indices were 3, 5, 4, 5, 9, 8, and 6, with a mean of 5.7. Estimated mid-latitude A indices were 3, 5, 4, 5, 5, 7, and 8, with a mean of 5.3.

http://www.arrl.org/logbook-of-the-world

LOTW, Step 1

Download Trusted QSL Software

Logbook of The World uses a software package called Trusted QSL. The Trusted QSL software that you downloaded and installed on your computer contains two programs – Trusted QSL (TQSL) and Trusted QSLCertificates (TQSL CERT).

Trusted QSL software is available for Windows and Mac OSX operating systems.

Linux users can build the software from the source code for the tqsllib library and the TrustedQSL applications. (ARRL does not maintain packages for the plethora of Linux distributions. For assistance with obtaining a packaged version for your Linux distribution, contact your distribution's maintainer.)

The software is downloaded from the web at www.arrl.org/instructions

1. From the web page http://www.arrl.org/instructions click the link to begin downloading the software for your operating system, PC or MAC.

2. When given the option select SAVE.

Please note where you are saving this file.
3. Double click the TQSL zip folder from the location where you saved it.
Double click the TQSL 113 icon to begin the installation wizard.
If your computer asks for permission to run the program select RUN.

*Windows 7 and Vista users may have to run the software installation as administrator.

4. Click NEXT as you continue through the installation. Let the installation wizard write the program files to the default locations.

5. When the installation is complete you will have two program icons on your desktop. These icons are used to open the two programs of the Trusted QSL software package – TQSL and TQSL CERTIFICATES.

You are now ready to proceed to the next step Request a certificate.

http://www.arrl.org/logbook-of-the-world

From: Yb land Dx club
Topic: 2968 Message: 2968

http://www.arrl.org/logbook-of-the-world

LOTW, Step 2

Requesting Your Certificate

Logbook of The World uses private key – public key encryption. The Trusted QSL software that you downloaded and installed on your computer contains two programs – Trusted QSL (TQSL) and Trusted QSL Certificates (TQSL CERT). All certificates are managed in the TQSL CERT program.

A certificate request (TQ5 file) is sent to ARRL and is answered with a TQ6 file. When the TQ6 file is loaded into TQSL CERT you will have your certificate, as indicated by the gold ribbon next to your call sign, which you will use to electronically sign your log files.

The TQ5 and TQ6 files contain unique digital signatures and must match each other like two halves of a torn ticket. Any previous certificate request is nullified when a new request is made so do not delete or alter any files after making a certificate request.

Because the request and response must match the entire process must be completed from the same computer. Once you have a complete certificate moving it to a new or second computer is only matter of a few clicks with your mouse. (see http://www.arrl.org/advanced-lotw)

Requesting a certificate is not difficult. It is simply a matter of entering some basic information about you and your call sign then saving a file – TQ5 and sending the file to LoTW.

In this procedure we are going to request a certificate for your current call sign.

The procedure below will guide you through each screen of the process. Let’s begin.

After you have installed the Trusted QSL software you will have two program icons on your desktop.

1. Open the TQSL CERT program by double clicking the icon on your desktop.

When opening the TQSL CERT for the first time you will get a message saying that you have no certificates and asks if you would like to request a certificate.

Click YES.

• If you inadvertently answered NO to the above question Select FILE > NEW CERTIFICATE REQUEST…

2. This first box is informational and indicates that the issuer of the certificate is ARRL. You do not have to do anything. Click NEXT.

3. Enter your CURRENT CALL SIGN without any portable identifiers

4. Use the drop down menu to select the DXCC entity that matches your call and where you are operating.

If you hold a KH6 or KL7 call sign and
- Your FCC address is Hawaii or Alaska then your DXCC entity will be Hawaii or Alaska.
- Your FCC address is in the continental United States then your DXCC entity will be United States of America.

The QSO Date Range will determine which QSOs in your log can be uploaded to Logbook of The World.

It is important that you enter correct information. The QSO date range cannot be changed once the certificate is issued.

5. QSO BEGIN date should be the date that this call sign was first issued to you. If you are unsure of this date then use the earliest date in your log for QSOs using this call sign.
- Do not use today's date.
- This may not necessarily be the date you were first licensed if you held another call prior to your current call sign.
- Do not use your birthday or any other date.

Currently active calls will not have a QSO END DATE. Entering a QSO END DATE for a current call will limit the QSOs that can be uploaded for this call.

6. Enter your name and address. For U.S licensees this must match your FCC address. Click NEXT.

7. Enter your e-mail address.

- Make sure that your e-mail provider allows attachments. You will receive your TQ6 certificate file, username and website password in an e-mail.

This next step is optional.

A password is recommended if you use a public computer or run LoTW/TQSL with a portable computer.

If you choose to use a private key password please write it down so you do not forget it.

If you lose or forget this password ARRL cannot help you.

To fix a lost private key password, you will need to apply for a new certificate.

8. Enter a password if you choose this option.

- You may leave this blank for no password. (Recommended)

9. Be sure that your request is UNSIGNED.

- Because this is your first certificate request your only choice should be UNSIGNED.

You should now have a TQ5 file saved in your folder.

Windows Vista Users

You must have compatibility files permissions checked. If you see this folder click on it to allow compatibility files otherwise your will not be able to see the TQ5 file that you saved.

After clicking the compatibility files folder it will change to an icon that says BURN

Please note that the upload is not automatic.

You must continue to the next step to upload the TQ5 file you just saved or e-mail the TQ5 file to lotw-logs@...

Please note that the upload is not automatic.

You must continue to the next step to upload the TQ5 file you just saved or e-mail the TQ5 file to lotw-logs@...

When done correctly your TQSL CERT window should look like this with a slashed red circle “Do Not Enter” sign, your call sign and your DXCC entity.

It is important that you do not delete or move or rename the TQ5 file or delete the red slashed circle.

Option to upload the certificate request file (TQ5)

1. Go to the LoTW file upload webpage: https://p1k.arrl.org/lotw/upload

2. Use the browse button to locate and select the TQ5 file that you created in the previous section. [your call sign].TQ5

3. Upload the file.

4. Sit back and wait for your postcard to arrive in the mail.

* If you are submitting a cert request for a non-US call sign, you will have to submit proof of license (a copy) and a copy of one other official document that shows your name, like a driver's license. See https://www.arrl.org/lotw/docreq for details.

Postcards and documents are used only during the initial account set up and are not required for once you have established your LoTW account.

http://www.arrl.org/logbook-of-the-world

LOTW, Step 3

Load and Save Your Certificate

1. When you receive your TQ6 file via e-mail you should be able to double click the attached file and say YES to open and it will load itself
-- or --- you can save the file to your LoTW folder and use the LOAD CERTIFICATE FILE feature of the TQSL CERT program.

* If you get a “Certificate or private key not found” message click OK and continue the installation process.

2. When correctly loaded, the slashed red circle will turn to a gold ribbon.

SAVE YOUR CERTIFICATE

The final step is to save the complete certificate as a p12 file to external media such as a floppy disk, CD, flash drive or memory stick. If you experience PC failure, hard disk crash, or loss of files you can restore your LoTW certificates by loading your p12 file into TQSL CERT.
(TQSL CERT > FILE > LOAD CERTIFICATE)

The postcard password and theTQ5 and TQ6 files have performed their respective tasks and it is not necessary to save any of these items. However you must save your certificate as a p12 file to be able to recover your complete certificate.

3. To save the complete certificate select CERTIFICATE > SAVE

Be sure to save this p12 to external media. If you save this file to your computer and the computer crashes you will not be able to recover the file.

This completes the certificate process. You may request additional certificates for your old calls, portable calls or other calls that are associated with you by requesting and uploading SIGNED certificate requests for each call. See the FAQ under Callsign Issues.

http://www.arrl.org/logbook-of-the-world

LOTW, Step 4

Making A Station Location

Now that you have your electronic certificate you can now sign and upload your logs to Logbook of The World. The first step in the signing process is to create a Station Location. Your station location contains the geographic information about your station. Information such as zones, grid squares, IOTA numbers and US States and Counties are included in your station location.

The information in your station location is how the other operator receives credit for things like your US State, County, zones, etc therefore it is very important that this information be complete and accurate.

1. Open TQSL Tqsl.lnk

2. Select ADD STATION LOCATION

3. Enter all of the information for the location of your operation and click next.

4. US Callsigns will get drop down menus to select a State and County.

5. The final step is naming the station location. Once you have entered the station location name (“Home” in the example), click FINISH.

http://www.arrl.org/logbook-of-the-world

LOTW, Step 5

Signing And Uploading Your Log

In this part of the process you will electronically sign your log file. The new digitally signed file is called a TQ8 file. It is this new TQ8 file that gets uploaded to LoTW.

This step assumes that you have exported an ADIF or Cabrillo log file from your logging program. Some of the more popular logging software programs will perform these next steps for you. Check your logging software instructions for this feature and how to configure your software.

1. Select FILE > SIGN EXISTING FILE

2. Select a station location to use for signing your log. Highlight (left click on the call) the location and click OK

3. Select the log file to sign. Click OPEN. You should use a different name for each file to help you keep track.

4. Next you will select the file to write to. When you electronically sign your log you will have created a TQ8 file. This is the secure file that will be uploaded to LoTW.

5. You will be asked to confirm the signing. If you have more than one callsign in your system be sure that the correct call is being used to sign the log.

6. You have the option of entering a date range for QSOs to be uploaded. You can leave either (or both dates) blank. If duplicate information is uploaded the most recent upload will override the previous upload.

It is a good practice to enter the last date you uploaded to LoTW as the beginning date.

7. You will see the system converting your log to TQSL format and then you will get a message that the TQ8 file is ready to be uploaded.

8. Log onto the LoTW website https://p1k.arrl.org/lotwuser/default

9. Select the UPLOAD FILE tab.

10. Use the browse button to locate and select your TQ8 file to upload.

11. Click the upload file button to upload the file. If done correctly you will receive a message that the file is queued for processing.

If you receive a message like this:
[FILE] does not appear to be a TrustedQSL file! Processing aborted.

The chances are that you selected your log ADIF file to upload or some other file that is not a TQ8 file.

Thank you for using
Logbook of The World

http://www.lotw-online.com/default.php?menu=Band%20Spots

Welcome to LOTW Users Online!
DXCC and States drop-down lists
Posted on 02-Oct-2011
Now you are able to select from list of DXCC countries or list of States to make a filter of the data. Next to titles for DXCC and State there is an additional '+' sign. Clicking on it will expand the list from which you can make your selection. Click on desired link in the list to make the data be filtered. To close the list without selection click on '-' button which shows up in place of '+' when list is expanded. Hope you will enjoy this feature. 73!
Search By US States added
Posted on 20-Sep-2011
Hello all, finally I found some time to add new feature to this cluster site. Now I show US States next to DXCC country and you can filter by it. You can filter first by United States and then see the states which can be also filtered when you click on them. States info is pulled from QRZ.com and it is possible that for some calls this info to be missing. Hope you will improve your WAS scores in LOTW. I will add some more things in the near future.
73!
Filters for Callsign and DXCC are added!
Posted on 15-Apr-2011
For now they work when you click on LOTW Callsign or DXCC country name. Data will be filtered depending on band selected. If you click on Callsign or DXCC when you are on 'ALL' bands you will see the data shown again for all bands. In order to get back just click on link 'Back to all spots'.
73!
LOTW Online Users Cluster is created!
Posted on 10-Apr-2011
The goal of this web site is to filter dx-cluster to find operators who are registered in LOTW and show them to people interested. This would be very useful when trying to improve your scores in LOTW system. Starting with basic functionallity the site will be constantly improved to make it easier for you to find stations you need. I will post in the 'Home' section when something new is added. This software is using data from DX Summit from Radio Arcala andLotw Users list from HB9BZA. As a starting version this utility may have some problems. Any comments and suggestions are wellcome on my emailadministrator@... .

http://home.comcast.net/~w6bbs/lotw.htm

LOTW QSL Manager Service

I am offering to set up and manage a Logbook Of The World account for you. This is a free service to any stations outside the US.

In most cases, all you have to do is send me an email requesting that I manage your LOTW account for you. I will then send you an email link for you to send a request to The ARRL LOTW Staff making me your LOTW QSL Manager.

I will then create a request for certificate for your call and upload it to the LOTW server. Once approved I will download your certificate and be ready to process your logs.

I can handle multiple calls from one dxcc entity if you have changed your call over time.

If you have multiple call signs from different dxcc entities then we repeat the process for each call.

From this point all you have to do is email me the adif export of your log and I will process them for you. The first round you send me your entire log, after that just your new qso's whenever you want to update. I will process your logs as often as you wish. I recommend once a month unless inactive.

Once I have your LOTW account setup and logs in place I will give you the password so that you may have full access to your own LOTW account. Each call sign will have it's own certificate, account and password. I can choose the password, or you may choose it. No one but you and I will have the password to your LOTW account. Only I will be able to sign your logs unless you install the software and download your certificates.

Should you decided at a later date to take over your own processing, all you have to do, is download the free TQSL software and install it. Download your certificate, or get it from me. You can now process your own log files.

I will gladly work with any dxpeditions as well.

I am not offering a QSL card service, this is only for LOTW.

You may email me mycallsign@arrl.net

HAM Radio expedition to St.Pierre et Miquelon, IOTA NA-032
TO2U, FP/VE3DZ, FP/VA2WA July 20-31, 2012

IOTA NA-032 Ham Radio DX -expedition to the St.Pierre et Miquelon islands. Two radio operators, Yuri, VE3DZ and Victor VA2WDQ/VA2WA will do there best to represent FP DXCC entity to the world of HAM radio operators. They will be active during period of July 20-31, 2012 in CW/SSB/RTTY by using personal calls FP/VE3DZ and FP/VA2WA for everyday and TO2U for contests.

About St.Pierre et Miquelon
First settled by the French in the early 17th century, the islands represent the sole remaining vestige of France's once vast North American possessions.
Geography
Sint-Pierre and Miquelon islands in the Gulf of ST LAWRENCE, 20 km southwest of the Burin Peninsula, Newfoundland and Labrador. Miquelon (110 km2) was once 2 islands. In the mid-1700s, an isthmus formed to Langlade (91 km²) in the south from sand collecting in the wrecks that had foundered on the reefs and sandbars between the islands. The treacherous waters between Langlade and Saint-Pierre (26 km²) were up to 1900 called Gueule d'Enfer - "the Mouth of Hell." Since 1800 more than 600 shipwrecks have been recorded.

History
Europeans began to regularly visit from the early 16th century and their settlements are some of the oldest in the Americas. At first the Basque fishermen only visited the islands seasonally during the fishing season, by the mid-17th century there were permanent French residents on the islands.

Population
About 5500 of the total population of more than 6000 live on the smaller island of Saint-Pierre, where the capital town of the same name is located. Fishing Cod on the Grand Banks was the main industry for centuries.

Climate
The archipelago is characterized by a cold borderline humid continental/subarctic climate, under the influence of polar air masses and the cold Labrador Curren. The average temperature is 15.7°C in August and -3.6°C in February.Precipitation is abundant and regular, falling as snow and rain. Because of its location at the confluence of the cold waters of the Labrador Current and the warm waters of the Gulf Stream, the archipelago is also crossed a hundred days a year by fog banks, mainly in June and July.

Visiting St.Pierre et Miquelon
To enter St.Pierre and Miquelon, all nationalities other than Canadian citizens must have a Passport. Canadian passengers are required to have a passport or driver's licence with picture or government issued ID with picture. Certain Countries with the exception of EU, USA, Japan and Switzerland may require a Visa. Here is the link how to get there http://www.st-pierre-et-miquelon.com/english/comment.php.

June 29, 2012 21:34 EST:
Today we\ve got an approval by REF for using a special callsign for the DX-expedion - TO2U. Thanks to Youri! He knows how to do that:)) But we decided to use this call only during the contests - WW VHF and IOTA). Beside that we are going to use FP/VE3DZ and FP/VA2WA.
Victor, VA2WDQ

Two radio operators, Yuri, VE3DZ and Victor VA2WDQ/VA2WA will do there best to represent FP DXCC entity to the world of HAM radio operators. They will be active during period of July 20-31, 2012 in CW/SSB/RTTY by using personal calls FP/VE3DZ and FP/VA2WA for everyday and TO2U for contests (CQ WW VHF Contest and RSGB IOTA).
The Band plan

BAND	CW	SSB	RTTY
6mt	50.104	50.115	-
10mt	28.024	28.440	28.080
12mt	24.894	24.940	24.914
15mt	21.024	21.240	21.084
17mt	18.074	18.140	18.104
20mt	14.024	14.240	14.084
30mt	10.114	-	10.142
40mt	7.024	7.060	7.140 7.041
80mt	3.524	3.790	-
160mt	1.824	-	-

Equipment
We plan to operate two stations. Given the difficulties in getting large amounts of heavy equipment to the island, we plan to use lightweight but high performance K3/TS-590S transceivers and a small HLA-300V amplifier.

Tranceivers
1 x Elecraft K3/100 with RigExpert Plus interface
1 x Kenwood TS-590S with K1EL WinKey interface

Amplifiers
1 x RM Italy HLA-300V

Antennas
20/15/10m: 1 x Spiderbeam 3 bands on 10m mast
30m/40/17/12 SteppIR BiggIR vertical
160/80m: 11.5m top loaded vertical
6M: 3 el. Yagi (Cushcraft)

Band Pass filters
Remo (Russia)

QSL card will be avaliable after DX-expedition via OQRS via buro or direct by using PayPal system.
Here is FP/VA2WA QSL as an example:

http://www.qrz.com/db/VP2MDD

VP2MDD , & VP2MSR, Montserrat, NA103

ll QSO'S for VP2MDD since 1993 managed by M0AEP
VP2MDD QTH overlooks the Caribbean Sea on the West coast of Montserrat.
Station grid locator Reference is FK86vr.
Montserrat IOTA reference is NA103 in the Leeward Islands, eastern Caribbean.
Antennas:- Carolina Windom for 10M - 80M (incl. 60M), 5 el Eagle 50 MHz yagi on 18' boom & 50 MHz half-wave vertical.
Also experimenting with vertical dipoles for 10M & 12M plus 40M - 6M tuned delta loop antenna.
The next activation of VP2MDD will be from Thursday 7th June until Monday 6th August 2012.
Gordon, G3USR / VP2MSR, will be joining me for 2 weeks at the end of June.
We will be concentrating on 6M, 10M & 12M operation.

Thursday 28 June 2012
Depending on band & weather conditions we may operate /P on 6M (100W to 5 el yagi @5M agl) from a cliff top (500 ft asl) site on the east coast of Montserrat in the next few days. Please appreciate no internet or cell phone coverage at the site. Old fashioned hit & miss type operation approximately between 1130 - 2200 utc. This very remote rural site offers uninterrupted take-off over the sea from North through East to South which will give us a clear shot towards Europe, the Mediterranean, North Africa, West Africa & the Middle East . It is a challenging 50 minute drive each way on poor roads/tracks. Not practical to undertake this operation on a daily basis.
VP2MDD (Graham) & VP2MSR (Gordon)

Modes: SSB / CW - sorry no data modes.
VP2MDD Txvr : TS480 HX (200 watts HF / 100 watts 50 MHz).
QSL's for VP2MDD QSO's can be sent via Bureau (marked via M0AEP) or direct to:-
Graham Dawes (VP2MDD), 11 Ferriby Road, Barton upon Humber, North Lincolnshire, DN18 5LE, UK.
Please include return postage in UK stamps, 2 Euros, current IRC or 2 US$ for direct replies.

** I support the DX Code of Conduct **
Please read the Code http://www.dx-code.org/ and use it as your
guide to help keep DXing fun.

Schedule 2012
Time Zone is GMT minus 2 hours (during daylight savings time)
Current weather
Monday 9 July – Arrive St. Pierre, may get on the air from Saint Pierre in evening with limited antenna.
Tuesday 10 July – Take morning boat to Miquelon. Setup antennas, Setup new QTH.
Through early Tuesday 17 July – On the air – SSB, CW, RTTY, PSK31 - 160M - 6M
Primarily SSB, CW and RTTY
 Generally on the highest frequency band open. Will try 6M if indications of openings May also operate SO-50 and AO-27 Satellites in good WX and daylight Also working on other projects while on the island.
14 - 15 July - IARU HF FP/KV1J – 160 -10 Single-Op - Mixed Mode - High Power (500 Watts)

Tuesday 17 July – Take down and return to Saint Pierre
Wednesday 18 July – Fly to Halifax, drive back to Boston

Equipment
Elecraft K3
Yaesu FT-817 (for satellites)
Heathkit SB-200 Amplifier (modified) (80 -10M)
laptop with N1MM logger, MMTTY
Tigertronics SignaLink USB
WiFi internet access (not sure if it will be available yet)
N6BV Propagation Predictions from Radioware

Antennas
(New location on island so not sure what antennas will be deployed)
N1IW Off-Centered Fed Dipole 80M - 10M, height = 6m (will use extensions for 160M)
W1STT Custom 1+KW Balun - Thanks Richie!!
SteppIR Vertical (Thanks Roger G3SXW and Nigel G3TXF) – 40M through 10M (will be working on the repair of the antenna, have temporary verticals to use during repair)
Phased verticals for 20 meters.
6 Meter Moxon.
Arrow 146/437-10 (for sats)

QSL Information
FP/KV1J -

Direct to KV1J. Please include self addressed envelope with return postage, or US$1, or new style IRC*   *Please only new Nairobi style IRCs, Thanks.

St. Paul Island

St. Paul Island is located approximately 14 miles northeast of the northern tip of Cape Breton Island, Nova Scotia, and 40 miles southwest of Cape Ray, Newfoundland on Canada's rugged East Coast. This island is commonly referred to as the "Graveyard of the Gulf".

The island lies at the entrance to the Gulf of St. Lawrence. Its layout is the complete opposite of the shifting sandy dunes of Sable Island (CY0). Instead, razor sharp, jagged rocks, concealed by mist and swell, guard every approach to St. Paul Island.

The island is only three miles long and one mile wide. It is a mountainous island with high cliffs and there are only two areas where a safe landing can be negotiated.

St. Paul Island is subject to dramatic and unpredictable weather; sudden rain and squalls – the wind can change direction without any warning as often as five times per day. On most days throughout the year the entire island is shrouded in a blanket of haunting fog and mist.

St. Paul Island is not an island to be taken lightly. If the unpredictable weather turns on you, it can be a hellish place. The logistical requirements are formidable and the planning for an expedition of this magnitude takes months.

[Terry Dwyer]

EQUIPMENT
The team understand the need for CY9M on various bands and modes – with careful thought and planning we'll be using the following equipment on the island.

6 x Elecraft K3 transceivers.

3 x Ameritron ALS 500 amplifiers.

1 x RF Power HVLA700 amplifier.

3 x G3TXQ Broadband Hexbeams by MW0JZE for 10-20m.

2-el Vertical Dipole Arrays for 15-20m.

Full sized vertical for 30m.

2-el Phased Vertical Array for 40m.

Full sized vertical for 80m.

Top loaded vertical for 160m.

1 x 6M5XHG 50Mhz beam.

2 x Pennant RX antennas

CY9 – DXCC
Last activity was in 2005. There are very many new Dxers to the game, so taking a more in-depth look at the entity which is St Paul island we see the following:

Rank #46 on The Dx Magazine
- breakdown per Continent
 #50 EU | #19 AS | #30 SA | #18 OC | #19 AF
Rank #41 on Clublog
- breakdown per Continent
#50 EU | #18 AS | #69 NA | #43 SA | #18 OC | #20 AF

http://www.rsgbcc.org/hf/rules/2012/riota.shtml

Here are the main changes for 2012:The World Multi-Operator category has been discontinued.
Island Multi-Operator stations must observe a "6 band/mode changes per hour" rule.
Island Multi-Operator stations must identify Run and Multiplier stations in their log.
The score for World to World QSOs is reduced from 3 points to 2 points.
Island Stations now receive more points for World Station QSOs.
Score for Island Stations contacting their own Island is changed.
Low Power Island expedition stations can now choose any antenna that they want.

IOTA Contest Section - previous results, record scores, trophy list and online log submissions.
Guide for newcomers to the RSGB IOTA Contest
1. GENERAL
The aim of the contest is to promote contacts between stations in qualifying IOTA island groups and the rest of the world and to encourage expeditions to IOTA islands. The General Rules for RSGB HF Contests do not apply to this event.
2. WHEN
1200UTC Saturday 28th July to 1200UTC Sunday 29th July 2012 (the contest always takes place over the last FULL weekend of July).
3. BANDS AND MODES
3.5, 7, 14, 21 and 28MHz, CW and SSB. IARU band plans must be observed, with CW contacts being made only in the recognised CW ends of the bands (see RSGB Yearbook and similar sources, for recognised IARU band plans). Contest-preferred segments on 80m and 20m must be observed, so no operation must take place on 3500-3510, 3560 - 3600, 3650 - 3700, 14060 - 14125 and 14300 - 14350kHz.
4. CATEGORIES
All entrants must operate within the limits of their chosen category when performing any activity that could impact their submitted score. All equipment (transmitters, receivers and antennas) plus all operators must be located within a 1km diameter circle or within the property limits of the station licensee’s address, whichever is the greater.

4.1 Location:
• Island Station: any station operating from a qualifying IOTA island, as listed in the IOTA Directory. Island Stations must ensure beforehand that the island from which they are operating is a valid qualifying island for IOTA. Any questions about the IOTA programme and island validity should be addressed to the IOTA Manager -- see RSGB IOTA Web site.
• World Station: any station not on a qualifying IOTA island.

4.2 Operators:
• Single operator One person. One signal at any one time. QSO alerting assistance of any kind (this includes, but is not limited to, packet, local or remote Skimmer and/or Skimmer-like technology, Internet) places the entrant in the Single-operator Assisted category.
• Single-operator Assisted One person. One signal at any one time. QSO alerting assistance is allowed (this includes, but is not limited to, packet, local or remote

Skimmer and/or Skimmer-like technology, Internet). Self-spotting or asking to be spotted is not allowed.

- Island Multi-Operator Note: There is no longer a World Station Multi-Operator category.
    - 24-hour Mixed Mode only.
    - Island Multi-ops are restricted to a maximum of two transceivers, where the first station is the RUN station, labelled "0" in the Cabrillo log. The second is the MULTIPLIER station, labelled "1" in the Cabrillo log, and is used to find and call other stations, but only if the station is a new multiplier.
    - The MULTIPLIER station must not be used to solicit other contacts, e.g. by calling "CQ" or "QRZ?". Any non-multiplier QSOs made accidentally on the MULTIPLIER station must be logged, but will be scored as zero points.
    - QSO alerting assistance is allowed (this includes, but is not limited to, packet, local or remote Skimmer and/or Skimmer-like technology, Internet). Self-spotting or asking to be spotted is not allowed.
    - Island Multi-operator entrants must include a full list of operators with their entry in the Cabrillo OPERATORS section.
    - RUN and MULTIPLIER stations are each limited to 6 "Band or Mode Changes" in every 60-minute "Clock Hour". A "Band or Mode Change" means two consecutive contacts on a different band or mode. For example, a change from 20m CW to 15m SSB then back to 20m SSB means two "Band or Mode changes". A "Clock Hour" means (for example) 1800 to 1900 or 2200 to 2300.

4.3 Mode:

- CW
- SSB
- Mixed-mode (Island Multi-Operator entries must be Mixed Mode).

4.4 Operating Time:

- 24 hours
- 12 hours (Multi-Operator entries must be 24 hours) In the 12-hour categories, operation need not be for one continuous 12-hour period, but once operation has commenced in the contest, off periods must be a minimum of 60 minutes.

4.5 Power: Any station not indicating transmitter power will be classified as High Power:

- High Power Maximum permitted by the station licence, but in all cases, no more than 1500 watts output from the transmitter
- Low Power Maximum 100 watts output
- QRP Maximum 5 watts output

5. DXPEDITIONS

5.1 Island Stations may, additionally, indicate that they are a DXpedition station, and compete for a range of expedition trophies and certificates. An additional listing will be shown in the results.

5.2 The definition of DXpedition for this optional listing is one:

- where the island can only be reached by boat or air (islands which can be accessed by bridge or causeway, man-made or natural, are not eligible),
- where the majority of operators are non-resident on the island
- where the operators take all radio equipment and antennas with them, and do not rely on a resident or on any masts or towers already installed for any part of the station,

6. EXCHANGE

Send RS(T) and serial number starting from 001, plus IOTA reference number if applicable Island Stations MUST include the IOTA reference as part of their exchange. Do not use

separate numbering systems for CW and SSB. Stations may be contacted on both CW and SSB on each band. Island Multi-operator entrants may find it convenient to allocate separate blocks of serial numbers for the RUN and MULTIPLIER stations, but do ensure if possible that there is no duplication of serial numbers.

7. SCORING

7.1 QSO Points – All entrants can contact anyone, Island Stations or World Stations.

- Island Stations contacting

World Stations: 5 points.

Island Stations having the same IOTA reference (for example EU-005 contacts EU-005): 5 points.

Other Island Stations: 15 points.

- World Stations contacting

World Stations: 2 points.

Island Stations: 15 points.

7.2 Multiplier - The multiplier is the total of different IOTA references contacted on each band on CW, plus the total of different IOTA references contacted on each band on SSB. Island multi-op stations may not contact members of their own group for multiplier credit.

7.3 Total Score - The score is the total of QSO points on all bands added together, multiplied by the total of multipliers.

8. LOGS

8.1 Electronic submission of logs by or e-mail is encouraged - and in fact required - for all high scoring entrants and all who use a computer to log or prepare the logs. Entrants submitting paper logs will not be eligible for certificates or awards. Those who log on paper are encouraged to get the log typed up by a friend and submit electronically. Electronic submissions must be in Cabrillo format (a definition of Cabrillo, as applied to the IOTA contest, can be foundhere). No other formats are acceptable. Many popular contest logging programs support the IOTA contest. Single-operator entrants are recommended to try SDI from EI5DI, which is free and can be downloaded from here

8.2 For Cabrillo logs, the categories and category overlays are:

```
CATEGORY:                        [SINGLE-OP, MULTI-OP] ALL [HIGH, LOW, QRP] [SSB, CW,
MIXED]
CATEGORY-ASSISTED:     [ASSISTED, UNASSISTED]
CATEGORY-DXPEDITION: [EXPEDITION, NON-DXPEDITION]
CATEGORY-TIME:              [12-HOURS, 24-HOURS]
```

So, a single-op, World, low power, 12-hours, CW, unassisted would show:

```
CATEGORY:                        SINGLE-OP ALL LOW CW
CATEGORY-ASSISTED:     UNASSISTED
CATEGORY-TIME:              12-HOURS
```

A multi-op Island Station may, for example, indicate:

```
CATEGORY:                         MULTI-OP ALL HIGH MIXED
CATEGORY-DXPEDITION:  EXPEDITION
```

8.3 Logs must show: Time, Callsign, Band, Mode, RST / serial number / IOTA reference sent, RST / serial number / IOTA reference received. Please ensure you send a single log in order of sent serial number. Do not send separate logs for each band. Logs from Island Stations must state their island name and IOTA reference number. The data in a Cabrillo log must be of the format:

```
QSO: 28024 CW 2003-07-26 1338 G3XTT         599  001 EU-005 ZS6EZ         599  018
------  0
QSO: 21003 CW 2003-07-26 1341 G3XTT         599  002 EU-005 G4TSH         599  130
EU-005  1
```

QSO: 21002 CW 2003-07-26 1343 G3XTT 599 003 EU-005 5B4/G3UFY 599 036 AS-004 1

All entrants are encouraged to log the actual frequency, not just the band. Island Multi-operator entrants must also identify the transmitter on which the QSO is made -- in accordance with normal Cabrillo formats, this is shown by a numerical identifier (RUN station=0, MULTIPLIER station=1) on the right of the QSO line, after the received IOTA reference.

8.4 Entries must be emailed to iota.logs@... and should be sent as a normal attachment to the e-mail. Send as an uncompressed file. Do NOT send more than one attachment. In the "subject" line of your e-mail message, please include your contest callsign. Please take a moment to check your log via a text editor before sending it, to avoid potential problems. You will receive an acknowledgement by e-mail within 24 hours, directing you to a Web page to complete the submission process, or advising you if there is any problem with your log. Further help on IOTA log submission is available by going to IOTA FAQs.

8.5 The address for paper entries is RSGB IOTA Contest, Radio Society of Great Britain, 3 Abbey Court, Fraser Road, Priory Business Park, Bedford, MK44 3WH, UK.

8.6 The closing date for all logs is 3 weeks after the contest, 19 August 2012 at 23:59:59 UTC

8.7 Island Stations - By submitting a log for this contest you agree that the RSGB can automatically grant credit to IOTA participants' scores for claimed QSOs that reasonably match the data in your submission (this facility is included in the Next Generation IOTA Software).

8.8 Photographs of IOTA contest operations are very welcome and will be posted on the RSGB Contest Committee website or used in RadCom. Do not send these as part of your log submission, but mail them separately toiotacontest@... There is also be an opportunity to upload photographs, YouTube clips and your location (by way of Google Earth) when you complete your log submission.

9. PENALTIES

Points may be deducted, or entrants disqualified, for violation of the rules or the spirit of the contest. This includes, for example, use of a third party to make contacts on a list or net, contacting CW stations on an SSB frequency or vice-versa, failing to observe appropriate contest-preferred band segments, or not giving the IOTA reference for every contact. The decision of the IOTA Contest Manager and RSGB Contests Committee is final in all matters of dispute.

10. AWARDS

Certificates will be awarded to leading stations in each category and section, and in each continent, according to number of entries. A large number of Awards and Trophies is now available, and new sponsors are always welcome.

11. SWL CONTEST

There is no longer an SWL section in the IOTA Contest, but the Mediterraneo DX Club runs an IOTA SWL Contest in parallel with the IOTA Contest. SWLs can find full details on the MDXC Web page: http://www.mdxc.org/swl

12. NOTE FROM RSGB IOTA CONTEST MANAGER:

The IOTA Contest Manager can be reached via the contest website. IOTA Contest information, including rules, trophies available, previous results, soapbox and photographs, and logs received can be found on the RSGB Contest Committee Web site at www.rsgbcc.org Copies of the IOTA Directory, if required, can be purchased from the RSGB. A full list of IOTA islands, and other information relating to the IOTA program can be found on the RSGB IOTA Web Page .

http://www.arrl.org/iaru-hf-championship

1. Eligibility: All licensed amateurs worldwide.
2. Objective: To contact as many other amateurs, especially IARU member society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10 meter bands.
3. Date and Contest Period: The second full weekend of July, beginning 1200 UTC Saturday and ending 1200 UTC Sunday (July 14-15, 2012). Both Single and Multi operator stations may operate the entire 24-hour period.
4. Entry Categories:
    4.1. Single Operator
        4.1.1. Categories
            4.1.1.1. Phone only – High, Low and QRP power levels
            4.1.1.2. CW only – High, Low, and QRP Power levels
            4.1.1.3. Mixed mode – High, Low and QRP Power levels
        4.1.2. One person performs all operating and logging functions.
        4.1.3. Use of spotting nets, packet, or multi-channel decoders (such as CW Skimmer) is not permitted. Single-operator stations that use spotting nets, packet or multi-channel decoders will be reclassified to the Multi-operator, Single Transmitter category.
        4.1.4. All operators must observe the amateur radio regulations of their country at all times.
        4.1.5. Single operator stations are allowed only one transmitted signal at any given time.
    4.2. Multi Operator, Single Transmitter, Mixed Mode only
        4.2.1. Must remain on a band and mode for at least 10 minutes before changing bands or modes.
        4.2.2. Only one transmitted signal is allowed at any given time.
            4.2.2.1. You are not allowed a second radio that works only multipliers.
        4.2.3. All operators must observe the amateur radio regulations of their country at all times.
         4.2.4. Violation of the band change rules will reclassify the entry as a checklog.
    4.3. IARU Member Society HQ Station
        4.3.1. May have only one transmitted signal per band mode (160 CW, 160 Phone, 80 CW, 80 Phone, 40 CW, 40 Phone, 20 CW, 20 Phone, 15 CW, 15 Phone, 10 CW, 10 Phone) at the same time.
        4.3.2. All stations involved in an HQ operation must be in a single ITU zone.
        4.3.3. Only one HQ station callsign per member society per frequency band is permitted.
        4.3.4. All operators must observe the amateur radio regulations of their country at all times.
5. Contest Exchange:
    5.1. IARU member society HQ stations send signal report and official IARU member society abbreviation. IARU International Secretariat club station NU1AW counts as a HQ station. Members of the IARU Administrative Council and the three IARU regional Executive

committees send “AC,” “R1,””R2,” and “R3” as appropriate.

5.2. All others send signal report and ITU zone.

5.3. A complete exchange must be logged for each valid QSO.

6. Valid Contact:

6.1. The same station may be worked once per mode per band for QSO credit.

6.1.1. Mixed-mode entries may work a station once per mode per band.

6.2. A station may only be worked for credit in the portion of the band that is generally accepted for the mode used.

6.2.1. On any band, a station may be worked once on Phone (in the Phone segment) and once on CW (in the CW segment).

6.2.2. Cross mode, cross band and repeater contacts are not valid QSOs.

6.3. Where contest-preferred segments are incorporated into regional band plans, participants must observe them.

6.4. The use of non-amateur radio means of communications (e.g. telephone or the Internet) for the purpose of soliciting a contact (or contacts) during the contest period is inconsistent with the spirit and intent of these rules.

6.5. Use of self-spotting techniques on packet or other mediums are inconsistent with the spirit and intent of these rules.

7. QSO Points:

7.1. Contacts within your own ITU zone, as well as QSOs with any IARU-member society HQ station or IARU official (counting as the special multiplier), count one point each.

7.1.1. Contacts with a station in the same ITU zone but on a different continent count one point.

7.2. Contacts within your continent (but different ITU zone) count three points.

7.3. Contacts with a different continent and IARU zone count five points.

8. Multipliers:

8.1. The total number of ITU zones plus IARU member society HQ stations worked on each band (not mode). IARU officials represent a maximum of four multipliers per band (AC, R1, R2 and R3).

8.2. IARU member society HQ stations and officials do not count for zone multipliers.

8.3. To qualify as the special multiplier, Administrative Council and Regional Executive Committee stations must only be operated by the individual station licensee as a single operator entry or as a multi operator, single transmitter entry with significant participation by the licensee.

9. Scoring:

9.1. The total number of QSO points times the total number of multipliers worked.

10. Reporting:

10.1. Entries must be postmarked or emailed no later than 30 days after the end of the contest (1200 UTC August 14, 2012).

10.2. Electronic entries must conform to the Cabrillo file format.

10.2.1. The Cabrillo file format and specifications may be found athttp://www.kkn.net/~trey/cabrillo/ or in the November 1999 issue of QST magazine.

10.2.2. Any entry which has been generated using a computer (either during the contest or after the contest) must be submitted either as an attachment to an email or on a 3.5” diskette.

10.2.3. Electronic files must use the entrant’s callsign as the file name.

10.2.4. The log file must be a chronological list of QSOs as made not separated by band or mode.

10.2.5. Entries sent as attachments to email must be sent toIARUHF@...

10.2.5.1. Email entries must include the call sign used during the contest on the SUBJECT line of the email.

10.2.6. Entries sent on diskette should be mailed to: IARU HF Championship, IARU International Secretariat, Box 310905, Newington, CT 06111-0905 USA.

10.2.6.1. Diskettes must be clearly labeled with the station call sign, contest name, entry class and date.

10.3. Participants may manually convert their paper logs to a Cabrillo log one QSO at a time and submit their entry using the web applet found atwww.b4h.net/cabforms.

10.4. Paper logs must be in chronological order, not separated by bands, and clearly indicate for each contact: band, mode, date, time (in UTC) callsigns, complete exchanges sent and received, multipliers and QSO points.

10.4.1. Multipliers should be marked in the paper log only the first time they are worked on each band.

10.4.2. Paper logs with more than 500 QSO's must include dupesheets (an alpha-numeric list of all callsigns worked, broken down by band and mode.)

10.4.3. All contacts in paper logs must be in chronological order, not separated by bands.

10.4.4. Paper logs must be mailed to IARU International Secretariat, Box 310905, Newington, CT 06111-0905 USA.

10.5. All paper entries must include an official summary sheet or reasonable facsimile thereof with complete contest information.

11. Awards:

11.1. A certificate will be awarded to the high scoring entry in each category in each ITU zone, each DXCC country and each ARRL Section.

11.2. A certificate of participation will be awarded to each IARU member society HQ station and to each Administrative Council and Regional Executive Committee station..

11.3. Achievement level awards will be issued to those making at least 250 QSOs or having a multiplier total of 75 or more.

11.4. Additional awards may be made at the discretion of each country's IARU member society.

12. Conditions of Entry:

12.1 By submitting a log to the IARU HF Championships, the submitter agrees that the log may be made public, at the discretion of the Contest Sponsor.

12.2. Each entrant agrees to be bound by the provisions of this announcement, by the regulations of his/her licensing authority, and by the decisions of the ARRL Awards Committee, acting for the IARU International Secretariat.

13. Disqualification:

13.1. Any entry may be disqualified if the overall score is reduced by more than 2%.

13.2. For paper log entries:

13.2.1. Score reductions do not include correction of arithmetic errors;

13.2.2. Any paper log entry may be disqualified if more than 2% of duplicate QSOs are left in the log and claimed for credit; and

13.2.3. A three-QSO reduction will be assessed for each duplicate QSO found during log checking or for miscopied callsigns.

13.3. For electronic logs, a one-QSO penalty will be assessed for a miscopied callsign.

14. Additional Rules:

14.1. For situations not covered in these rules refer to the ARRL General Rules for All Contests and the ARRL Rules for Contests on Bands below 30 MHz.

15. Additional Information:

15.1. Questions may be directed to contests@... or IARU HF Contest Information, PO Box 310905, Newington, CT 06111-0905 USA.http://www.arrl.org/iaru-hf-championship

Kepada Rekan2,

Mengajukan permohonan menjadi anggota YBDXC kepada YB2DX OM Hans melalui email yb2dx@... dengan persyaratan memenuhi salah satu sbb:

Dapat melampirkan copy/scan/photo award dari salah satu kontest yg berskala Internasional (skala Nasional tidak berlaku) atau

Dapat melampirkan copy/scan/photo salah satu dari DXCC Awards yang dikeluarkan oleh ARRL atau

Dapat melampirkan copy/scan/photo QSL Card yg terdiri dari minimal 5 Benua (AF, AN, AS, EU, NA, SA), (OC tidak berlaku)

Anggota diharuskan mempunyai data pada www.qrz.com

de YB4IR Imam / YB1AR Yana

ONLINE REGISTRATION (at this moment, valid YB Operator only)

http://home.comcast.net/~w6bbs/lotw.htm

LOTW QSL Manager Service

I am offering to set up and manage a Logbook Of The World account for you. This is a free service to any stations outside the US.
In most cases, all you have to do is send me an email requesting that I manage your LOTW account for you. I will then send you an email link for you to send a request to The ARRL LOTW Staff making me your LOTW QSL Manager.
I will then create a request for certificate for your call and upload it to the LOTW server. Once approved I will download your certificate and be ready to process your logs.
I can handle multiple calls from one dxcc entity if you have changed your call over time.
If you have multiple call signs from different dxcc entities then we repeat the process for each call.
From this point all you have to do is email me the adif export of your log and I will process them for you. The first round you send me your entire log, after that just your new qso's whenever you want to update. I will process your logs as often as you wish. I recommend once a month unless inactive.
Once I have your LOTW account setup and logs in place I will give you the password so that you may have full access to your own LOTW account. Each call sign will have it's own certificate, account and password. I can choose the password, or you may choose it. No one but you and I will have the password to your LOTW account. Only I will be able to sign your logs unless you install the software and download your certificates.
Should you decided at a later date to take over your own processing, all you have to do, is download the free TQSL software and install it. Download your certificate, or get it from me. You can now process your own log files.
I will gladly work with any dxpeditions as well.
I am not offering a QSL card service, this is only for LOTW.
You may email me mycallsign@...

QSL
How to obtain the QSL

Qsl Via HB9EOU
WIESNER LUDVIC

FIAZ 40
2300 LA CHAUX-DE-FONDS
SUISSE
DIRECT QSL
 If you wish to request your TO2D QSL card direct, please follow these instructions: Needed minimun:
Self Addressed Envelope (SAE) and 2 Euro or 2 US$ or 1 IRC
Cards received without SAE and or not enough postage will be answered via bureau.
 Not in Log ?
If you cannot find your callsign in the LOG but are sure to have a valid contact, please send your request to HB9EOU after carefully checking the QSO details (date, time, band and mode)
Every request will be considered in order to debug any possible log entry error.
Thank you for your understanding.
Generous person!
If you send QSL like asking a sum greater than required
ie, with minimum 5 Euro or 5 USD you will be entered in the list of donor

OPDX Bulletin 1067.1 June 28, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1067.1
BID: $OPDX.1067.1
June 28, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and 1A0C for the following DX information.
1A, S.M.O.M. (Press Release - Thoughts about the magic band. Last press release before the kick off)
Posted on June 28th, by the 1A0C team [edited]:
"Roma is not precisely a remote place with scarce ham population! So we don't see the need of a beacon. Even more, we don't want to upset the local ham community with another broadcasting signal in the band, there is a nice beacon already (I0JX) and it will be more than enough. We will, of course, keep watching the early warning sites such as the 6m ON4KST prop pages and DXCluster.
>As it was intended from the beginning this operation is primarily focused on working North America and Asia. Our plan for 6m is to steer the beam to JA in the morning. All eastern EU will be covered in 1 hop as well. And turn the beam to NA past midday, giving a chance for the eagers in West EU. Last operations by 1A0KM has provided Sovereign Military Order of Malta to most of the EU 6m population, however there are very few dxpeditions planned for this season, therefore pileups from the old Europe can be large as people are idle looking for any prey to hunt.
>The 6m propagation, specially on Es skip, is unpredictable, but our experience of the last 20 years points that during the last week of June/1st of July conditions are best for Xatlantic contacts and long haul openings to the N. East. We need to be very observant for any possible multihop event, managing meanwhile the EU pileup smartly whilst looking for possible links across the Pond or Siberia. This is not easy, but we have done it successfully and recently from Algeria, Egypt, Morroco, Palestine, Andorra, etc.
>At the end, we are in Europe, hence, when working EU the so called "DX-windows" must be avoided, that is 50.100-50.130. We are thinking to stay fixed on one frq for all CW operation below it, between 50084-95, in order to not to disturb upwards the band to leak the pileup into the DX windows and choose a phone frq up in the band, away from the DX zone, e.g. 50180. We really hope the local operators, and even the European 6m fans, will appreciate this decision of the team.
BAND PLANS BAND CW SSB RTTY ------ ------ ------ ------- 6M 50.084 50.180 -- 10M 28.024 28.495 28.080 12M 24.894 24.945 24.921 15M 21.024 21.295 21.080 17M 18.074 18.145 18.100 20M 14.024 14.145 14.080 30M 10.104 --- 10.140 40M 7.004 7.065/7.160 7.035 80M 3.524 3.780
--50 MHz information and operating tips
• The 6 meter band will be included in this operation. We'll focus for long haul openings, as most of the Europe regions have been widely covered in the recent years.
• We plan to use the following frequencies: 50.084 for CW and 50.180 for SSB. Although they may be changed, depending on local noise/birdies. Split operation will be deployed when

needed.
• The main mode will be CW. If band conditions permit, SSB will be used to gain a higher QSO rate. Please do not ask for mode changing.
• Please avoid QSO duplication, give others a chance. Logs will be uploaded twice a day to our website. If it will work, we will provide the live log online (new are not sure 100% now).
• We don't find necessary to set a beacon station this time.
• Our Grid Locator is JN61FV. Please, DO NOT send your locator, it is not needed and we won't log it anyway, it wastes precious time."

NA-128
Contest Group
ALL OPERATIONS ARE QSL VIA VE2CQ

2012
Île Verte C.Is.A QC-015

Members of the « NA-128 Contest Group » will activate the special callsign VX2I M/S from Ile Verte (IOTA NA-128, C.IS.A QC-015, Grid FN58, ARLHS CAN-244, WLOTA 1404) between July 26-29, 2012 during the IOTA Contest .

The group will operate many stations from the lighthouse keeper’s quarters on all bands (SSB, CW and RTTY, PSK63) before and after de contest. A station will be dedicated on 6m. The group will operate ONLY in SSB and CW on 10, 15, 20, 40 and 80m DURING the contest. If you need NA128 for the IOTA 50th ANNIVERSARY MARATHON, work us DURING the contest!

Built in 1809, the Ile Verte lighthouse is the oldest in the St-Laurence River and the third oldest in Canada. It was declared an historical monument in 1976 by The Historic Sites and Monuments Board of Canada. A special stamp showing the lighthouse was released by Canada Post in 1984. The lighthouse is 54 feet high and is the main attraction on the island. It is open to the public and there is also an inn where you can stay overnight.

IJ7A, S Pietro Island IOTA DXpedition, EU 073

IOTA reference: EU073

From July, 26 to 29 2012, and during the next IOTA Contest (July, 28-29 2012) we will be operating from the island of San Pietro (Cheradi group, reference IOTA EU073).

The category of participation will be Island-Multi-Operator (mixed)-High Power.

Islands on the Air (IOTA) Contest 2012

Here are the main changes for 2012:

The World Multi-Operator category has been discontinued.

Island Multi-Operator stations must observe a "6 band/mode changes per hour" rule.

Island Multi-Operator stations must identify Run and Multiplier stations in their log.

The score for World to World QSOs is reduced from 3 points to 2 points.

Island Stations now receive more points for World Station QSOs.

Score for Island Stations contacting their own Island is changed.

Low Power Island expedition stations can now choose any antenna that they want.

All the rules here:

http://www.rsgbcc.org/hf/rules/2012/riota.shtml

Info about the island

The Cheradi Islands are a small archipelago, to the south-west of the basin of Mar Grande of Taranto, in the gulf.The archipelago consists of two islands of St. Peter and St. Paul (respectively, distant from the navigable channel of Taranto 3.5 and 6.25 km), part of the military property, and where it is forbidden the landing and navigation. At one time there was also the islet of San Nicolicchio now disappeared.
Flora and faunaThe largest island of St. Peter may be considered a true wilderness area. While the prohibition of the Navy for landing and navigation has deprived the citizens of an area of great interest for the city, it has preserved the rich ecosystem of the islands. Many species of birds and songbirds find refuge on the island of St. Peter, as the barn owl, the oystercatcher, quail, kingfishers, kestrels, doves, gulls and cormorants, reptiles such as lizards, geckos and tarantulas, including rodents, mice and voles. At various times throughout history, vast areas of the main island were used for planting. During the colonization of the monks there were planted olive trees. After leaving the island by the latter, the vegetation began to grow. In the early eighteenth century was built on the island of St. Peter's Chapter of the farm, and new areas of the island were used for planting.After leaving the island again in 1842 the farm was leased to a farmer who cried wheat and olive trees and figs. With the advent of the Navy every type of farming was abandoned, there was planted a large pine forest and the wild plants he resumed the upper hand. Today the island's vegetation is

typically Mediterranean, with wide pine forest, oak trees, oaks, sycamores and palm trees, many flowers, asparagus, clover, poppies, daffodils (narcissus), mauve, sage, heather, thistles (Carduus) , capers, oats, clover and garlic.
Features weather and seaThe winds coming from the north often last several days, calm down or decrease in intensity during the night and early morning hours, to blow with violence during other times of the day. The south-west wind causes rough seas, the south wind is violent, especially in winter and during the months of May and June brings rain and mist. In spring, the wind coming from the west (from Calabria) is short if somewhat violent and often quiet during sunset. The winds coming from the South and East leading the fog.There are signs that precede the onset of the winds coming from NE and ENE, as the curtain of clouds that persists in the hills north of the Mar Piccolo blow until those winds.During this regime are clearly visible the coast of Calabria. The external currents are rather weak, affected by the winds, with EW direction. The tides around Cheradi are irrelevant, they are around 30-40 cm.
The islandsSan NicolicchioAt one time there was also the islet of San Nicolicchio, now lost because of industrial renovation and enlargement of the cargo port. The island was called by the fishermen in dialect u 'squegghie (the rock) and located near the tip Rondinella. In ancient times people of Taranto had built an abbey on the island of greek ritual, dedicated to St. Nicholas of Myra.St. PaulThe island of Sao Paulo is the smallest of Cheradi, having an area of 5 hectares and is also the second to last among the islands of Puglia in size, after Cretaccio.St. Peter'sThe small island of San Pietro has an area of approximately 117 hectares, has a triangular shape and has three bits called Punta La Forca west, north and Scanno The Punta Punta A Place in the East Coast stretches for 7 km The maximum length of the island from Punta La Punta The Scanno fork is a little over 2 km, maximum width is 1.6 km, the maximum height above sea level is 10
meters. (Punta La Forca).
CuriosityThe surfaces of the islands of St. Peter and St. Paul are respectively of 118 ha and 5 ha, and are also rich in wildlife and marine sponges, such as Petrosia ficiformis, and tunicates, as Phallusia mammillata.On the island of San Pietro is located 120 meter antenna, it was used for the service on 500 kHz of maritime radio aid (no longer operating).Enjoy particular interest to amateur radio are regularly organized expeditions during which you make thousands of connections with other radio amateurs around the world.The ITU prefixes allocated to both islands are characterized by the initials IJ7.

Dear ALL,

2 hari meleset dari jadwal tayang, terlampir (atau silah diunduh) e-QSP edisi KHUSUS bln Juni 2012

Dari halaman depan (1) berturut-turut,konten edisi ini adalah:

+ QSL card dari awak ISS ?

+ Obituari: Dr Jos Soejoso YB2SV (SK)

+ Transit Venus, 5-6 juni 2012

+ Space mission Shenzhou 9, sebuah kisah sukses dari Cina

+ Membuat sendiri BALUN 1 : n

Kembali yg unik dr edisi ini adalah untuk pertama kalinya (sejak era BeON) kalawarti elektronik ini keluar dengan jumlah halaman yang GANJIL, yaitu 9 halaman !!!

Selamat membaca, PSE QSL, and as always: pse ENJOY .!!!

73, de

bam ybØko

[Ed. , e-QSP]

PS:

bagi rekans yang tidak bisa menerima surel dengan lampiran (attachment), sila unduh sendiri di <http://www.issuu.com/e-QSP>
http://www.issuu.com/e-QSP (File name: e-QSP Vol. i-Kh-JUNE 2012),

https://docs.google.com/open?id=0B_kYrg8Peh3Qd1ZHMkNXdHlSeU0 (File name: Vol. I ☐ KHUSUS Juni 2012), atau kirim imil pendek (atau klik Reply mssg ini) ke japri unclebam@...

As usual, PSE QSL, TNX ...

73,

[bam]

OPDX Bulletin 1068 July 2, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1068
BID: $OPDX.1068
July 2, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N1DG, NC1L, NG3K & ADXO, NJ1Q & W1AW, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, K8GI, K8YSE, NE8Z/HC1MD, W8GEX & 60m News, WB8YJF, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HA0HW, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, Pete's DX- Newsdesk, PS7AB, RSGB IOTA Web Site, Sixitalia Weekly, TA1HZ, TA2RX, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 24th-June, through Sunday, 1st-July there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, JA, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VR, VU, XE,
XU, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
1A, SOVEREIGN MILITARY ORDER OF MALTA (Reminder)
By the time you read this, an international team of 13 operators will be active as 1A0C between July 1-4th. Activity will be on 80-6 meters using CW, SSB and RTTY. Special attention will be paid to non-European stations (especially from the U.S. and Japan). QSL via OQRS or LoTW. Please carefully read, the following URL page about the QSL Policy at: http://www.1a0c.com/qsl-informationFor more details and updates, see:http://www.1a0c.com
5C13, MOROCCO
Look for Moroccan amateur radio operators to use the special prefix 5C13 between July 1-27th. Activity is in celebration of the 13th anniversary of the crowning of Mohammed VI King of Morocco. Stations heard as of print time: 5C13IG, 5C13KD, 5C13NK, 5C13SG and 5C13YZ.
9Y, TRINIDAD AND TOBAGO
Members of the Trinidad And Tobago Amateur Radio Society will be active as 9Y4HQ during the IARU HF World Champion- ships (July 14-15th). Activity will be on all HF bands using CW and SSB. QSL ONLY via DF2RG, direct or by the Bureau.

C9, MOZAMBIQUE
Ivor, ZS1WY, is currently active as C91IW and is expected to be there over the next year. However, Ivor is there working in Mo- zambique, and operations may be limted. QSNs show he was on 160 meters. QSL via ZS1WY.
CY9, ST. PAUL ISLAND (Update)
The CY9M Team announced this past week, [edited] "CY9M are delighted to welcome Bill, N2WB, to this exciting expedition. Bill has a wealth of DXpeditioning experience visiting and operating from some of the rarest places on Earth. Welcome aboard Wild Bill!" The following media pages are available for this operation at:
Website: http://www.cy9m.com/Twitter: https://twitter.com/#!/CY9MFacebook: http://www.facebook.com/CY9M.2012
DXCC NEWS
Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
3C0E - Annobon; 2012 Operation
>3C6A Equatorial Guinea; 2012 Operation
>5X1RO Uganda; 2012 Operation; **
>J25DXA Djibouti; 2011 Operation
>J28RO - Djibouti; 2010 Operation **
>XW4XR Laos; 2012 Operation** - Indicates logs have been uploaded to LoTW. If you've had any of these operations rejected in a recent submission please send an E-mail to bmoore@... to be put on the list for an update.
DXPEDITION AWARDS FROM FRIEDRICHSHAFEN
* At last weekend's Friedrichshafen Convention, the German DX Foundation announced at their DX forums that the 2011 "DXpedition of the Year" went to the VP8ORK South Orkney DXpedition.
* Tevfik, TA1HZ, who was active as ZA1TC, received the WAEDC 2011 Hero Award in Friedrichshafen, Germany.
DXPEDITION VIDEOS OF THE WEEK (New Feature)
With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
1976 - 7J1RL Okino Torishima Island -
> English Ver. - http://www.youtube.com/watch?v=SoNABeU-hVk
> JA Version - http://www.youtube.com/watch?v=vMmxQ8IfsuY#!
>1997 - BS7H Scarborough Reef - http://www.youtube.com/watch?v=y50WgagQIxM
>2004 - ZK3SB Tokelau Island - http://www.youtube.com/watch?v=oWowLbRn94E
>2008 - YJ8TZ Vanuatu DXpedition - http://www.youtube.com/watch?v=eaeQd0Lkdq0
>2010 - 3B8/IZ4AKS and 3B9/IZ4AKS; Mauritius & Rodrigues Islands Micro- DXpedition - http://www.youtube.com/watch?v=G4MCCZu_V3Y
>2011 - YJ0VK Vanuatu DXpedition - http://www.youtube.com/watch?v=lRxBOaGq37MIf you have a DXpedition video available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.
EA6, BALEARIC ISLANDS
Flavio, IW2NEF, will be active again as EA6/IW2NEF from Mallorca Island (EU-004) between June 16-27th. Activity will be on the HF bands, 6 meters and 2 meters. QSL via his home callsign.
EI & GI, IRELAND AND NORTHERN IRELAND
Dave, WJ2O, is expected to tour both Ireland and Northern Ireland as EI/WJ2O/m and GI/WJ2O/m, respectively, between July 8-19th. His schedule is as follows:
Ireland - July 8-15th and 19thN. Ireland - July 16-18thActivity will be on the HF bands,

and he plans as to be in the IARU HF World Championships (July 14-15th) as a Single-Op/Mixed-Mode from Ireland. QSL direct to his home callsign (see (QRZ.com)). For more information, see his Web site at:http://wj2o.com

FP/TO2, ST. PIERRE AND MIQUELON

Operators Yuri/VE3DZ and Victor/VA2WDQ/ VA2WA will be active as FP/VE3DZ and FP/VA2WA from Miquelon (NA-032) between July 20-31st. Activity will be on 160-6 meters using CW, SSB and RTTY. Look for them to use the special callsign TO2U for the CQWW VHF (July 21-22nd) and the RSGB IOTA Contest (July 28-29th). Suggested frequencies are:

CW - 1824, 3524, 7024, 10114, 14024, 18074, 21024, 24894 and 28024 kHz

>SSB - 3790, 7060/7140, 14240, 18140, 21240, 24940 and 28440 kHz

>RTTY - 7041, 10142, 14084, 18104, 21084, 24914 and 28080 kHz

>6m - 50.104/CW and 50.115/SSBQSL cards will be available after the DXpedition via OQRS, by the Bureau or direct by using the PayPal system. For more details and updates, visit:http://www.to2u.contestgroupduquebec.com

HD081, ECUADOR

Members of the Quito Radio Club (HC1QRC) will be active as HD081QRC (Hotel Delta Zero Eighty One) between July 14-22nd. Activity will be on all bands, CW and SSB. The operation is to commemorate the founding of the Quito Radio Club 81 years ago. Equipment will include both modern and some beautifully restored vintage radios by Gustavo, HC1BG. QSL via HC1JQ, direct or by the Bureau.

HG, HUNGARY (WFF Op)

The members of the Regional Radio Sport Club Puspokladany and quest operators will activate the rare Hevesi Fuves Pusztak Nature Reserve (HAFF-020) between July 13-16th. Operators mentioned are Zoli/HA0DX (Organizer), Viktor/HG0NAZ, Pista/HA0KA and Imi/HA0BW. Activity will be on all HF bands using CW, SSB and the Digital modes, with up to 4 stations depending on the local situation. QSL via the HA QSL Bureau (via HA0HW).

IOTA NEWS

AS-074. Ian, 9M2FB, will be active from Pulau Ketam during the RSGB IOTA Contest (July 28-29th) as a Single-Op/24HR/CW-Mode/Dx- pedition entry. QSL via his home callsign direct (see (QRZ.com)).

EU-014. Peter, ON8VP, will be active as TK/ON8VP from Corsica (DIFM TK-001, MIA MCO-001, WLOTA 1390) between July 1-6th. Activity will be holiday style. QSL via his home callsign, the Bureau is preferred.

EU-015. The special event station SX9S will be active from Crete between July 1st and December 31st. This marks the 50th anniversary of the national park "Samaria Gorge" (SVFF-011). QSL via SV9AUE, by the Bureau or direct.

EU-075. Nikiforos, SV1EEX, will be active as SV1EEX/8 from Hydra Island until the middle of July. Activity will be on 40-6 meters using CW, SSB and PSK. QSL via his home callsign (see details on (QRZ.com)).

NA-067. Jon, WB8YJF, will be active as WB8YJF/4 from Ocracoke Island (USI NC-001S) between July 22-29th. Activity will include the RSGB IOTA Contest (July 28-29th). Operations will be on 80-10 meters using CW, RTTY, and SSB. QSL via his home callsign, direct (for a FAST reply) or by the Bureau.

NA-126. Operators Kevin/VE9MY and Linda/VE9GLF will be active from John's Island (CISA NS-127) before, during and after the RSGB IOTA Contest (July 28-29th). Both callsigns will be used as a Single-Op/Low-Power entries. QSL both callsigns via VE9MY (see QRZ.com), LoTW, direct or by the Bureau (prefered - E-mail requests are accepted). Visit: http://qsl.net/ve9my

ISWL CALLSIGNS (For July/August/Sepember)

The following ISWL club callsigns will be used throughout the month of June/August/Sepember:

Look for G4BJC and M1SWL to be used by several ISWL members in July, August and September, to mark the Olympic Games 2012 in the U.K.
The operators and dates for both club callsigns are as follows:
G4BJC:
>July 1-20th - GX4BJC - Arthur G-20358 / G0KOC - WAB: TQ62
>July 21-27th - GO4BJC/A - John G-20579 / M0HEM - WAB: TQ48
>July 28th-August 3rd - GO4BJC/A - Mike G-11331 / M0SMJ - WAB: SS20
>August 4-10th - GO4BJC/A - Walt G-8343 / G3NYY - WAB: SO93
>August 11-17th - GO4BJC/A - John G-11570 / G8XTJ - WAB: SP80
>August 18-24th - GO4BJC/A - Peter G-20322 / G4VFG - WAB: SX65
>August 25-31st - GO4BJC/A - Herbie G-20006 / G6XOU - WAB: TM22
>September 1-7th - GO4BJC/A - Geof G-20665 / M0BAU - WAB: SJ37
>September 8-9th - GO4BJC - Arthur G-20358 / G0KOC - WAB: TQ62
>September 10-30th - to be notified
>M1SWL:
>July 1-20th - MX1SWL/A - Tom G-7964 / G3RPV - WAB: TL27
>July 21-27th - MO1SWL/A - John G-11570 / G8XTJ - WAB: SP80
>July 28th-August 3rd - MO1SWL/A - Peter G-20322 / G4VFG - WAB: SX65
>August 4-10th - MO1SWL/A - Geof G-20665 / M0BAU - WAB: SJ37
>August 11-17th - MO1SWL/A - Tony G-10476 / G4ZIB - WAB: SO87
>August 18-24th - MO1SWL/A - Mike G-11331 / M0SMJ - WAB: SS20
>August 25-31st - MO1SWL/A - Walt G-8343 / G3NYY - WAB: SO93
>September 1-7th - MO1SWL/A - John G-20579 / M0HEM - WAB: TQ48
>September 8-9th - MO1SWL/A - Herbie G-20006 / G6XOU - WAB: TM22
>September 10-30th - MX1SWL/A - Tom G-796 4 / G3RPV - WAB: TL27ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operators.
For more information, see
http://www.iswl.org.ukor (QRZ.com) and eQSL.cc. NO LoTW.
K2, UNITED STATES (Update - Special Notice!!)
The 4th annual "Original 13 Colonies - Independence Week - Special Event", has begun as of June 30th (OPDX.1067 for details). However, due to the effects of the severe storms in the Midwest and Northeast resulting in loss of power to many areas and the lack of propagation, the Special Event is being extended until midnight (0400Z) on Saturday 7 July (Sunday Zulu). Note that, due to other commitments, all colony operators may not be on the air at all times during that time period. They will do the best they can to help you get your contacts. PLEASE BE PATIENT! A SPOTTER's PAGE is available at:
http://www.cwfun.org/funspots/us13
KH6BZF PROPAGATION FORECAST/REPORT (July 2-8th)

By the time you read this, members of the Russian Robinson Club (RRC), Yuri/N3QQ and Dick/N7RO will be active from American Samoa until July 3rd. They are currently active as KH8PPG, but may sign KH8RRC, depending on how fast the FCC acts on their vanity callsign application from Pago Pago. Activity will be on 40-10 meters using CW, SSB and RTTY, with two stations on the air - one operating 100 watss and the other with 600 watts. Yuri tells

OPDX that they "Plan to stay at hotel near the beach, and have a RTTY station ready to go, all tested/packed." QSL via N7RO. While there, they will install a UHF repeater system for the StarKist tuna plant, and also talk with the U.S. Fish & Wildlife Service (FWS), as well as boat owners about a potential expedition in the future to Rose Atoll (OC-190); possibly during this winter (no dates yet).

KH9, WAKE ISLAND

Paul, N6PSE, reported on eHam.net that the Intrepid DX Group "has just received a letter from the USAF denying our request to do a DXpedition from Wake Island". The group submitted a request two years ago and then "recently sent a follow up letter". Paul also states [edited], "I had E-mailed WA2YUN when I learned he was working on Wake. This was well after we had sent our proposal to the DoD. Now that the Colonel responsible for the base has denied our request, we will focus on other rare entities."

KH0, MARIANA ISLANDS

Hiro, JL1RXW, is now active as KH0XG from Tinian Island (OC-086) until July 3rd. Activity will be on the HF bands SSB only. QSNs show he is 40 and 15 meters. QSL via his home callsign ONLY, direct or by the Bureau. Don't send to the KH0 Bureau or TINIAN direct. KH0, MARIANA ISLANDS

Kirk, WE8A, will be active as WE8A/KH0 from Saipan (OC-086) between Thursday, July 26th, and Sunday, July 29th. Activity will be on 80-6 meters, but with a focus on 30/17/12 meters using CW and SSB. Suggested operating frequencies on the 30/17/12 meter bands will be (+/- QRM):

CW - 10106, 18071 and 24901 kHz

SSB - 18136 and 24936 kHz

QSL ONLY direct to: 5-1-35, Daikaidori, Kobe, 652-0803 JAPAN. Please do not send to the U.S. Bureau or JA Bureau. For more details and updates, go to:

http://blog.zaq.ne.jp/kirc/category/5

PC100, THE NETHERLANDS (Special Event)

Look for special event station PC100NOM to be active between July 2-29th. Activity is to promote the 100th anniversary of The Netherlands Open Air Museum in Arnhem. The operator is Fred, PA0FAW, and he will be operating on CW, SSB and PSK, ..etc. Fred's reference numbers are DIG1487, ISWL PA-11092 and WAB-11722. QSL via PA0FAW, direct, by the Bureau or eQSL. No LoTW, SWLs are welcome.

PQ7/PW7, BRAZIL

Look for special event stations, PW7FD (SSB & Digital) and PQ7FD (CW), to be active between July 1-30th, in honor of the Brazilian Firefighters. Activity will be on 40, 20, 17, 15 and 10 meters. QSL Manager is PS7AB (QRZ.com), direct (SASE w/1 USD), or by the Bureau (QSLs from SWLs are welcome) or LoTW. For more information, see:

http://www.ps7ab.com.br/pq7fd.htm

PT0, ST. PETER AND ST. PAUL ROCKS

A report on QRZ.com, states that a special event station, "PT0S is a DXpedition to St. Peter and St. Paul Archipelago in the Nov/Dec 2012 time frame. " A suggested URL (which seems to not be active yet) will be at:

http://www.pt0s.com

QSL INFO AND NEWS

QSL-INFO from DB0SDX (dated July 1st)

Freddy, F5IRO, reports that all his logs for J28RO, J25DXA and 5X1RO, have been uploaded to LoTW.
QSL TC6BLH via TA1HZ, direct or by the Bureau. Members of the TC Special Wireless Activity Team (TCSWAT) and the Giresun Radio Amateurs and Nature Sports Club (GITRAD) activated the Boztepe Lighthouse, Sinop (built in 1863), this past weekend. This was the first activation of this lighthouse. For information on the "Western Black Sea Lighthouses On The Air", visit:
http://www.tcswat.org/awards/WEBLOTA/index.html
QSL RECEIVED VIA LoTW: 5P12EU, 6O0CW, A65EE, C6ANM, CM5FZ, CP1FF, E7DX, EA8/RW3DO, ER1MM, G3VMW, G4BUE, HK3TU, IZ0SPA, JH2UVL, K8MM, K9FY, KP4SJ, KT4ZB, LB9JE, LY2SA, N0UJJ, OK1DTM, OM5NL, OX3XR, OZ5RZ, PA1T, PY4XX, RA2FT, RN1ON, RN6AJ, RZ3QZ, SK5A, SP1RKR, SQ9NKW, SV5/G0TSM, TK5JJ, UA0BA, UT5EO, UT5UKY, VA5LF, VE1CHL, VE5MX, VK4CT, W7RTL, WI6I, WR5U, XF4DL, YO2CZW, YO3FRI and Z21BB
QSLS RECEIVED VIA MAIL: 3A2LF, 4Z5MU, 4W0VB, 9K2YM, 9M2AX, 9Q6AL, 9Y4LAS, BY8AC, CT1BWQ, CU3AK, DL1BI, EA9EU, EK6TA, EK7DX, ES1TU, ES3AX, EY7AD, FW0NAR, GQ7VJR, HK0NA, HK1NA, KH6/VE7AHA, MM0XAU, PJ5/SO6X, PJ5/SP6IXF, SU9VB, SV5BYR/5, T30D, UA0BA, V26E, V31IZ, YB8Y, YJ0VK, YV1FPT, ZK2C and ZL2MS
QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!
ST2AR QRT
Robert, ST2AR, reports on (QRZ.com) that he is off the air! He states, "After 2 years, 7 months and 138,000 QSOs the switch has been finally pulled. Last QSO was made on the 9th of June on 24-CW. As I write, I'm on the way to Italy where Rome is my new duty station for the next 5-6 years. See you also from some of the beautiful Italian islands. Thanks to Ralph, K2PF, all ST2AR contacts are now uploaded to LoTW. I will work on the eQSL log after returning home during the summer."
TO2, ST. BARTHELEMY
Operators Ludovic/HB9EOU and Andre/HB9CVC will be active as TO2D from St. Barthelemy Island (NA-146) between July 22nd and August 4th. Activity will be on 40-6 meters using SSB and RTTY. Suggested frequencies are:
 SSB - 7058/7180, 14195/14269, 18145, 21295, 24945 and 28495 kHz
 RTTY - 7035, 10140, 14080, 18100, 21080, 24920 and 28080 kHz
 6m - 50118 kHz
QSL via HB9EOU. For more details and udates, visit:
http://st-barth.hb9eme.ch
TM70, FRANCE (Special Event)
Operators Philippe/F5SKW, Dimitri/F5SWB, Freddy/F5IRO/J28RO, David/F8CRS, Yves-Michel/F5PRU, and possibly some other hams and French Servicemen will be active as TM70TRS or TM70TE from the 3rd floor of the Eiffel Tower, approximate 300 meters above the ground, between July 12-15th. Activity is to commemorate the 70th anni- versary of the French Army Signal Corps. Activity will be on CW, SSB and RTTY, and on the HF and VHF

(JN18du) bands. Operations will be 24 hours each day. A special QSL card will be available. QSL via the F6KHX ARC or F5OGL, direct or by the REF QSL Bureau.
TT8, CHAD
Phil, F4EGS, will once again be active as TT8PK from N'djamena, until August 6th. Activity will be limited due to his work schedule and spare time. Operations last time were on 40-10 meters using CW, SSB and some RTTY. QSL via F4EGS, by the Bureau or direct
(see (QRZ.com) for details).
VY0, CANADA (Update)
Rob, KC0VEU, is now active with his new callsign AD0AX/VY0 from Eureka, Ellesmere Island, in the Nunavut Territory (NA-008, Grid Loc. EQ79ax) until July 5th. He is there on official business. Some- time during his stay, and weather permitting, he will attempt to operate from the PEARL facility 15km away which is located at 80°N - 86°25'W, and therefore in the rare ER grid (ER60) for those who chase the CQ Grid Fields award and the rare ITU Zone 75. PEARL (the Polar Environment Atmospheric Research Laboratory) is also a separate base for the Arctic Challenge
www.french-polar-team.frThis is Rob's fifth time on Ellesmere. QSL direct or by the Bureau to his home callsign.
XR, CHILE
Members of the Radio Club of Chile will be active as XR3HQ from the Chile HQ station in the IARU HF World Championships (July 14-15th). QSL via the Bureau.

3004. ARRL Launches Logbook of the World/WPX Award Integration

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-03 02:45:27 UTC
From: Yb land Dx club
Topic: 3004 Message: 3004

ARRL Launches Logbook of the World/WPX Award Integration

The wait is over! After weeks of beta testing, the ARRL launched the integration of Logbook of The World (LoTW) -- its electronic confirmation system -- with CQMagazine's Worked All Prefixes (WPX) Award on Monday, July 2. The WPX Award is the first of the CQ-sponsored awards that LoTW will support. More than 51,000 radio amateurs worldwide use Logbook of The World, and there are currently almost 432 million QSOs in the LoTW system.
"We had originally planned to introduce this new program in early April, but due to the introduction of the new DXCC fee structure and our new Online DXCC application, we had to push the date back," explained ARRL Chief Operating Officer Harold Kramer, WJ1B. "The ARRL's IT Department has been diligently working on this. Using information and feedback from our hand-selected group of beta testers, our programmers -- led by ARRL Information Technology Manager Michael Keane, K1MK -- have spent many hours making sure that this will be a smooth integration. We know the Amateur Radio community is excited about this new program and we wanted to make sure it had gone through a rigorous testing before launching it to the public. By partnering the WPX Award with our LoTW program, the ARRL is giving radio amateurs throughout the world an inexpensive and convenient means of gaining credits toward CQ's popular operating awards."
ARRL Chief Executive Officer David Sumner, K1ZZ, concurred. "LoTW has significantly increased interest and participation in the ARRL's DXCC, Worked All States (WAS) and VUCC awards programs," he said. "We anticipate a similarly positive response to the addition of CQ's WPX Award. Amateurs will be able to spend more time operating and less time chasing QSL cards."
The process to apply for the WPX award via Logbook of The World is the same as applying for ARRL-sponsored awards (such as DXCC and Worked All States) via LoTW. Logbook users will notice that a WPX account has automatically been created for them on their LoTW awards page (see photo below). Anyone can sign up for an LoTW account. If you live in the US and plan on applying for ARRL-sponsored awards via LoTW, you must be an ARRL member (international amateurs do not need to be an ARRL member to apply for these awards via LoTW). Since the WPX award is a CQ-sponsored award, amateurs applying for this award via LoTW do not need to be ARRL members.
"This is an important milestone in a process that has been years in the making," said CQ Editor Rich Moseson, W2VU. "The hams who participate in our award programs have been asking about using LoTW confirmations for CQ awards ever since Logbook of The World came online. We are pleased to finally be able to begin providing them with this service, and look forward to the addition of the rest of CQ's awards, including Worked ALL Zones (WAZ), the USA-Counties Award (USA-CA) and the CQ DX Awards over the coming months. We thank the League's IT staff for its hard work in making this a reality."
Amateurs wishing to apply for the WPX Award via Logbook of the World will pay 12 cents for each QSO they use in their application. A separate charge for the WPX Award (and endorsements) is payable to CQ: Subscribers will be charged $6 for each award, while non-subscribers will be charged $12 for each award. Endorsement stickers are $1 each.
Yaesu is the Principal Sponsor of the LoTW website.

3006. PT0S, St. Peter & St. Paul Rocks DXpedition, SA-014

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-03 03:22:49 UTC
From: Yb land Dx club
Topic: 3006 Message: 3006

http://www.pt0s.com

PT0S, St. Peter & St. Paul Rocks DXpedition, SA-014

ABOUT PT0S
The Araucaria DX Group, in conjunction with the TX3A Team, is pleased to announce a DXpedition to St. Peter and St. Paul Rocks, PY0S, under the call sign PT0S. The DXpedition will take place in the late November to mid December, 2012 time frame. The actual dates will depend on weather conditions and will be announced later on this website.

There has been an official ban on Amateur Radio activities from PY0S. Although the ban, which was created for environmental and safety reasons, remains in place, the Araucaria DX Group was given a special permit by Brazil's SECIRM (Secretaria da Comissao Interministerial para Os Recursos do Mar), the Brazilian Navy, Ministry of Environment and LABRE to conduct a two week long operation.
The operation will have a strong low band focus. There will be a dedicated 160 meter station operating on 160 meters from sunset to sunrise. A second station will be on 80 and 40 meters at night. During the day we will operate two stations on the higher bands -- and 6 meters -- based on conditions. RTTY will also be supported.
The DXpedition's goal is to give this rare and difficult entity to as many amateurs as possible, taking maximum advantage of this unique opportunity. The group will be using newly designed RX antennas and receiving equipment to allow small and QRP stations to work PT0S on all bands, but especially on 80 and 160 meters.
All QSO-s will be loaded onto LoTW within 36 hours of taking place.
Operators will be Fred Carvalho PY2XB (PY2XB/PY0F, PQ0F, VP5/PY2XB, 8P9XB), Peter Sprengel PP5XX/PY5CC (PY0FM, PW0T, HK0NA). Tomi Pekarik, HA7RY and George Wallner, AA7JV. Due to environmental considerations, we have been limited to four operators.About The Araucaria DX Group
The Araucaria DX Group (GRUPO ARAUCARIA DE DX) was formed in the 70s by mostly Brazilian amateur radio enthusiasts. Today it has become a multinational group focused on contesting and dxing. The group currently has 340 members, of which about 100 are from outside Brazil. The group includes 15 top of Honor Roll and several Contest Hall of Fame members. For details go to: http://www.araucariadx.com

About the TX3A Team:
The TX3A Team of HA7RY and AA7JV have conducted a number of two-man DXpeditions to Chesterfield Reef (TX3A), Mellish Reef (VK9GMW), Serrana Bank - Bajo Nouveo (5K0T) and Willis Islets (VK9WWI). The team focuses on putting difficult places on the air, especially on the low bands.

LOCATION
Coordinates: 00 deg 55.0' N 29 deg 20.1' W
The Saint Peter and Saint Paul Archipelago (ASPSP) is a group of 15 small islets and rocks in the Atlantic Ocean, lying close to the equator and about 520 nautical miles (990 km) east of the Brazilian city of Natal. The rocks are close to the Intertropical Convergence Zone (ITCZ), are area of constant and severe thunderstorms, resulting in permanently noisy

radio conditions, especially on the lower bands. The rocks are located relatively close to both North America and Europe. We hope that the proximity of the rocks to Europe and North America will allow relatively small stations to work this rare entity.
We will be operating from the largest rock, called Belmonte. This is a very a difficult place to operate from. Although the Brazilian navy maintains a scientific research station on Belmonte, which is manned year around, we will have to be totally self-reliant and will be unable to use station's facilities. Apart from the location of the research station, there is no flat ground on the rocks. We will be taking a pre-fabricated platform on which we will erect our tent.
Due to their strategic importance, the Rocks of St. Peter and St. Paul are treated differently by the Brazilian government to other islands in its territory. The Secretariat of the Interministerial Commission for Sea Resources (SECIRM) manages the archipelago in a manner the maximizes protection of national and environmental interests in the region. The infrastructure of the archipelago is very complex. Researchers take turns constantly on the research station located on Belmonte islet. The conduct research in areas of geology, biology, oceanography, meteorology and other academic and national interest. The difficulties of access in terms of almost 1,000 km distance that separates this small part of the country from the continent, the absence of drinking water, the frequent earthquakes; are just some of the difficulties encountered by the Brazilian government in managing the site.
As a consequence of several meetings with the Brazilian authorities, the organizers of the Expedition, represented by the Araucaria Dx Group's Chairman (PY5EG Atilano de Oms), had the opportunity to show the relevance of ham radio activity to the communications community as well how the Dx-Pedition intends to cooperate to meet the requirements of the occupation of the archipelago and demonstrate its compatibility with the ongoing activities. The Brazilian Navy through SECIRM is giving total support to the expedition.
Due to the fact that the archipelago is a very important natural Brazilian reserve, a special permit from Ministry of Environment (ICMBIOS) has been issued (NR 01-2012).
The expedition has also received a fundamental support from the Brazilian Amateur Radio League LABRE, as well from ANATEL (Agencia Nacional de Telecomunicacoes). A special call has been assigned PT0S.
During all contacts with the Brazilian entities, we emphasized the importance of the work done by radio amateurs and reciprocity that could derive from this understanding. The operation is aimed not only at bringing this rare location to the DX community, but also to demonstrate that Amateur Radio is in fact totally compatible with the scientific and environmentally sensitive nature of the St. Peter and St. Paul Archipelago.
The Araucaria DX Group greatly appreciates the understanding and support of all its friends and Brazilian authorities.Additional Background:
The archipelago of St Peter and St Paul is a group of small rocky islands and rocky which is situated in the central equatorial Atlantic Ocean, lying 627 km from the archipelago of Fernando de Noronha, 986 km the nearest point on the mainland and 1010 km from Natal, in Rio Grande do Norte. It was declared as part of the Brazilian territory, according to IBGE belonging to the state of Pernambuco, despite being closer to the state of Rio Grande do Norte. In 1998 a scientific station was opened on the island Belmonte, initiating the program Archipelago of Sao Pedro and Sao Paulo (Proarquipelago) administered by the Secretariat of the Interministerial Commission for Sea Resources (SECIRM). The permanent presence of scientists in scientific station is required to prove the livability in the archipelago, which is seen as crucial for its international recognition as the archipelago as Brazilian territory.

EQUIPMENT
Transport: We will travel from the city of Natal aboard a Brazilian fishing vessel. The distance is 550 nautical miles (990 km) which is a four day trip. Cargo capacity is limited and these fishing vessels are not overly comfortable.

TX Antennas: There will be three TX antennas: Two SpiderPole based verticals, each fed by an antenna coupler, and the newly developed Garden Beam, a rotatable tri-band vertical parasitic array. Conditions on Belmont do not allow for the installation of antennas with large footprints and we must be sensitive to the environmentally critical nature of the rocks, therefore the use of simple and light antennas. The main TX antenna, intended for 160, 80 and 40 meters, will be an inverted L, mounted on the edge of the rocks on the northernmost tip of Belmont, about 3 meters above the water's edge. Grounding will mostly be through the salt-water. The antenna will be fed via a high power automatic antenna coupler, similar to the one used on our previous DXpedition. A second vertical, to be used on 80, 40 and 30 meters, will be located on the east side of Belmont, approximately 50 meters from the main TX antenna. The Garden Beam, which covers 20, 15 and 10 meters, will be located on a small stand 2 meters above the rocks.. The GB is a unique vertically polarized antenna that provides substantial gain and front-to-back even when mounted low above the ground. Unlike a regular Yagi, which must be mounted high above the ground for low angle radiation, the GB achieves low angles even when mounted very close to the ground. This eliminates the need for a tower or mast. For details go to : http://gardenbeam.com/
RX Antennas: Because of the lack of space on Belmonte, we will install two remotely controlled small DHDL antennas, and their associated filters and pre-amplifiers, on a rock named Cabral, about 70 meters north of the main TX antenna. The coax and control cables will run underwater to Belmont. We hope that this arrangement will allow us to operate simultaneously on two bands, especially on 160 and 80 meters, without compromising our low-band RX capability. A description of the DOUBLE HALF DELTA LOOP antenna used by TX3A can be downloaded from the following
URL: http://tx3a.com/docs/TX3A_DOUBLE_HALF_DELTA_LOOP.ZIP

Transceivers and Amplifiers:
We will have two stations. Both stations will use K3 transceivers. The main station will have two combined SG-500 amplifiers for an output of 1000 W, while the other station will have a single SG-500 amplifier for an output of 500 watts.
AC Power:
Two 240 V, 1.5 kW Honda generators will provide AC power. All radios and amplifiers will run on 12 V DC. There will be two battery banks: two paralleled 12 Volt 60 Ahr car batteries for the transceivers and six paralleled batteries for the power amplifiers. The batteries will be continuously replenished via two 80 A battery chargers. This arrangement, which we have tested and refined on VK9GMW and TX3A, provides the most efficient use of the generators, as the batteries act as buffers, allowing the generators to run in their Eco mode most of the time. This will be critical, as our allowable fuel load is only 400 liters, which works out to around 28 liters (or 7 gallons) per day, for a 14 day operation. Fuel efficiency will be key to being able to use full power during the entire operation. Also, by being very fuel efficient, we will be complying with the mandate to be extremely environmentally friendly, and bring a minimum impact to this sensitive area.

QSL INFOQSL via HA7RY

Direct QSL:
The preferred way for requesting PT0S QSL cards is using the Online QSL Request Service

(OQRS) on our website.
You can use that form to request your direct QSL, and cover the costs of sending the QSL card to you direct by using PayPal. We request a minimum of US$ 5 or EUR 4 for this service. This might look expensive, but do not forget that you save the costs of sending your own QSL and SASE to us. Any funds remaining after our costs will go to help the PT0S expedition budget. This method allows us faster processing, helps us protect the environment and you will receive your PT0S card faster. If you choose this method (which we prefer), please do NOT request a bureau card or send us your own QSL card.

If you decide to send us your QSL direct by postal mail, please try to follow the below suggestions:

* Please include at least $2 with every direct QSL request for up to three cards per envelope. Unfortunately the traditional "green stamp" -- i.e. US $ 1.00 -- no longer covers the cost of international postage.
* If you send International Reply Coupons (IRC), please make sure that it is not expired or is not about to expire.
* If possible, the return envelope should be C6 size (162 x 114 mm) or C6/C5 size (229 x 114 mm) and NOT marked for AirMail or Priority. Any other size envelopes cost extra postage. If you do not have access to such envelopes, we prefer a self-addressed label which we can stick on the envelope ourselves.
Please be patient, as it will take us time to design and print the QSL cards.
Mailing address:

Tamas Pekarik
Alagi ut 15.
H-2151 Fot
HUNGARY

LOTW:
The log will be placed on LoTW, generally within 36 hours of the QSO taking place.
Note that unlike many large DXpeditions who sometimes delay their LoTW postings because they want to make sure they get $5 donation for each QSL card, we will place all valid QSO-s on LoTW. That does not mean we don't need your donation! We will be incurring substantial expenses to bring you this rare and difficult location and will appreciate all the help we can get. To make a donation please see the Support page or click Donate!

Bureau:
We will launch an Online QSL Request Service (OQRS) available through this website.
If you want to receive your QSL via the bureau, please use that form to request the card.
We will check your QSOs against the log and send your card to you via the bureau. This method allows us faster processing, helps us protect the environment and you will receive your PT0S card faster. If you request your bureau card online, please do NOT request a direct card and do NOT send us your QSL card.

WUST, Worked US Territories Award

   Where DX is our middle name!!

The Worked US Territories Award (WUST) is a very colorful certificate sponsored by the METRO DX Club.
Contact a minimum of fourteen (14) of the current sixteen (16) IARU-recognized U.S. territories (as of 1 January, 2011). The sixteen WUST territories are: KG4 (Guantanamo Bay), KHØ (Mariana Islands), KH1 (Baker & Howland Islands), KH2 (Guam), KH3 (Johnston Island), KH4 (Midway Island), KH5 (Palmyra & Jarvis Islands), KH5K (Kingman Reef), KH7K (Kure Island), KH8 (American Samoa), KH8S (Swains Island), KH9 (Wake Island), KP1 (Navassa Island), KP2 (US Virgin Islands), KP4 (Puerto Rico) and KP5 (Desecheo Island). Mixed bands and modes OK. No date restriction. GCR list certified by two licensed amateurs showing the callsign of the station worked, date, time, frequency/band and mode. If you are at the TOP OF THE ARRL DXCC HONOR ROLL as printed in the most recent QST (normally the August edition), you automatically qualify for the award without having to send copies of QSL cards. You must write "TOP OF THE ARRL DXCC HONOR ROLL IN QST AUGUST 2010" (or the most current year of QST) on the Award Application in the "QSO Data" section. This applies ONLY to those who are at the VERY TOP (Number 1) on the ARRL DXCC Honor Roll. For an LoTW confirmation, it must be verified by two amateurs as does a QSL card, or a copy of the screenshot of the LoTW QSL confirmation detail may be substituted.
Photocopies of QSL cards are OK. SWL OK. Send GCR list or QSL photocopies and fee of US$8 or 4 valid IRCs to:
METRO DX Club, 3810 N. Chamlin Drive , Morris , IL 60450 .
Following receipt of the original award for a minimum of fourteen territories, endorsements for contact #15 or contact #16 are available for US$3.00 or two (2) valid IRCs.
See the Award Application for further information.
Award Application/Sample log extract: http://www.metrodxclub.com/log_extract.htm
Internet: http://www.metrodxclub.com
E-mail: awards@...
To view the WUST News Release, CLICK HERE.

Congratulations to the following DXers who have received the WUST Award:
METRO DX Club Members: AF9H (15), AI9L (15), K9BWQ (ALL 16), K9CJ (ALL 16), K9PY (15), N9AKR (14), N9ALC (15), N9TK (15), W9LNQ (ALL 16), W9YYG (ALL 16), WB9Z (ALL 16).
DXers from Around the World:
Awarded 2011: HB9DDZ (ALL 16), K2EP (ALL 16), K2XF (ALL 16), K9NU (ALL 16), KB9AIT (ALL 16), KE9U (ALL 16), N4XO (ALL 16), W7PAQ (ALL 16), WA7QCC (14), WA7QQI (15), WM4R (15),K2HJB (14).
Awarded in 2012: K6YK (16), DJ6VM (16), W6HTC (16), K6GAK (16), N5FG (16), K8IU (16), N5WI (16), KD4OS (16), DK7YY (14), W1WTG (14), K6VWE (15), JF2SKV (15), W4ZYT (16), W4VIC (16),W8UV (16), WØROB (15), DL2SUB (14), K9UQN (16), K6MM (14), ON5FP (16), AAØZP (15), KN6KI (16), VE3XN (16), WB5STU (14), W4REX (16), W3YX (16), K1KO (16), I6ONE (16),YT3H (16),OM3M

B (16), IØWDX (16), IK5ACO (16), N4AA (16), W6DPD (16), K7XE (16), I5KG (16), IK2ABJ (16), IT9HLR (16), DJ3XG (14) and W6OUL (16).

http://www.cq-amateur-radio.com/cq_awards/cq_dx_awards/cq_dx_award/cq_dx_award_official_rules.html

The CQ DX Awards Program recognizes achievements in the amateur radio art of "DXing," or contacting amateurs in faraway places. It is sponsored by CQ magazine.

THE CQ DX AWARD1. The CQ DX Award is issued in three categories. The CQ DX CW Award is issued to an amateur radio station submitting proof of contact with 100 or more countries. Thecq CQ DX SSB Award is issued to an amateur radio station submitting proof of contact with 100 or more countries. The CQ DX RTTY Award is issued to an amateur radio station submitting proof of contact with 100 countries using two-way RTTY. Applications should be submitted on the official CQ DX Award application (form 1067B). Reasonable facsimiles or computer printouts are also acceptable.

2. All contacts must be two-way in the mode for which the application is made. Cross-mode or one-way contacts are not valid. QSLs must be listed in alphanumeric order (A to Z and 1 to ¯) by prefix. All contacts must have been made after November 15, 1945. Deleted countries do not count. Only currently active countries are acceptable.

3. QSL cards must be verified by one of the authorized check points for the CQ DX Awards, or must be included with the application. Return postage must be included. Electronic verifications from sources approved by CQ are acceptable. See the CQ website for acceptable online sources.

4. Country endorsement stickers are issued for 150, 200, 250, 275, 300, 310, and 320 active countries. A fee of $1.00 per sticker (where stickers are issued) is charged. An SASE must be enclosed with all endorsement applications.

5. Special endorsements, as follows, are available for a fee of $1.00 each:
(a) 28 MHz endorsement - for 100 or more countries confirmed in the 10 meter band.
(b) 3.5/7 MHz endorsement - for 100 or more countries confirmed using any combination of the 40 and 80 meter bands.
(c) 1.8 MHz endorsement - for 50 or more countries confirmed using the 160 meter band.
(d) QRPp endorsement - for 50 or more countries confirmed using 5 watts output or less.
(e) Mobile endorsement - for 50 or more countries confirmed with the applicant operating mobile.
(f) Slow Scan TV endorsement - for 50 or more countries confirmed using two-way SSTV.
(g) OSCAR endorsement - for 50 or more countries confirmed via amateur satellite.

6. Any altered or forged confirmations will result in permanent disqualification of the applicant.

7. Fair play and good sportsmanship in operating are required for all amateurs working toward CQ DX Awards. Continued use of poor ethics will result in disqualification of the applicant.

8. A fee of $6.00 is required for CQ subscribers applying for a CQ DX Award certificate. The latest CQ mailing label must be attached for the subscriber discount. For non-subscribers the certificate fee is $12.00. IRCs are acceptable in lieu of check or cash.

9. Normally the ARRL DXCC country list constitutes the basis for CQ DX Award country status. Deleted countries are not valid for the CQ DX Award. As a country is deleted, country totals of applicants are automatically adjusted accordingly.

10. All contacts must be with land-based amateur stations working within authorized amateur bands. Contacts with ships and aircraft are not acceptable.

11. Decisions of the CQ DX Awards Manager shall be final.

THE CQ DX HONOR ROLL12. The CQ DX Honor Roll lists all stations with a total of 275 or more active countries.

13. Separate Honor Rolls are maintained for SSB and CW. To remain on the Honor Roll, a station must update his or her totals at least once per year. Updates indicating "no change" are acceptable to meet this requirement. An SASE must be included with all updates in order to receive confirmation of total.

14. An audit sheet showing countries needed by an Honor Roll member is available for $3.00 plus an SASE for each mode. These are available from the CQ DX Award Manager.

15. All checks must be made payable to Keith Gilbertson. Applications should be sent to Keith Gilbertson, K0KG, CQ DX Awards Manager, 21688 Sandy Beach Lane, Rochret, MN 56578-9604 USA.

3011. CQ Award via eQSL

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-03 05:39:35 UTC
From: Yb land Dx club
Topic: 3011 Message: 3011

http://www.cq-amateur-radio.com/cq_awards/cq_on_line_confirmation/cq_on_line_confirmations.html

On-Line Confirmations
CQ accepts electronic confirmations for all awards for contacts confirmed viaeQSL.cc (limited to confirmations from eQSL "Authenticity Guaranteed" members). See details below excerpted from CQ magazine.

CQ plans to give award credit for contacts confirmed via the ARRL's Logbook of the World (LoTW) system, once that system is set up to support non-ARRL awards. We are working with the League officials to help make that happen. These will likely come online one award at a time. We will update this page when there are any changes.

Update on Logbook of the World and CQ AwardsThe April 1, 2012 target date for being able to apply ARRL Logbook of the World (LoTW) credits to the CQ WPX Award is being pushed back to mid-April. According to the ARRL, this delay was made necessary by its decision to launch its new DXCC fee structure on April 2 and online DXCC applications on April 3. There have been no reported technical problems with the software needed to use LoTW for WPX, and beta testing of the system is planned for early April. Additional CQ awards will be added later, one at a time. We will provide further updates when more information is available.

CQ Announces eQSL
Electronic Confirmation Acceptance
CQ magazine will accept contact confirmations made on the eQSL.cc electronic confirmation system for its operating awards effective immediately, CQ Editor Rich Moseson, W2VU, and eQSL Founder and Webmaster Dave Morris, N5UP, announced in January.

There will be certain limitations and procedural differences for different awards, at least to start. Only confirmations from "Authenticity Guaranteed" members of eQSL will be accepted, and in accordance with existing eQSL policy, a membership level of bronze or higher is required in order to participate in award programs via eQSL. "This is the first time that CQ has formally accepted anything other than traditional paper QSL cards for its awards," said Moseson. "We have been working with Dave Morris and his team for several months to assure that the integrity of our awards programs will be protected and to create mechanisms to make it easy for both award applicants and award managers to use eQSL credits toward our awards. All of our award managers have been involved in this process and support this action." "We want to express our great appreciation to Dave and his team for their willingness to do whatever was necessary to make this agreement
possible," Moseson added. "It has been a pleasure working with them and we look forward to a long-lasting relationship." "We are pleased to be adding CQ to the top of our list of amateur organizations that accept electronic QSLs," said Morris. "CQ has some of the most highly sought-after awards, and we have been working behind the scenes for years to create credit submission mechanisms that would ensure the integrity of their programs without

introducing any additional labor for the award managers.

We believe the electronic QSL can drastically reduce costs, and the award application mechanisms we have developed will provide for more efficient processing at reduced cost for both the applicant and the award manager." Specific Requirements and Procedures Applicants for the CQ DX and CQ DX Field Awards must print out their eQSLs and submit them along with their traditional QSLs to a CQ checkpoint or to CQ DX Awards Manager Billy Williams, N4UF. eQSL has an automated process in place for applicants or CQ's Worked All Zones, WPX, and USA Counties awards.

N5UP explains how that will work for the applicant: "The applicant goes to the My Awards screen. He clicks on the particular award he wants to apply for. This brings up a list of the credits our system 'thinks' he is entitled to. There are checkboxes that allow him to check which ones he wants to use, and we automatically pre-fill one credit per category so he doesn't have to do anything if he wants to take the defaults. At the bottom of the screen are two buttons: 'Submit to CQ' and 'Print Paper Application'." The "submit" button will place all the selected QSOs into a file for the award manager to access, while the "print" button will generate a printed list to be submitted along with the traditional application.

PLEASE NOTE that ALL applicants must send the award fee payment to the CQ Award Manager, regardless of how the application is submitted. Some CQ award managers are now accepting PayPal; see individual award web pages for details. All awards will continue to accept traditional QSLs as well as eQSLs. For the USA-Counties Award (USACA), applicants must note on their record books (or printouts) whether each county has been confirmed traditionally (with an "X" to the right of the entry) or electronically (with an "E" next to the entry).

For more information on eQSL, visit http://www.eQSL.cc.

A PDF version of this can be downloaded here.

Dear ALL,

2 hari meleset dari jadwal tayang, terlampir (atau silah diunduh) e-QSP edisi KHUSUS bln Juni 2012
Dari halaman depan (1) berturut-turut,konten edisi ini adalah:

+ QSL card dari awak ISS ?
+ Obituari: Dr Jos Soejoso YB2SV (SK)
+ Transit Venus, 5-6 juni 2012
+ Space mission Shenzhou 9, sebuah kisah sukses dari Cina
+ Membuat sendiri BALUN 1 : n …

Kembali yg unik dr edisi ini adalah untuk pertama kalinya (sejak era BeON) kalawarti elektronik ini keluar dengan jumlah halaman yang GANJIL, yaitu 9 halaman !!!

Selamat membaca, PSE QSL, and as always: pse ENJOY ….!!!

http://www.yt1ad.info/3d2c/index.html

3D2C, Conway Reef DXpedition 2012
September 24th 2012 till October 5th 2012
Our team continues its activities in Central and Southern Pacific. For 2012
We booked the beautiful island of the Pacific, we wanted to activate the last
year, but we preferred the island of Rotuma with 3D2R CALL. Now our team
unanimously decided that the Conway Reef is our next point. We already have
CALL: 3D2C.

Conway Reef
Conway Reef, known since 1976 by its Fijian name "Ceva-I-Ra" or "Theva-i-Ra" Reef, is a coral reef of atoll type 450 km southwest of the Fiji Islands, but part of the Republic of Fiji. It is 2.5 km long in an east-west direction. On the middle of the reef is a small sand cay , 1.8 meters high and about 320 meters long and 73 meters wide, with a land area of two hectares. A stranded wreck of a coaster lies 240 meters south of the center of the cay, and the wreck of a fishing vessel lies on the northeast end of the reef. The reef is uninhabited apart from a number of birds which appear to have almost no fear of humans. Administratively, the reef it is part of Western Division , Fiji , and of Nadroga-Navosa province. In 1838 the Royal Navy Captain Drinkwater Bethune of HMS /Conway/ first came across the reef and recorded it however it was first mapped by the British several years later by Captain Denham of HMS /Herald/ . Three shipwrecks (1979, 1981 and 2008) have occurred on the reef. The most recent being a Chinese fishing vessel (Shin Sheng No.165) It was reported in 1983 that there was some vegetation on the cay, but it was bare by 1985. The cay currently has some vegetation about 3m high. While there are no other gaps larger than 75 km between Fiji islands (except Rotuma Island , which is politically but not geographically part of Fiji), Conway Reef lies 450 km to the southwest of the main Fiji complex. The closest land to Conway Reef lies 275 km WSW (Hunter Island in the French territory of New Caledonia). Hunter Island is also claimed by Vanuatu . Access to the island should only be attempted at high tide in a shallow draft tender. Extreme care must be taken to navigate the coral heads

Planned Travel Dates:
Departure to Conway reef from hotel Novotel Lami bay, Suva, Fij is:
September 24 th 2012 at 06,00 PM (18,00 local time).
Part of our team, 5 person with Alex UA4HOX coming via Seoul and will be in hotel in Suva, Friday, September 21st 2012. Main group coming via Los Angeles, departure september 22nd at 23,00 fromLAX and arriving in Nadi at 06,00 AM September 24th. Team will travel from Nadi to Suva with few rental car's.
Return from Conway Reef is night, October 5/6 th 2012.
Our boat Island Dancer II
If You like to see more info abou Our transportation from Suva to Conway Reef see this URL

Rasanya kalau main timpa menimpa sepertinya malah menambah keruwetan. Menurut saya cara untuk mengatasi hal ini adalah mendekati mereka dan memberikan penjelasan kepada mereka bahwa tindakan mereka salah bukan dengan menggurui mereka tetapi membangkitkan perasaan bersalah mereka karena hal ini berhubungan dengan ego pribadi... sama seperti trek trekan di jalan raya... bukan saja membahayakan diri pengendara saja tetapi juga orang lain. Bagaimana perasaan mereka ketika mereka sedang enak enak QSO disamping mereka ada orang yang iwak iwak iwak? pasti mereka marah.... nah kalau begitu apakah tidak terlalu egois kalau mereka bisa iwak iwak tetapi ketika mereka di iwak iwakin marah?
Memang hal itu menggambarkan wajah bangsa dan negara kita ini saat ini,semua pada egois tidak pernah memikirkan apakah dengan tindakan kita kita akan menyengsarakan orang lain. Mereka secara umum adalah teman teman kita juga... jadi kitapun janganlah terlalu egois juga karena membiarkan mereka berkelanjutan ber iwak ria... tanpa memberitahukan mereka. Ingat pepatah menang jadi arang kalah jadi abu... karena itu pwr vs pwr akan berakibat jelek bagi semua.....
(sekedar renungan)
PS: Alokasi CW itu adalah semua frekwensi..... lihat kembali aturannya

Hallo Pak Donny, sebenarnya saya sependapat dengan Anda, cuma timbul pertanyaan siapa yang harusnya memperbaiki itu, karena sepertinya tidak ada maka kita harus peduli. Kedengarannya mereka adalah teman yang sangat mengerti tentang etika menggunakan frekuensi, sehingga tidak dibutuhkan diajari atau disadarkan. Sekali-sekali kita boleh unjuk rasa atas ketidak setujuan cara demikian. Ha ha ......serius baget. Yang kita harapkan hari esok lebih baik dari ini. salam Kama

Bagaimana perasaan mereka ketika mereka sedang enak enak QSO disamping mereka ada orang yang iwak iwak iwak? pasti mereka marah.... nah kalau begitu apakah tidak terlalu egois kalau mereka bisa iwak iwak tetapi ketika mereka di iwak iwakin marah?
Memang hal itu menggambarkan wajah bangsa dan negara kita ini saat ini,semua pada egois tidak pernah memikirkan apakah dengan tindakan kita kita akan menyengsarakan orang lain. Mereka secara umum adalah teman teman kita juga... jadi kitapun janganlah terlalu egois juga karena membiarkan mereka berkelanjutan ber iwak ria... tanpa memberitahukan mereka. Ingat pepatah menang jadi arang kalah jadi abu... karena itu pwr vs pwr akan berakibat jelek bagi semua.....
(sekedar renungan)
PS: Alokasi CW itu adalah semua frekwensi..... lihat kembali aturannya

E51E, Aitutaki 2012, OC-083

Norman, 5B4AIF will be active from Tautu Village, Aitutaki island OC-083 between December 10, 2012 to January 5, 2013.

Aitutaki is an "almost atoll". It has a maximum elevation of approximately 123 metres with the hill known as Maunga Pu close to its northernmost point. The land area of the atoll is 18.05 km², of which the main island occupies 16.8 km². The Ootu Peninsula, protruding east from the main island in a southerly direction along the eastern rim of the reef, takes up 1.75 km² out of these 16.8 km² for the main island. For the lagoon, area figures between 50 and 74 km² are found. Satellite image measurement suggests that the larger figure also includes the reef flat, which is commonly not considered part of a lagoon.
The barrier reef that forms the basis of Aitutaki is roughly the shape of an equilateral triangle with sides 12 kilometres in length. The southern edge of the triangle is almost totally below the surface of the ocean, and the eastern side is composed of a string of small islands (including Mangere, Akaiami, and Tekopua).
The western side of the atoll contains many of Aitutaki's important features including a boat passage through the barrier reef allowing for anchorage close to shore at Arutanga. Towards the south of the side is a small break in the barrier reef, allowing access for small boats to the lagoon which covers most of the southern part of the triangle. Further to the north is the bulk of the main island. Its fertile volcanic soil provide tropical fruits and vegetables. Two of Aitutaki's 15 islets (motus) are also volcanic. The rest are made of coral.
Aitutaki Airport is located close to the triangle's northern point. There is an area suitable to land flying boats in the southeastern part of the lagoon.

See you from E51E , 73

OPDX Bulletin 1068.1 July 2, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1068.1
BID: $OPDX.1068.1
July 2, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and AA7JV for the following DX information.
ANNOUNCEMENT [edited]
PT0S - DXpedition to St. Peter and St. Paul Rocks
June 30, 2012, Sao Paulo and Miami
The Araucaria DX Group, in conjunction with the TX3A Team, is pleased to announce a DXpedition to St. Peter and St. Paul Rocks, PY0S, under the callsign PT0S. The DXpedition will take place in the late November to mid December, 2012 time frame. The actual dates will depend on weather conditions and will be announced on the PT0S website, PT0S.com
There has been an official ban on Amateur Radio activities from PY0S. Although the ban, which was created for environmental and safety reasons, remains in place, the Araucaria DX Group was given a special permit by Brazil's SECIRM (Secretaria da Comissao Interministerial para Os Recursos do Mar), the Brazilian Navy, Ministry of Environment and LABRE to conduct a two week long operation.
The operation will have a strong low band focus. There will be a dedicated 160 meter station operating on 160 meters from sunset to sunrise. A second station will be on 80 and 40 meters at night. During the day we will operate two stations on the higher bands -- and 6 meters -- based on conditions. RTTY will also be supported.
The DXpedition's goal is to give this rare and difficult entity to as many amateurs as possible, taking maximum advantage of this unique opportunity. The group will be using newly designed RX antennas and receiving equipment to allow small and QRP stations to work PT0S on all bands, but especially on 80 and 160 meters. For operating procedures and advice on how to maximize your chances of getting into the log, please visit PT0S.com
All QSOs will be loaded onto LoTW within 36 hours of taking place.
Operators will be Fred Carvalho/PY2XB (PY2XB/PY0F, PQ0F, VP5/PY2XB, 8P9XB), Peter Sprengel/PP5XX/PY5CC (PY0FM, PW0T, HK0NA). Tomi Pekarik/HA7RY and George Wallner/AA7JV. Due to environmental considerations, we have been limited to four operators.
For further information and regular news updates please go to PT0S.com
About:
The Araucaria DX Group
The Araucaria DX Group (GRUPO ARAUCÁRIA DE DX) was formed in the 70s by mostly Brazilian amateur radio enthusiasts. Today it has become a multi- national group focused on contesting and dxing. The group currently has 340 members, of which about 100 are from outside Brazil. The group includes 15 top of Honor Roll and several Contest Hall of Fame

members. For details go to:
http://www.araucariadx.com
TX3A Team:
The TX3A Team of HA7RY and AA7JV have conducted a number of two-man DX- peditions to Chesterfield Reef (TX3A), Mellish Reef (VK9GMW), Serrana Bank - Bajo Nouveo (5K0T) and Willis Islets (VK9WWI). The team focuses on putting difficult places on the air, especially on the low bands.
Background on St. Peter and St. Paul Archipelago
Due to their strategic importance, the Rocks of St. Peter and St. Paul are treated differently by the Brazilian government to other islands in its territory. The Secretariat of the Interministerial Commission for Sea Resources (SECIRM) manages the archipelago in a manner that maximizes protection of national and environmental interests in the region. The infrastructure of the archipelago is very complex. Researchers take turns constantly on the research station located on Belmonte islet. They conduct research in areas of geology, biology, oceanography, meteorology and other academic and national interest. The difficulties of access in terms of almost 1,000 km distance that separates this small part of the country from the continent, the absence of drinking water, the frequent earth-quakes; are just some of the difficulties encountered by the Brazilian government in managing the site.
As a consequence of several meetings with the Brazilian authorities, the organizers of the Expedition, represented by the Araucaria Dx Group's Chairman (PY5EG Atilano de Oms), had the opportunity to show the relevance of ham radio activity to the communications community as well how the DX- pedition intends to cooperate to meet the requirements of the occupation of the archipelago and demonstrate its compatibility with the ongoing activities. The Brazilian Navy through SECIRM is giving total support to the expedition. Due the fact that the archipelago is a very important natural Brazilian reserve, a special permit from Ministry of Environment (ICMBIOS) has been issued (NR 01-2012).
The expedition has also received a fundamental support from the Brazilian Amateur Radio League LABRE, as well from ANATEL (Agencia Nacional de Tele- comunicações). A special call has been assigned PT0S. During all contacts with the Brazilian entities, we emphasized the importance of the work done by radio amateurs and reciprocity that could derive from this under- standing. The operation is aimed not only at bringing this rare location to the DX community, but also to demonstrate that Amateur Radio is in fact totally compatible with the scientific and environmentally sensitive nature of the St. Peter and St. Paul Archipelago.
The Araucaria DX Group greatly appreciates the understanding and support of all its friends and Brazilian authorities.
Additional Background:
The archipelago of St. Peter and St. Paul is a group of small rocky islands and rocky which is situated in the central equatorial Atlantic Ocean, lying 627 km from the archipelago of Fernando de Noronha, 986 km the nearest point on the mainland and 1010 km from Natal, in Rio Grande do Norte. It was declared as part of the Brazilian territory, according to IBGE belonging to the state of Pernambuco, despite being closer to the state of Rio Grande do Norte. In 1998 a scientific station was opened on the island Belmonte, initiating the program Archipelago of São Pedro and São Paulo (Proarquipélago) administered by the Secretariat of the Inter- ministerial Commission for Sea Resources (SECIRM). The permanent presence of scientists in scientific station is required to prove the livability in the archipelago, which is seen as crucial for its international recognition as the archipelago as Brazilian territory.

The IARU HF Championship Heats Up the Summer

Radiosport fans are gearing up for the summer's biggest HF competition: the IARU HF World Championship. This 24 hour long contest is the highlight of the summer HF contesting season, with plenty of opportunity to work DX from all around the globe on CW and SSB. Participants also get the chance to make QSOs with many IARU Member Society club stations and officials.
"The IARU HF Championship is one of radio sport's more unique events," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's the only major contest that uses International Telecommunications Union (ITU) zones as part of the exchange, and the only contest that gives special multiplier status for IARU Member-Society stations and their officials."
Hams can get in on the fun in a variety of ways. You may choose to enter as either a single operator, using either SSB only, CW only or a mixture of both modes. Single operator stations can choose from three power levels: High Power (greater than 150 W), Low Power (between 5 and 150 W) or QRP (5 W or less). You can also get some friends together at one station and participate as a Multioperator station with a single transceiver.
One of the fun things to do is see how many of the IARU special stations you can work during the event. "While most stations give their ITU zone as part of the contest exchange, IARU Member-Society stations give the abbreviation for their IARU society name, such ARRL for W1AW," Kutzko explained. "In addition, IARU officials can give one of four unique exchanges: AC if they are on the IARU Administrative Council, or R1, R2 or R3 for the ITU Region that official serves. It is always special to see so many nations represented on the air by their national organization. It reinforces the global nature of Amateur Radio and the common bonds we all have as amateurs."
The IARU HF World Championship begins at 1200 UTC Saturday, July 14 and goes until 1200 UTC Sunday, July 15. Complete rules may be found online. Logs may be submitted via e-mail; paper logs should be mailed to IARU International Secretariat, Box 310905, Newington, CT 06111-0905 USA. All logs must be e-mailed or postmarked no later than 1200 UTC August 14, 2012.

DXNL 1787 - Jul 4, 2012
DX Newsletter

C9, MOZAMBIQUE
Ivor,ZS1WY, is currently active as C91IW and is expected to stay until the end of 2013. He has been spotted already on 160m. QSL via ZS1WY.

CE, CHILE
The special event station 3G90AA celebrates the 90th anniversary of the Radio Club of Chile until Jul 31. QSL via CE3AA.

CN, MOROCCO
Moroccan amateur radio operators may use the special prefix 5C13 from July 1-27 to celebrate the 13th anniversary of the crowning of Mohammed VI King of Morocco.

E5, SOUTH COOK ISLANDS, OC-013
Wayne,N6NB (E51YNB), and Carrie,W6TAI (E51TAI), will be active from Rarotonga (OC-013) in all modes on all bands from Jul 7-21. They also plan to take part in the IARU HF World Championship (July 14/15). QSLs for both calls via N6NB (QRZ.com).

ES, ESTONIA
Eddie,ES2TT, and Andrew,RN1CW, will show up as ES2012ABCS and ES3/RN1CW from Haapsalu Castle (WCA ES-00003) working in CW/SSB/BPSK on 6m-40m from Jul 6-8. The las will be uploaded to the WCA E-Log as well. QSLs for ES2012ABCS via ES2TT and for ES3/RN1CW via RN1CW.

EU, BELARUS
The Borisov Amateur Radio Club (EW2WW) celebrates the 910th anniversary of Borisov city by using the special event call EV910B in SSB and CW on 80m-10m from Jul 1-31. QSL via EW2EO.
See also: http://www.qsl.net/ew2eo/award/borisove.htm

GW, WALES, EU-005
The special event station GB10SOTA is activated to celebrate 10 years of "Summits on the Air" (SOTA) from Mount Snowdon (Yr Wyddfa, 1085m, GW/NW-001, EU-005, WLOTA 0453, Loc IO73xb). Listen for them to be QRV on HF, VHF and UHF from the highest mountain in England and Wales until July 15. QSL via MW0IDX. See also: http://www.sota.org.uk

HP, PANAMA
Sergio,HP1/IZ6BRN, has returned to Panama. Skeds can be arranged via Skype. QSL via IZ8CLM, LoTW, eQSL.

FP, ST PIERRE ET MIQUELON, NA-032
Eric,FP/KV1J, plans to hand out some IOTA points in SSB/CW/RTTY/PSK31

on 160m-6m operating from Miquelon (NA-032, DIFO FP-002, WLOTA 1417, Loc GN17) on July 10-17. If the conditions are fine he may also work via satellites. His plans include also the IARU HF World Championship. QSL via homecall. See also: http://www.kv1j.com/fp/July12.html

PA, THE NETHERLANDS
The special callsign PC100NOM is active from Jul 2-29 to promote the 100th anniversary of The Netherlands Open Air Museum in Arnhem. The operator is Fred,PA0FAW (ISWL PA-11092/WAB-11722), operating in CW, SSB and digital modes. QSL via PA0FAW.

PY, BRAZIL
The special event stations PW7FD (SSB, digital modes) and PQ7FD (CW) are working on 40m, 20m, 17m, 15m and 10m until July 30 as a tribute to Brazil's Fire Departments. QSL via PS7AB.

SP, POLAND
Jarek,SQ6OCO/p, activates Mielno Castle (WCA: SP-01236, ZWP: ZLL-03) until Jul 10. Listen for him on 7100, 14200 and 28500 kHz. QSL via homecall.

W, USA
The "Original 13 Colonies Special Event" which was announced in the last DX Newsletter has been prolonged until July 7.

VE, CANADA
The special event station CK6S is activated by the Calgary Amateur Radio Association to mark the 100th aniversary of the Calgary Stampede from July 5-15. QSL via VE6AO. All HAMs in the city of Calgary may use the special prefixes CJ6 for VA6 and CK6 for VE6 for the same period.

Awards in Friedrichshafen:
VP8ORK was awarded the "DXpedition of the Year 2011".
ZA1TC (Tevfik, TA1HZ) received the "WAEDC 2011 Hero Award".

European trip: Paolo,I2AE, has left for a 11,000 km trip through Northern Europe. He plans to activate several WFFs, IOTAs, WCAs and lighthouses.

LoTW: Freddy,F5IRO, uploaded his logs of J28RO, J25DXA and 5X1RO on Jun 26.

DXCC: Following stations are approved for DXCC credit:
3C6A (2012), 3C0E (2012), 5X1RO (2012), J28RO (2010), J25DXA (2011), XW4XR (2012)

ST2AR QRT: After two years and seven months Robert,ST2AR, went QRT with 138.000 QSOs in the log. He will work in Rome for the next 5-6 years.

SILENT KEY: Richard L. Baldwin,W1RU, holder of the Golden Badge of Honour of the DARC, passed away at the age of 92 years on June 21.
Richard was President of the IARU and the ARRL for many years. During this time he was responsible for the preparation of the WARC in 1979, where the new bands 30m/17m/12m were allocated to amateur radio.
During his term as IARU President he was able to give the organization

a new representative direction.
Our condolences and sympathy are with his family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 7/8 DARC VHF/UHF Microwave Contest
Jul 7/8 Independence of Venezuela Contest
Jul 7/8 DL DX RTTY Contest
Jul 8 DARC 10m Digital Corona Contest
Jul 14/15 IARU HF World Championship

IOTA compiled by Klaus, DL7UXG (e-mail: iota@....de)

Island activities:
EU-014, TK, Corsica Island: Laurent,F8BBL, will be active as TK12IOTA from
Corsica (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) on July 7-21.
He will operate mainly in CW on 80m-10m. He also plans to operate as
TK12IOTA/p from Lavezzi Island (EU-164) on July 14 starting around
0800 UTC, and from the Sanguinaires Islands (EU-104) on Jul 18 starting
around 1000 UTC. QSL via F8BBL. See: http://rnb.dx-cw.net

EU-029, OZ, Sjaelland Archipelago: Philipp,OZ/HB9EYW, will be QRV in holiday
style from Falster Island (EU-029, DIA SJ-016, WLOTA 1961, Loc JO54XP)
mainly on 40m from Jul 10-19. QSL via HB9EYW.
See also: http://www.qrz.com/db/hb9eyw

EU-034, ES0, Hiiumaa/Saaremaa/Laanemaa County group: Frank,DL1FT, is going
to spend his holidays on Saaremaa Island (WLOTA 1401) and plans to show
up as ES0FTZ whenever his time permits from Jul 8-19. His preferred
bands are 40m and 20m. QSL via DL1FT (bureau/direct/LoTW/eQSL).
More information is available on his website: http://www.DL1FT.de

EU-075, SV, Peloponnisos (Argolis)/Attiki Region group: Nikiforos,SV1EEX/8,
is working in CW/SSB/PSK on 80m-6m from Hydra Island until mid July.
QSL only direct or eQSL via SV1EEX.

EU-115, EI/GI/MI, Ireland: Dave,WJ2O, will be on a roundtrip through
Ireland (EU-115, WLOTA 2484) and Northern Ireland from Jul 8-19.
Listen for him on the HF bands signing either EI/WJ2O/m or GI/WJ2O/m.
Dave will join the IARU HF World Championship as EI/WJ2O/m from Ireland
QSLs only direct via his homecall (QRZ.com).
Further information can be found at: http://www.wj2o.com

EU-128, DL, Schleswig-Holstein State East group: Heinz,DL4AO/p, will be QRV
    from Fehmarn Island (GIA O-001, WLOTA 0637) in CW/RTTY/PSK/JT65A on
    12m-30m from Jul 10-20. QSL via homecall.

EU-170, 9A, Dalmatia North group: Feri,9A/HA4BF/p, will spend his holidays
    on Vir Island (ACIA IC-200, IOCA CI-141, CIA-55, MIA MC-451,WLOTA 4050)
    from Jul 8-21. He will operate in SSB only.
    QSL direct to HA4BF or via LoTW and eQSL.

EU-171, Jylland North group: Ric,DL2VFR, will be active mainly in CW on the
    HF bands signing OZ0FR/p from Vendsyssel-Thy on Jul 7-20.
    QSL via DL2VFR (bureau/direct). See: http://www.iota-expedition.com
        ---
    Rene,OZ/DL2JRM, Anett,OZ/DO6XX, and Robin,OZ/DO2XX, are working from
    the same island from Jul 7-21. They will use 100 watts and GP on 80-10m
    in SSB and CW (only DL2JRM) QRV. Rene also plans short trips to other
    DIA islands where he will show up as OZ/DL2JRM/m. QSLs via homecalls.

OC-177, YB0, Seribu Islands: 30 different operators are going to activate
    Pulau Kaliage Besar (Loc OI34GI, YBFF-025) from July 6-9. Listen for
    YE0M in CW, SSB and RTTY on 2m-160m. QSL via YB1GJS.
    See also: http://ye0m.com

US Islands: Frandy,N1FJ/p, will be QRV from Three Mile Island (USi NH020,
    not IOTA) from Jul 8-13. This island is located on Lake Winnipesukee
    in Belknap County/New Hampshire. He will work mostly in CW on 15m-40m.
    QSL via homecall.

Lighthouse activities

FP/KV1J LH 1417 Jul 10-17

WFF activities

DLFF: Some members of the clubstation DK0ASP will be active from the
    Nature Reserve Rotwildpark Stuttgart (WFF DLFF-146) on Jul 7/8.
    This will be the first activation of this nature reserve. They will
    be QRV as DL2A with two stations on 20m, 30m and 40m. All QSOs will
    be confirmed with a QSL via bureau.

FFF: The special event station TM7TDF (Tour de France) will be QRV from the
    Parc Regional (FFF-078) on Jul 7/8. They will be active also from the
    mountain Planche des Belles Filles (SOTA F/JU-027) on Jul 6/7.

http://hb9fr.ch/3b9sp

3B9SP, Rodrigues DX Operation 2012, AF 0017

Between the 16 and 23 October 2012, the Radio 7 Team, HB9FR, will activate the Island of Rodrigues, a part of the Republic of Mauritius.
Our call sign is granted and will be 3B9SP.
After having run many amateur radio contests and activities form our club station, we now would like to know how it is being on the other side of the world and of the pile up, and talking to our friends at home from a rare country.
For many years we were talking about doing a so called “DX Operation”. As we are all getting older we decided that time has now come to do it! Last year we began to think about possible destinations and it came out that Rodrigues Island could be a possibility. There wasn’t a lot of Amateur Radio activity from Rodrigues these last years. Rodrigues is easily reachable by plane, and as cost is one of our key factors this was important. At the beginning of our plans we decided that the cost of this adventure should be reasonable. So transport should be possible by plane, knowing that we sure will have weight problems as we do have to bring over the complete equipment. Our goal is to set up three amateur radio stations that can be run together on different Amateur Radio bands. Mostly one in CW, morse telegraphy, one in phone and the third running special modes like RTTY and modern phase shift keying modes (PSK31). To produce a good signal we would like
to use small 400 Watt solid state amplifiers for the CW and phone stations. Two rotary beam antennas for the frequencies above 14 MHz are also planned to be set up for these two stations. For the digital mode station we are planning to use wire antennas. Vertical antennas will be setup for the low frequency bands. The hopefully good October propagation conditions will allow us to give everybody around the world a chance to have a QSO during the eight operating days (October 16 to October 23). We don’t want to break any record in number of QSO's, we just would like to do an good job with an Amateur Radio equipment that can be easily transported without need of containers and shipping.

3B9SP Equipment:

Transceivers: 2 Elecraft K3, 1 IC-706
Power Amplifiers: 2 Elecraft KPA 500
Interface: MicroHam Micro Keyer II
Filters: Dunestar Multiband Switched Bandpass Filters

Antennas:
- 2 Spiderbeam 3el for 14, 18, 21, 24 and 28 MHz on Spider pole
- Verticals for 7, 10 and 14 MHz
- 1 Butternut HF2V for 7, 3.5 and 1.8 MHz
- Slim Jim 50 MHz

3B9SP QSL Info:
QSL Manager HB9ACA
Manfred Oberhofer

P.O. Box 38
1553 Chatonnaye
SWITZERLAND

QSLing order:
* OQRS direct requests within Club Log
* mail direct requests
* OQRS buro requests within Club Log
* normal buro requests (please note that both buro paths take certainly long time as always)
If possible, please use the OQRS system, which will be available after the expedition. It saves time and and cost.
QSL requests received direct by the manager will result in a direct response, subject to certain provisions.
In order to receive a direct card:
* Ensure that the QSO information on your card is clear and correct. Be sure that time and date of your QSO's are in UTC.
* Enclose a good quality self addressed and stamped envelope (SASE) of sufficient size and strength for the number of return cards expected. No Air Mail envelopes and no labels only please! If the postage is ok, the QSL Manager will stamp the envelope with a A-Priortity stamp. Up to eight QSO's can be confirmed on a single card.
* Enclose US dollars or sufficient International Reply Coupons (IRC's) to meet postage costs. Loose Swiss stamps are also welcome. We can not use stamps or currency form other countries. The IRC's must be propely stamped. Only the new IRC's valid until december 2013 will be accepted. To read more about IRC's follow the link to the Universal Post Union, click on more and download th PDF document.
Within Europe Outside Europe
1 - 4 cards $2
or
1 IRC stamped in Europe $3 for Priority, $2 for Economy
or
1 IRC stamped outside Europe
5 cards or more $4
or
2 IRC stamped in Europe $4
or
2 IRC stamped outside Europe
* Please do not send other currencies or cheques. Applications received direct but without a self addressed envelope, an envelope wich is too small, or without sufficient postage will receive confirmations via the burerau.

The logs will be uploaded for log search, to the Club Log database. Of course, it highly depends on the internet connection possibility. If there is no internet service available, we will upload the logs, as soon as possible. If you could not find your QSO, but you are sure that it was a good contact, send an email after the expedition with the QSO details or just work us again. Manfred, HB9ACA, will then check the log for any possible error make the correction, if necessary. In this case, please do not send direct QSL request until you got the answer about the QSO in question.
The logs will be uploaded to LotW within 6 months after the DX Operation.

About Rodrigues
Continent : Africa
CQ Zone : 39
ITU Zone : 53
IOTA : AF-017
Time Zone : UTC + 4 hours
Rodrigues (French: île Rodrigues) named after Dom Diogo Rodrigues is a semi-autonomous island part of the Republic of Mauritius located in the Indian Ocean, about 650 kilometres (400 mi) east of Mauritius. It is the is part of the Mascarene Islands which include Mauritius, Cargados Carajos shoals and the French island Réunion, other nearby island countries and territories include Tromelin, Agalega, Comoros, Mayotte and the Seychelles to the far north-west. The area of Rodrigues is 108 km2. It is of volcanic origin surrounded by coral reef, and just off its coast lie some tiny uninhabited islands and islets. The island used the be the tenth district of Mauritius before it gained autonomous status in 2001 and is governed by the Rodrigues Regional Assembly. The capital of the island is Port Mathurin.
As of 2011, the island's population was about 37,922. Its inhabitants are Mauritian citizens. English is the official language of the island, though people also speak French, Indian languages and some oriental languages are also spoken, the lingua franca is Rodriguan Creole. Most of the inhabitants are of mixed African and Frenchdescent. Its economy is based mainly on fishing, farming, handicraft and a developing tourism sector.

History
From the 10th century, Arabs have been known to visit the Mascarene Islands. A 12th century map supposedly contains them, and the Cantino planisphere of c.1500 and some other contemporary maps clearly show the three islands of the Mascarenes asDina Arobi (or Harobi), Dina Margabin and Dina Moraze. These are apparently corrupted transliterations or transcriptions of the Arabic Diva Harab ("Desert Island"),Diva Maghrebin ("Western Island") and Diva Mashriq ("Eastern Island"). While the second clearly refers to Réunion, sources disagree about which of the other is MAuritius and which one Rodrigues, which are both to the east of Réunion and arranged in a somewhat stylize way on these maps. However, even in its original state, Rodrigues had some karst, while Mauritius even after suffering 500 years of deforestation can by no means be called "desert" even in a colloquial sense.
The island was located again in February 1507. Part of the fleet of Afonso de Albuquerque and Tristão da Cunha, Diogo Fernandes Pereira's Cirne spotted Réunion on February 9 after a cyclone diverted their course. The other two islands were subsequently rediscovered. The initial name was Diogo Fernandes; Domingo Froizwas given as a name some years later, and by 1528 it had been again renamed after the Portuguese navigator Dom Diogo Rodrigues and has remained so since. The orthography has been less stable at first, with the name being transcribed Diego Rodriguez,Diego Roiz, Diego Ruys (or even "Diego Ruy's Island"), Dygarroys orBygarroys. Some early French sources called it Île Marianne.
Due to the island lying far off the beaten track of seafarers at that time, it received few visits. From 1601, the Dutch began visiting the island somewhat more regularly for fresh supplies of food. In 1691 the Huguenot, François Leguat and 7 companions landed on the island, intending to set up a farming colony of Protestant refugees. Farming was not successful, but there was an abundance of tortoises, turtels, birds, fish and other seafood.
During the 18th century several attempts were made by the French to develop the island. African slaves (ancestors of the present population) were brought to Rodrigues to develop stockbreeding and farming.

In 1809, after a brief battle with the French, British troops took possession of Rodrigues. And with British occupation, slavery was abolished.
In 1883, the eruption of the Indonesian volcano Krakatoa was heard at Rodrigues Island and it remains the furthest point at almost 4800 km, at which the explosion was heard. The sound was described as "the roar of heavy guns". Naval ships were ordered to investigate as it was feared the sound was due to a ship in distress firing its guns. Having been heard from about 5000 km (3000 mi) away on the other side of the Indian Ocean, the noise remains the loudest sound in recorded history.
In 1968, Rodrigues was joined with Mauritius when it attained independence; today it is an autonomous region of Mauritius.

Climate
The isolation and location of the island give a micro climate specific to Rodrigues, with two seasons. Rodrigues enjoys a mild tropical maritime climate with persistent trade winds blowing throughout the year. Mean summer temperature is 25.9 degrees Celsius and mean winter temperature is around 22.3 degrees Celsius. The temperature difference between summer and winter is 3.6 degrees Celsius. January to March are the hottest months and August is the coolest month. The wettest month is February; September and October are the driest months. The climate is hotter and dryer than in Mauritius. Cyclones may arise from November to April, and Rodrigues is more often hit than Mauritius

Biodiversity
Rodrigues Island was characterised by endemic plant and animal species in abundance, but from the seventeenth century much of its biodiversity has been eradicated. The island was home to a now extinct species of bird, the Rodrigues Solitaire. An endemic species of bat, the Rodrigues Flying Fox is currently threatened.

OM Budi,
Saya tertarik juga dengan Lighthouse On The Air on HAM.Saya membaca di Lighthouse database reference http://www.unc.edu/~rowlett/lighthouse/ yang Pulau Ambon juga memliki Light House di Tanjung Nusaniwe. Tanjung Nusanive (Nusaniwe, Noesanive) Date unknown. Active; focal plane 138 m (453 ft); white flash every 5 s. 30 m (98 ft) skeletal tower, painted white. No photo available, but a Google satellite view probably shows this light station. This may be the original lighthouse, a 21 m (69 ft) square skeletal tower with gallery seen in a 1919 photo posted by the Amsterdam Tropenmuseum. Located at the southern tip of Ambon island, about 13 km (8 mi) southwest of Ambon city. Site status unknown. ARLHS IDO-317; Admiralty K1620; NGA 25772.
Mungkin Pa Budi bisa memberi petunjuk untuk saya untuk dapat ambil bagian dalam kegiatan ini, yang kalau tidak salah bulan Agustus ada kegiatan Contestnya.
Terima kasih atas petunjuk serta bantuannya, semoga rekan2 yang Lokasi/Daerah tempat tinggal mereka yang memiliki Lihgt House dapat turut serta dalam kegiatan ini.

Subject: RE: [orari-news] Kembalikan Pulau Miangas dari DU9 ke YB8 !!!

Dear All

Sedikit banyak ada kaitannya (yg kemudian sy extend) dg subyek ini, ada bbrp points yg sy mau “angkat” ke “atas” (dan untuk itu sy mohon bantuan “moral” dr rekans):

1. ORARI (di semua strata: ORLOK, ORDA,ORPUS) bisa memprakarsai DX-pedition atau IOTA di/dr Mercu Suar/Lighthouses yg berada di pulau-pulau terdepan/terluar/perbatasan.
Di laman YBDXClub bbrp wkt yll OM Budi Santoso YF1AR prnh posting ttg WLOTA Contest 2011, tp kemudian tidak ada posting lanjutan-nya lagi (ato memang dr YB-land nggak ada yg ikut).
BTW, dr situs WLOTA/World Lighthouse On The Air sy dapatkan daftar pulau-pulau (dg lighthouses) di YB land, yg kalau memang ada yg berminat bisa sy e-QSP-kan di edisi mendatang ... atau brngkali juga bisa diminta dr OM Fachmi YBØMF, WLOTA repr./associate di Indonesia.
2. ORARI takes lead dlm upaya (efforts) utk mem"bebas"kan penggunaan 60m band (5 MHz) KHUSUS utk EmComm di IARU Reg. III.
Tentunya IARU Conv. 2012 di Ho Chi Minh City dan GAREC 2012 di Port Dickson, My ... merupakan forum yg tepat utk meretas jalan bagi "perjuangan" utk ini – yg notabene tidak mudah (dg mengambil contoh Canada/VE-land yg perlu waktu selama 3 tahun dg/secara intens dan persistent memperjuangkan ini di berbagai forum di IARU Reg. II.
3. Anggota ORARI “yang mampu” lebih berperan serta secara aktip dalam kegiatan di forum regional, atau katakanlah yang paling dekat (dan bisa diikuti tiap hari) dg check in di SEA (South East Asia) Net di 20m.
Dalam mengenang kepergian OM Jos YB2SV (SK) – ex DPPers pada berbagai Masa

Bakti ke Pengurusan ORPUS dan salah satu penggiat di SEANet ini *), rasanya tidak berlebihan kalau para sahabat beliau menaruh obsesi dalam era kepengurusan ORARI PUSAT masa bakti 2011-2016 ini salah satu SEANEt Convention bisa digelar di YB-land.

*), quote: " ... Dalam kaitannya dengan SEANET, yang sangat membanggakan beliau adalah keberhasilannya mengibarkan bendera ORARI (dan Merah Putih) di beberapa kali Konvensi SEANET, dengan menyabet Top Scorer pada SEANET WORLDWIDE CONTEST selama beberapa tahun berturut-turut: Kuala Lumpur (1975), Bangkok (1977), Singapore (1978), Penang (2x masing-masing pada tahun 1979 dan 1984) dan Jogjakarta (1981),.

Kemenangan berturut-turut selama beberapa tahun sejak 1975 itu akhirnya dipuncaki dengan mendapatkan sebuah Trophy "yang besar sekali" untuk katagori Overall Champion, yang diterimanya pada SEANET Convention di Singapore (1983) ... dan :

... Pada scope nasional, kepengurusan ORARI Pusat di bawah Ketua Umum Soewondo YBØAT memberi mas Jos mandat untuk menjadi Ketua pada Konvensi SEANET (South East Asia Net Convention) di Yogjakarta (1981), sedangkan pada kepengurusan ORARI Pusat di bawah Atmodjo Brotoatmodjo YB2DAN beliau ditunjuk menjadi Liaison Officer untuk IARU (1982 – 1986) ...." unquote

4. Pengurus ORPUS Masa Bakti 2011-2016 bisa meng-agenda-kan penyelenggaraan NATIONAL Field Day (vide SK 48/OP/KU/2000) sbg Kalender Tahunan, yang dari tahun-ke-tahun penyelenggaraannya dilakukan secara bergilir di bawah koordinasi ORDA(atau gabungan beberapa ORDA) yg mem-bawah-I lima Pulau/kelompok Pulau utama: Jawa (utk call areas Ø-1-2-3), Sumatra (utk call areas 4-5-6), Kalimantan (call area 7), Sulawesi (call area 8), NTB, NTT, Maluku, Papua (call area 9)

Itu dulu yg bbrp hari ini "terngiang" di benak saya, dan kebetulan bisa terpicu dg posting OM Adhi YB3MM di bawah ini.

73, es just wismilak ...

OM Adhi - YB3MM

Pada saat pelantikan Pengurus ORARI Pusat, Pak Tifatul Sembiring menyinggung

masalah NKRI dan DXpedition.

Mudah2an para pengurus yang baru dilantik dapat menyikapinya.

Meizon - YC0MEI

Subject: [orari-news] Kembalikan Pulau Miangas dari DU9 ke YB8 !!!

Hello IOTA Chaser di Indonesia,

Setelah diperiksa di direktori pulau-pulau yang diterbitkan oleh RSGB,

ternyata pulau Miangas, pulau yang terletak di paling utara Indonesia

digolongkan ke dalam OC-235 (DU8-9 Mindanao's Coastal Islands).

Koq bisa? Kenapa demikian?

Harusnya Pulau Miangas termasuk dalam Kabupaten Talaud OC-209.

Bahkan di wikipedia pun sudah dinyatakan Pulau Miangas adalah milik

Indonesia.

Mungkin sudah banyak rekan-rekan kita yang protes ke RSGB atau langsung ke

Roger G3KMA, tetapi buktinya hingga sekarang pun Pulau Miangas tetap lepas

dari genggaman NKRI.

Tolong untuk Orpus yang bekerja sama dengan Metro TV dll yang katanya akan aktivkan memancar dari pulau terluar, mohon Pulau Miangas ini dimasukkan dalam prioritas utama.

Denger kabar, sekarang sudah ada kapal Pelni yang ke pulau Miangas?

Khusus untuk OM Yoppie, OM Martin, OM Kadek, saya siap diajak kesana looooh... (lupakan dulu Lucipara nya)

Adhi YB3MM

No 1105

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

3D2_cr - The 3D2C team [425DXN 1080] now includes sixteen operators (AD6E, AH6HY, K6MKF, K6SRZ, K9CT, LZ1CG, N6NKT, N6PSE, PY5CC, RW3RN, RW4NW, RZ3FW, UA4HOX, WD5COV and YT1AD). They will leave Suva (Fiji Islands) for Conway Reef on 24 September around 18 local time (6 UTC), and will return in the night between 5 and 6 October. Their "primary objective is to provide as many DXers as possible a 'new one' with this rare DXCC entity" and their "secondary objective is to give as many band-slots as possible". They will target European contacts during those periods when propagation is possible. Plans are to upload their logs to Club Log on a daily basis. QSL via YT1AD. There will be an OQRS for direct and bureau QSL cards. Band plan and further information ca be found at http://www.yt1ad.info/3d2c/index.html [TNX N6PSE]

7X - Special event stations 7T50I (operated by Radio Club Algiers), 7U50I and 7V50I (both operated by Radio Club Laghouat), 7W50I (operated by Radio Club Bou-Saada) and 7Y50I (operated by Radio Club Mostaganem) will be active through the end of the year to celebrate the 50th anniversary of the indipendence of Algeria. Information on the relevant award can be found at qrz.com under any of the callsign above. [TNX IARU Region 1]

BV - Look for BO0M to be active from Matsu Island (AS-113) on 27-30 July, IOTA Contest included. QSLling instructions can be found at http://art.ham.org.tw/en/qsl_en.aspx [TNX NG3K]

EI - Olivier, ON4EI will be active as EI8GQB on 7-31 July using an hybrid wind-solar power system from his caravan. He will participate in the IOTA Contest as EI1A. QSL for both callsigns via bureau to ON4EI. A Live Information Banner as well as daily updates with pictures and videoes will be available at http://www.qrz.com/db/EI8GQB [TNX ON4EI]

ES - RD1AR, SP7DPJ, SQ7OXU and UA1ANA will be active as ES0W from Ruhnu Island (EU-178) on 26-30 July, IOTA Contest included. QSL via SP7DPJ, direct or bureau. [TNX NG3K]

F - To celebrate the 70th anniversary of the French Army Signal Corps and to honour French radio pioneer and army general Gustave-Auguste Ferrie (1868-1932), special event station TM70TE will be active on 12-14 July from the 3rd level of the Tour

Eiffel. Expect activity on the HF and VHF bands, SSB and CW. QSL via F5KBB, direct or bureau.

F - Jacky, F4EGH (SSB) and Leon, ON4ZD (CW) will be active as TM0BI from Fort Boyard Island (EU-032) on 25-26 July. They will be QRV from 7 UTC to 16 UTC each day, as they are not allowed to stay overnight. QSL via ON4ZD, direct or bureau. [TNX ON4ZD]

F - Peter ON8ZZ and his son Frederik ON3NT will be active as F/OT9Z from the Chausey Islands (EU-039) on 27-29 July. They will also participate in the IOTA Contest as TM7T. [TNX rsgbiota.org]

F - Look for F6KUF/p to be active from Noirmoutier Island (EU-064) on 20-21 August. Activity will be on 80-10 metres SSB, CW and possibily PSK/RTTY. QSL via home call. [TNX F5TRO]

FM - Lars, K9FY will be active holiday style as TO5U from Martinique (NA-107) on 11-18 July. He will be QRV on all bands SSB and CW. QSL via home call, direct or bureau.

G - In the IARU HF World Championship (14-15 July), and transmitting from several DXCC Entities within the UK, the RSGB HQ team will be using the special callsign GO2HQ to celebrate the London Olympics. QSL via M0OXO and LoTW. Further information can be found at www.gr2hq.com. [TNX GM3WOJ]

G - 2O12L (Two Oscar One Two Lima) will be the callsign of the London amateur radio station for the Olympic and Paralympic Games. Five stations (three on HF and two on VHF) will be active from 25 July to 9 September. QSL via G4WNF, direct or bureau (e-mail requests for bureau cards can be sent to g4wnf[@]mac.com), and LoTW. Further information at www.2o12l.com

HA - HA0BW, HA0DX, HA0KA and HG0NAZ will be active as HG0WFF from the Hevesi Fuves Pusztak nature reserve on 13-16 July. They plan to operate SSB, CW and digital modes on the HF bands with up to four stations. QSL via HA0HW, bureau preferred. [TNX HA0HW]

HB9 - The teams of HB9IRC and Insubria Radio Club (IQ2IR) will be operating from Mount Bar, in southern Switzerland, during the weekend. HB9IRC will be located at hut and will be active on 7-8 July, while a second station will be activated as HB9SOTA on 8 July from the summit of Mount Bar. Expect activity on the HF bands CW and SSB and on 145.350 MHz. [TNX HB9TZA]

HC - Celebrating their 81st anniversary, members of Quito Radio Club (HC1QRC) will be active as HD081QRC on 14-22 July. They will be QRV on all bands CW and SSB, using both modern equipment and some vintage radios "beautifully restored by Gustavo, HC1BG". QSL via HC1JQ, direct or bureau. [TNX NE8Z]

I - Look for Dario, IZ4UEZ to be active holiday style as ID9/IZ4UEZ from Lipari Island (EU-017) on 6-11 July. He will operate SSB, possibily with some RTTY. QSL via home call, direct or bureau. [TNX rsgbiota.org]

I - Members of ARMI Taranto and the 599 DX Team will be active as IJ7T from San Pietro Island (EU-073) on 20-22 July. They will operate SSB, CW and RTTY on the HF bands and 6 metres. QSL via IK7WDS. An OQRS for direct and bureau cards will be available on Club Log. Further information will be available at www.armi.ta.it [TNX

IZ7AUH]

LA - Thomas, SM3DMP will be active holiday style as LA/SM3DMP from Otroy (EU-056) on 18-20 July. He will operate mainly CW on 30, 20 and 17 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]

LA - Waldi, SP7IDX and Mek, SP7VC will be active as LA/SP7IDX and LA/SP7VC from Mageroya (EU-044) on 20-29 July. They will operate SSB and RTTY with two stations on 80-6 metres, and will participate in the IOTA Contest. During their travel to Mageroya, on 19-20 July, they might stop and be active as SM/SP7VC and SM/SP7IDX from Seskaro Island (EU-139). QSL via home calls. [TNX DX Coffee]

LX - Radioamateurs du Luxembourg will be represented in the IARU HF World Championship (14-15 July) by LX75HQ. This is the HQ special callsign celebrating the LX Amateur Radio Association's 75th anniversary. Information on the award for contacting LX75HQ, LX75RL and ordinary LX stations during the year 2012 can be found at www.rlx.lu. [TNX LX2A]

OZ - DL2JRM, DO2XX and DO6XX will be active as OZ/homecall from Vendsyssel-Thy (EU-171) on 7-21 July. Look for OZ/DO6XX and OZ/DO2XX on 80-10 metres SSB, while OZ/DL2JRM will also operate CW. QSL via home calls, direct or bureau. [TNX rsgbiota.org

PA - Celebrating the 100th anniversary of the National Open Air Museum in Arnhem, Fred PA0FAW will be active as PC100NOM until 29 July. QSL via PA0FAW, direct and bureau. [TNX VA3RJ]

PY - The Perdigueiros Radio Team will be active as PR5D from Ilha do Mel (SA-047) on 27-29 July, IOTA Contest included. QSL via PY5DC, direct only. [TNX rsgbiota.org]

PY0S - Fred/PY2XB, Peter/PP5XX (PY5CC), Tomi (HA7RY) and George (AA7JV) will be active as PT0S from St. Peter and St. Paul Rocks (SA-014) for two weeks in the late November to mid-December time frame. The actual dates will depend on weather conditions and will be announced on the PT0S website (see below). Amateur radio activities are still banned from the archipelago [425DXN 1088], but the the Araucaria DX Group has been given a special permit to conduct this DXpedition. The operation will have a strong low band focus. There will be a dedicated station operating on 160 metres from sunset to sunrise. A second station will be on 80 and 40 metres at night. During the day there will be two stations on the higher bands - and 6 metres - depending on conditions. RTTY will also be supported. QSL via HA7RY (OQRS for direct and bureau cards will be available on the website) and LoTW (the logs will be uploaded "generally within 36 hours of the QSO taking place"). For further information and regular updates please visit http://pt0s.com/

SM - Lars, SM6CUK will be active as SA6G/7 from Ven Island (EU-137) on 25-30 July, IOTA Contest included. QSL via home call, direct or bureau. [TNX VA3RJ]

SV - The Radio Amateur Association of Greece (RAAG) will activate special callsign SX1GR from the Acropolis of Athens on 18-22 July.

Expect activity on the HF bands SSB, CW, RTTY and PSK31, as well as on 6 and 2 metres. QSL via bureau. [TNX SV1RP]

SV9 - Claude, HB9CRX will be active as SV9/HB9CRX from Kissamos, Crete (EU-015) on 9-21 July. He will operate CW QRP on 30-6 metres. QSL via home call. [TNX F5NQL]

TA - TC0KLH (and not TC2KLH as previously announced) will be the callsign to be used from Kefken Island (AS-159) on 27-29 July, IOTA Contest included [425DXN 1102]. QSL preferably via the TA bureau. [TNX TA1HZ]

UA - Special callsign UE95K will be in use on 14-22 July from Bryansk in memory of Pavel M. Kamozin, World War II fighter ace and twice Hero of the Soviet Union. QSL via RV3YR. [TNX RV3YR]

UA - Members of the Russian Robinson Club are planning to be active from IOTA groups AS-061 (Ratmanova/Big Diomede Island) and AS-092 (Bering Sea Coast South group) in July-August. A special callsign, RI0K, has been granted for use bewteen 15 July and 28 August. [TNX DX World]

UA - Vladimir, UA0LCZ will be active as RI0NZ from Popov Island (AS-066) on 24-30 July. Before the IOTA Contest he will concentrate on CW (3507, 7007, 10107, 14017, 18067, 21017, 24897 and 28017 kHz). QSL via home call, direct or bureau. [TNX UA0LCZ]

V3 - Henry W5HNS (V31WH), Jay K0BCN (V31MX) and Marty W5MRM (V31MO) will be active from Caye Caulker (NA-073) on 23-31 July. They will operate CW, PSK and SSB on 40-10 metres. During the IOTA Contest they will use V31MX and alternate SSB and CW. QSL via home calls or LoTW. [TNX W5HNS]

W - Jon, WB8YJF, will be active as WB8YJF/4 from Ocracoke Island (NA-067) on 22-29 July, IOTA Contest included. He will operate CW, RTTY and SSB on 80-10 metres. QSL via home call, direct and bureau. [TNX OPDX Bulletin]

CHANNEL ISLANDS ---> Peter ON8ZZ and his son Frederik ON3NT will be active as MU/OT9Z from Guernsey (EU-114) on 16-20 July. They also plan to operate from the islands of Herm (17 July), Sark (18 July) and Alderney (19 July). On 20-26 July they will be active as MJ/OT9Z from Jersey (EU-013). QSLs via ON3NT, direct or bureau, and LoTW. They have a website at http://dxpeditionchannelislands.weebly.com

NORTHERN EUROPE TOUR ---> Paolo, I2AE is touring northern Europe (Sweden, Finland, Norway and Denmark) until late July, and plans to operate holiday style from a number of WFF sites, islands, lighthouses etc. "he will find on his way". Look for him around 14244 and 7144 kHz, with some possibile activity also on 6 metres. [TNX I2JJR]

Direttore Responsabile I2VGW

DX WORLD GUIDE ---> The third edition of the "DX World Guide", by Franz Lagner (DJ9ZB), is the first edition using color throughout and the first to be entirely in English. The 384-page book includes detailed entries for well over 300 DX "entities". It is available in both print and digital (CD) formats; orders can be placed on the CQ Communications on-line store at http://store.cq-amateur-radio.com.

LOTW & WPX ---> The ARRL launched the integration of Logbook of The World (LoTW) with CQ Magazine's Worked All Prefixes (WPX) Award on 2 July. A WPX account has automatically been created for Logbook users on their awards page, and they will be able to use LoTW to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply. Further information on www.arrl.org (News section).

NORTH KOREA ---> Rick, K6VVA has been working for quite some time on a "P5 CW Only & IOTA AS-197 Project" which now appears to be having interesting developments. "It has been a very long 6 years thus far", Rich says, "but I believe the time has finally come to fish or cut bait". Rick is "not seeking any donations at this point, but rather only an indication of the level of potential contributions for the related humanitarian purposes likely required in order for approval of this project and issuance of a P5 license". Read the details at www.k6vva.com/p5/

QSL GALLERY ---> The large collection of QSL cards on Les Nouvelles DX's web site has been updated. Fourteen different galleries include more than 10,000 cards for the ten Most Wanted DXCC Entities (2004-11), the 61 deleted DXCC Entities, obsolete prefixes, stations from Magrebh from 1947 to 1962, D5 and DL5 stations from 1945 to 1962 (soon to be enlarged to include D2/DL2 and D4/DL4 stations), Antarctic bases & TAAF (Terres Australes and Antarctiques Francaises), the various French DXCC island Entities in the Pacific Ocean, the Indian Ocean and the Americas (from 1945 to 1970), pre-1945 countries, French Departments and CONUS. plus a gallery for cards not accepted by DXCC. Your participation is encouraged - please visit www.LesNouvellesdx.fr and send your comments to lesnouvellesdx[@]free.fr [TNX F6AJA]

QSL MANAGER OF THE YEAR ---> The Golist QSL Manager Data Service is reviving its QSL Manager of the Year Award. The purpose of this award is to recognize the service provided by QSL managers to the world wide DX community. The definition of a QSL Manager for this award is "any person who confirms contacts via printed QSL card for any station other than their primary call sign". A plaque, donated by DX Publishing, Inc., publisher of QRZ-DX and The DX Magazine, will be awarded to the QSL Manager of the Year selected, at the W4DXCC Convention held in Pigeon Forge, Tennessee in September 2012.
Nominations will be accepted from DX and Contest clubs, which are encouraged to poll their members for their nominations for the Top 5 QSL Managers for 2012. Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters. The deadline is 1 August 2012.
The recognized format for clubs submission is: Club Name; Club Officer (Name, Call Sign, club office and email address); Top 5 QSL Manager Nominees (list name and callsign); put QSL Manager of the Year-2012 in the subject line and sent the message to golist[@]gmail.com. [TNX K1XN]

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).

+ SILENT KEYS + Gian Carlo Bavassano (I1RBJ) passed away on 5 July at 66 years of age.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W2VU and N6PSE for the following DX information.
3D2C, CONWAY REEF (Press Release)
Paul Ewing, N6PSE, sent out the following press release #1 on July 3rd:
"The World-Wide DX Group, led by Hrane Milosevic-YT1AD, is pleased to announce our next DXpedition, as 3D2C from the remote South-Pacific atoll of Conway Reef. This Dxpedition will take place from September 24th to October 5th, 2012. The World-Wide DX Group is the same group which brought you the recent 3D2C Rotuma Island Dxpedition in September, 2011.
>Our primary objective is to activate Conway Reef with a goal of providing as many DXers as possible a "new one" with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. We will target European contacts during those periods when propagation is possible and we will ask JA and North America to stand buy during those brief periods when the bands are open to EU.
>The team consists of sixteen operators including: Leader-Hrane Milozevic- YT1AD, Co-Leader Alex Romanov-UA4HOX, Co-Leader Paul Ewing-N6PSE, Dave Flack-AH6HY, David Jorgensen-WD5COV, Vasily Kozerodov-RW4NW, Dr. Alan Eshelman-K6SRZ-Team Physician, Alan Maenchen-AD6E, Sergej Yanovsky-RZ3FW, Craig Thompson-K9CT, Stanislav Vatev-LZ1CG, George Williams-N6NKT, Alexander Kuznetsov-RW3RN, Peter Sprengel-PY5CC and Mike Flowers-K6MKF.
>Our QSL Manager is Hrane Milosevic-YT1AD. We will have OQRS, we will accept direct and bureau QSL cards. We plan to upload our logs to Club Log on a daily basis.
>At this time, we are seeking Foundation, Club and individual support for this Dxpedition.
>You can find out more about our plans at our website:
>http://www.yt1ad.info/3d2c/index.html
>Thank you,
>The World-Wide-DX Group"CQ NEW (Press Release)
Richard Moseson, W2VU, sent out the following press release on July 3rd:
"Logbook of the World Support for CQ WPX Award Goes "Live" -- Participants in CQ magazine's WPX award program may now use the American Radio Relay League's Logbook of the World (LoTW) system to apply for the WPX award and its endorsements. Amateurs will be able to use LoTW logs to generate lists of confirmed contacts to be submitted for WPX credit. Standard LoTW credit fees and CQ award fees will apply. LoTW support for the WPX award went 'live' on July 2.
>Logbook of the World is the ARRL's electronic confirmation system for amateur radio contacts. It provides a confirmation when both stations in a contact submit their logs to the system and a match between the logs is confirmed.
>The application process for the WPX award via LoTW is the same as applying for ARRL-sponsored awards (such as DXCC and Worked All States), according to ARRL, which adds

that Logbook users will notice that a WPX account has automatically been created for them on their LoTW awards page.
>ARRL adds that amateurs wishing to apply for the WPX Award via Logbook of the World will pay 12 cents for each QSO they use in their application. A separate fee for the WPX Award (and endorsements) is payable to CQ: Subscribers will be charged $6 for each award, while non-subscribers will be charged $12 for each award. Endorsement stickers are $1 each.
>WPX is the first non-ARRL award supported by LoTW. Support for the rest of CQ's operating achievement awards - including Worked All Zones (WAZ), the USA-Counties Award (USA-CA) and the CQ DX and DX Field Awards - will be phased in over time.
>ARRL www.arrl.org is the National Association for Amateur Radio in the United States and publisher of QST magazine. CQ Communications, Inc. www.cqcomm.com is publisher of CQ Amateur Radio magazine and is the world's largest independent publisher of amateur radio magazines, books and videos."

P5, NORTH KOREA (P5/K6VVA Pending "CW ONLY" & IOTA AS-197 Activation Proposal Project)
Rick, K6VVA, states: "This is a 'Work-In-Progress' Update & Interest Level Survey." Press release by Rick states on his Web page:
"P5 'CW ONLY' & IOTA AS-197 PROJECT
>HISTORY
>During the past 6 years, I have had more than 50 cordial telephone conversations with D.P.R.K. personnel seeking official permission to operate from P5. Along with email proposals and discussions in this matter, substantial efforts have been made to obtain a P5 license.
>For more than a year now I have now been working with an NGO Organization which is well respected in the D.P.R.K. as a result of Humanitarian work they have done in P5 for many years. I have personally donated several thousands of dollars to this organization and another NGO specifically for both Food and Medical related relief projects to the people in need within the D.P.R.K. Representatives from both organizations personally supervise the final delivery and distribution of agricultral, food and medical related items in the D.P.R.K. to ensure the integrity of the donation programs.
>NEW DEVELOPMENTS
>For several months now my NGO contact and I have been discussing a possible new venue which would be mutually beneficial in helping to accomplish each of our objectives in the D.P.R.K.
>A longstanding goal has been to combine the need for a "CW ONLY" P5 Expedition with the first time activation of at least one P5 IOTA 'NEW ONE'. I believe an opportunity now exists to combine these goals in conjunction with unique "Cultural" and "Humanitarian" objectives which have been formulated for review by D.P.R.K. Authorities. There is strong support from the NGO in this effort.
>CLARIFICATION
>I need to make it very clear than I am *NOT* seeking any donations at this point, but rather only an indication of the level of potential contributions for the related "Humanitarian" purposes likely required in order for approval of this project and issuance of a P5 license.
>Although I will be paying ALL my own expenses for the Expedition, a quite large 'threshold' amount for the 'Humanitarian' part of the proposal has been established which may be necessary for this P5 Project to succeed. NO future donations will come to me personally, but rather be directed to the very well-respected NGO specifically earmarked for the D.P.R.K. relief part of the P5 Project proposal AFTER the Expedition has concluded.

There are some remaining details yet to be finalized.
>THE CHALLENGE
>WRITTEN APPROVAL from at least four separate D.P.R.K. Ministries and entities (including the D.P.R.K. Military) is necessary in order for this to happen. Based upon a detailed review of several previous P5 Expedition attempts that did not result in getting on the air, a key objective in this matter is to minimize potential failure upon arrival at the final destination in P5.
>It has been a very long 6 years thus far, but I believe the time has finally come to 'fish or cut bait'. I've espoused that 'Ham Radio Operators' are known to be generous contributors to Humanitarian causes. Being able to provide an indicator of this to the D.P.R.K. Authorities up-front can potentially make the difference between another 'No', or finally YES' in obtaining the desired P5 license.
>Another purpose of this Expedition is to hopefully further 'open the door' for a future Multi-Operator venue in P5, as well as activation of the other 3 remaining P5 IOTA 'NEW ONES'.
>PREPARATION
>My FIVE 2011 IOTA Expeditions to NA-041, NA-066, NA-091, NA-184 and NA-242 ('NEW ONE') were also used to fine-tune operational matters as well as test antenna designs for P5 use in a small venue footprint most likely acceptable to the D.P.R.K. Authorities. The plan is 4 days QRV with 200 watt radios and 'Verticals near salt water'. I have all the radio, antenna and computer equipment necessary for this expedition, including two KPA500 amplifiers (approval for use of the amps in P5 is questionable at this time).
>Thanks very much in advance for your possible participation in the Humanitarian aspect of this P5 'CW ONLY' and IOTA AS-197 Project. For Any Updates, Check TWITTER
>http://www.twitter.com/k6vva
>CLICK HERE TO INDICATE YOUR INTEREST LEVEL
>http://www.k6vva.com/p5/p5interest.html73...
Rick, K6VVA * The Locust
FOC (First Class CW Operators' Club)
NCCC Co-Founding Member
P.S. This is NOT a solicitation for contributions or donations, but only an inquiry to obtain an idea as to the possibilities of achieving the minimum 'threshold' amount set forth in the proposal to hopefully make this 'Cultural & Humanitarian' endeavor also become a reality for P5 'CW ONLY' and first time activation of IOTA AS-197."

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 1st-July, through Sunday, 8th-July there were 210 countries active. Countries available: 1A, 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5V, 5Z, 6W, 6Y, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH3, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8/h, VP9, VR, VU, XE, XU, YA, YB,
YI, YK, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
1A, SOVEREIGN MILITARY ORDER OF MALTA (Wrap-up)
The 1A0C operation went QRT on July 5th. As per their Web page, the 1A0C operation made 40957 QSOs with 14479 unique callsigns (14735/CW, 20268/SSB, 5950/RTTY and 4/FM). Breakdown by continent is as follows: 427/AF, 3226/AS, 27142/EU, 9320/NA, 288/OC and 554/SA. QSL via OQRS or LoTW. The OQRS is now available online at:
http://www.1a0c.com/qsl-information
3B9, RODRIGUES ISLAND
A team of operators from Switerland known as the "Radio 7 Team" will be active as 3B9SP from Rodrigues Island (AF-017) between October 16-23rd. Operators currently mentioned are Manfred/HB9ACA, Michel/HB9BOI, Herbert/HB9BOU, Eugen/HB9BQP, Nicolas/HB9CYF, Cedric/HB9HFN, Bertrand/HB9SLO, Fritz/HB9TNA and Alain/HB9TYJ. The pilot station will be Sebastien/HB9ICC and the coordination in Mauritius is Jacky, 3B8CF. Their goal is to set up three amateur radio stations that can be run together on different Amateur Radio bands. Mostly one on CW, one on SSB and the third running special modes like RTTY and PSK31. They hope to use small 400 watt solid state amplifiers for the CW and SSB stations. Activity

will be on 160-6 meters using two 3 element Spiderbeams (20/17/ 15/12/10m), verticals for 40/30/20m, a Butternut HF2V for 160/80/40m and a Slim Jim for 6 meters. QSL via HB9ACA direct or use the OQRS on ClubLog. The logs will be uploaded to LotW within 6 months after the DX Operation.

7T50/7U50/7V50/7W50/7Y50, ALGERIA

Members of the "Amateurs Radio Algeriens" (ARA - 7X2ARA) will be active using special prefixes to celebrate the 50th anniversary of the Algerian Independence between now and December 31st. A special award/diploma is available for obtaining 50 points by working the following stations:

7T50I - Official Station (RC Algiers); 10 points; QSL via 7X2ARA

>7W50I - Radio Club Station from East and South East area (RC Bou-Saada); 5 points; QSL via 7X2ARA

>7V50I & 7U50I - Radio Club Stations from the south zone (RC Laghouat); 5 points; QSL via 7X2ARA

>7Y50I - Radio Club Station from the West and South West area (RC Mos- taganem; 5 points; QSL via 7X2ARA

>7X ordinary Algerian stations; 3 pointsComplete details about the award are available on (QRZ.com) under any of the above special callsigns.

9A20, CROATIA (Special Event/Contest)

This year the Croatian Radio Amateur Association team will participate in the IARU HF World Championship (July 14-15th) using the special callsign 9A20HQ. They shall be active on all six bands and both modes. QSOs with 9A20HQ are valid for the "20th Anni- versary of the 9A prefix" award and will be automatically confirmed via the Bureau - no need to send your cards. Details/rules for the "20th Anniversary of 9A prefix" can be found on:

http://www.hamradio.hr/index.php?option=com_content&view=article&id=2116&Itemid=798

9H, MALTA

Giammario, IK0PEA, will be active as 9H3EA from Bugibba near La Valletta between August 5-17th. Activity will be holiday style on the HF bands plus 6 meters. He will be using a Kenwood TS 480-SAT with a vertical antenna. He may also use a dipole antenna for better performance on 30 and 40 meters. Focus will be on the Digital modes and SSB. QSL via his home callsign, by the Bureau or direct.

AFRICAN TOUR (6W & C5)

Dom, M1TKA, will activate two African countries during the month of August. His tentative schedule is as follows:

August 15-22nd - Senegal; Callsign 6W/M1KTA

August 22-29th - Gambia; Callsign C5/M1KTA

Activity will be on most HF bands using SSB, PSK and CW (in that order). He also mentions that he will use 6 meters if open from Senegal. For more information and updates, visit his Blog page at:

http://m1kta-qrp.blogspot.com

AP, PAKISTAN

Operators Asad/AP2AUM, Muhammad/AP2MF and Khalid/AP2MKS will be active as AP2ARS from Swat District between 1300z July 14th and 1900z July 15th. They will operate from an elevation of 2300m ASL using frequencies 7050 and 14150 kHz, and the satellites. Power output will be 150 watts to an Inverted V dipole for HF and an egg beater for the satellite communications (Grid Locater: MM65HH). QSL via: PARS AP2ARS, P.O.BOX 1450, Islamabad, 44000, Pakistan.

CY9, ST. PAUL ISLAND (Update)

The CY9M Team posted the following press release (#3) on July 6th [edited]: "Very soon it's time for an inter- national team of 10 amateur radio operators to board their flights to Nova Scotia, Canada, to participate in the expedition to St. Paul Island, a top-40 'most wanted' DXCC.

Quick Facts: CY9M St. Paul Island, July 26th-August 1st, 160-6 meters, QSL via M0URX.
Once the team arrives at St. Paul, in the Gulf of St. Lawrence, we plan to unpack and prepare six Elecraft K3 transceivers, four amplifiers, raise three Hex Beams and a number of other antennas in order to be active all bands from 160 through 6 meters CW, SSB and Digital.
The power station consists of three generators that will constantly charge three large battery tanks for maximum efficiency. We plan to consume more that 500 litres of fuel, large amounts of camping food and other 'necessities', including several hundred litres of water all of which are not found on the island.
The team, together with 2 tons of equipment and supplies, head out to sea on a 42 foot motor vessel on the evening of 25th July or on the morning of the 26th depending on weather. We expect to be active starting July 26th and continuously rock the bands until August 1st, weather permitting. Participation throughout the IOTA contest.
After the activity, all contacts will be verified via LoTW and for those who want paper QSL, Tim Beaumont, M0URX, lends us his excellent manager services. The log will be available through ClubLog, likely after the expedition.
The activity is supported both financially and through the loan of equipment by several large clubs such as NCDXF, GDXF, ARRL and companies like Elecraft, Acom and DX Engineering. But we are most proud that so many individual amateur operators and DX chasers contribute to the activity out of their own pocket.
If you would like to donate any amount to the CY9M St. Paul Island Dxpedition, please click here:
http://www.cy9m.com/donorFeel free to follow us on Twitter and Facebook for the latest news updates.
We look forward to working you from St. Paul Island, a top 40 most wanted DXCC.
73, CY9M Team, St. Paul Island DXpedition Bill, N2WB Kevin, VE3EN George, EA2TA Steve, VA3FM Christian, EA3NT Victoria, SV2KBS Simon, IZ7ATN Bjorn, SM0MDG Col, MM0NDX Mike, AB5EB"The following media pages are available for this operation at:Website: http://www.cy9m.com/Twitter: https://twitter.com/#!/CY9MFacebook: http://www.facebook.com/CY9M.2012
DIAMOND DXCC (Additional Diamond DXCC Tools and Reports Now Available)
The ARRL Web page reports, "The Diamond DXCC Award, celebrating the 75th anniversary of DXCC, has proven to be popular around the world. Nearly 700 applications have been filed, with K3RA presently sitting atop the list with 200 of the 231 possible entities in the log. Some incredibly rare places have been on the air in 2012 so far, including Tibet and Socotra Island! Recently ARRL has been able to add some additional tools and reports to the Diamond DXCC system. An online form has been added that is similar to the Online DXCC application. The Diamond DXCC application works the same way, except it is tailored to work for just the Diamond DXCC entities." For the complete report and more details, visit:
http://www.arrl.org/news/view/additional-diamond-dxcc-tools-and-reports-now-available
DXPEDITION VIDEOS OF THE WEEK
With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings: 1993 - AH1A Howland Island DXpedition:http://www.youtube.com/watch?v=hZuIxN-85js
 2006 - 5A7A Libya DXpedition: http://www.youtube.com/watch?v=fJOfy8MZLYY
 2011 - A71DLH Qatar DXpediiton: http://www.youtube.com/watch?v=z0f0zo-fSJ0
If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.
E5, SOUTH COOK ISLANDS (Update)
Norman, 5B4AIF, will be active as E51E from a villa in Tautu Village on Aitutaki Island (OC-083) between December 10th and January 5th (2013). Activity will be holiday style using

just basic antennas. Norman states, "I hope to have the HF2V for 40/80m. Shipped in advance everything else will travel with us. Inverted V's will be used for other bands unless I can get something 2nd hand to leave there. The radio will be a IC-7000, the amp will have the full legal power of 400 watts. I would like to operate at least SSB and RTTY, I am learning CW so if I am feeling able I will do some slow morse, but if no one sends slowly I will have to try another mode." Suggested frequencies are:
CW - 1825, 3525, 7020, 10105, 14025, 18075, 21025, 24895 and 28025 kHz
SSB - 1840, 3793, 7185, 14215, 18160, 21295, 24950 and 28485 kHz
RTTY - 3630, 7035, 10145, 14090, 18105, 21090, 24925 and 28090 kHz
6m - 50105/CW and 50130/SSB
QSL via EB7DX only. He is a ClubLog user. He now has a Web page up and running with a "bands/modes" needs survey available at:
http://aitutaki2012.com
EF8, CANARY ISLANDS
Luis, EA8AY, will be active as EF8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at:
http://www.ea8ay.com/ef8x
EI1/EI8/EI80, IRELAND
Olivier, EI8GQB/EI1A/ON4EI, will operate as EI8GQB between July 7-31st, from a caravan with green energy. He will take part in the IARU HF World Championship (July 14-15th) and RSGB IOTA Contest (July 28-29th). He will operate as a Single-Op/2R (2 radios) with 5 different antennas in a portable condition like disaster/emergency situation. Follow his activities on
http://www.qrz.com/db/EI8GQBwhere you will find a "Live Information Banner" with message and live frequencies as well as daily information with photo and video. Between July 28-29th, look for Olivier to use his new special contest callsign EI1A during the RSGB IOTA Contest. He plans to use a solar panel and a wind generator only. QSL EI8GQB and EI1A ONLY via the Bureau to ON4EI.
ADDED SPECIAL ACTIVITIES: Between July 14-15th, look for EI80IRTS to be activated by Olivier/ON4EI and Bernard/EI4II from the Irish Radio Trans- mitters Society (IRTS) HQ (Headquarter) station during the IARU HF World Championship. Also, look for EI80IRTS to be active on July 21st. This is a special callsign celebrating the 80th anniversary of the Irish Radio Transmitters Society.
GO2, ENGLAND
The RSGB IARU UK HQ team (GR2HQ) will be active during the IARU HF World Championship (July 14-15th) with the special callsign GO2HQ to celebrate the London Olympics this year. Other UK stations will also start using the GO prefix on July 21st. Please QSL GO2HQ via M0OXO - see
www.gr2hq.comfor more details.
H4, SOLOMON ISLANDS (IOTA Op)
Vadym, UT6UD, will be active as H44UD from New Georgia Island (OC-149), Western Province of Solomon Islands, between July 10-17th. Activity will be holiday style, and he will work mainly on CW during his evening and morning. If conditions permit, Vadym will try to find time to activate the IOTA groups OC-047 and OC-158. QSL via his home callsign, by the Bureau or direct.
IOTA NEWS
AS-113. Members of the Amateur Radio Taipei (ART) will be active as BO0M from Matsu Island between July 27-30th. Activity will include an entry in the RSGB IOTA Contest (July 28-29th). Operators mentioned are Tang/BM2AAV, Ken/BV1EL, Eddie/BV2DD, Evan/BV2KS, Lee/BV2NT, Lee/BX2AB, Calvin/BX4AG, Alfred/VR2SA and Bom/XX9LT. QSL only via: A.R.T. QSL

Service, PO Box 73-326, Taipei, Taiwan. Visit the ART Web page at:
http://art.ham.org.tw/en
EU-017. Dario, IZ4UEZ, to be active as ID9/homecall from Isola Lipari (IIA ME-001, MIA MI-053, WLOTA 1144, IPA: ME) between July 6-11th. Activity will be holiday style, using SSB only (RTTY under conditions). Equipment will be a FT857 w/100w into a fishing rod antenna, QSL via his home callsign, direct or by the Bureau.
EU-032. Operators Jacky/F4EGH (SSB) and Leon/ON4ZD/OS0S (CW) will be active as TM0BI from Fort Boyard Island (DIFM AT026, DFCF 17003) both days July 25th and 26th, between 0700-1600z (+/-). This year they were not able to receive permission to remain during the night on the fort. Activity will be on the usual island frequencies on SSB and CW +/- 17 kHz above the band edge. There will be no Digital activity. All QSL info is available on (QRZ.com).
EU-073. Members of Taranto ARMI section and 599 DX Team will be active as IJ7T from San Pietro Isle (IIA TA-002) between July 20-22nd. Activity will be on the HF bands and 6 meters using CW, SSB and RTTY. Operators mentioned are Fabrizio/IZ7LDC (Team Leader), Francesco/IZ7AUH (Co-Team leader), Luigi/IZ7HYA (Logistic/ Equipment), Elso/I7LGM, Simone/IZ0BTV, Antonio/IK7WDS, Giuseppe/ IK7MOF, Alessandro/IZ7FMM and Aurelio/IZ8EGM. QSL via IK7WDS, direct or by the Bureau. QSL cards can also be requested via the OQRS on ClubLog. For more information, visit:
http://www.armi.ta.it
EU-096. Tony, OH1TD, will be active from his summer home on Korpo Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via OH Bureau.
EU-123. Iain, MM0TFU, will be active as MM0TFU/p from Blackwaterfoot on the west side of the Isle of Arran (IOSA CL01, SCOTIA CS14), Clyde Islands, between July 19-28th. Activity will be before and during the RSGB IOTA Contest (July 28-29th). QSL via LoTW, preferred. QSL also via his home callsign, direct or by the Bureau.
EU-132. Adam, DJ0IF, will be active as SN0RX from Wolin Island during the RSGB IOTA Contest (July 28-29th). QSL via SP8RX.
EU-146. Ronny, ON6CQ, will be active as PA/ON6CQ from the Island of Schouwen Duiveland during the RSGB IOTA Contest (July 28-29th) as a Single-Op/SSB entry. QSL via ON6CQ, direct or by the Bureau (preferred), or 100% by LoTW.
EU-170. Feri, HA4BF, will be active as 9A/HA4BF/p from Vir Island (ACIA IC-200, CIA-55, IOCA CI-141, MIA MC-451, WLOTA 4050) between July 8-21st. Activity will be holiday style and SSB only. QSL via his home callsign, direct, LoTW and eQSL.
EU-171. Operators Netti/DO6XX, Robin/DO2XX and Rene/DL2JRM will be active as OZ/homecalls from Vendsyssel-Thy/Nordjylland (DIA NJ-001) between now and July 21st. Netti and Robin will be active on 80-10 meters using SSB, with 100w and GP antenna. Rene will be active 80-10 meters using CW and SSB, with 100w and GP antenna. Rene will also operate /m from different DIA islands. QSL via their home callsign, by the Bureau or direct.
EU-171. Ric, DL2VFR, will be active as OZ0FR/p from Vendsyssel-Thy/ Nordjylland (DIA NJ-001) between now and July 20th. Activity will be on all HF bands, mostly CW. QSL via his home callsign, by the Bureau or direct. Visit the Web site:
http://www.iota-expedition.com
NA-067. Sergej, K0KOC, will be active as homecall/p from Ocracoke Island (USI NC001S, WLOTA 0466, Hyde County, NC) between July 26-30th. He will be using a Elecraft KX3 10W QRP, most of the time operating the Digital modes (JT65, PKS-31, RTTY), powered by 20w sun panels and LiFo battery only. QSL via his home callsign, direct or by the Bureau.
IQ1, ITALY (Special Event/Award)
Members of the "Associazione Radioamatori Italiani" (ARI) will activate their club station as IQ1TW between July 1-31st. A special operating award - "Apollo Space Program From the Earth to the Moon" - will be available. The award is to "commemorate and keep alive the

memory of the space program which has revolutionized the life of humankind". To qualify for the award, you need to have confirmed contacts with the ARI Headquarters Station IQ1TW and any three stations from the following list: IZ1UMD, IZ1RFU, IZ1XBB, IZ1WVX, IZ1LBH, IK1WGZ, IZ1RGY, IZ2SMV and I1MXI. On July 20th, the anniversary of the first moon landing, a confirmed contact with IQ1TW (without the necessity of the other 3 contacts) will qualify you for the award. The special event stations will operate with 200 watts using dipole and vertical antennas. Full details, including a list of the planned HF operating frequencies and modes, log and confirmation information, rules, and
application instructions are posted on the ARI web pages at:
http://aritortona.xoom.it

Otherwise, QSL to M0URX according
to (QRZ.com).
QSL MANAGER OF THE YEAR. The Golist QSL Manager Data Service is reviving its QSL Manager of the Year Award. The purpose of this award is to recognize the service of QSL Managers world-wide for the service they provide to the World Wide DX Community. Nominations for this award will be accepted by the Golist from DX and Contest clubs, world-wide, for the year of 2012. Each DX club and Contest club is encouraged to poll their members for their nominations for the Top 5 QSL Managers for 2012.
The definition of a QSL Manager for this award is any person who confirms contacts via

printed QSL Card for any station other than their Primary Call Sign. Each club should tabulate the votes of their members and submit to the Golist the Top 5 vote getters as voted by members of their club. Votes should be tabulated and sent to the Golist by August 1, 2012, to be eligible for the QSL Manager of the Year award. Each club world-wide may only send one submission for voting purposes. Records of submission will be maintained by the GOLIST.
A plaque, donated by DX Publishing, Inc., publisher of QRZ-DX and THE DX MAGAZINE, will be awarded to the QSL Manager of the Year selected at the W4DXCC Convention held in Pigeon Forge, Tennessee, in September 2012. The recognized format for your club's submission is as follows: Club Name; Club Officer (Name, Call Sign, club office and email address); Top 5 QSL Manager Nominees (list name and callsign). In the subject line of your official email: *QSL Manager of the Year-2012*. Send to: golist@... Ending Date: August 1, 2012.
QSL RECEIVED VIA LoTW: 7Z1CQ, 8P6NW, 9M2TO, 9V1YC, A45XR, CT1JOP, E72U, EA1VT, EA2RCF, EO2012KW, ER1DA, FG5FU, FK8DD, G3ZQH, G3ZRN, G4MLW, G5CL, HA5AQ, HI3TEJ, HK1MW, HP1/IZ6BRN, K1DW, K9ZM, LU5FF, LY2MM, N2MH, NP2KW, OE9ICI, OH8L, OK1DX, OM0CS, ON4KEB, PA7RA, PJ7PT, R7AU, R7NA, VE1NB, VE2PID, W0RU, W5PR, WS7V, YT9M and YU2VZ

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!
SK9, SWEDEN
The Swedish SSA Youth Team (SK0YT) initiative will be manning SK9HQ during the IARU HF World Championship (July 14-15th) as a Multi-Multi entry on 160-10 meters SSB. Their QTH will be Kvarnberget ARC club station SK0UX. A total of seven youngsters will participate this time and the aim is to introduce "contesting" and to give them the opportunity to practice operator techniques. QSL via SM6JSM.
SV9, CRETE
Claude, HB9CRX, will be active as SV9/HB9CRX from Kissamos Island (EU-015) between July 9-21st. Activity will be on 30-6 meters using CW only and running QRP 5 watts. QSL via his home callsign.
SX1, GREECE
Members of the Radio Amateur Association of Greece (RAAG), the National Technical University of Athens and DXPlus Hellenic Radio Amateur M.I. Team will activate special event station SX1GR from the "Sacred Rock of Acropolis of Athens" between July 18-22nd. Look for activity to be on all HF frequencies using CW, SSB, RTTY and PSK31. Activity will also be on 6 and 2 meters. The station/stations will be active during the hours of museum operation. A special QSL award and special engraved QSL plaque will be available on request for any QSO. For additional information please contact SV1HER at: vanikiotis@... QSL via SV Bureau. See (QRZ.com) for more details.
TC, TURKEY (Correction/Update to OPDX.1066)
Tevfik, TA1HZ, informs that there has been a mistake regarding the callsign to be used from Kefken Island's (AS-159) Lighthouse during the RSGB IOTA Contest weekend. It was originally mentioned that the TC2KLH callsign would be used, but the callsign now will be TC0KLH during the activity between July 27-29th. Please QSL via the TA QSL Bureau.
TM70, FRANCE (Special Event/Update - Callsign Granted)
Operators Philippe/ F5SKW, Dimitri/F5SWB, Freddy/F5IRO/J28RO, David/F8CRS, Yves-Michel/F5PRU, and possibly some other hams and French Servicemen will be active as TM70TE from the 3rd floor of the Eiffel Tower, approximately 300 meters above the ground, between July 12-15th. Activity is to commemorate the 70th anni- versary of the French Army Signal Corps. Activity will be on CW, SSB and RTTY, and on the HF and VHF (JN18du) bands.

Operations will be 24 hours each day. A special QSL card will be available. QSL via the F6KHX ARC or F5OGL, direct or by the REF QSL Bureau.

TO5, MARTINIQUE

Lars, K9FY, will be active as TO5U from Martinique (NA-107) between July 11-18th. Activity will be holiday style on all HF bands using CW and SSB ("as condx and time away from beaches and Caribbean-French eateries and water holes allow"). QSL via his home callsign direct.

UE95, RUSSIA (Special Event)

Look for special event UE95K to be active between July 14-22nd. Activity is to celebrate the 95th anniversary of Pavel Kamozin, a twice hero of the Soviet Union, as a flight commander, deputy commander, and commander of a squadron of a fighter aviation regiment. QSL via RV3YR.

V3, BELIZE (Update)

Operators Henry/W5HNS, Jay/K0BCN and Marty/W5MRM will be active as V31WH, V31MX and V31MO, respectively, from Cay Caulker (NA-073). The team will arrive on July 23rd, and possibly be on the air that day. They will return to the U.S. on July 31st. Activity will be on 40-10 meters using a 5 band hexbeam and a 40m dipole, operating CW, PSK and SSB. Jay and Henry are the CW ops (as well as SSB) and Marty will operate on SSB. They may possibly have two transceivers on before the RSGB IOTA contest. During the RSGB IOTA Contest (July 28-29th), they will sign V31MX and be on the contest allowed bands alternating SSB and CW (on 40m and up). QSL via their home callsigns or LoTW.

VP2M, MONTSERRAT

Operators Bob/W5UQ and Bill/W5SJ are in their last minute preparations for their annual July trip this time they hold the callsigns VP2MUQ and VP2MSJ, respectively, between July 17-24th. Activity will be a casual, holiday style, DXpedition with an emphasis on CW on the 30/17/12 meters bands plus some limited RTTY..... EXCEPT for the weekend when Bill will take on the CQWW VHF Contest (July 21-22nd) with a 7 element, M2, 6M7JHV and Bob's Expert Amp, 1K FA for all bands, including 6 meters for the contest. They'll be operating from Gingerbread Hill. QSLs go to W5JAY.

VY2, CANADA

A group of Eastern Ontario amateur radio operators will be operating from Prince Edward Island (NA-029) between July 12-16th. During the IARU HF World Championship (July 14-15th), they will be using VY2RAC as Canada's HQ station. They will be operating as Multi-2 entry, both CW and SSB. QSL via: Radio Amateurs of Canada, 720 Belfast Road, Suite 217, Ottawa, Ontario, K1G 0Z5, Canada.

ZL9, CAMPBELL ISLAND (Update)

Members of the Hellenic Amateur Radio Association of Australia announced that they have received a landing permit from the NZ Dept. of Conservation for ZL9HR Campbell Island DXpedition in November.

ZS, SOUTH AFRICA

Bernie, ZS4TX, announced this past weekend that he will be active during the upcoming CQWW DX RTTY Contest (September 29-30th) as a Single-Op/All-Band/High-Power entry. He also mentioned that he will be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single- Band (15m)/High-Power entry. QSL both events via LoTW.

To all radio amateurs

SB DX ARL ARLD027
ARLD027 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MOZAMBIQUE, C9. Ivor, ZS1WY, is currently active as C91IW and is expected to be there over the next year. QSL via ZS1WY.

MOROCCO, 5C13. Look for Moroccan amateur radio operators to use the special prefix 5C13 until July 27. Activity is in celebration of the 13th anniversary of the crowning of Mohammed VI King of Morocco.

TRINIDAD AND TOBAGO, 9Y. Members of the Trinidad And Tobago Amateur Radio Society will be active as 9Y4HQ during the IARU HF World Championships. Activity will be on all HF bands using CW and SSB. QSL via DF2RG only, direct or by the Bureau.

IRELAND AND NORTHERN IRELAND, EI/GI. Dave, WJ2O, is expected to tour both Ireland (July 8 to 15 and July 19) as EI/WJ2O/m and Northern Ireland (July 16 to 18) as GI/WJ2O/m. Activity will be on the HF bands, and he plans as to be in the IARU HF World Championships as a Single-Op/Mixed-Mode from Ireland. QSL direct to home call.

ST. PIERRE AND MIQUELON, FP/TO2. Operators Yuri, VE3DZ and Victor, VA2WDQ/VA2WA will be active as FP/VE3DZ and FP/VA2WA between July 20 and 31. Activity will be on 160-6 meters using CW, SSB and RTTY. Look for them to use the special call sign TO2U for the CQWW VHF and RSGB IOTA Contests.

ECUADOR, HD. Members of the Quito Radio Club (HC1QRC) will be active as HD081QRC between July 14 and 22. Activity will be on all bands, CW and SSB. The operation is to commemorate the founding of the Quito Radio Club 81 years ago. QSL via HC1JQ, direct or by the

Bureau.

HUNGARY, HG. The members of the Regional Radio Sport Club Puspokladany will activate the rare Hevesi Fuves Pusztak Nature Reserve (HAFF-020) from July 13 to 16. Activity will be on all HF bands using CW, SSB and the Digital modes, with up to 4 stations depending on the local situation. QSL via the HA QSL Bureau (via HA0HW).

MARIANA ISLANDS, KH0. Kirk, WE8A, will be active as WE8A/KH0 from Saipan (OC-086) from July 26 to 29. Activity will be on 80-6 meters, but with a focus on 30, 17 and 12 meters using CW and SSB. QSL direct only to: 5-1-35, Daikaidori, Kobe, 652-0803 JAPAN.

THE NETHERLANDS, PC. Look for special event station PC100NOM to be active until July 29. Activity is to promote the 100th anniversary of The Netherlands Open Air Museum in Arnhem. Operator Fred, PA0FAW, will be using CW, SSB and PSK. QSL via PA0FAW, direct, by the Bureau or eQSL.

BRAZIL, PQ7/PW7. Look for special event stations, PW7FD (SSB and Digital) and PQ7FD (CW), to be active until July 30, in honor of the Brazilian Firefighters. Activity will be on 40, 20, 17, 15 and 10 meters. QSL to PS7AB direct, by the Bureau or LoTW.

ST. BARTHELEMY, TO2. Operators Ludovic, HB9EOU and Andre, HB9CVC will be active as TO2D between July 22 and August 4. Activity will be on 40-6 meters using SSB and RTTY. QSL via HB9EOU.

FRANCE, TM70. Operators Philippe, F5SKW, Dimitri, F5SWB, Freddy, F5IRO/J28RO, David, F8CRS, Yves-Michel, F5PRU, and possibly others will be active as TM70TRS or TM70TE from the 3rd floor of the Eiffel Tower, approximately 300 meters above the ground, from July 12 to 15. Activity is to commemorate the 70th anniversary of the French Army Signal Corps. Operations will be on CW, SSB and RTTY, on the HF and VHF bands, 24 hours a day. A special QSL card will be available. QSL via the F6KHX ARC or F5OGL, direct or by the REF QSL Bureau.

CHAD, TT8. Phil, F4EGS, will be active as TT8PK from N'djamena, until August 6. Activity will be limited due to his work schedule and spare time. QSL via F4EGS, the Bureau or direct.

CHILE, XR. Members of the Radio Club of Chile will be active as XR3HQ from the Chile HQ station in the IARU HF World Championships. QSL via the Bureau.

THIS WEEKEND ON THE RADIO. The 070 Club Firecracker PSK31 Sprint, Venezuelan Independence Day Contest, DL DX RTTY Contest, Straight Key Weekend Sprintathon, DARC 10 Meter Digital Corona and QRP ARCI Summer Homebrew contests are all on tap for this weekend. Please see July QST, page 77 and the ARRL and WA7BNM Contest Websites for

details.

SB PROP @ ARL $ARLP027
ARLP027 Propagation de K7RA

ZCZC AP28
QST de W1AW
Propagation Forecast Bulletin 27 ARLP027
From Tad Cook, K7RA
Seattle, WA July 6, 2012
To all radio amateurs

SB PROP ARL ARLP027
ARLP027 Propagation de K7RA

Solar activity jumped way up this week, with average daily sunspot numbers increasing by nearly 92 points to 118.1. Average daily solar flux went to 138.5 from 92.8 the week before. One new sunspot group appeared on June 29, another on July 1, and two more on July 4.

Geomagnetic activity this week was concentrated on June 30 through July 2, and the causes were the usual suspects, solar flares and solar wind spewing from coronal holes. One unusual aspect was that the mid-latitude A index, measured in Virginia, was actually higher on July 3-4 than the planetary A index, which is usually higher. The planetary A index is made up of an weighted aggregate of estimated K index data from multiple geomagnetic observatories.

The outlook for the near term has changed since the forecast that was presented on Thursday in the ARRL Letter. The solar flux is higher, and the higher geomagnetic activity is because of an M-Class solar flare on July 4.

The forecast shows increasing activity over the next couple of days, with solar flux at 165 on July 6-7, 160 and 155 on July 8-9, 145 on July 10, 140 on July 11-12, then 130, 125, 115 and 110 on July 13-16, and 105 and 100 on July 17-18. Solar flux is expected to dip below 100 on July 19-22. Solar flux is expected to rise to 140 on July 30 through August 1, dip again, and then peak at 145 on August 7.

Planetary A index is expected at 8, 12, 22, 18, 8 and 7 on July 6-11, and 5 on July 12-26, followed by another active period with planetary A index at 20 on July 27-28, 15 on July 29-30, and 8 on July 31 through August 1. A index should go quiet down to 5 over the next couple of weeks, except for a reading of 8 on August 4.

Petr Kolman, OK1MGW of the Czech Propagation Interest Group predicts the geomagnetic field will be quiet to unsettled July 6-7, quiet to active on July 8, unsettled to active July 9, mostly quiet on July 10-12, unsettled to active July 13-15, mostly quiet on July 16-18, and quiet to unsettled on July 19-21.

The Australian Space Forecast Centre issued a Geomagnetic Disturbance Warning at 2328 UTC on July 5. They predicted quiet to unsettled conditions July 6, quiet to unsettled conditions with active to minor storm periods late in the UTC day on July 7, and unsettled to active conditions with isolated minor storm periods on July 8.

This alert comes from a mail list offered by the Australian Government Bureau of Meteorology. You can see the email lists offered at http://www.ips.gov.au/mailman/listinfo/ and example on subscribing at http://www.ips.gov.au/mailman/listinfo/ips-geo-warning. This is for the Geophysical Warning email list, but notice that on the listinfo page at the first URL that the text string to the left of the Geophysical Warning description is ips-geo-warning, which matches the end of the second URL above. Just substitute the appropriate string of characters in that URL for any other lists you want to subscribe to.

As June is now over, we can look at some monthly numbers and 3-month moving averages. For the 3-month periods centered on January through May 2012, the average daily sunspot numbers were 83.3, 73.7, 71.2, 87.3 and 91.5. Keep in mind that the 3-month average centered on May is an arithmetic average of all daily sunspot numbers from April 1 through June 30.

If we look at just the monthly sunspot number averages for September 2011 through June 2012, they are 106.4, 123.6, 133.1, 106.4, 91.4, 50.1, 78, 84.5, 99.4 and 90.1.

That period last fall when sunspot numbers were so high was unusual, or at least we hadn't seen activity such as that in a long time. It was eight years earlier, in November 2003 when the monthly average of daily sunspot numbers was over 100 previous to September 2011. In November 2003 the average daily sunspot number was 103, and in October 2003 it was 118.9. It hadn't passed the November 2011 average of 133.1 since 9 years ago when it was 132.8 in July, 2003. On July 20, 2003 the daily sunspot number was 224.

Go to http://spaceweather.com/ and in the Archives drop-downs toward the upper-right, set it for July 21, 2003. Then click the Back and Forward links toward the upper right and see all the sunspot activity as it moves across the sun. If there seems to be a one-off problem with the sunspot numbers in the spaceweather.com archive, it displays the previous day's sunspot number because the date has changed to the next UTC day by the time the daily sunspot number is updated. You can check it against the daily sunspot numbers in our

bulletin at http://www.arrl.org/w1aw-bulletins-archive/ARLP030/2003 to see what I mean.

Space.com ran an article on a recent solar flare. Read it at http://www.space.com/16400-solar-flare-sun-fireworks.html.

Also, NASA commented yesterday: http://www.nasa.gov/mission_pages/sunearth/news/News070512-M6.1flare.html

Following last week's reports, another Field Day report came in on July 3 from Billy Bagwell, KE5WLH of the Greyhound Amateur Radio Club at Eastern New Mexico University in Portales, New Mexico. Billy wrote, "K5R, the special event station celebrating 100 years of New Mexico statehood had three radios on 80, 40, 20, and 15 meters. We made plenty of contacts on all bands. 80 got better here after 9:00 PM local time and was great most of the night with times of noise and fading. We think this was due to sun event/magnetic activity. 20 and 40 were hot as we expected. 15 meters started slow at noon and moved with the Sun from East to West until sunset when it seemed to fade away. On Sunday at sunrise 15 meters came back hard and moved with the Sun as expected. We had our stations set up in the Roosevelt County Sheriffs Office EOC, and all involved had a great time!"

On June 30, Bob Leo, W7LR of Bozeman, Montana wrote about a "giant 6 meter opening yesterday morning, the best that I have ever heard in 75 years of hamming. The band was full of distant DX. I even worked Israel, Poland, Estonia and Svalbard with 100 watts, all new ones for me between 1300z to 1500z when the band folded. Today it is as dead as a fence post."

Bob was born in 1921 and was on the famous Hallicrafters expedition to Africa in 1948. Check out his bio at http://www.qrz.com/db/w7lr, which of course requires a free account and login.

Joe, CT1HZE of Portugal (IM57nh) reports "June 30 was definitely an historic day for 6 meter multi-hop Es. Already from 0430z observers in Finland received FM broadcast stations from Russia on 70 MHz indicating a MUF greater than 110 MHz at high latitudes of up to 70 degrees N."

"These Es clouds shifted westerly with the sun and at about 1300z a spectacular 6 meter opening started when the automatic keyer from NN7J (CN85, Beavercreek, Oregon) was heard simultaneously by G0JHC, CT1HZE and stations in Germany. In the following 6 hours Pacific Northwest stations from W6, W7, VE7, VE6 and VE5 were able to work hundreds of QSOs with many countries in Western, Central, and Eastern Europe."

"Highlights were QSOs between JW7QIA and W7 (OR) and W5 (TX) stations and W7MEM and Israel (10700km). Even W7GJ who stated for years that he would never work EU on terrestrial modes was able to

work 9 QSOs with EU into G, SP, F and DL. CT1HZE was able to work 25 stations from the Pacific Northwest, after waiting for more then a decade for such an opening. Best DX was VE7DAY CO70 and WB8VLC CN84 who used 35W and a 5 el. only. Several QSOs were even made on SSB."

"Due to the early local time on the West coast probably many stations missed the first hours of the opening and later on some had to go to work, of course. I would consider this as a multihop Es propagation event with high MUF (over 70 MHz) on huge parts of the paths and probably more hops than necessary for the distance, i.e. 5 or 6 hops for the 8000 to 9000 km paths considering observed elevated angles with which the signals were received."

Thanks, Joe, and Bob. What an opening!

Kevin Lahaie, K7ZS of Hillsboro, Oregon wrote on June 29, "Out of the blue Europe opens this morning on 6 meters in a big way! I just worked DL, F, GM, SM, SP, ON, IT9 and OZ on 6 meter CW. Yahoo!"

Apparently the opening may have favored the northwest and not the southwest. I hope he wasn't so discouraged that he missed the opening, but early on June 29, Lance Wilson, NR7N of Scottsdale, Arizona wrote: "I have been on 6 meters for fifty years and I must say that the E-season in the Southwest has been disappointing. We have had a few good openings this year to the East Coast but nothing like previous years. International DX is non-existent. I keep watching VHFdx.info reports on extensive East Coast to Europe openings (as well as extensive U.S. openings for them as well) while we on the other side of the country go empty handed."

"While working Europe from the west normally requires F2 it appears that something else may be at play here. Day after day of seeing the left-hand lower quarter of the U.S. virtually blank makes me wonder what could be going on. Openings, when they occur, are mainly to the northwest with some also to the middle of the country. Even our normal pipeline to Texas appears to be down."

Regarding conversion of Command sets to SSB, a topic mentioned in recent bulletins, Ray Soifer, W2RS of Green Valley, Arizona wrote: "The W2EWL conversion didn't exactly convert a Command set to SSB, it made it into a VFO to use with an SSB exciter. In the 1950s I had a Central Electronics 20A exciter and a converted BC-458 VFO. The 20A generated SSB (upper sideband) at 9 MHz. Mixing that with the 5 MHz output of the BC-458 produced USB on 20 meters or LSB on 80."

http://topbanddxdiindonesia.blogspot.com/2012/07/ye0m-usai-9-juli-2012.html
YE0M Usai, 9 Juli 2012

Aktivasi YE0M di Kaliage, Kepulauan Seribu, referensi IOTA OC-177, 60 km ke utara Jakarta usai. Saya mohon maaf karena kemarin, di sini, saya tulisYE0M sudah usai padahal masih ada satu hari lagi yaitu 9 Juli 2011 (UTC).

Versi artikel yang sekarang Anda baca adalah yang paling mutakhir. Total QSO adalah lebih dari 20K seperti terurai dalam Gbr.3 (paling bawah)

Gbr.1. Moonlight over Kaliage Island. Foto: Nana YD1LUX

Saya belum dapat kabar lanjutan berapa jumlah QSO mixed modes/bands-nya. Tapi, saya bukan ahli nujum, prakira saya, perolehan mereka akan lebih dari 16K. Sebuah jumlah yang cukup berarti untuk kegiatan YE0M dalam beberapa hari saja.

Saya pernah bertanya di forum OrariNews: apa rahasianya?

Gbr. 2. OM Manila (duduk, kaus hijau) merayakan hari ulang tahunnya ke-70 dengan awak YE0M

Sambil tunggu kawan-kawan Orari kembali ke Jakarta untuk berbagi pengalaman, saya ingin simpulkan analisis teknis (bukan analisis kemampuan/skill dan kompetensi operator-operatornya) sebagai berikut:
a. Jumlah QSO CW lebih besar ketimbang moda-moda lainnya. QSO rate pada moda CW bisa dua atau tiga kalinya moda-moda lainnya.
b. Jumlah band-band yang diaktifkan adalah 11 buah dengan 4 moda
c. Persiapan yang matang dan adanya alat-alat yang baik/terawat.
d. Jumlah operator dan SDM yang cukup banyak untuk pembagian tugas secara optimal
e. dll
Selama ini, DXpedition Orari ke Kepulauan Seribu - atau mungkin juga ke tempat-tempat eksotis lainnya di Indonesia - sering "terjebak" dan karena kurangnya perhatian kepada tiga hal di atas. Akibatnya, hasilnya pun kurang memuaskan. Jumlah QSOnya paling banyak 'hanya' sekitar 7.5K

Gbr. 3. Jumlah dan rincian perolehan final QSO dari YE0M, 2012

Bisa dilihat bahwa perolehan 102 qso CW dua-arah (Mults=22 DXCC) pada topband (160m) tergolong memuaskan mengingat musim ini adalah bukan musim yang sesuai untuk DXing pada 160m.

Jumlah QSO dari YE0M telah melampaui perolehan qso dari YB8Y, April 2012 di OC-221, yaitu 20.344. Tim ini telah membuat rekor baru yang fantastis di Indonesia! Ayo tim lain mana yang akan berhasil memecahkannya?

Sekali lagi, selamat bagi tim YE0M dan terima kasih bagi sponsor-sponsor DXpedisi Orari ini. Safe travelling back home!

Sudah pantas kiranya Orari melakukan rekrutmen/talent-scouting, pelatihan-pelatihan secara terbuka sistematis terhadap SDM baru yang berpotensi untuk kegiatan-kegiatan seperti ini di masa depan dalam rangka melanjutkan kegiatan DX-peditions-nya.

PS: where do we go next?

OPDX Bulletin 1069.1 July 9, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1069.1
BID: $OPDX.1069.1
July 9, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network and K6VVA for the following DX information.
P5, NORTH KOREA (P5/K6VVA Pending "CW ONLY" & IOTA AS-197 Activation Proposal Project)
Rick, K6VVA, released the following on July 9th:
"IMPORTANT INFO UPDATE #1 which should address some of the assumptions, speculations and inaccurate guessing I've seen posted various places.
INFO UPDATE #1This is a supplement to my initial P5 'CW ONLY' and IOTA AS-197 Activation Project Proposal general information.
First of all, Tnx very much to each of you who have responded thus far via the P5 Interest webform. I am extremely encouraged by the level of generosity already expressed for the Humanitarian part of this Project in such a short time.
A longstanding hallmark of Amateur Radio is 'International Goodwill & Friendship. As a member of Rotary International for 25 years, I have a bona fide, genuine interest and commitment to the Humanitarian aspects of this unique P5 Project proposal. The U.S.A. NGO involved has an extremely high ranking on Charity Navigator. In fact, higher than many prominent and well respected other U.S.A. based Humanitarian Organizations.
Let me make it very clear - this is NOT a cash-into-the-pockets-of- officials endeavor as has been the case with some other expeditions. As I initially indicated, representatives of the NGO involved personally supervise the final delivery and distribution of agricultural, food and medical related items in the D.P.R.K. which have been purchased from any contributions to ensure the integrity of the donation programs. As a valid 501(c)(3) organization, at least the USA contributors will have the potential opportunity for their charitable contributions to be tax deductions. Regarding the donations level 'threshold' term used in the original information, this was established by me and not the D.P.R.K..
Over the past 15 years, when North Korea has been struck by famines and floods, the NGO participating in this project proposal has provided lifesaving assistance to help 2 million people survive. Current work focuses on delivering safe, clean and reliable water supplies to three major hospitals serving cities outside of the capital; and on providing emergency food relief through hospitals to children dying of severe malnutrition. If you saw the photos I've seen of some of these young children, it would break your heart. By providing some of the most fundamental of human needs, the NGO works to alleviate suffering and build hope in North Korea. It’s called 'Humanitarianism' & 'Goodwill'.
The U.S.A. NGO Humanitarian activities in the D.P.R.K. as a part of this combined P5 Project proposal must be approved by D.P.R.K. Officials. That's the way things work over there, but any future donations associated with bringing this P5 Project Proposal to fruition will be subject to written approval by all requisite D.P.R.K. entities for a P5 license, and an element of mutual trust required to operate first, with donations to follow

AFTER the expedition is done. Sound impossible? It is highly 'challenging', but to paraphrase an old saying: 'I would rather attempt to do the seemingly impossible and fail, than to do nothing and succeed.' How many of you had attempted something like this lately???
Under no circumstances is anyone obligated to do any of the following:
1. No one is obligated to make a voluntary donation of any amount at any time.
2. No one is obligated to make a donation in order to receive a QSL for a P5 QSO.
3. No one is obligated to join in an on-air pileup and attempt to make a P5 QSO.
Since Amateur Radio Operators Worldwide are known to be people of integ- rity, we will be asking the D.P.R.K. Authorities to trust us that the stated donation interest level amounts which have been made in advance will be honored by each individual, and directed to the U.S.A. NGO at the conclusion of the expedition. In a venue of mutual understanding, we will need to trust the D.P.R.K. Authorities to honor the terms and conditions in the P5 License and Expedition related documents agreed to in advance. This would only be possible based upon the D.P.R.K.'s longstanding relationship and respect of the NGO for all of the Humanitarian work it has done in the D.P.R.K. for over 20 years. Another option if necessary might be some type of Escrow account scenario.
For those who have already indicated a donation interest level amount on the P5 Project webform, please note the following (be sure and include your callsign and name):
1. To CHANGE the amount, send an email to: p5changeme@...
2. To DELETE your interest, send an email to: p5deleteme@...
I will reiterate that under NO circumstances should any donations be sent to me directly at any time, either now or in the future. Any donations which may be made on behalf of this project MUST go directly to the U.S.A. based NGO for the Humanitarian purposes. At the appropriate time, the NGO name will be provided along with specific instructions for the donation processes (as well as the QSL route). As previously indicated, pursuant to this specific P5 Project Proposal, I will be paying ALL of my own expedition expenses. The only exception to this not considered may possibly be the printing of QSL cards which has just been offered, and would be a form of non-cash expedition-specific support.
Most of us in the HF DXing and Contesting arena are 'Old Codgers' now, and the 'SK' factor has been sadly accelerating amongst our ranks at an alarming rate. For many, there may not be another 5 or 10 years to wait for a P5 expedition. A reality check is that this *could* still end up the case. Others have likely been pursuing P5 license approval. Their efforts might succeed and mine fail. Because of the need to ascertain a realistic idea of donation possibilities for the Humanitarian aspect of my proposal, as I indicated months ago in the IOTA realm, there would be exceptions to my new policy of not making far-in-advance notice of my future IOTA expeditions. This was a planned for exception. The previously stated intention of 4 days QRV with 200 watt radios and Verticals near salt water was being very conservative. I indicated I also have two KPA500 amps, but that approval for use in P5 is questionable (for a number of reasons). I have a short-list of
other experienced expedition operators who have been on stand-by for years now with an expressed interest in joining me on a P5 expedition. Of course a more than one operator venue is on the table, but I chose to be conservative at this time in seeking interest levels.
As to why a CW ONLY proposal, there are some very good reasons.
P5 is the most needed DXCC entity on CW. I also happen to prefer CW, which in times of challenging solar conditions, still provides the best opportun- ity for Little Pistol station operators with weak signals to make a desired QSO especially over a long haul path. I can assure you I have a specific on-air operating plan to implement for maximizing QSOs and minimizing pileup chaos if I am fortunate to find myself on-the-air from P5 and IOTA AS-197.

My understanding is that the primary past P5 operation resulted in a bit over 16,000 QSOs with about 12,000 unique callsigns, and the majority of QSOs were on SSB. Let's face reality here. With so many still needing at least one contact with P5 (especially on CW), I'd be willing to bet that at least 75% of those who already have a P5 SSB QSL in hand would jump into ANY new P5 SSB pileup again (even on the same band already worked and confirmed) just because they can, or have nothing better to do. Sorry, but I have no interest in spending a lot of my own money to go work dupes on SSB who already have a P5 QSL card, and see so many Little Pistol station operators (many of whom only operate CW) miss out on a needed first P5, P5 'CW' and/or IOTA AS-197 QSO.
Should approval end up for only a 4 day, single op venue in P5 as I initially conveyed, my goal is a net 15 to 18 hours per day of operating. Since the CW SPRINT is my favorite CW contest, I can assure you things will move along very fast, but not so fast in WPM that the majority of DX'ers won't be able to copy. My minimum goal as a 4 day, single op is 7,000 to 9,000 QSOs (unless a major solar flare occurs). I will send 'UP' after each 'TU', and also I.D. frequently enough unlike too many major expeditions this past year. There will be no valuable time wasted having to call CQ-CQ-CQ from P5 as has been the case with most of the not-so-rare IOTA Expeditions or even DX Contests. I believe my QSO goal is quite attainable, considering that I made 4,467 QSOs in 2 days as KP2CW in the 2004 ARRL CW DX Contest (Top Ten Single Operator All Band), and was First Place World, Single Operator 20 Meters CW, in the 2009 ARRL CW DX Contest as VP2VVA.
People can make assumptions and speculate all they want about aspects of this unique P5 Project Proposal which is understandable. Everyone is entitled to their own opinion, however some of the comments I've read by various 'Armchair Quarterbacks' are very inaccurate guessing. Please leave Political rhetoric out of your comments which serve no useful purpose. During the 'Cold War', many of us in the U.S. worked a lot of fellow Russian ham friends on the air regardless of what was happening in the Political World. Amateur Radio transcends Political Borders. Hopefully this INFO UPDATE has clarified a few things, however I am not at liberty to share all of the details of the P5 Project Proposal at this time. An additional INFO UPDATE will be made when deemed appropriate.
Tnx very much again to everyone including many of my ham friends who know me for their extremely encouraging generous level of Humanitarian interest provided thus far.
73...

P5 "CW ONLY" & IOTA AS-197 PROJECT
.....

HISTORY...

During the past 6 years, I have had more than 50 cordial telephone conversations with D.P.R.K. personnel seeking official permission to operate from P5. Along with email proposals and discussions in this matter, substantial efforts have been made to obtain a P5 license.

For more than a year now I have now been working with an NGO Organization which is well respected in the D.P.R.K. as a result of Humanitarian work they have done in P5 for many years. I have personally donated several thousands of dollars to this organization and another NGO specifically for both Food and Medical related relief projects to the people in need within the D.P.R.K. Representatives from both organizations personally supervise the final delivery and distribution of agricultral, food and medical related items in the D.P.R.K. to ensure the integrity of the donation programs.

NEW DEVELOPMENTS...

For several months now my NGO contact and I have been discussing a possible new venue which would be mutually beneficial in helping to accomplish each of our objectives in the D.P.R.K.

A longstanding goal has been to combine the need for a "CW ONLY" P5 Expedition with the first time activation of at least one P5 IOTA "NEW ONE". I believe an opportunity now exists to combine these goals in conjunction with unique "Cultural" and "Humanitarian" objectives which have been formulated for review by D.P.R.K. Authorities. There is strong support from the NGO in this effort.

CLARIFICATION...

I need to make it very clear than I am *NOT* seeking any donations at this point, but rather only an indication of the level of potential contributions for the related "Humanitarian" purposes likely required in order for approval of this project and issuance of a P5 license.

Although I will be paying ALL my own expenses for the Expedition, a quite large "threshold" amount for the "Humanitarian" part of the proposal has been established which may be necessary for this P5 Project to succeed. NO future donations will come to me personally, but rather be directed to the very well-respected NGO specifically earmarked for the D.P.R.K. relief part of the P5 Project proposal AFTER the Expedition has concluded. There are some remaining details yet to be finalized.

THE CHALLENGE...

WRITTEN APPROVAL from at least four separate D.P.R.K. Ministries and entities (including the D.P.R.K. Military) is necessary in order for this to happen. Based upon a detailed review of several previous P5 Expedition attempts that did not result in getting on the air, a key objective in this matter is to minimize potential failure upon arrival at the final destination in P5.

It has been a very long 6 years thus far, but I believe the time has finally come to "fish or cut bait". I've espoused that "Ham Radio Operators" are known to be generous contributors to Humanitarian causes. Being able to provide an indicator of this to the D.P.R.K. Authorities up-front can potentially make the difference between another "No", or finally "YES" in obtaining the desired P5 license.

Another purpose of this Expedition is to hopefully further "open the door" for a future Multi-Operator venue in P5, as well as activation
of the other 3 remaining P5 IOTA "NEW ONES".

PREPARATION...

My FIVE 2011 IOTA Expeditions to NA-041, NA-066, NA-091, NA-184 and NA-242 ("NEW ONE") were also used to fine-tune operational matters as well as test antenna designs for P5 use in a small venue footprint most likely acceptable to the D.P.R.K. Authorities. The plan is 4 days QRV with 200 watt radios and "Verticals near salt water". I have all the radio, antenna and computer equipment necessary for this expedition, including two KPA500 amplifiers (approval for use of the amps in P5 is questionable at this time).

Thanks very much in advance for your possible participation in the Humanitarian aspect of this P5 "CW ONLY" and IOTA AS-197 Project. For Any Updates, Check TWITTER and the INFO UPDATES webpage.

PLEASE READ ANY INFO UPDATES BEFORE PROCEEDING

P.S. This is NOT a solicitation for contributions or donations, but only an inquiry to obtain an idea as to the possibilities of achieving the minimum "threshold" amount set forth in the proposal to hopefully make this "Cultural & Humanitarian" endeavor also become a reality for P5 "CW ONLY" and first time activation of IOTA AS-197.

ORARI sudah berjalan ke 44 tahun, mungkin saat Amateur Radio lahir di Indonesia saya belum lahir, saya mengharap ke depan semoga lebih baik dan ORARI next generation akan banyak berkreasi, dan experimen dalam hal tele communication. Dan tidak banyak web, blok spot di internet yang Copy paste dengan mengaku ia yang design pada hal sudah ada negara lain yang membuat.
Semoga kita menghargai kreasi dan experimen oleh bangsa lain dan kita sendiri. Do it with your self do not copy with another .
Cheer de YB6AR...

Bagaimana TL922 Hf Linear Amplifier menjadi TL911 .
Dengan tube 4 x GI46B dan Single tube 3CX1500A7.
Penjelasan : TL922 di design untuk HF Linear amplifier dengan 2 X 500Z dan membangkitkan tenaga max.1200 watt, sedangkan TL911 membangkitkan 2500 watt dengan external HV 3500 VDC 3Amp. Makanya TL911 karena 911 adalah panggilan emergency untuk traffic penting. Hi hi hi...

Additional Diamond DXCC Tools and Reports Now Available
TAGS: 75th anniversary, active stations, arrl hq, Basic Award, DXCC staff, Excel spreadsheet, Online DXCC Application, pdf file, spreadsheet
07/06/2012
The Diamond DXCC Award, celebrating the 75th anniversary of DXCC, has proven to be popular around the world. Nearly 700 applications have been filed, with K3RA presently sitting atop the list with 200 of the 231 possible entities in the log. Some incredibly rare places have been on the air in 2012 so far, including Tibet and Socotra Island!
Recently ARRL has been able to add some additional tools and reports to the Diamond DXCC system. An online form has been added that is similar to the Online DXCC application. The Diamond DXCC application works the same way, except it is tailored to work for just the Diamond DXCC entities. Once you have set up an account for the Diamond DXCC, you can enter your QSOs into the form and it will remember them. If you have already started and used the Diamond DXCC Scorecard – the Excel spreadsheet, you can simply upload that spreadsheet into the online form.
The online form will keep count for you and will also allow you to make applications directly to ARRL HQ – no longer will you have to print out the spreadsheet or fill out paperwork! Additionally, HQ DXCC staff will be able to edit and change your online form data, so if you have 7O6T listed in Yemen, for example, staff can move that contact to the proper spot on the form: Socotra. When you come back to see your account you will be able to see the correction(s).
Another fun feature that has been added to the Diamond DXCC is a listing of operators who qualified for the basic award and how many entities they have credited! This online Diamond DXCC Standings listing is similar to the daily standings that are produced for VUCC and DXCC. The standings are updated at approximately 0200Z each day. When you go to the Standings listing, simply open the PDF file titled “US Letter,” which is used to denote that the formatting matches the size of paper typically used in the USA.
For more information, see the Diamond DXCC web pages. We have been adding new call signs to the list of Active Stations as they are reported and verified for some of the rarer entities. Please use these and the Entity List to help fill out your online form.

The IARU HF Championship Heats Up the Summer
TAGS: arrl contest branch, club stations, Contest, contest exchange, IARU HF World, IARU International Secretariat, IARU Member Society, IARU officials, itu zone, major contest, Manager Sean Kutzko, single operator, UTC Saturday
07/03/2012
Radiosport fans are gearing up for the summer's biggest HF competition: the IARU HF World Championship. This 24 hour long contest is the highlight of the summer HF contesting season, with plenty of opportunity to work DX from all around the globe on CW and SSB. Participants also get the chance to make QSOs with many IARU Member Society club stations and officials.
"The IARU HF Championship is one of radio sport's more unique events," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "It's the only major contest that uses International Telecommunications Union (ITU) zones as part of the exchange, and the only contest that gives special multiplier status for IARU Member-Society stations and their officials."
Hams can get in on the fun in a variety of ways. You may choose to enter as either a single operator, using either SSB only, CW only or a mixture of both modes. Single operator stations can choose from three power levels: High Power (greater than 150 W), Low Power (between 5 and 150 W) or QRP (5 W or less). You can also get some friends together at one station and participate as a Multioperator station with a single transceiver.
One of the fun things to do is see how many of the IARU special stations you can work during the event. "While most stations give their ITU zone as part of the contest exchange, IARU Member-Society stations give the abbreviation for their IARU society name, such ARRL for W1AW," Kutzko explained. "In addition, IARU officials can give one of four unique exchanges: AC if they are on the IARU Administrative Council, or R1, R2 or R3 for the ITU Region that official serves. It is always special to see so many nations represented on the air by their national organization. It reinforces the global nature of Amateur Radio and the common bonds we all have as amateurs."
The IARU HF World Championship begins at 1200 UTC Saturday, July 14 and goes until 1200 UTC Sunday, July 15. Complete rules may be found online. Logs may be submitted via e-mail; paper logs should be mailed to IARU International Secretariat, Box 310905, Newington, CT 06111-0905 USA. All logs must be e-mailed or postmarked no later than 1200 UTC August 14, 2012.

Triple Play WAS
* The Triple Play WAS (Worked All States) Award is available to all amateurs worldwide who must use Logbook of the World (LoTW) to confirm QSOs with each of the 50 states on voice, CW, and digital modes. The Triple Play WAS Award is a serial-numbered award starting with # 1, as determined by the time stamp of the electronic application submitted via LoTW. Awards issued will be tracked and presented on the ARRL Web site.

* Two-way communications must be established on amateur bands with each state on each mode. There is no minimum signal report required. Any or all bands (except 60 Meters) may be used for the Triple Play WAS. The District of Columbia may be counted for Maryland.

* Contacts must be made from the same location, or from locations no two of which are more than 50 miles apart. Club station applicants, please include clearly the club name and callsign of the club station (or trustee).

* Contacts must be made after 0000Z on January 1, 2009 to be considered for this award. LoTW will be programmed to automatically use this criterion. Contacts must be confirmed via LoTW. Written confirmations will not be accepted.

* There are no endorsements for the Triple Play WAS Award.

* Contacts made through "repeater" devices or any other power relay method cannot be used for WAS confirmation. A separate WAS is available for Satellite contacts. All stations contacted must be "land stations." Contact with ships, anchored or otherwise, and aircraft, cannot be counted. EXCEPTION: Permanently docked exhibition ships, such as the Queen Mary and other historic ships will be considered land based.

* A US applicant must be an ARRL member to participate in the WAS program. DX stations are exempt from this requirement.

* Attempts to falsify data, logs, or other application operations may be grounds for disqualification. The decision of the ARRL Awards Committee in such cases is final.

* Please follow the instructions presented on the LoTW website. The cost of the Triple Play WAS award is $17 for a certificate delivered to a U.S. address, or $18 delivered to an address outside U.S.A. A LoTW processing fee of $5 will be charged via the online application. There are no per QSO fees associated with any WAS awards.

* Now is your chance to proudly display your accomplishment of achieving the WAS Triple Play award with a distinctive wall plaque to display next to your certificate! This distinctive plaque is a replica of the Triple Play award certificate laminated in plexiglass. Your callsign, award date and award number are printed on the plexiglass giving it a raised (3-D) appearance. The plaque is $45 plus shipping (Shipping is $10.00 in the USA by FedEx and $25 outside of the USA by registered mail). You can send an e-mail with a credit card number, or, download the form and return it to WAS by regular mail, fax or e-mail it as an attachment. You can also call (860)594-0234 to place your order.

DIRECT QSL

For all direct request, please send a self addressed envelope with:

2 US$, (1 IRC + 1 USD) or 1 Euro for all destinations.

NOT IN LOG?

If you cannot find your callsign in the LOG but are sure to have a valid contact, please send your request to EB7DX after carefully checking the QSO details (date, time, band and mode) with our operators.
Every request will be considered in order to debug any possible log entry error.

Thank you for your understanding

LOTW CONFIRMATIONS

All QSOs will be confirmed via LOTW.
BUREAU CONFIRMATIONS

Spanish Bureau, we dont need your Bureau QSL card.

Campbell Island
Campbell Island (Motu Ihupuku) is a remote, uninhabited, subantarctic island of New Zealand and the main island of the Campbell Island group. It covers 112.68 square kilometres (43.51 sq mi) of the group's 113.31 square kilometres (43.75 sq mi), and is surrounded by numerous stacks, rocks and islets like Dent Island, Folly Island (or Folly Islands), Isle de Jeanette Marie, and Jacquemart Island, the latter being the southernmost extremity of New Zealand. The Island is mountainous, rising to over 500 metres (1,640 ft) in the south. A long fjord, Perseverance Harbour, nearly bisects it, opening out to sea on the east coast.
Campbell Island is inscribed in the UNESCO World Heritage list together with the other subantarctic New Zealand islands in the region as follows: 877-005 Campbell Island S52.33 E169.09 11331 Ha 1998
The island holds the distinction of being the most remote location (on a significant piece of land) from London, England and from Dublin, Ireland.
History
Campbell Island was discovered in 1810 by Captain Frederick Hasselborough of the sealing brig Perseverance, which was owned by shipowner Robert Campbell's Sydney-based company Campbell & Co. (whence the island's name). Captain Hasselborough was drowned on 4 November, 1810 in Perseverance Harbour.
The island became a seal hunting base, and the seal population was almost totally eradicated. The first sealing boom was over by the mid teens of the 19th century. The second was a brief revival in the 1820s. The whaling boom extended here in the 1830s and 40s. In 1874 the island was visited by a French scientific expedition intending to view the Transit of Venus. Much of the island's topography is named after aspects of, or people connected with, the expedition. In the late 19th century the island became a pastoral lease. Sheep farming was undertaken from 1896 until the lease, with the sheep and a small herd of cattle, was abandoned in 1931 as a casualty of the Great Depression.
In 1907 a group of scientists spent 8 days on the Island group surveying. The 1907 Sub-Antarctic Islands Scientific Expedition conducted a magnetic survey and also took

botanical, zoological and geological specimens.
During World War II a coastwatching station was operative at Tucker Cove at the north shore of Perseverance Harbour as part of the Cape Expedition program. After the war the facilities were used as a meteorological station until 1958, when a new one was established at Beeman Cove, just a few hundred metres further east.
A notable incident occurred in April 1992. A group of meteorological staff (New Zealand) were swimming when one of them was attacked and partly eaten by a Great White Shark. Jacinda Amey, one of the workers, swam back to rescue him while the shark was still in the area. She towed him to the shore where first aid was applied. He was rescued by a helicopter flying from Taupo which was guided by a twin engine plane with Sat Nav, which was and still is the longest ever single engine helicopter rescue in the world. The victim survived and Amey was awarded the New Zealand Cross – New Zealand's highest bravery medal for civilians. The station was manned permanently until 1995 when a fully automatic station was established. Today, human presence is limited to periodic visits by research and conservation expeditions.
The legend of The Lady of the Heather
The Lady of the Heather was the title of a romantic novel by Will Lawson. The novel is a mixture of facts and fiction elaborating on the incidents surrounding Captain Hasselburg's death on Campbell Island. The story is about a daughter of Bonnie Prince Charlie, exiled to Campbell Island after she is suspected of treachery to the Jacobite cause. Her character was inspired by Elizabeth Farr. Farr was probably what would now be called a "ship girl", which is a prostitute that worked on board docked ships, but the presence of a European woman at this remote place, and her death, gave rise to The Lady of the Heather story. The accident happened when William Tucker was present on the Aurora. Tucker was another unusual character in the sealing era who became the source of a legend and a novel. The remoteness and striking appearance of the sealing grounds, whether on mainland New Zealand or the subantarctic islands, and the sealing era's early place in Australasia's European history, supply the elements for romance and legend which are generally absent in the area's colonial history.
Climate
Campbell Island has a maritime tundra climate with consistently cool, cloudy, wet and windy weather. The island receives only 650 hours of bright sunshine annually and it can expect less than an hour's sunshine on 215 days (59%) of the year. The peaks of the island are frequently obscured by cloud. It has an annual rainfall of 1,450 millimetres (57.1 in), with rain, mainly light showers or drizzle, falling on an average of 325 days a year. It is a windy place, with gusts of over 96 kilometres per hour (50 kn; 60 mph) occurring on at least 100 days each year. Variations in daily and annual temperatures are small with a mean annual temperature of 6 °C (42.8 °F), rarely rising above 12 °C (53.6 °F).
Important Bird Area
The island is part of the Campbell Island group Important Bird Area (IBA), identified as such by BirdLife International because of its significance as a breeding site for several species of seabirds as well as the endemic Campbell Teal and Campbell Snipe.
Conservation
In 1954 the island was gazetted as a nature reserve. The feral Campbell Island Cattle were eliminated by about 1984. The feral Campbell Island Sheep were culled during the 1970s and 1980s, with their eventual extermination in 1992. In 2001 Brown Rats (Norway rats) were eradicated from the island nearly 200 years after their introduction. This was the world's largest rat eradication. The island's rat-free status was confirmed in 2003.[6] Since the eradication, vegetation and invertebrates have been recovering, seabirds have been returning and the Campbell Teal, the world's rarest duck, has been reintroduced. Other native landbirds include the New Zealand Pipit and the Campbell Snipe, a race or species of

the Coenocorypha snipes only discovered in 1997. The snipe had survived on Jacquemart Island and began recolonising the main island after the rats had been removed. Some Southern Right Whales come into bays in the winter to calve.
The area is one of five subantarctic island groups designated as a World Heritage Site by UNESCO.
Research
To mark the 200th anniversary of its discovery, the Campbell Island Bicentennial Expedition (CIBE) was undertaken in December 2010-February 2011. The research expedition was the largest multidisciplinary expedition to the island in over 20 years, and aimed to document the Island's human history, assess recovery of the Island’s flora and invertebrate fauna since the removal of sheep and the world's largest rat eradication programme, study the Island's plentiful but little understood streams and characterise the unusual stream fauna, and reconstruct past environmental conditions and deduce long term climate change from tarn sediment cores.
The expedition was run by the 50 Degrees South Trust, a charitable organisation established to further research and education on New Zealand's Subantarctic Islands, and to support the preservation and management of these World Heritage ecosystems. The expedition and the programme outputs can be followed at the CIBE website.

3050. OQRS - Online QSL Requests

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-11 14:52:23 UTC
From: Yb land Dx club
Topic: 3050 Message: 3050

OQRS - Online QSL Requests
*
* Added by Michael Wells G7VJR, last edited by Gary Hinson on Jul 09, 2012 (view change)
* show comment
The OQRS (Online QSL Requests) system enables people you have contacted to request QSL cards from you through your log search page in Club Log, without necessarily sending you their QSL card and waiting for it to reach you. They have the option to pay you to send them cards 'direct' (through the postal system), otherwise they can request cards for free 'via bureau' (through the QSL bureaux).
OQRS is available to all Club Log users. However, make sure you understand how the system works and be prepared to write and send out QSL cards before enabling OQRS and, in effect, entering into contracts with other amateurs.
Since many amateurs are unwilling or unable to pay for direct cards, it is a condition of using Club Log OQRS that, if requested, you must send bureau cards free of charge. Please do not enable Club Log OQRS if you are unwilling or unable to do this, for instance if you do not belong to a national radio society or QSL bureau service and hence cannot send outbound cards through the bureaux.
Important notes
* OQRS is provided 'as is' with no guarantees. It is free to use provided users accept all risks.
* People requesting direct cards though OQRS pay you through PayPal. Aside from providing information, Club Log plays no part in the financial transactions. It does not receive or process the money and takes no commission. PayPal charges are nothing to do with Club Log.
* Club Log also does not send or manage your QSL cards for you - you must do this!
* There are limits to the amounts you can charge for direct cards, based on guidance from various DX foundations and generally accepted amateur practice. Postal costs do vary around the world but be reasonable about your charges. Amateur radio is a hobby, not a commercial venture.
If you expect to receive online QSL requests from Japan, China etc. you must configure your PayPal account for UTF8 - watch this video to find out how!
How to enable OQRS
Login to Club Log, select "Settings" in the top menu and then click the "OQRS" button. The settings available are:
Setting
Description
Enable QSL requests Set to 'Enabled' to switch on OQRS for your log.
PayPal Address Enter the email address you use for PayPal here. You need to register with PayPal first if you have not already done so.
QSL Query Address Enter the address where people can email you if they have QSL or log queries.
Basic charge per card Set this to the amount in US Dollars it normally costs you to send someone a single QSL card direct. Do not set this too high - $2 is considered appropriate.
Charge extra per QSO If necessary, you can charge more for each additional QSO requested in the QSL. Most of us do not need and should not use this option.
QSOs per card If necessary, you can charge more for every 5, 10, 20 or 30 QSOs requested.

Most of us do not needs and should not use this option.
Click 'Save changes' to activate OQRS on your log.
How OQRS works
Amateurs can enter their callsigns and search your log in Club Log to check whether they appear in your log. The address of your log search page is:
https://secure.clublog.org/logsearch/CALLSIGN
where CALLSIGN is replaced by your callsign.
If they do appear in your log, and if you have enabled OQRS, Club Log gives them a "Request OQSL" button on the search results page. Clicking the button allows them to request cards either direct (at some cost, paid via PayPal) or via bureau (always free). The amount they are charged for direct cards depends on the preferences you have set on your 'Settings' page.
If the person searching your log is also a registered user of Club Log, they will not need to fill in the QSO details in their OQSL requests. Club Log does this for them, automatically, using QSO details from their log. Apart from being easier, this helps avoid typing errors.
How to process direct OQSL requests when they arrive
Whenever someone requests a direct card from you through OQRS, their payment through PayPal triggers two emails to be sent from PayPal stating the amount paid and the QSO data: one email is sent to the address you have configured in OQRS and another is sent to them as a receipt. Provided you only receive occasional OQSL requests, there is sufficient information in the email from PayPal for you to prepare and send cards manually.
You must respond promptly to OQSL requests you receive by preparing and sending out your QSL cards - Club Log will not do this for you!
Using ADIF and CSV files
For heavy OQRS users (e.g. DXpeditions receiving hundreds or thousands of QSL card requests), Club Log generates ADIF files containing the relevant QSOs and addresses. However, since few amateur programs are presently able to use QSL address data in ADIF files, Club Log also generates separate CSV files containing the same information: spreadsheet programs such as Excel can handle CSV files quite easily, but it's up to you to print out cards, envelopes and labels.
A Windows program is under development to help with the QSL printing process. Watch for further announcements when it is completed and released for general use.

DXNL 1788 - Jul 11, 2012
DX Newsletter

7X, ALGERIA
The special event stations 7T50I (Radio Club Algiers), 7U50I and
7V50I (Radio Club Laghouat), 7W50I (Radio Club Bou-Saada) and
7Y50I (Radio Club Mostaganem) are celebrating the 50th anniversary of
the independence of Algeria until Dec 31. A special award is available.
QSLs via 7X2ARA.

9A, CROATIA
The team of the Croatian Radio Amateur Association will participate in
the IARU HF World Championship (Jul 14/15) using the special callsign
9A20HQ this year. All QSOs will be confirmed via bureau automatically.
See also: http://www.hamradio.hr/index.php?view=article&id=2116

9Y, TRINIDAD AND TOBAGO
The "Trinidad and Tobago Amateur Radio Society" will join the upcoming
IARU HF World Championship as 9Y4HQ in CW and SSB on all bands.
QSL via DF2RG.

AP, PAKISTAN
Pakistani hams (AP2AUM, AP2MF, AP2MKS) announced to show up as AP2ARS
from the Swat district (35.5044 N, 72.5996 E; Loc MM65hh) from a height
of 2300m a.s.l. from Jul 13-15. Listen for them on 20m and 40m running
150 watts into an Inverted V dipole and via satellite.
Unfortunately QSL only direct via: PARS AP2ARS, Box 1450 Islamabad,
44000, Pakistan. See also: http://www.pakhams.com

CE, CHILE
The Radio Club de Chile (CE3AA) will sign XR3HQ in CW and SSB on all
bands during the IARU HF World Championship. QSL via bureau.

DL, GERMANY
The German team DA0HQ will be active from eight different QTHs using
the special DOK HQ12
in CW and SSB on the six main HF bands during the
IARU HF World Championship. The DA0HQ operators are looking forward to
make many QSOs. In the interest of fairness everybody should work
several HQ stations during this contest.

As every year the district Mecklenburg-Western Pomerania plans a
special activity to support the SOP award (Sea of Peace).
DL0SOP will be QRV from Jul 1-31 and hands out some points for the SOP
and also the special SDOK SOP12. See also: http://www.mydarc.de/dl0sop

EI, IRELAND
Olivier,ON4EI, will be active as EI8GQB using an hybrid wind-solar power system from his caravan until Jul 31. He will take part in the IOTA Contest as EI1A. More details at QRZ.com. QSLs via ON4EI.

Olivier,ON4EI, and Bernard,EI4II, will join the upcoming IARU HF World Championship as Irish HQ station using EI80IRTS (and also on Jul 21).

F, FRANCE
Philippe,F5SKW, Dimitri,F5SWB, Freddy,F5IRO/J28RO, David,F8CRS, Yves-Michel,F5PRU, and possibly also others will be active as TM70TE from the 3rd floor of the Eiffel Tower, approximately 300 meters above the ground, from July 12-15 to commemorate the 70th anniversary of the French Army Signal Corps. QSL via F6KHX oder F5OGL.

FM, MARTINIQUE
Lars,K9FY, wants to enjoy the pile-ups on 160m-10m signing TO5U from Ducos on Martinique (NA-107, DIFO FM-001, WLOTA 1041) from Jul 11-18. QSL via homecall, unfortunately only direct.

G, ENGLAND
The RSGB team has applied the special call GO2HQ or the IARU Contest and they will work from several DXCCs. They have also launched a special awards program. QSL via M0OXO. See also: http://www.gr2hq.com

GW, WALES
The "Strumble Head DX & Contest Group" will be active again as MC0SHL from Ramsey Island (EU-124, Loc IO71) on 40m-6m using two Hexbeams and a Windom with one station dedicated to digital modes (mostly RTTY) from Jul 12-16. The Team members include Ant,MW0JZE, Charles,M0OXO, Chris,G1VDP, and Rob,MW0RLJ, with his XYL Jane. They will operate from their farm HQ in the Pembrokeshire National Park (WFF GFF-015) if they are unable to get to the island due to bad weather.
QSL via M0URX (OQRS), LoTW and Clublog. See also: http://www.mc0shl.com

H4, SOLOMON ISLANDS
Vadym,UT6UD, will be active as H44UD from New Georgia Island (OC-149) from Jul 10-17. Activity will be holiday style and he will work mainly in CW during his evening and morning. If conditions permit, Vadym will try to activate also the IOTA groups OC-047 and OC-158. QSL via UT6UD.

HC, ECUADOR
Members of the Quito Radio Club (HC1QRC) will be active as HD081QRC in CW and SSB on all bands from Jul 14-22. The operation is celebrate the 81st anniversary of the founding of the Quito Radio Club. Equipment will include both modern and some beautifully restored vintage radios by Gustavo,HC1BG. QSL via HC1JQ.

JA, JAPAN
Following stations will join the IARU HF World Championship from Japan:
8N1HQ (JA1HGY, Minato-city, 160m CW, 10m CW)
8N1HQ (JG1ZUY, Kimitsu-city, 15m SSB)
8N1HQ (7J1YAJ, Naka-gun, 40m CW, 40m SSB)

8N3HQ (JH3AIU, Miki-city, 15m CW)
8N4HQ (JH4WBY, Okayama-city, 80m CW, 80m SSB, 10m SSB)
8N8HQ (JH8ZMM, Iwamizawa-city, 20m CW, 20m SSB)
QSLs will be sent via bureau automatically.

8J1MBR is a special event call on the occasion of the 60th anniversary of
Mobara City (JCC 1210) in Chiba prefecture in the Kanto region on Honshu (AS-007, WLOTA
2376). It is active until Mar 31, 2013.
QSL via bureau.

HAMs are celebrating the 20th anniversary of Yachimata City (JCC 1230) (known
for Suika = watermelon and peanuts) and activate the special event station
8J1SPY until Mar 31, 2013. Yachimata-City is located in the Chiba prefecture (AS-007, WLOTA 2376). QSL via
bureau.

The special event stations 8N0CLEAN and 8N5CLEAN are active during the "Clean Reception Environment Month" until Oct 31. QSLs via bureau.

The special event station 8J6OKAJO is working until Dec 31 to mark the 400th anniversary of Oka Province Castle Town (now Taketa-city JCC 4408 Jo: Castle) in the prefecture Oita on Kyushu (AS-077, WLOTA 0963).
QSL via bureau.

The special callsign 8J9HC is active Aug 12 to celebrate the 36th All Japan High School Cultural Festival in Toyama (JCC 2801) on the island of Honshu (AS-007, WLOTA 2376). QSL via bureau.

LX, LUXEMBURG
The radio society "Radioamateurs du Luxembourg" will be represented by LX75HQ during the IARU HF World Championship. QSL via LX2A.

The special event station LX75RL marks the 75th jubilee of the society outside of the contest until Dec 31. QSL via LX2A.
See also: http://www.rlx.lu

UA1, EUROPEAN RUSSIA
The special event call UE95K marks the 95th birthday of Paul Kamozine from Jul 14-22. He was a pilot and twice hero of the Soviet Union. Operation takes place in all modes from Bryansk (oblast Bryanskaya, UA3Y, oblast #118). QSL via RV3YR, direct preferred.

V4, ST KITTS AND NEVIS
once again John,W5JON, will be operating as V47JA from Calypso Bay on St. Kitts (IOTA NA-104, Loc FK87pg) between Jul 12 and Aug 2. Activity will be in SSB on 80m-6m (incl. 60m) and also during the RSGB IOTA SSB Contest and the CQWW VHF Contest (Jul 21/22). His equipment includes:

Kenwood TS-590S and a SB200 amp, a 80m-10m multiband dipole and a S9 vertical. His XYL Cathy,W5HAM, will occasionally operate as V47HAM. All QSLs should be sent via his homecall W5JON, also via LoTW.

VE, CANADA

The Hamilton Amateur Radio Club (VE3DC) and the 1812 Special Committee are pleased to announce that the special callsign XM31812 will be QRV from Jul 13-15 to commemorate the Bicentennial of the War of 1812. QSL via VE3ATX. See also: http://www.wix.com/xm31812/xm31812

A group of HAMs is going to visit Prince Edward Island (NA-029) from Jul 12-16. They will join the upcoming IARU HF World Championship as the Canadian HQ station VY2RAC. QSL via: Radio Amateurs of Canada, 720 Belfast Road, Suite 217, Ottawa, Ontario, K1G 0Z5, Canada.

VP2M, MONTSERRAT

Bob,W5UQ, and Bill,W5SJ, will be active as VP2MUQ and VP2MSJ from Gingerbread Hill during their annual July DXpedition from Jul 17-24. They will be QRV in holiday style focussing on CW, 30/17/12m and RTTY. QSLs via W5JAY.

VP9, BERMUDA

A team of Dit,DF7KF, Angelo,DM1AC, and Joe,DL9MS, will show up as DF7KF/VP9 (or with a special call) on 144 MHz via EME working from Bermuda (Loc FM72oh) starting on Jul 13. QSL via DL9MS, only direct.

LG/SJ, MOROKULIEN

Bernd,DH1SBB, Claus,DO9BC, Guenther,DG7SF, and Mike,MD0VMD, will be QRV as LG5LG and SJ9WL (alternating each day) from Morokulien on the border between Norway and
Sweden (Loc JO69cw). Activities will take place in SSB and digital modes on 160m-6m (mainly 40m/20m) from Jul 13-17. QSLs via LA4EKA (please no eQSL).

HAM RADIO IN TURKMENISTAN: N8OO (ex-EZ5AA) states that all amateur radio activities from Turkmenistan is illegal for about ten years.

HEAD QUARTERS AWARD 2012

Die "Brave Radio Friends" sponsor the HEAD QUARTERS AWARD 2012. Applicants must work a minimum of 10 different HQ stations during the IARU HF World Championship. Each HQ stations counts only once on any band or mode. The award is for free and available only as a PDF. Send your applications to de3ear@... by Aug 31, 2012. Please send your attachments only in one of the following formats: pdf, txt, doc, xls, jpg

JAPAN DX MEETING 2012: The Japan DX Meeting 2012 will be held in Tokyo on Aug 25. See also: http://jdxm.web.fc2.com/e.html

P5, NORTH KOREA: Rick,K6VVA, has been working for quite some time on a "P5 CW Only & IOTA AS-197 Project". Stay tuned! http://www.k6vva.com/p5

IARU 2012 Arrives With Usual European Focus; Videos Show Proof of PopularityJamie Dupree NS3T

One debate that surfaces from time to time in contest circles is the need for a 24 hour class in major contests, as some argue that the 48 hour limit for single operators is too much. If you like a contest of shorter duration with stations all over the world, then get your radios and antennas ready for the 2012 IARU HF Championships.
The IARU contest has changed dramatically over the years, as it used to be one of those contests that was 48 hours long - now it has blossomed into a contest that has seen strong growth in the number of logs, even with tough propagation in recent years.
The IARU test has also turned into one of the most popular contests each year in Europe, and that is obvious when you make a simple sweep across the internet, as a number of videos pop up from the 2011 running.
For example, you can get a review of how things went at OP0HQ in 2011:
If you like big operations, then you can take a peek at how things went at EF8HQ, which turned in the top score for any HQ operation in 2011:
Maybe you want to look at a smaller group in the Multi-Op section - then check out Team 4O3A from Montenegro:
Or there was the setup of the portable station for HB9EGA, done with time-lapse photography:
As with anything on the internet, there's always something funny, and that was true at IO1HQ, as IR1Y decided to use his trumpet to shake up the troops:
Also from Italy, IO8HQ came up with their own video as well:
Meanwhile in Poland, Team SN7H added their own fun to You Tube as well:
So as you get your radios and antennas ready for IARU 2012, maybe you might want to think about testing out the video camera as well, because a video on the internet might attract some people to ham radio contesting - and it might bring forward a few ideas and a few laughs along the way.
The 2012 IARU HF World Championship begins at 1200z on July 14 and ends at 1200z on July 15. The rules can be found on the ARRL web site.

ZCZC AE28
QST de W1AW
DX Bulletin 28 ARLD028
From ARRL Headquarters
Newington CT July 12, 2012
To all radio amateurs

SB DX ARL ARLD028
ARLD028 DX news

This week's bulletin was made possible with information provided by NC1L, PY2EV, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

CYPRUS, 5B. Anton, RT9T is QRV as 5B/RT9T until July 18 while on holiday. This includes an entry in the IARU HF World Championship. QSL to home call.

ALGERIA, 7X. Special event stations 7T50I, 7U50I, 7V50I, 7W50I and 7Y50I are QRV until December 31 in celebration of the 50th anniversary of the independence of Algeria. QSL all calls via 7X2ARA.

WEST MALAYSIA, 9M2. Alex, SQ9UM, will be QRV as 9M2/SQ9UM from July 13 to 15. Activity will be on 40 to 6 meters using CW, SSB and RTTY. This includes an entry in the IARU HF World Championship. QSL to home call.

PAKISTAN, AP. A group of operators will be QRV as AP2ARS from the Swat district from July 13 to 15. Activity will be on 40 and 20 meters, including some satellite operation. QSL direct.

TAIWAN, BV. Alex, KU1CW is QRV as BW2/KU1CW. This includes an entry in the IARU HF World Championship. QSL via LoTW only.

ETHIOPIA, ET. Club station ET3AA has been active on 17 meters using SSB daily between 0700 and 1500z. QSL direct.

JERSEY, GJ. Look for M0CFW to be QRV as MJ0CFW from July 13 to 15. This includes being a Single Op/Mixed Mode/Low Power entry in the IARU HF World Championship. QSL to home call.

SOLOMON ISLANDS, H4. Vadym, UT6UD is QRV as H44UD from New Georgia Island, IOTA OC-149, until July 17. Activity is holiday style using

mainly CW during his evenings and mornings. QSL to home call.

ECUADOR, HC. Members of the Quito Radio Club will be QRV as HD081QRC from July 14 to 22 in celebration of the 81st anniversary of the founding of the Quito Radio Club. Activity will be on all bands using CW and SSB. QSL via HC1JQ.

JAPAN, JA. Special event station 8J6OKAJO is QRV until December 31 to commemorate the 400th anniversary of Oka Province Castle Town in the prefecture Oita on Kyushu, IOTA AS-077. QSL via bureau.

PAPUA NEW GUINEA, P2. Drew, K9QV is QRV as P29VAC from Port Moresby. Activity of late has been on 20 meters. His length of stay is unknown. QSL to home call.

BRAZIL, PY. Special event station PS1J will be QRV from July 15 to 20 during the 5th National Scout Jamboree being held in Rio de Janeiro. Activity will be on all contest bands with multiple stations near the usual scouting frequencies. QSL via PY1AA.

CANADA, VE. Members of the Hamilton Amateur Radio Club and the 1812 Special Committee will be QRV as special event station XM31812 from July 13 to 15 to commemorate the Bicentennial of the War of 1812. QSL via VE3ATX.

VENEZUELA, YV. Members of the DX Group Caracas are QRV as YW5B from La Blanquilla Island, IOTA SA-037, until July 16. Activity is on 160 to 2 meters using CW, SSB, FM and various digital modes. QSL via DM4TI.

OPERATIONS APPROVED FOR DXCC CREDIT. The following operations are approved for DXCC credit: Rwanda, 9X0PY, operation for December 24, 2011 through January 7, 2012; Bangladesh, operations for 1994 and 1995, 1998 and 1999. If you had any of these operations rejected in a recent submission, please send an email to bmoore@... to be put on a list for an update.

THIS WEEKEND ON THE RADIO. The IARU HF World Championship, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, FISTS Summer CW Sprint and and the CQC Great Colorado CW Gold Rush will certainly keep contesters busy this upcoming weekend. The Run for the Bacon QRP CW Contest is scheduled for July 16. Please see July QST, page 77 and the ARRL and WA7BNM Contest Websites for details.

OM Jimmy YB7KNV,

Sy nggak bisa buka unggahan anda yg di FB, jd sy buka dari yg diunggah ke YBDXC_News@yahoogroups.com.

Yg saya temukan cuma sampai halaman 40 (tentang PEMBERIAN HAK DAN KUASA KEPADA PENGURUS ORARI PUSAT).

Pertanyaan sy: apa ini sudah semua (terunggahkan)? Kalau ya, dimana saya bisa mendapatkan Hasil Kptsn RAKERNAS I-nya?

Kalau memang sudah ada, tolong anda langsung japrikan saja, tks ..

73,

[bam]

Subject: [YBDXC_News] HIMPUNAN KEPUTUSAN DAN KETETAPAN MUNASSUS ORARI THN 2012

OM Jimmy YB7KNV,

Sy nggak bisa buka unggahan anda yg di FB, jd sy buka dari yg diunggah ke YBDXC_News@yahoogroups.com.
Yg saya temukan cuma sampai halaman 40 (tentangPEMBERIAN HAK DAN KUASAKEPADA PENGURUS ORARI PUSAT).
Pertanyaan sy: apa ini sudah semua (terunggahkan)? Kalau ya, dimana saya bisa mendapatkan Hasil Kptsn RAKERNAS I-nya?

Kalau memang sudah ada, tolong anda langsung japrikan saja, tks ..

73,
[bam]

Oh..., saya pernah lihat tower2 itu ketika ke padalarang - sempat bertanya dalam hati : "station siapakah ini ?".
Hebat rencananya untuk ajang latih diri/uji ketrampilan rekan2, semoga sukses seperti yg diharapkan, tapi sayang saya belum berkesempatan saat ini.

Semoga next time saya punya kesempatan yg baik utk ikutan - paling tidak nengok rekan2 berkontes ria.

(e) eQSL (d) direct only (B) Bureau only (L) LoTW

Complete details and rules on the "IARU HF World Championship" are available at: http://www.arrl.org/iaru-hf-championship
ADDED NOTE: Special multipliers are given out for working IARU regional officials such as AC, R1, R2 and R3, plus country headquarters stations.

LATE/LAST MINUTE DX UPDATES AND PRESS RELEASE

AT1/VU2, INDIA. Members of the ARSI (Amateur Radio Society of India) will be active as AT1HQ, the HQ callsign of the ARSI, for the IARU HF World Championship (July 14-15th) Contest this weekend on all bands. This will be run by multipler stations across India running the same callsign. The stations and operators making this possible include Aravind/

VU2ABS, Kumar/VU2BGS, Nand/VU2NKS, Pai/VU2PAI, Prasad/VU2PTT, Chandra/
VU2RCT, Ganesh/VU2TS, Raman/VU3DJQ, Deepak/VU2CDP and Mur/VU2MTT. QSL
via VU2PTT. ADDED NOTE: Also, look for Gopal, VU2GMN, on SSB to be
giving out the R3 multiplier as the IARU Region 3 Director.

9A22, CROATIA (WFF Op!). Members of Radio Clubs "Karlovac" (Karlovac),
"Duga Resa" (Duga Resa) and "Croatian Flora Fauna" (Zagreb) are expected
to activate the Special Forest Reserve "Javornik - Tisov vrh" (9AFF-061),
on July 14th, located within a mined area of Plješevica mountain. They
used the special callsign 9A22MINE, remembering that some areas in Croatia
have remained affected by landmines for 22 years. QSL via 9A1MB. All
other details are available on QRZ.com.

HL0, SOUTH KOREA. Operators Aves/DS2AGH, Sungki/HL1IWD, Harry/WX8C and
Jussi-Pekka/OH6RX will be active as HL0HQ from the KARL HQ club station
in Seoul during the IARU HF World Championship (July 14-15th). QSL via
DS2AGH direct or by the Bureau.

LR5/LR7, ARGENTINA. Members of the Radio Club Argentino (LU4AA) will be
active during the IARU HF World Championship (July 14-15th), giving the
multiplier RCA. Look for the following stations to be on the air:
  LR5H - 80/15m SSB and 40m/CW; Operators LU2NI, LU3HY, LU5DX, LU5HM,
         LW5HR, LU7HE and LU8ADX
  LR7D - 20m/SSB; Operators LU1DK, LU4DX and LU7DR
  LR5F - 20m/CW; Operator LU5FF
  LR7H - 160/10m/CW and 160m/SSB; Operator LU7HF and LU7HN
  LR7F - 40/10m/SSB, 80/15m/CW; Operators LU4FPZ, LU3FMD, LU6FEC,
         LU9FEL, LU7FTS and LU6FN
QSL via the Bureau or direct to LU4AA.

OH0, ALAND ISLAND (OH0HQ - FINNISH IARU HQ STATION): Martti, OH2BH,
reports the following [edited]:
"In a departure from the traditional HQ pattern in Finland, the
Finnish Amateur Radio League (SRAL), Contest Club Finland (CCF) and
Radio Sporting Team (OH0Z) are organizing the activation of HQ station
from the western Aland Islands at the OH0Z contest site (JP90xi).
  The team will put a minimum of five (5) stations on the air,
challenging the midnight sun of the Finnish Summer which never sets.
  Now you have an excellent opportunity to work The Finnish HQ station
from Aland Island (IOTA-002).
  The operator roster is as follows: Bob/K3EST (guest) together with
Juha/OH1JT, Pekka/OH2TA, Tomi/OH6EI, Martti/OH2BH, Kari/OH2XX, Juha/
OH6XX, Harry/OH6VM and Timo/OG9X.
  QSL cards via bureau or SRAL, P.O.Box 44, 00441, Helsinki, Finland

  In the same IARU HF World Championship Contest OH2UA and OH6KZP will
be running multi-single as OH0X from Brando, eastern Aland Islands.
QSL via OH2TA."

TC50, TURKEY. This year the TRAC Radio and Community of Radio Amateurs
will participate in IARU HF World Championship (July 14-15th) using the
special callsign TC50HQ. Activity will be on all six bands and both modes.

14 July 2012 A.R.I. DX Bulletin

No 1106

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

9A - Members of Radio Clubs Karlovac, Duga Resa and Croatian Flora Fauna will be active as 9A22MINE from special nature reserve "Javornik-Tisov Vrh" on 14 July. QSL via 9A1MB. Further information can be found at qrz.com. [TNX 9A6AA]

9M2 - Look Alex, 9M2/SQ9UM to be active on 40-6 metres CW, SSB and RTTY on 13-15 July, IARU HF World Championship included. QSL via home call. [TNX SQ9UM]

CT7 - Special event station CQ73I will be active on 16-22 July for the 31st International Motorcycle Rally in Faro, Portugal. Expect activity on 80-6 metres SSB, CW and RTTY. QSL via CT1EHX. [TNX CT1END]

CY9 - The final list of operators for the CY9M DXpedition to St Paul Island (NA-094) includes Bill N2WB, Bjorn SM0MDG, Christian EA3NT, Col MM0NDX, George EA2TA, Kevin VE3EN, Mike AB5EB, Simon IZ7ATN, Steve VA3FM and Victoria SV2KBS. They will have six transceivers, four amplifiers and a wide range of antennas, and will be QRV on 160-6 metres SSB, CW and digital modes from 26 July through 1 August. QSL via M0URX, direct or bureau (preferably through his OQRS). The logs will be uploaded to LoTW "at the earliest opportunity". Further information, including logserach and details on how to contribute, can be found at www.cy9m.com [TNX MM0NDX]

DU - Bodo, DF8DX will be active as BW/DF8DX from Taiwan (AS-020) on 22-25 July and as DU8/DF8DX from Mindanao Island (OC-130) from 26 July to 10 August, IOTA Contest included. Side trips to other IOTA groups in the Philippines are being considered. QSL via DF8DX, direct or bureau, and LoTW. [TNX rsgbiota.org]

EA - Celebrating the win in the 14th UEFA European Football Championship, amateur radio stations from Spain may use special prefixes until 31 July. EA stations may use AO, EB stations may use AM and EC stations may use AN.

EA6 - Look for EA6/IW2NEF to be active from the Balearic Islands (EU-004) on 16-27 July. He will be QRV on the HF bands, as well as on 6 and 2 metres. QSL via home call, bureau preferred. [TNX NG3K]

FJ - Ludovic, HB9EOU and Andre, HB9CVC will be active as TO2D from St. Barthelemy (NA-146) from 22 July to 4 August. They will operate SSB and RTTY on 40-6 metres. QSL via HB9EOU. Further information

can be found at http://st-barth.hb9eme.ch/

FO/A - Philippe, FO4BM is planning an holiday style operation as TX0HF from the Austral Islands. Target islands are Tubuai (OC-152) and Rurutu (OC-050), with expected activity on 20 metres SSB with 100 watts and a dipole. F5UKW says that the dates given at qrz.com (until 21 July for OC-152 and 21-23 July for OC-050) are not confirmed, and that the operation is delayed "until Philippe can get an airplane". QSL via F4FJH, direct only. [TNX DX World]

FP - Yuri, VE3DZ and Victor, VA2WA (VA2WDQ) will be active as FP/VE3DZ and FP/VA2WA from St. Pierre et Miquelon (NA-032) on 20-31 July. They will operate CW, SSB and RTTY on 160-6 metres with two stations, and will participate in the CQ WW VHF and RSGB IOTA Contests as TO2U. An OQRS for bureau and direct cards will be available after the expedition. Further information and logs search can be found at www.to2u.contestgroupduquebec.com [TNX DX World]

GW - Special event callsign 2O12W (Two Oscar One Two Whiskey) will be activated between 21 July and 9 September on all bands and modes from Barry, Wales to celebrate the London 2012 Olympic and Paralympic Games. Further information at www.2O12W.com. QSL via GW1FKY.

H4 - Vadym, UT6UD is active as H44UD from New Georgia Island (OC-149) until 17 July. If conditions permit, he might also visit and be QRV from OC-047 and OC-158 (17-21 July). QSL via home call, direct or bureau.

HC - Rick, NE8Z will be active again from Ecuador on 21-31 July. He be QRV on 40-10 metres as HC1MD from Cumbaya (CW and RTTY), HC1MD/HC1 from Mount Cayambe (CW), HC1MD/HC3 from Loja (CW) and HC1MD/HC5 from Cuenca (CW). QSL via K8LJG. [TNX NE8Z]

I - Representing the Associazione Radioamatori Italiani (ARI), the following stations will participate in the IARU HF World Championship: IO0HQ (160 CW), IO1HQ (80 CW, 40 CW and 20 SSB), IO2HQ (20 CW), IO4HQ (160 SSB and 80 SSB), IO5HQ (40 SSB), IO8HQ (15 SSB) and IO9HQ (15 CW, 10 CW and 10 SSB).

I - Antonio, IZ1NES will be active as IA5/IZ1NES from Isola d'Elba (EU-028) on 15-22 July. QSL via home call, direct or bureau. [TNX rsgbiota.org]

SM - Kjell, SM4DDS, will be active as 7S5A from Boko Island (EU-177) on 14-19 July. He will be QRV on 80-10 metres CW and SSB. QSL via home call, direct or bureau, and LoTW. [TNX SM4DDS]

T8 - Shuji, JA1FMN will be active as T88FK from Babeldaob Island, Palau (OC-009) on 17-19 July. He plans to be QRV on 17 and 15 metres PSK31 and SSB, with some 6m SSB and 29MHz FM if the propagation is good. He plans to be QRV after 18 local time. QSL via home call, direct or bureau.

UA - Victor, UA1OEJ will be active as UA1OEJ/p from the Solovetskiye Islands (EU-066) on 22-31 July. He will operate SSB and digital modes. QSL via home call, direct or bureau; log search at http://ra1ohx.ru. [TNX qrz.ru]

VP2M - Bob, W5UQ (VP2MUQ) and Bill, W5SJ (VP2MSJ) will be active holiday

style from Montserrat (NA-103) on 17-24 July. They plan to focus on 30, 17 and 12 metres CW, with some RTTY. QSL for both calls via W5JAY. [TNX The Daily DX]

VP9 - Kyle, VP9/WA4PGM will be on honeymoon in Bermuda on 13-22 July. He will be QRV as time permits during the IARU, CQ VHF and NAQP RTTY contests, and will also looking for contacts on 6 metres. QSL VP9/WA4PGM direct to home call; cards for contacts made when he uses VP9I go via N1HRA (direct and bureau). [TNX WA4PGM]

YB - A team of nine operators (YB3MM, YB8XM, YB9BU, YB9BZ, YB9GV, YB9KA, YC0OIL, YC9HIU and YC9MKF) will participate in the IOTA Contest as YB9IOTA from Trawangan Island (OC-150). QSL via YB9BU. They have a website at www.mdxc.org/yb9iota/

ZL9 - The new dates for the ZL9HR DXpedition to Campbell Island (OC-037) [425DXN 1093] are from 28 November to 9 December. Team members are VK2IR, VK3YP, W2LK, K5GS, K3EL, KE4KY, ZL3CW, HA5AO, VE7DS and 9M6XRO. QSL via EB7DX and LoTW. Further information, including band/mode survey, operating frequencies, log search and details on how contribute, can be found at www.zl9hr.com. [TNX VK3YP

IARU HF WORLD CHAMPIONSHIP ---> The objective of the contest is to contact as many other amateurs, especially IARU member society HQ stations, around the world as possible using the 160, 80, 40, 20, 15 and 10m bands. This year's event (rules can be found at www.arrl.org/iaru-hf-championship) will run from 12 UTC on 14 July until 12 UTC on the 15th. The following IARU Member Society HQ stations are expected to participate:

Call	DXCC	Mult
6D0LM	Mexico	FMRE
8N1HQ	Japan	JARL
8N2HQ	Japan	JARL
8N3HQ	Japan	JARL
8N4HQ	Japan	JARL

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

425 DX NEWS MAGAZINE ---> The June 2012 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

ANTARCTICA AWARD ---> The new website for the Antarctica Award, sponsored by the Mediterraneo DX Club, is now up and running at www.mdxc.org/awardantarctica/

CLUB LOG'S OQRS ---> Club Log's OQRS (the Online QSL Request System for bureau and direct cards) is now available to all users, not just expeditions. Detailed instructions for enabling it can be found at www.clublog.org/docs/x/E4Bk.

DXCC NEWS ---> 9X0PY (Rwanda, 24 December 2011-7 January 2012) and S21YD (Bangladesh, 1994-95 and 1998-99) have been approved for DXCC credit. If you had any of these cards rejected, please send an e-mail to bmoore[@]arrl.org to be put on the list for an update (please include the Reference number in the upper right hand portion of your credit slip to help expedite retrieval). [TNX NC1L]

LONDON OLYMPIC GAMES SPECIAL PREFIXES ---> Subject to prior authorisation, individual amateur radio operators and Club stations in the United Kingdom may use special prefixes from 21 July to 9 September to celebrate the London 2012 Olympics and Paralympic Games. The second letter in the existing call sign (D, I, J, M, U, W, etc, plus E for Intermediate licences) may be replaced by the letter "O"; where no second letter exists, the letter "O" may be added. For instance, GD0XXX (Isle of Man), GI0XXX (Northern Ireland), GJ0XXX (Jersey), GM0XXX (Scotland), GU0XXX (Guernsey), GW0XXX (Wales) and G0XXX (England) may all be amended to GO0XXX. Furthermore, calls in the series GB2012 will be available for Special Event Stations relating to the Olympics; licences will also be issued for "flagship" stations using the prefix 2O12 (Two Oscar Twelve) + 1 letter relating to the location of the station (e.g. 2O12L for London and 2O12W for Wales).

MALPELO 2012---> "If you worked HK1MW, HK1N, HK1T or HK6F in January 2012 then you really worked Malpelo. These four men were the advance team setting up the gear for the HK0NA DXpedition. During that time, they operated using their home calls without using a portable identifier. These QSOs count for Malpelo. Special photo QSLs have been printed and are now available via N2OO", one of four ways: OQRS direct or bureau (http://df3cb.com/oqrs/n2oo/), traditional direct (Bob Schenck, P.O. Box 345, Tuckerton NJ 08087-0345, USA) or traditional bureau. [TNX N2OO]

NORTH KOREA ---> On 9 July Rick, K6VVA released an update "which should address some of the assumptions, speculations and inaccurate guessing I've seen posted various places". The update is a supplement to the initial "P5

CW Only & IOTA AS-197 Project" general information [425DXN 1105], and can be found as a .pdf document on http://www.k6vva.com/p5/p5infoupdates.html [TNX K6VVA]

QSL HG2011 ---> All of the contacts made last year with HG2011 special event stations were confirmed automatically via the bureau about four months ago, Tibi, HA1DAE says. "We don't collect QSL cards", he adds, so please refrain from sending yours. SWLs are can send their QSL request by e-mail (ha1dae[@]t-online.hu).

V84SMD ---> A most wanted survey for bands and modes is now up and running on the 11-23 November DXpedition website: www.mdxc.org/v84smd/brunei-survey/ [TNX IZ8CCW]

WHQS AWARD ---> Once again "MK QTC", the Polish Radio Amateurs' Journal, sponsors the W-HQ-S award for working as many HQ stations as possible (at least 10) during the upcoming IARU HF World Championship. For complete details please visit http://suchacz.eu/viewpage.php?page_id=4 or e-mail qtc[@]post.pl [TNX SP2FAP]

WORLD LAKES AWARD ---> Details on the World Lakes Award can be found at http://worldlakes.info [TNX EA5OL]

WRTC2014 RULES AND STATION TESTS ---> The official competition rules for the 2014 World Radiosport Team Championship have been published (www.wrtc2014.org/contest/wrtc-rules). Thanks to everyone who provided feedback during the rules review process," said Andy Blank, N2NT, Director of the WRTC2014 Rules Committee. "We wanted to release the rules prior to the 2012 IARU Championship so that potential competitors and the WRTC test stations would have the opportunity in 2012 and 2013 to practice under the rules". WRTC2014 will be a Two-Operator Two-Transmitter competition, where both stations will be permitted to transmit at any time.
Station tests will be conducted during this weekends' IARU HF World Championship. Thirteen stations ((K1GQ, K1RQ, K1ZD, N2KW, N9NB, NI1L, W1HH, W1MA, W1MJ, W1SJ, W1UE, W1UJ and WB1Z) will be set up in the WRTC competition configuration using sites planned for 2014. The test stations will be active on 10-80 metres CW and SSB, and many of them will be operating according to the WRTC competition rules. "One mission of the station test is to confirm that all sites are relatively equal," said Tom Frenaye, K1KI, Director of the Site Acquisition and Testing Committee. "As you hear or work the test stations, please make a note of their signals in comparison to the other WRTC test stations". Signal reports and other feedback should be sent to info[@]wrtc2014.org. Awards will be offered for working the WRTC test stations, details can be found at www.wrtc2014.org/wrtc2014-station-test-in-iaru-hf-championship/

3070. ARLP028 Propagation

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-14 02:04:25 UTC
From: Yb land Dx club
Topic: 3070 Message: 3070

SB PROP @ ARL $ARLP028
ARLP028 Propagation de K7RA

ZCZC AP29
QST de W1AW
Propagation Forecast Bulletin 28 ARLP028
From Tad Cook, K7RA
Seattle, WA July 13, 2012
To all radio amateurs

SB PROP ARL ARLP028
ARLP028 Propagation de K7RA

Solar activity rose moderately this week. Average daily sunspot numbers were up nearly 3 points to 120.9, and average daily solar flux rose over 28 points to 166.8. There was quite a bit of geomagnetic activity, the most happening on July 9, when the mid-latitude A index reached 29, planetary A index was 30, and Alaska's college A index was 60. That day I stopped in to visit K7SS on my way back from a trip to Oregon, and a check of the bands showed HF conditions were quite difficult.

Sunspot group 1520 was directly facing Earth on July 12 at 1653 UTC when it spewed out an X.14 class solar flare. We've seen flares off to one side or another that had limited effect, but this one was aimed straight at us. There was an immediate SID (Sudden Ionospheric Disturbance) event, and the resulting CME should reach Earth some time around 1020 UTC Saturday, July 14. This could be bad news for operators in the IARU HF World Championship and other operating events this weekend. The accuracy of the 1020 UTC impact estimate is plus or minus 7 hours. The 24-hour contest begins at 1200 UTC Saturday. See http://www.arrl.org/iaru-hf-championship/ for details.

The latest prediction shows planetary A index at 8, 18 and 15 on July 13-15, then 5 on July 16-26, then 20 on July 27-29, 10 on July 30-31, 15 on August 1-2, 10 on August 3-4, 8 on August 5, and 5 on August 6-22.

Predicted solar flux is 165 on July 13-15, then 160, 145, 130, and 120, on July 16-19, 105 on July 20-21, then 115, 120, 130, 140, 145 and 150 on July 22-27, and 165 on July 28 through August 2, 160 on August 3-4, then 165, 155, and 150 on August 5-7, and 145 on August 8-10.

If you check http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html and compare the July 11 and July 12 predictions, you can see a big

difference between the forecast in this bulletin (July 12) and the one presented in this week's ARRL Letter, based on the July 11 projection.

Over the past week, four new sunspot groups appeared. On July 7, group 1520 was new and on July 8, older group 1517 (visible since July 1) disappeared. On July 9 group 1513 (visible since June 26) was gone and 1521 was new. On July 10, group 1515 (visible since June 27) disappeared, and on July 11 group 1518 (around since July 4) was gone. On June 12, two new groups, 1522 and 1523 appeared.

Petr Kolman, OK1MGW, again provides us with the Czech Propagation Interest Group geomagnetic activity forecast. Expect unsettled to active conditions on July 13-15, mostly quiet July 16-18, quiet to unsettled July 19-21.

You can follow progress of any geomagnetic disturbance this weekend by checking http://spaceweather.com/ and http://www.spaceweatherlive.com/en. Note the last site is available in Dutch, French and German by selecting your language of choice in the drop-down on upper right.

We received even more email about the old BC-458 SSB conversion, including some corrections to the correction in the last bulletin. We won't cover the subject any longer in this bulletin, but the original March 1956 QST article by W2EWL is a treat to look at. If you are an ARRL member, you can find it in the QST archive by logging into your account at http://www.arrl.org/ and then going to http://www.arrl.org/arrl-periodicals-archive-search. Just enter "W2EWL" in the Author Call field, and March 1956 for the month and year. There you can download a 1.6 MB pdf of the article.

Walt Knodle, W7VS of Bend, Oregon sent along an article titled "MRI of the Sun's Interior Motions Challenges Existing Explanations for Sunspots". Read it at http://www.sciencedaily.com/releases/2012/07/120709092457.htm.

You can read articles about the most recent solar flare at http://www.livescience.com/21573-major-solar-flare-erupts-giant-sunspot.html and http://www.space.com/16557-giant-sunspot-ar1520-solar-flares.html.

Jon Jones, N0JK sent a message about the big recent 6 meter opening and notes it was June 29, not June 30. He says, "In Kansas, we were at the edge of it. N0LL worked MM0AMW at 1219 UTC followed by LA7HJA at 1545 UTC. I logged JW7QIA at 1642 UTC. I was running 100 w and a 2 element Yagi portable for the contact with Peter. He was using a stack of two 5 el Yagis. I heard him for about 5 minutes. The VE4SPT/b EO26 was 599 at the same time."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 5 through 11 were 122, 131, 127, 113, 137, 122, and 94, with a mean of 120.9. 10.7 cm flux was 164.6, 157.7, 158.4, 177.7, 173.8, 173.4 and 161.7, with a mean of 166.8. Estimated planetary A indices were 14, 16, 8, 13 30, 13, and 10, with a mean of 14.9. Estimated mid-latitude A indices were 13, 14, 8, 15, 29, 15, and 10, with a mean of 14.9.

3071. HQ in IARU Contest

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-14 02:06:50 UTC
From: budi santoso
Topic: 3071 Message: 3071

Dear All,

4.3. IARU Member Society HQ Station
4.3.1. May have only one transmitted signal per band mode (160 CW, 160 Phone, 80 CW, 80 Phone, 40 CW, 40 Phone, 20 CW, 20 Phone, 15 CW, 15 Phone, 10 CW, 10 Phone) at the same time.
4.3.2. All stations involved in an HQ operation must be in a single ITU zone.
4.3.3. Only one HQ station callsign per member society per frequency band is permitted.
4.3.4. All operators must observe the amateur radio regulations of their country at all times.

Halo rekan2 amatir radio,
Saya baru saja mendengar berita bahwa OM Hasan Koesoema (YB0AH) salah satu
OT dan perintis ORARI
meninggal dunia di Surabaya. Semoga arwahnya diterima oleh Tuhan YME dan
keluarganya diberi kekuatan.

Salam,
steve, w2fb

Subject: [YBDXC_News] HQ in IARU Contest

Dear All,

4.3. IARU Member Society HQ Station

4.3.1. May have only one transmitted signal per band mode (160 CW, 160 Phone, 80 CW, 80 Phone, 40 CW, 40 Phone, 20 CW, 20 Phone, 15 CW, 15 Phone, 10 CW, 10 Phone) at the

same time.

4.3.2. All stations involved in an HQ operation must be in a single ITU zone.

4.3.3. Only one HQ station callsign per member society per frequency band is permitted.

4.3.4. All operators must observe the amateur radio regulations of their country at all times.

July 16, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q & W1AW, N2OO, WA2HMM, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, WA4PGN, KH6BZF, K8GI, K8YSE, NE8Z, W8BBQ, W8GEX & 60m News, K9QV, W9ILY, 4J5T, 9A6AA, 9K2HN, 9M6XRO, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, IZ1JLF, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, RV3YR, Sixitalia Weekly, V84SMD team, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-July, through Sunday, 15th-July there were 216 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, H40, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J5, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

There were 37 CQ Zones available during the past week.
CQ Zones that were not active are: 2,3,4

There were 51 ITU Zones available during the past week.
ITU Zones that were not active are: 3,4,7,8,13,15,21,22,23,24,25,26,31, 34,35,43,58,59,68,69,70,71,72,74,90

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
  more likely a "BUSTED CALLSIGN". As always, you never know - "Work

First Worry Later" (WFWL).

3D2, CONWAY REEF (Update). Members of the World-Wide DX Group will be active as 3D2C from Conway Reef between September 24th and October 5th. Their primary objective is to provide as many DXers as possible with a "new one" with this rare DXCC entity and, as a secondary objective, to give as many band-slots as possible. They would like to focus on European contacts which is the most difficult area to work especially during those periods when propagation is possible, so they ask that JA and North America to stand-buy during those periods. Activity will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. See OPDX.1045 for suggested frequencies. Currently, the Multi-national team consists of 15 operators: Hrane/YT1AD (Leader), Alex/UA4HOX (Co-Leader), Paul/N6PSE (PR & Co-Leader), Dave/AH6HY, David/WD5COV, Vasily/RW4NW, Alan/K6SRZ (Team Physician), Alan/AD6E, Sergej/RZ3FW, Craig/K9CT, Stanislav/LZ1CG, George/N6NKT, Alexander/RW3RN, Peter/PY5CC and Mike/K6MKF. QSL Manager is YT1AD. There will be an OQRS available for direct and Bureau QSL cards. They expect to upload their logs to ClubLog on a daily basis. PLEASE NOTE: They are seeking support from Foundations, Clubs and individuals for this DXpedition. Details are available at:
http://www.yt1ad.info/3d2c/donors.html
For more details and updates, visit the 3D2C Web page at:
http://www.yt1ad.info/3d2c/index.html

CQ73, PORTUGAL. Operators José/CT1EHX, Tó-Zé/CT1GFK, Gonçalo (AL)/CT1GPQ, Miguel (Mike)/CT1IUA, Anderson/CT2IUK, Lili/CT2KAL and Pedro/CR7ABW, will be active as CQ73I (Charlie Quebec Seven Three India) between July 16-22th. Activity is to commemorate the 31st International Motorbike Faro. Look for operations on 80/40/30/20/17/15/12/10/6 meters using CW, SSB, and RTTY. QSL via CT1EHX.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
9X0PY – Rwanda; Operation for: December 24, 2011 through January 7, 2012
S21YD – Bangladesh; Operations for: 1994, 1995, 1998, and 1999

If you've had any of these operations rejected please send an E-mail to bmoore@... to be put on the list for an update. (When responding please include the Reference number on your credit slip to help expedite retrieval. (This number can be found in the upper right hand portion)).
PLEASE Note. Bill states,"Due to heavy E-mail, I may not be able to reply all messages. Please see your LoTW account to confirm the update or, check your numbers on the daily listing at:
http://www.arrl.org/dxcc-standings "

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2011 - MU/PA9M Guernsey: http://www.youtube.com/watch?v=o5qNOwB7xZg
2011 - 4W6A Atauro Island (Timor Leste) DXpedition:
http://www.youtube.com/watch?v=_SC8o__1x7o

http://www.youtube.com/watch?v=2sIHDCZiwG8
http://www.youtube.com/watch?v=oX7mtztXsuY
http://www.youtube.com/watch?v=xhhlX1rwA1k
2009 - K5N Dxpediiton to Rare Grid EL58:
http://www.youtube.com/watch?v=FLgdlAZXPfc (Part 1)
http://www.youtube.com/watch?v=fZAt6RrQEjc (Part 2)
http://www.youtube.com/watch?v=52v2qgzH9Nw (Part 3)

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

HC, ECUADOR. Dr. Rick, NE8Z/HC1MD, will once again be active from here between July 21-31st. He plans to activate the following areas with the following callsigns:

HC1MD - Cumbaya (CW + RTTY) HC1MD/HC3 - Loja (CW)
HC1MD/HC1 - Mt. Cayambe (CW) HC1MD/HC5 - Cuenca (CW)

Activity will be on 40-10 meters operating CW, SSB and RTTY, using a TS-50s/AT-50 with a Carolina Windom (40-10m) antenna from Cumbaya. From all other areas he will operate portable using a OutBacker (40-10m) antenna. QSL via K8LJG. View the HC/Ecuador and HC8/Galapagos DX-Diplomas at: http://webpages.charter.net/ne8z

IOTA NEWS.....

AS-137. Members of the Shanghai DX Club will be active as BY4DX/5 from Shengsi Island between July 27-29th. Activity will include an entry in the RSGB IOTA Contest (July 28-29th). Operators mentioned are Xuhui/BD4CQ, Zhang/BD4DYH, Ming/BD4FM, Tony/BG4GMA, Siqing/BG4HRM, Colin/BH4ACQ and Feng/ON6WFO. QSL via BD4HF, by the Bureau or direct.

AS-147. Taka, JA8COE, will once again be active as homecall/8 from Yagishiri Island (WFF JAFF-034 WLOTA 2512) between July 27-29th. Activity will include the RSGB IOTA Contest (July 28-29th). QSL via his home callsign, direct or by the Bureau.

AS-190. (New IOTA) A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB possibly between October 1-15th. Operators mentioned are Abdul/7Z1CQ, Suli/7Z1SJ, Abdullah/HZ1AR, Bader/HZ1BF, Abdullah/HZ1BW, Abdul/HZ1DG, Firas/HZ1FS, Hani/HZ1HN, Mohamad/HZ1MD and Nhaw/HZ1TL. More details and a Web page will be forthcoming. See their logo on QRZ.com.

EU-034. Operators Andres/ES1AN, Harald/ES1LS, Arvo/ES1QV, Toivo/ES2DJ, Juri/ES2EZ, Toivo/ES2RR and Mati/ES2QN will be active as ES0U from Saaremaa Island, Estonia, during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Low-Power entry. QSL via ES2DJ or by the Bureau.

EU-045. Alessio, IZ0UIM, will be once again active as IB0/IZ0IUM from Ventotene Island (IIA LT-011) between July 18-22nd. He will also possibly be active from Santo Stefano Island (also EU-045,

IIA LT-010) during his time there. Activity will be on 80-10 meters SSB only using a FT-1000 w/100 watts into a multi-band dipole. QSL via direct, LoTW or eQSL. Alessio will also upload his log to ClubLog during his DXpedition.

EU-066. Victor, UA1OEJ, will be active as UA1OEJ/P from Solovetsky Islands between July 22-31th. Activity will be on the HF bands using SSB and the Digital modes. QSL via his home callsign.

EU-083. Look for 19 members of the ARI La Spezia, lead by Jul/I1SAF, to be active as IP1T from Isola del Tino (IFF IFF-218, IIA SP-002, MIA MI-114, ITA ITA-058, WLOTA 0645) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/1-Stn/Low-Power entry. Opertaors mentioned are I1SAF, I1ANP, I1HBY, IZ1CLA, IZ1BZV, IZ1JOE, IZ1MHY, IZ1MHX, IW1PDP, IZ1NES, IZ1OSS, IZ1ELP, IK8XVA, IZ1JUP, IZ1REW, IZ1RWC, IZ1MHL, IZ1TRG, IZ1MHQ and IZ5JLF (ex- IZ1JLF). Activity will be on 80-10 meters using low power, with antennas: Windom (80-10m) and a vertical 1/4 wave on 40 meters. QSL via IZ5JLF, direct or by the Bureau (preferred).

EU-093. Spanish operators from the Asociación Cultural Radioaficionados Costa Blanca, URE Dos Hermanas and Adriatic DX Team will be active as ED5K from Tabarca Island (ARLHS SPA-136, DIE E-006) during the RSGB IOTA Contest (July 28-29th). Outside the contest operators will use ED5RKB. Activity will be on 160-2 meters using CW, SSB, RTTY and PSK31 with three stations on the air. During the contest operators will be on the air on the non-contest bands. Operators menitoned are Juanjo/EA1EN, Israel/EA1HVY, Juan Carlos/EA2RC, Antonio/EA2VE, Tony/EA5CRC, Fernando/EA5FX, Juan/EA5FHK, Tony/EA5HJO, Eugene/EA5HPX/UT2XD, Ivan/EA5IDH, Javi/EA5KM, Paco/EA7HHV, Antonio/EA7IQM, Luis-Enrique/EB5ESV, Mario/EB5BXK, Manolo/EB7ABJ, Alfonso/EC7AKV, Antonio/EC7JA, and for Logistics Josemi/EA5EEO. QSL via EA5RKB, direct or by the Bureau. Vist their Web page at:

http://acracb.org/tabarca

EU-136. Jozef, OM5AW, will be active as 9A/OM5AW from Krk Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/ SSB-Mode/Assisted/Low-Power/12HRS entry. QSL via OM2FY.

EU-144. Members of the Italian Sezione ARI of Cosenza will be active as ID8/IQ8CS from Dino Island (IIA CS-002) during the upcoming RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. Operators mentioned are Franco/IK8FKP, Francesco/IZ8EQF, Massimo/IZ8JBO, Costantino/IZ8EPX, Antonio/IK8UHA, Marco/IW8RMN, Antonio/ IW8PPZ, Emilio/I8SUE, Massimiliano/IZ8EPY, Pietro/IZ8FWN, Antonio/IW8ROL, Peppe/IZ8EBI, Renato/IZ8JCV, Pasquale/ IZ8IYX, Francesco/IZ8JFA, Gianluigi/IZ8EWB and Rocco/IK8ERL. QSL via the Bureau. Visit the club's Web page at:

EU-146. Operators Louis/PA0LCE, Arsene/ON4FE, Lieven/ON4PQ, Kurt/ON5UT, Joel/ON6JM, Eddy/ON7PO, Pat/ON7PQ and Walter/ON8LW will be active as PF4C from Schouwen Duiveland, Netherlands, during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/All-Band/ Low-Power/Mixed-Mode entry. QSL via ON4ON.

EU-172. Joergen, OZ0J, will be active as 5Q2T from Fyn Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/ 24-Hrs/Mixed-Mode entry. QSL via OZ0J.

EU-179. Members of the Beer Lovers International Radio Club, the Dnepropetrovsk Radio Club and Tavria Radio Club will be active from the Kalanchakskiye Islands between July 24-30th. The group plans to operate on CW, SSB and RTTY, and use the callsign UT7E/p during the RSGB IOTA Contest (July 28-29th). QSL UT7E/p via UT7EZZ, and all others via their home callsigns.

NA-128. Operators Robin/VE2DRO, Claude/VE2ZOS, Rock/VE2TCQ and Jean-Pierre/VA2SG will be active as VE2DRO from Coudres Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/ Mixed-Mode entry. Activity will be on 40/20/15/10 meters using CW and SSB. QSL via VE2DRO (SASE). Look for them on APRS: VE2DRO-7 and VA2SG-7.

OC-130. Bodo, DF8DX, will be active as DU8/DF8DX from Mindanao Island (WLOTA 2803) between July 26th and August 10th. Activity will also include an entry in the RSGB IOTA Contest (July 28-29th). If time permits, Bodo will activate other IOTAs in DU after the contest. QSL via DF8DX, direct or by the Bureau. Log will be uploaded to LoTW.

OC-150. Members of the Organisasi Amatir Radio Indonesia (ORARI) will be active as YB9IOTA from Gili Trawangan Island in the Nusa Tenggara Barat Province during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. Operators mentioned are Bimbo/ YB3MM, Joppy/YB8XM, Kadek/YB9BU, Tjok/YB9BZ, Adi/YB9GV, Kardi/ YB9KA, Adhianto/YC0OIL, Santika/YC9HIU and Ferdiy/YC9MKF. QSL via YB9BU direct only.

SA-037. POSTPONED! Members of the Grupo DX Caracas, who were expected to activate La Blanquilla Island between July 11-16th, this past week, have announced that their operation was postponed until August (dates to be announced). There was no reason given for postponement.

J6, ST. LUCIA. Bill, K9HZ, will once again be active as J68HZ from his villa at Labrelotte Bay, Castries, St. Lucia (NA-108, WLOTA L-1336) between August 1-18th. Activity is usually on 80/40/20 meters using CW and SSB. Suggested frequencies are:

CW - 3550, 7050 and 14050 kHz

SSB - 3770, 7155 and 14155 kHz
He also suggests to watch 40 or 20 meters between 1600-2400z daily. Bill will also be using his K3 radio and YP3 portable beam for the trip! QSL via his home callsign. ADDED NOTE: Bill, states, "I just counted up my QSL cards and found I am 5 states short of a WAS. I've probably worked them all but just don't have cards. I'll be looking for the following states for confirmed QSL cards next trip: Alaska, Nevada, North Dakota, South Carolina, and Vermont. If you have contacted me from one of these states previously, please remember to QSL. THANKS!"

KH6BZF PROPAGATION FORECAST/REPORT (July 16-22nd)....

N2, UNITED STATES (LH Op). The Old Barney ARC will be operating from the Barnegat Lighthouse (Old Barney) (ARLHS Lighthouse # USA-039) on August 4th (rain date August 5th) from about 1300-2100z. Other reference numbers are IOTA NA-111 (Long Beach Island, NJ) and USI NJ-001S. Operation will be mostly 20 and 40 meters SSB. QSL via N2OB.

NQ2, UNITED STATES. Jaime, WP3A, will once again be active as NQ2A during the IARU HF World Championship (July 14-15th) from Brooksville, FL. He will be active from here until July 22nd. QSL via NP3O direct or by the LoTW.

OFFICERS FOR 2012-2013. On Monday, April 2nd (ed. I know it is a little late... Old age is setting in [the mind] and I'm a busy guy!), the members of Northern Ohio DX Association (NODXA) re-elected and elected (*) the following to serve as officers between May 2012 and April 2013:
President: Tedd Mirgliotta, KB8NW
Vice President: Dwaine Modock, K8ME
Secretary (*): Glenn Williams, AF8C
Treasurer: Mary Michaelis, N8DMM
Newsletter Editor: David Autry, WD8IOU
For more information about NODXA, check out the club's Web site at:
http://www.nodxa.org
Also, as of July 6th, NODXA is now on FaceBook (TNX to Brain, K3USC) at:
http://www.facebook.com/NorthernOhioDxAssociation

9K CALLSIGNS ON CLUGLOG'S OQRS. Hamad, 9K2HN, informs that he has enabled the OQRS service on Clublog.org for the following callsigns he manages: 9K0A, 9K2F (AS-118), 9K2HN/P (AS-118), 9K2USA, 9K47NLD, 9K5HN and 9K9X. He also mentioned, "I will not be adding my own call to the above list because I still enjoy collecting qsl cards."

MALPELO UPDATE. QSL Manager Bob, N2OO, reports, "if you worked HK1MW, HK1N, HK1T or HK6F in January 2012, then you really worked MALPELO. These four men were the advance team setting up the gear for the HK0NA DXpedition. During that time, they operated using their home calls without using a portable identifier. These QSOs count for Malpelo! Special photo QSLs have been printed and are now available via N2OO. Go to <http://df3cb.com/oqrs/n2oo/> for OQRS (direct and bureau) or <www.qsl.net/n2oo/history/qsl-n2oo.htm> for direct mail information, etc."

QSL RECEIVED VIA LoTW: 1A0C, 4Z5MU, 9A2UZ, 9M2TO, 9M0L, AB1JM, AE5P, BD5WW, CR6K, CT1HFS, DL0CS, E75MC, ED5WW, EI9KC, G3OFA, GI4DOH, GM0OAA, K6RV, KH2L, KM0O, KP4ED, LX1AX, MJ0ASP, N4KG, N4NX, N6NH, RI1ANF, RU6AT, TX1B, UA2FR, UR3IFD, UW2M, UX1VT, UZ0U, VY0/AH6EZ, W2SE, WB4DCM and WS7V

QSLS RECEIVED VIA MAIL: 3C6A, 6O0CW, 9L0W, A52AB, A35YZ, AH8A, C31VM, D44BS, E51EWP, E51M, FO5QB, FY5PO, GW4UDG/P, GW0VSW, KW6GM, LX1NO, LY2PX, RI1ANF, SU9VB, SV2ASP/A, TO3X, VK2KM and WP3DZ

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

P29, PAPUA NEW GUINEA. Drew, K9QV, is now currently active as P29VAC from Port Moresby. However, Drew informed OPDX on Friday that he may be in PNG for only a few more days (specific date was given). He also states, "I have been checking into the Southern Cross DX net on 14.238.5

MHz at 1030z when I am able. Operations have mainly been on 20m. Common modes are SSB, CW, JT-65." According to QRZ.com, he is using a KX3 w/10 watts into a Buddistick vertical. QSL via K9QV, direct or eQSL.

P4, ARUB. "The Daily DX" reports that Jack/W6NF and his XYL Shelley/ K7MKL will be on holiday in Aruba at the P49Y rental station between August 15-21st, and be active as P40NF and P40S, respectively. Shelley plans to be in the SARTG RTTY Contest. Outside of the contest, both operators will be casually active. Jack will be mostly on 20/15/10 meters CW, and possibly 6 meters if they find an antenna. Listen to operator's instructions for QSL info.

P5, NORTH KOREA (Update). If you missed the special bulletin (OPDX.1069.1) on Rick, K6VVA, explaining/addressing "some of the assumptions, specu- lations and inaccurate" which is being passed/posted around on various places, go to: http://www.papays.com/opdx1069.1.html
The letter is also available in PDF format at:
http://www.k6vva.com/p5/p5infoupdates.html

R1, EUROPEAN RUSSIA. Members of the AFARU (Armed Forces Amateur Radio Union) will be active as R100WWS from any areas of Russia between August 10-18th. Activity is to celebrate the 100th anniversary of the Military Air Forces of Russia (formed on August 12, 1912). Operations will be on all bands and modes. QSL via RV3YR.

T6, AFGHANISTAN. Croatian operators and members of the Croatian unit of the ISAF, Maj/9A7TJ and Vlado/9A3QM, will be active as T6TJ and T6VT, respectively, situated in camp Marmal in Mazar e Sharif City (Balkh province), until the end of September. Emir, 9A6AA, informs OPDX that he helped obtain their licenses through the Chief ISAF Spectrum Manage- ment Bureau of ISAF Headquarters which took several months to obtain and received on July 11th. Activity will be holiday style (but they are not on holiday) with operation mainly on SSB and the Digital modes. Maj, T6TJ, will operate mainly on the Digital mode using a FT2000, and Vlado, T6VT, will operate mainly SSB with a FT-857. They will be using wire antennas. QSL both operators via 9A6AA. For more updated info, pictures and logs see: http://www.inet.hr/9a6aa

T8, PALAU. Shuji, JA1FMN, will be active as T88FK from Babeldaob Island (OC-009) between July 17-19th. Activity will be on the HF bands and 6 meters using SSB, FM and PSK31. Operations will be mainly on 17 meters and on 15 meters (PSK31 and SSB). If propagation is good, look for operations on 6 meters SSB and 10 meters FM. QSL via his home callsign, by the Bureau or direct to: Shuji Yamanishi, 72-83-203 Toyoshiki Kashiwa- city, Chiba 277-0863 Japan.

TX0, AUSTRAL ISLANDS (IOTA Op). Philippe, FO4BM, will be active as TX0HF from the following French Polynesia IOTAs which count for the Austral Islands for DXCC:
  OC-152 – Tubuai Island; Now through July 21st
  OC-050 - Rurutu Island; July 21-23rd
Activity will probably be on 20/15/10/6 meters SSB. QSL via F4FJH.

V8, BRUNEI (Update to OPDX.1064). Members of the Gemilang Amamteur Radio Club (GEMILANG Radio) and the Mediterraneo DX Club will team-up and sponsor/plan another DXpedition, this time to Brunei (OC-088). The multi-national team (90% of the team operated during the 9N7MD DXpedition) will be active as V84SMD between November 11-23rd. Activity will be on 160-10 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. They plan to have 15 to 18 operators with 4 to 5 stations on the air 24 hours. The group has now activated a survey on band/mode needs on their Web page at: http://www.mdxc.org/v84smd/brunei-survey
QSL via IK2VUC, direct, by the Bureau or the OQRS. Logs will be uploaded to LoTW 4-5 months after the activity. The V84SMD Web page is now online at: http://www.mdxc.org/v84smd

VK9L, LORD HOWE ISLAND. Operators Seppo/OH1VR and Henri/OH3JR will be active as VK9/homecall from Lord Howe Island (OC-004) between November 17-27th. Activity will be on 160-6 meters using CW, SSB and RTTY. Also, they will both participate in the CQWW DX CW Contest (November 24-25th) as two Single-Op/Single-Band (bands not provide) entry. QSL via their home callsigns ONLY direct (SAE + IRC or 2 USDs).

VP9, BERMUDA. Kyle, WA4PGN, informs OPDX that he will be on his honeymoon with his wife Pam on Bermuda (NA-005) between July 13-22nd. He states, "I will operate as time permits during the IARU HF Championships (July 14-15th), CQWW VHF Contest (July 21-22th) and the North American RTTY QSO Party (July 21-22nd). Especially looking for contacts on 6 meters." QSL VP9/WA4PGM direct to his home callsign with SASE or SAE and return postage. QSL VP9I (DX club callsign) to N1HRA. See: http://vp9ge.com/vp9i.htm

WEB PAGE ACTIVATED. Natig, 4J5T, informs OPDX readers that the members of the "Safari" DX-activators club have activated the following Web page to get you familiar with their expeditions, on-air activities, to learn some special issues linked to opportunity for DXing in Azerbaijan. Please visit and comment on their Web page at: http://safari.16mb.com/wordpress

XE, MEXICO (Grids On The Birds). David, XE3DX, will be a on a family vacation between July 16-20th, but plans to activate some grid squares on SO-50 and AO-27 only. He will be active on most of the day passes, and plans to operate from EK48, EK49, EK69, EL50, EL51, EL61 and EL60, in the Campeche, Yucatan and Quintana Roo States. He will return home between July 30th-August 4th. QSL direct or by LoTW (preferred).

ZL9, CAMPBELL ISLAND (Update). Members of the Hellenic Amateur Radio Association of Australia announced that they have received a landing permit from the NZ Dept. of Conservation for ZL9HR Campbell Island (OC-037) DXpedition in November. The dates are now offical and the operation will take place between November 28th and December 9th, 2012. The ZL9 Campbell Island (NZ) is Number 15 on the current DXCC most wanted list. The ZL9HR DXpedition team is Tommy/VK2IR (Team Leader), John/VK3YP (Co-Leader), Les/W2LK, Gene/K5GS, Dave/K3EL, Glenn/KE4KY, Jacques/ZL3CW, Pista/HA5AO, Don/VE7DS and John/9M6XRO. The official Web site is at: http://www.zl9hr.com

http://topbanddxdiindonesia.blogspot.com/2012/07/hasil-hasil-ye0hq-dan-yb1c-pada-kontes.html

Hasil-hasil YE0HQ dan YB1C pada Kontes IARU 2012
Walau masih sangat prematur (belum ada pemeriksaan duplikasi dll), saya tergerak untuk memuat dua gambar dari layar komputer tentang hasil kontes IARU 2012 yang diikuti oleh dua stasiun HQ di Indonesia, yaitu: YE0HQ (Gbr 1.) dan YB1C (Gbr.2), sebagai berikut:

Gbr.1. Hasil YE0HQ

Gbr 2. Hasil YB1C Konon, YE0HQ memancar dari kawasan Buncit, Jakarta Pusat sedangkan YB1C memancar dari Padalarang, Jawa Barat. Keduanya tidak berhasil membukukan satu pun QSO dua-arah pada top band (160m)

Saya ingin sampaikan penghargaan kepada Orari (Pusat dan Daerah) yang telah memfasilitasi dengan baik peran serta para anggotanya yang senang kontes di kedua stasiun tsb. Semoga bisa lebih baik dan merata di tahun-tahun mendatang.

Untuk sementara, data yang saya peroleh hanya sebatas kedua gambar tersebut di atas. Silakan para pembaca untuk menganalisis data yang ada.

Keep up the good works, OM

Greetings!

By an act of Congress in 1989, the United States Government officially declared August 7th of each year as National Lighthouse Lightship Day, to be cerlebrated each year by all light-beacons, where feasible, by free tours and opening lighthouses to the public. In addition, the ARLHS (Amateur Radio Lighthouse Society) will activate as many nautical beacons as possible, conduct on-air contests, and hold special lighthouse radio events.

All "Hams" are encouraged to celebrate their ham radio hobby by activating lights during International Lighthouse-Lightship Week (I L L W) from August 1 - 8, especially National Lighthouse Day (August 7th) and the contest QSO Party onAugust 4 & 5. [See below]

On August 7th, the ARLHS club station, W7QF, will offer a special certificate for all contacts. made with its club station. (Operating on or near 14.270) On August 4 & 5special prizes will be offered for the top three scoring stations in the QSO Party. For prizes, operating, logging, and scoring guidelines, see http://illw.org.

James Weidner, K2JXW, president

Amateur Radio Lighthouse Society (ARLHS / ILLW)

http://www.d64k.net/

D64K DXpedition, Comoros Islands (IOTA AF-007)

Plans

We plan to QRV from 6 through 160 meters on CW, SSB and RTTY on different bands/modes starting around 18:00Z August 8th

Equipment

Band Plan

We are also considering the possibility to be active on 60 meters. Any suggestion relating this new band is welcome, and can be done via email: support@...

D6 in the DXCC

D68C did a terrific job with 168.722 QSOs, but since 2001, other activities from Comoros Islands were not really relevant in terms of QSOs. This entity, since that year, had never stop climbing the chart. Moreover, actual surveys report, on the top part of the chart, several Entities recently activated by Major Dxpeditions.
Who become Dxer “after 2001” is looking for D64K!

Rank #68 on The Dx Magazine in the world-wide results of 2011
#57 EU | #62 AS | #50 NA | #27 AF,OC,SA

Rank #49 on Clublog in the world-wide results of Feb. 2011
#69 EU | #42 AS | #49 NA | #28 SA

QSL info

General information
Please check the log online and wait for the end of the dxpedition before sending your QSL card request.

OQRS
The contribution for a QSL cards request via OQRS is 5 USD. All the request via OQRS will be answered as soon as the QSL cards will arrive from the printer service. All the QSOs for OQRS requests will be confirmed on LOTW on weekly basis.
OQRS is our favorite way to confirm QSOs: it is safe and quick and it is very easy to manage.

Direct QSL
You can send your request of QSL with a SAE and the standard contribution for the reply. For standard contribution is better to explain what we are taling about beacuse the price for the stamps were increased recently in Italy.

For a standard contribution we request:

for EUROPE: 2 USDs + SAE
for OUTSIDE EUROPE: 3 USDs + SAE
Please note: NO STAMPs and NO IRC.

IRC are often used as a currency in the amateur radio world. This is not correct, and you can discover it, if you find a post officer that wants strictly apply the rules of IRC. It is also popular send old IRC that are not more valid.

Note for Italians: Italy is in Europe too, the minimal contribution for Italian Amateurs Radio is 2USDs + SAE. Please do not send SASE (no stamps).

Direct QSL card requests doesn't respect those policies will be answered via the BURO.
Direct QSL card requests with expired IRC will be NOT answered at all.

Direct requests with an appropriate contribution will be answered after the request via OQRS.

The address of the QSL manager is:

PAOLO DEL DO' – IV3DSH
VICOLO CANTARUTTI 3
33030 TORREANO MART. UD 33035
Italy

LOTW
D64K's log will be entirely uploaded on LOTW after 6 months from the end of the dxpedition. Be patience, if you cannot wait for the LOTW confirmation, please evaluate the OQRS request.

BURO
We are happy to confirm QSL requests via the BURO. We will start to answer to this kind of cards after all OQRS and Direct requests.

Note: BURO and LOTW are completely free. So maybe you want to evaluate to suport our dxpedition with a donation. You donate using paypal from donors page.

QSL Semi-Direct
Associations, Clubs and sponsors in general can negotiate directly with the QSL manager, to establish a dedicated QSL service for their members or affiliates.

NH8S, Swains Island DXpedition 2012, OC-200

IOTA OC-200

Swains Island DXpedition
Scheduled for September 5 - 18, 2012
July 17, 2012
Press Release

Craig (K9CT) and Joe (W8GEX) are happy to report that preparations for the NH8S Swains Island DXpedition are on schedule. The 20 man international team should be on the island from September 4, thru September 17. Swains is # 31 most wanted worldwide. They will operate all bands with SSB, CW and RTTY.
A big thank you goes to John (N7CQQ) and Paul (W8AEF) for their time in building and testing the SVDA's that will be used. Thanks also to Paul (W6XA) and Tom (N4XP) for testing the radios, amps and laptops. All of the equipment has been shipped to Arnie (N6HC) in California for the upcoming departure via cargo ship later this week. The QSLing will be handled by Joe (AA4NN) with help from his XYL Margarett. Plans are to upload logs daily by satellite phone from the island to Clublog.
We are very grateful to our equipment sponsors, including: ICOM, Elecraft, VIbroplex, Innovantennas, DX Engineering, Heil Sound, Primus, Hi-Z Antennas, and The RF Connection. Also to Kimo (KH7U) for the 160m vertical, and George (W8UVZ) for the Battle Creek Special.
We have updated our website with pictures, operating information and links. Thanks to John (K6MM) for doing the webmaster duties.
There will be a great emphasis placed in working Europe where Swains is most needed. We will have several receiving antennas aimed that direction.
It will be very hot and humid, and mosquitoes should be plentiful, so please have patience with the operators. We ask that you listen to the operator instructions to ensure we are able to work as many stations as possible. Please refer to our operating guidelines on the Band Plan page:
http://nh8s.org/pages/bandplan.html
This tent and generator operation is a very expensive endeavor, and the group is most grateful for the foundations, clubs and individuals who have already contributed. For those that would like to donate, you may do so from our website: www.nh8s.org.
The skilled international crew that is looking forward to working you includes: 9V1FJ, AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, KB8OCP, N2TU, N4HH, N6HC, NA6M, ND2T, SM5AQD, W4BUW, W6KK, W8GEX, W8TN, and WB9Z.
The team is grateful for the opportunity to activate a rare DXCC entity and, hopefully, work thousands of other DXers worldwide. We look forward to having fun and making life-long friends.

CU in the pileups!
And don't forget to sign our Guestbook -- just click on the Coconuts!

73,
Your NH8S Team

Operating Plan

We want you in our log, so please help us by following these guidelines.
1. If you cannot hear us - please don't call us. Wait until propagation and conditions favor your QTH for one or more of the 11 Bands and 3 Modes. Eventually you WILL have a clear path to Swains Island. Be patient.
2. Unless you hear otherwise from the Operator, we will ALWAYS be operating in SPLIT MODEthroughout the DXpedition.
3. Listen to the Operator for RX frequencies (e.g., "up 5 to 10", or "listening on 7.155", etc.)
4. You have two ears and one mouth, so please try to listen more, talk less. Be patient.
5. During SSB pileups, please announce your full call clearly -- ONCE -- using common phonetics.
6. During ALL pileups, listen for YOUR call on the comeback. Trust that we have two good ears.
7. We're not impressed by those who add to the QRM by constantly calling out of turn. Be patient.
8. Please do not Tune Up on any of our TX frequencies or any of our RX slots!
9. If we ask for "EU" only or "QRP only" or any other specific request, please QRX. Be patient.
10. Resist those "insurance" QSOs. We want to maximize unique QSOs, not Dupes.
11. Whenever possible, we will try to listen in the General portion of the band.
Remember: We want you in our log. Please help us get you there.
Tentative
Schedule NH8S Band Plan

Swains Island
IOTA OC-200
Swains Island is an atoll in the Tokelau chain. Culturally a part of Tokelau, it is an unincorporated unorganized territory of the United States administered by American Samoa. Swains Island has also been known at various times as Olosenga Island, Olohega Island, Quiros Island, Gente Hermosa Island, and Jennings Island. Owned by the Jennings family and used as a copra plantation, Swains Island has a population of 37 Tokelauans, who harvest the island's coconuts.

SB DX @ ARL $ARLD029
ARLD029 DX news

ZCZC AE29
QST de W1AW
DX Bulletin 29 ARLD029
From ARRL Headquarters
Newington CT July 19, 2012
To all radio amateurs

SB DX ARL ARLD029
ARLD029 DX news

This week's bulletin was made possible with information provided by IZ3DBA, NC1L, ON5JM, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

ALGERIA, 7X. Special event stations 7T50I, 7U50I, 7V50I, 7W50I and 7Y50I are QRV until December 31 to celebrate the 50th anniversary of the independence of Algeria. QSL all calls via 7X2ARA.

CROATIA, 9A. Look for operators HA7PL, HA6NL, HA6PS, HA6PJ and HA7JJS to be QRV as 9A/home calls from the villages of Tkon and Kranj on Pasman Island, IOTA EU-170, from July 24 to 31. Activity will be on all HF bands and 6 meters using CW, SSB and various digital modes. This includes being entries in the upcoming IOTA contest. QSL to home calls.

TAIWAN, BV. Bodo, DF8DX will be QRV as BW/DF8DX from July 22 to 25. Activity will be holiday style on the HF bands using mainly CW. This might include being an entry in the upcoming IOTA contest. QSL to home call.

PORTUGAL, CT. A group of operators are QRV as CQ73I until July 22 to commemorate the 31st International Motorbike Faro. Activity is on 80 to 6 meters using CW, SSB, and RTTY. QSL via CT1EHX.

AUSTRAL ISLANDS, FO. Philippe, FO4BM is QRV as TX0HF from Tubuai Island, IOTA OC-152, until July 21 and then from Rurutu Island, IOTA OC-050, from July 21 to 23. Activity is on the HF bands. QSL direct to F4FJH.

ENGLAND, G. Members of the Cray Valley Radio Society will be QRV as 2O12L from New Eltham to mark the London 2012 Olympic and Paralympic Games. Activity will be on all bands and modes. QSL via G4WNF.

WALES, GW. Special event station 2O12W will be QRV from Barry from July 25 to September 9 to mark the London 2012 Olympic and Paralympic Games. Activity will be on all bands and modes. QSL via GW1FKY.

ECUADOR, HC. Rich, NE8Z will be QRV from July 21 to 31 as HC1MD from Cumbaya, HC1MD/HC1 from Mount Cayambe, HC1MD/HC3 from Loja and HC1MD/HC5 from Cuenca. Activity will be on 40 to 10 meters using CW and RTTY from the various locations. QSL via K8LJG.

THAILAND, HS. The Radio Amateur Society of Thailand, HS0AC, as well as other stations in the provinces, have permission to operate in the CQ World Wide VHF contest on 6 meters. QSL via operators' instructions.

SARDINIA, IS0. Giacomo, IZ3DBA will be QRV as IM0/IZ3DBA from La Maddalena Island, IOTA EU-041, from July 22 to 28. Activity will be on the HF bands using primarily CW with some SSB. QSL to home call.

LUXEMBOURG, LX. Special event station LX/OP50LX will be QRV on July 21 to commemorate the 50th anniversary of the first activation of this special call sign from Berle. The original activation was to commemorate the Battle of the Bulge. Activity will be on 80, 40, 20, 17, 15, 10 and 2 meters. QSL via operators' instructions.

DENMARK, OZ. Special event station OZ12SJ will be QRV from July 21 to 29 during the Scout and Guide Jamboree in Holstebro. This includes entries in the CW World Wide VHF and DMC RTTY contests and in the upcoming RSGB IOTA contest. QSL via operators' instructions.

EUROPEAN RUSSIA, UA. Victor, UA1OEJ will be QRV as UA1OEJ/p from the Solovetsky Islands from July 22 to 31. Activity will be on the HF bands using SSB and various digital modes. QSL to home call.

BERMUDA, VP9. Kyle, WA4PGM is QRV as VP9/WA4PGM until July 22. He is active in his spare time. This includes entries in the CQ World Wide VHF contest and North American RTTY QSO Party. QSL direct to home call.

MEXICO, XE. David, XE3DX is QRV from various grid squares in the Campeche, Yucatan and Quintana Roo States while on vacation until July 20. He is active on Satellites SO-50 and AO-27 only. QSL direct to home call.

INDONESIA, YB. A large group of operators will be QRV as YE9IOTA from Gili Trawangan Island, IOTA OC-150, from July 25 to 31. Activity will be on the HF bands. This includes an entry in the upcoming RSGB IOTA contest. QSL direct to YB9BU.

THIS WEEKEND ON THE RADIO. The North American RTTY QSO Party, CQ Worldwide VHF Contest, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, Russian Radio Team Championship, DMC RTTY Contest, Feld Hell Sprint and the RSGB Low Power CW Contest are all on tap for this weekend. The SKCC CW Sprint and CWops Mini-CWT Test are scheduled

for July 25. Please see July QST, page 77 and the ARRL and WA7BNM Contest Websites for details.

SB PROP @ ARL $ARLP029
ARLP029 Propagation de K7RA

ZCZC AP30
QST de W1AW
Propagation Forecast Bulletin 29 ARLP029
From Tad Cook, K7RA
Seattle, WA July 20, 2012
To all radio amateurs

SB PROP ARL ARLP029
ARLP029 Propagation de K7RA

In last week's bulletin ARLP028 we reported a blast of energy from a solar flare headed our way, predicted arrival on Saturday, July 14. The CME hit at 1800 UTC, and had a huge effect on propagation and geomagnetic indices. The next day the planetary A index was 60, mid latitude A index was 39, and the high latitude college A index was 88. Conditions haven't been that upset since March 9, 2012, when the mid-latitude A index was 57, planetary A index was 67, and the college A index was 107.

All other indices were lower, with the weekly average of daily sunspot numbers down over 16 points to 104.7, and average of daily solar flux down 25 points to 141.8.

The latest prediction from NOAA/USAF has solar flux at 95 on July 20-21, 100 on July 22, 105 on July 23-24, 110 on July 25-27 then 165 on July 28 through August 2, 160 on August 3-4, and 165 on August 5.

Predicted planetary A index is 5 on July 20-21, then 12 and 8 on July 22-23, 5 on July 24-27, 20 on July 28-29, 10 on July 30-31, 15 on August 1-2, 10 on August 3-4, 8 on August 5, and 5 on August 6-22.

OK1HH predicts quiet to unsettled conditions July 20, quiet July 21, quiet to active July 22, mostly quiet July 23-24, quiet July 25, quiet to active July 26, active July 27-28, mostly quiet July 29, quiet on July 30, quiet to active July 31 through August 2, quiet August 3, mostly quiet August 4, active August 5, mostly quiet August 6-7, quiet to unsettled August 8, quiet August 9, quiet to unsettled August 10, and active on August 11.

How well do the forecasts from NOAA/USAF (at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html) do in predicting what will happen next week, or a few weeks out? No statistics here, but I noticed that the current solar flux

depression (with flux values at 100 of less for the next few days) has been predicted for weeks. Solar flux values for July 16-19 show the trend, with values of 154.4, 127.5, 109.5, and 100, and now on Thursday July 19 the predicted values for July 20-22 are 95, 95 and 100.

Looking back at the forecast from July 2, we see the same dip around this time of the month, only longer and deeper. That date it showed flux values on July 18-23 at 100, 90, 85, 85, 90 and 100.

On July 9 this was revised, and the dip was only down to 105, centered on July 20-21. On July 13 this was adjusted down, with the minimum at 100, on July 18-20. Revised again on July 14, it now had the flux at 100 on July 19-21. The July 15 forecast shifted it again, at 100 on July 20-23. On July 16 it changed again, with flux values of 105, 95, 95, 95, 95 and 130 on July 19-24. On July 17 the July 24 value changed from 130 to 105, and on July 18 the minimum went from 100, 95, 95, 95 and 100 on July 19-23, and now on July 19 it is 95, 95 and 100 on July 20-22.

So over the past few weeks the forecast for a short term minimum has shifted around the next few days, and we hope it becomes more accurate as we close in on the date.

Dave Greer, N4KZ of Frankfort, Kentucky wrote: "Here it is some 24 hours after total bedlam - a good kind of bedlam - on 6 meters on Monday, July 16. From the DX Sherlock website, I knew before I left work that 6 would be on fire by the time I got home from work. It did not disappoint. In fact, it threw me an unexpected surprise."

"I got on at 2118 UTC and didn't leave the rig for the next three hours as the Caribbean and northern South America boomed into my EM78ne QTH in Frankfort, KY. I worked some 20 stations. None represented new 6 meter DX entities for me but it was still a blast. You don't work Brazil on 6 meters every day, at least I don't."

"But in the midst of the chaos, I heard W3GMT calling CQ with a strong signal and no takers. I felt sorry for him and answered his next CQ. I nearly fell out of my chair when he said his QTH was Charleston, South Carolina. You see, South Carolina was the LAST state I needed for 6 meter WAS. And it only took me 25-plus years to work it."

"South Carolina is practically in my backyard. That's the problem - it's too close. If I had worked at it, I could have worked it years ago but I preferred the casual approach. So 12 years after I worked Alaska on 6 meters, 10 years after I worked Hawaii, I finally got my last state."

"That I didn't expect when I turned on the rig on July 16."

"By the way, I just put up a new 6 meter Yagi on my tower on Saturday so this was the perfect way to break it in. Compared to the big guns on 6 meters - with the KW amps and Yagis with booms that are longer than my tower is tall - I'm just a peanut whistle but with my 100 watts and modest Yagis over the past years I have managed to work 70 countries on 6 meters, all continents and now all 50 states."

"And yes, it is still and will always remain the Magic Band."

Nice report, Dave!

We also got an interesting report from Steve McDonald, VE7SL of Mayne Island, British Columbia. Steve wrote: "As you know from your reports, the 'normal' summer 6m season has been a bit of a disaster here in the PNW as well as many parts of the country. But although the number of openings has been minimal, some of them have been spectacular. You have already reported on the 5 hour opening between the PNW and Europe (June 29) which surely must be an exceptionally rare occurrence as many 40 year plus 6 meter operators have commented that they have never seen anything like it before, myself included."

"This note is to report another example of why 6 meters is called the 'magic band'. Both myself and Johnny, KE7V, (about 40 miles to my southwest in Port Angeles, WA) worked 4Z1UF in Lod, Israel on July 13. Johnny worked him at around 1433Z and I worked him seven minutes later at 1440Z when his signal (as is so often the case with EU propagation) finally drifted far enough north for me to hear him. The distance between us is about 6700 miles. What is remarkable about this contact is that there were really no indicators that the band was open... no beacons from the north (or anywhere else for that matter), no EU video signals coming over the pole and no signals from North America, just 4Z1UF, all alone on the band, calling CQ on CW! Ilya's signal (peaking 569) was in and out here in less than 60 seconds and I believe it was much the same for KE7V."

"Somewhat fortunately, Johnny's beam is difficult to move due to a faulty rotator and he had it temporarily parked towards Europe. He had been casually tuning the band early in the morning, while also watching the Tour de France race on television when he noted and pounced upon the weak signal before it was gone! One wonders how often these very short 'wormhole' openings occur during the height of the summer E season when combined with a very quiet and diminished auroral field in the polar regions! 4Z1UF reported no indicators to the west coast as well and his few 'before and after' QSO's were all along the Atlantic seaboard. Magic!"

Thanks, Steve! Check out Steve's Radio Notebook page at http://members.shaw.ca/ve7sl/.

Thanks to VE3KKL, Gordon Curling of Kars, Ontario for catching the error regarding the June 12 solar flare in the last bulletin. That should be an X1.4 flare, not X.14.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 12 through 18 were 132, 112, 120, 134, 89, 87, and 59, with a mean of 104.7. 10.7 cm flux was 165.4, 147.2, 147.9, 140.5, 154.4, 127.5 and 109.5, with a mean of 141.8. Estimated planetary A indices were 11, 3, 17, 60, 31, 14, and 5, with a mean of 20.1. Estimated mid-latitude A indices were 11, 4, 11, 39, 27, 9, and 5, with a mean of 15.1.

DXNL 1789 - Jul 18, 2012 DX Newsletter

CT, PORTUGAL
The special event station CQ73I operates in SSB/CW/RTTY on 80m-6m
on the occasion of the 31st International Motorcycle Rally in Faro
until July 22. QSL via CT1EHX.

EA, SPAIN
To celebrate the win of the 14th UEFA European Football Championship
Spanish hams are allowed to use these special prefixes until July 31:
EA may be replaced by AO, EB by AM, and EC may be replaced by AN.

F, FRANCE
The op's F5SKJ, F6FAI, F4EJW, F4ELJ, F0GWK and F0GXK are planning to
visit the lighthouse in the bay of Morlaix on Noire Island and want
to work as TM9LF on July 21/22. QSL via F0GWK (office only) and eQSL.

FJ, ST BARTHELEMY, NA-146
Ludovic,HB9EOU, and Andre,HB9CVC, will hand out a few IOTA points
from St. Barthelemy (NA-146) signing TO2D between Jul 22 and Aug 4.
They work in SSB and RTTY from 40m-6m. QSL via HB9EOU.
See also: http://st-barth.hb9eme.ch

FO/A, AUSTRAL ISLANDS
Philippe,FO4BM, is planning an holiday style operation as TX0HF from
the Austral Islands. His destination islands are Tubuai (OC-152) and
Rurutu (OC-050), with expected activity in SSB on 20m running 100 watts
into a dipole. He is standby to get on an airplane to these islands.
QSL via F4FJH, unfortunately only direct.

FP, ST PIERRE AND MIQUELON
Yuri,VE3DZ, and Victor,VA2WDQ/VA2WA, will be active as FP/VE3DZ and
FP/VA2WA from Miquelon (NA-032) from Jul 20-31. Listen for them in CW,
SSB and RTTY on 160m-6m and also in the CQWW VHF Contest (Jul 21/22)
and RSGB IOTA Contest (Jul 28/29) which they both plan to join as TO2U.
Their preferred frequencies are:
CW: 1824, 3524, 7024, 10114, 14024, 18074, 21024, 24894, 28024 kHz
SSB: 3790, 7060/7140, 14240, 18140, 21240, 24940, 28440 kHz
RTTY: 7041, 10142, 14084, 18104, 21084, 24914, 28080 kHz
6m: 50104 kHz (CW) and 50.115 kHz (SSB)
QSLs can be requested after the DXpedition via OQRS (bureau) or
via PayPal (direct). See: http://www.to2u.contestgroupduquebec.com

G, ENGLAND
On the occasion of the upcoming Olympic Games and Paralympic Games
British HAMs are allowed to use special prefixes between Jul 21 and
Sep 9. Single letter prefixes may be supplemented with the letter 'O'

and in double letter prefixes the second one is replaced by an 'O'.
For example:
    M3aaa becomes MO3aaa
    G3aaa becomes GO3aaa
    GM3aaa becomes GO3aaa
    2E0aaa becomes 2O0aaa
    2M0aaa becomes 2O0aaa
    GX3aaa becomes GO3aaa
See also: http://www.rsgb.org/news/articlelinks.php?id=0263

The special event station GB4TDF celebrates the 99th anniversary of the
Tour de France until Jul 23 operating from Hancocks Radio Hut (WAB SD67
Loc IO84rd), Low Bentham, Lancaster, Lancashire (EU-005, WLOTA 1841).
The OPs are Barrie,G1JYB, Stephany,G1LAT, and members of the "Sands
Contest Group". QSL via bureau, eQSL.

The "Riviera Amateur Radio Club" will be operating a portable station
from Brixham Breakwater (Loc IO80FJ, WAB SX95) on Jul 19/20 supporting
RNLI Torbay's Lifeboat Week 2012. The club callsign MX0RIV will be QRV
on all HF/VHF bands. QSL via bureau. See: http://www.rivieraarc.org.uk

GW, WALES
The special event callsign 2O12W (Two Oscar One Two Whiskey) will be
activated between Jul 21 and Sep 9 on all bands and modes from Barry
in Wales to celebrate the London 2012 Olympic and Paralympic Games.
QSL via GW1FKY. See also: http://www.2o12w.com

HC, ECUADOR
Rick,NE8Z/HC1MD, will once again be active from here from Jul 21-31.
He plans to activate these areas with the following callsigns:
HC1MD from Cumbaya (CW/RTTY), HC1MD/HC1 from Mount Cayambe (CW),
HC1MD/HC3 from Loja (CW) and HC1MD/HC5 from Cuenca (CW). Activity will
be in CW/SSB/RTTY on 40m-10m, using a TS-50s/AT-50 with a Carolina
Windom (40m-10m) antenna from Cumbaya. From all other areas he will
operate portable using an OutBacker antenna (40m-10m). QSL via K8LJG.
See also: http://webpages.charter.net/ne8z

KL7, ALASKA
Rick,K6VVA, activates several islands as K6VVA/KL7 from Jul 19-26:
Jul 19-21: Crescent Island (NA-172, USi new, 2nd North Western County)
            together with Mike,K9AJ
Jul 23/24: Barter Island (NA-050, USi AK044S, 4th Central County)
Jul 25/26: Endeavor Island (aka Endicott, NA-004, USi AK046S,
            2nd North Western County)
Rick prefers working mostly in CW on the high bands (30m-10m).
Note that this schedule is subject to change due to local weather.
QSL via N6AWD. See also: http://www.k6vva.com/iota/na172

OH, FINLAND
Henry,OH3JF, celebrates the achievement of his CQ county award with the
special callsign OG3077F until Apr 3, 2017. He has succeeded in working

all 3077 counties of the United States in CW since 1987. QSL via OH3JF.

OZ, DENMARK
In connection with the largest Scout Jamboree ever held in Denmark, a special event station with the callsign OZ12SJ will be very active from Holstebro running five stations on all bands from Jul 21-29. They also offer a license course and the option of actually taking a license test on site. The callsign is expected to be active in the DMC RTTY Contest, CQWW VHF Contest and the RSGB IOTA Contest. QSL via bureau.

SV, GREECE
Members of the Radio Amateur Association of Greece (RAAG), the National Technical University of Athens and DXPlus Hellenic Radio Amateur M.I. Team will activate the special callsign SX1GR from the "Sacred Rock of Acropolis of Athens" in CW/SSB/RTTY/PSK31 on all HF bands, 6m and 2m from July 18-22. The station will be active during the hours of museum operation. A special QSL award and special engraved QSL plaque will be available on request for any QSO. See QRZ.com for more details.

UA, EUROPEAN RUSSIA
Victor,UA1OEJ, will show up in SSB and digital modes signing UA1OEJ/p from the Solovetskiye Islands (EU-066) from Jul 22-31. QSL via UA1OEJ. See also: http://ra1ohx.ru

V3, BELIZE
Henry,W5HNS, Jay,K0BCN, and Marty,W5MRM, will hand out a few points as V31WH, V31MX and V31MO from Caye Caulker (NA-073) from Jul 23-31. They will work in CW and SSB on 40m-10m using a 40m dipole and a Hexbeam. They have not made a decision about PSK or RTTY yet since they have only one transceiver at their disposal. They will sign V31MX in the upcoming RSGB IOTA Contest. QSLs via homecalls, LoTW.

VP9, BERMUDA
Kyle,WA4PGM, will be on honeymoon with his wife Pam in Hamilton Parish, Bermuda (NA-005, Loc FM72PI) from Jul 13-22. Operating as time permits, using the call VP9/WA4PGM, during the IARU HF Championship (Jul 14/15), CQWW VHF Contest (Jul 21/22) and the North American RTTY QSO Party on Jul 21/22. QSL via homecall.

W, USA
The Montgomery County Amateur Radio Club (MARC) in Maryland will use the special call W3M during its Fieldday operations on July 23/24. The operation will take place from Davis Airport in northern Montgomery County (FM19kf). See also: http://www.marcclub.org

YA, AFGHANISTAN
The Croatian HAMs Maj,9A7TJ, and Vlado,9A3QM, are members of the UN ISAF forces. They are working as T6TJ and T6VT with wire antennas from Camp Marmal in Mazar-e-Sharif until mid September. QSLs via 9A6AA. See also: http://www.inet.hr/9a6aa

DXCC: Following operations were approved for DXCC credit:
    9X0PY (Dec 24, 2011, until Jan 7, 2012)
    S21YD (1994, 1995, 1998 and 1999)

WHQS Award: Once again the Polish amateur radio journal "MK QTC" sponsors
    the W-HQ-S award for working at least ten HQ stations during the
    IARU HF World Championship.
    See also: http://suchacz.eu/viewpage.php?page_id=4

WRTC 2014: The stations of the WRTC 2014 were tested from several locations
    during the IARU HF Championship. They joined the contest as K1GQ, K1RQ,
    K1ZD, N2KW, N9NB, NI1L, W1HH, W1MA, W1MJ, W1SJ, W1UE, W1UJ and WB1Z.
    More information about the WRTC can be found at http://www.wrtc2014.org

PH9HB/am, Amateur Radio from Cloud Nine: DXCoffee had an interesting
    interview with Jerry, PH9HB.

World Lakes Award: Paco Gil,EA5OL, calls attention to the World Lakes Award:
    http://worldlakes.info

LINKS: Current SOTA activities (mountain summits) are announced at:
    http://www.sotawatch.org

    Detailed information about current VHF activities can be found on the
    VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 21/22 Saar Contest
Jul 21/22 North American QSO Party
Jul 22   RSGB Low Power Contest
Jul 28/29 RSGB IOTA Contest

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
AS-020, BV, Taiwan Island: Bodo,DF8DX, will visit Taiwan from Jul 22-25 and
    will be active as BW/DF8DX in CW. QSL via DF8DX (bureau/direct).
    The log will be uploaded to the LoTW as well.

AS-066, R0L, Sea of Japan Coast group: Vladimir,UA0LCZ, will be QRV as RI0NZ
    from Popov Island (RR-16-02, RDA PK-05) on Jul 24-30. Before the IOTA
    Contest he will concentrate on CW (3507, 7007, 10107, 14017, 18067,
    21017, 24897 and 28017 kHz). QSL via UA0LCZ.

AS-154, TA, Black Sea Coast East group: The planned Hungarian-Turkish IOTA
    DXpedition TC0HA had to be cancelled because the received no permission
    to set foot on Giresun Island. They will give it another try in 2013.

EU-005, G/GM/GW, Great Britain: The special event station GB1AVR (Ackworth
    Vintage (Vehicle) Rally, Loc IO93ipIP, FISTS 14041) will be activated

on Jul 21/22 during the Steam rally in Ackworth.
QSL via bureau or direct to G0BPK. See also: http://www.pdars.com

EU-013, GJ/MJ, Jersey: The team of OT9Z will stay on Jersey (WLOTA 0818) from Jul 20-26. They are guests of the JARS (Jersey Amateur Radio Society) and will operate thee stations simultaneously as MJ/OT9Z.
QSL via OT9Z (bureau) or ON3NT (direct).
See also: http://dxpeditionchannelislands.weebly.com

EU-028, I5, Toscana (Tuscany) Region group: Antonio,IZ1NES, is spending his holidays on Elba (IIA LI-001, MIA MI-022, WLOTA 0609) until Jul 22 and signs IA5/IZ1NES in a holiday style on the HF bands. QSL via IZ1NES.

EU-041, I0, Maddalena Archipelago: The frist destination of Jack's,IZ3DBA, island trip is Maddalena Island. He will work in holiday style signing IM0/IZ3DBA in CW/SSB on the HF bands from Jul 22-29. QSL via IZ3DBA

EU-044, LA, Finnmark County West group: Waldi,LA/SP7IDX, and Mek,LA/SP7VC, will be active from Mageroya (WLOTA 0160, Loc KQ21VC) on Jul 20-29. They will operate in SSB and RTTY with two stations on 80m-6m, and will participate also in the IOTA Contest. During their travel to Mageroya they might stop and be active as SM/SP7VC and SM/SP7IDX from Seskaro Island (EU-139) on July 19/20. QSLs via homecalls, LoTW.
See also: http://sp7idx-hexbeam.eu and http://www.sp7vc.pl

EU-045, I0, Lazio Region group: Antonio,IZ8IQL, Carlo,IZ0EGC, Gianni,IW0BTN, Giorgio,IZ8FAV, Francesco,IK8TEO, and Giuseppe,IZ0GZW, will be QRV as IB0F from Ponza (IIA LT-001, MIA MI-076, WLOTA 1395) from Jul 23-31. They will also participate in the RSGB IOTA Contest (Jul 28/29).
For QSL routes check QRZ.com.

Alessio,IB0/IZ0UIM, activates Ventotene Island (IIA LT-011) again from Jul 18-22. He may also visit Santo Stefano Island (IIA LT-010) during this time. He works only in SSB on 80m-10m with FT-1000 and dipole.
QSL unfortunately only direct to his homecall, LoTW, eQSL.

EU-056, LA, More og Romsdal County Centre group: Thomas plans to be active as LA/SM3DMP from Otroy Island (WLOTA 3195) from Jul 18-20. He works with TS-590 and wire vertical mainly in CW on 30m/20m/17m.
QSL via SM3DMP (bureau/direct). Log will be uploaded to the LoTW also.

EU-073, I7, Puglia Region group: Members of Taranto ARMI section and 599 DX Team will be active as IJ7T from San Pietro Island (IIA TA-002) from July 20-22. They will operate SSB, CW and RTTY on the HF bands and 6m.
QSL via IK7WDS. An OQRS for direct and bureau cards will be available.
Further information will be available at: http://www.armi.ta.it

EU-075, SV, Peloponnisos (Argolis)/Attiki Region group: George,SV1CDY, still on air as SV8/SV1CDY from Aegina Island (Loc KM17rs) is working mostly on 6m (preferably 1600 UTC on 50.130-50.140 MHz) and of course during the RSGB IOTA Contest at the last weekend of July. QSL via homecall.

EU-123, GM/MM, Shottish Coastal Islands: Iain,MM0TFU/p, operates from
    Blackwaterfoot on the western side of Arran (IOSA CL01, SCOTIA CS14)
    from Jul 19-28. He plans to join the RSGB IOTA Contest as well.
    QSL via homecall (bureau/direct), LoTW preferred.

EU-178, ES0/8, Parnumaa County/Saaremaa County South group: Dominik,SQ7OXU,
    and Jack,SP7DPJ, are undertaking an IOTA DXpedition to the island
    Ruhnu (WLOTA 4244, Loc KO17PT) from Jul 23-30. They will work as ES0W
    and also during the IOTA Contest. QSL via SP7DPJ.
    See also: http://www.sp7dpj.com

EU-179, UR, Black Sea Coast group: Members of the "Beer Lovers Radio Club
    International, Dnepropetrovsk Radio Club" and the "Tavria Radio Club"
    (Alex,UR5GDX, Ivan,UR8GX, Nick,UR3GO, Leo,UT7CL, and Roman,UR3CJR) will
    be QRV in CW, SSB and RTTY from Kalanchakskiye Island (UIA BS-008) from
    Jul 24-30. They will join the IOTA Contest as UT7E/p.
    QSLs for UT7E/p via UT7EZZ (bureau/direct), all others via homecalls.

EU-182, UR, Black Sea Coast group: UT9IO/p plans to become active in CW/SSB/
    digital modes on the HF bands from Zmeinyi Island from Jul 21-29. He
    plans to take part in the IOTA Contest as well. QSL via homecall.

NA-067, W4, North Carolina State East group: Jon,WB8YJF/4, will be QRV again
    from Ocracoke Island (USi NC001S, WLOTA 0466) working in CW, RTTY and
    SSB on 80m-10m from Jul 22-29 (incl. IOTA Contest). QSL via homecall.

Lighthouse activities

FP/VA2WA   LH 1417 Jul 20-31
FP/VE3DZ   LH 1417 Jul 20-31
TK12IOTA/p LH 0098 Jul 18
TO2D   LH 1395 Jul 23-31

WFF activities

DLFF: The German club Elbe-Elster (Y43) plans to spend its fieldday in the
    nature park "Niederlausitzer Heidelandschaft" (QTH Zeischa, DLFF-091)
    from Jul 20-22. They will be QRV as DL0LIB/p and with their individual
    homecalls/p on HF and VHF. See also: http://www.y43.info

FFF: Daniel,F8GAF, will be QRV from FFF-372 on Jul 22. QSL via F8GAF.

YVFF: YW2OM is the callsign of a DXpedition to the Sierra Nevada National
    Park (YVFF-042, YVAO-01, YVMA-01-02). Their location will be the
    "Observatorio Astronomico Nacional de Llano del Hato" in Merida from
    Jul 19-24. Operation is planned to take place in SSB, CW and digi mode
    on 2m-160m. QSL via YV5AJ (bureau/direct).

New DXCC entity Kosovo soon?

Almost four and a half years after obtaining its independence the Kosovo,
former province of Serbia, shall receive its full sovereignty in September.
This was decided by the International Steering Group, as the Austrian

Foreign Minister Michael Spindelegger announced in Vienna last Monday. Accordingly, the group decided to end international supervision with immediate effect to support the independence of Kosovo. 25 countries are belonging to the International Steering Group, including Germany and most other EU countries, the United States and Turkey. The concept of "supervised independence" was invented by the former Finnish UN Special Envoy for Kosovo Martti Ahtisaari. The meeting of the group in Vienna was attended also by the Kosovo Prime Minister Hashim Thaci.

Many thanks for contributing to this issue of the DXNL are going to: Carl Smith (QRZ DX), 425DXNews, OPDX Bulletin, DF6EX (WIN-QSL), DJ5AV, DJ9ZB, DL1SBF, DL1THM, DL7AV, DL7MAE, F6AJA & Les Nouvelles DX, IZ3EBA, NG3K, OZ1ADL, SV1CDY, VA3RJ and others.

Surfin': How's DXCC?
TAGS: best thing, DXCC, dxcc entities, dxcc program, Hermes, myself, Netherlands Antilles, qsl card, radio,software defined radio, Stan Horzepa
07/20/2012
By Stan Horzepa, WA1LOU
Contributing Editor
This week, Surfin' searches the Internet for the history of the DX Century Club.
Rich Holoch, KY6R, e-mailed me: "I would love it if someone would write an in depth account of the history of the DXCC program."
Searching the Internet, I found the A, B, Cs of DX: Fundamentals of the Art of DXing (An Interactive Tutorial) by Don Boudreau, W5FKX, which appears on the Delta DX Association website. Click on "Entity" in the article's Table of Contents and you will find "Some Historical Perspective" concerning "What Are DXCC Entities?"
How to Count Countries Worked -- A New DX Scoring System by Clinton B. DeSoto, W1CBD, is the article from the October 1935 issue of QST that W5FKX referenced in his article. This article was one of the first attempts to define a "country" for DX purposes.
I have not chased "countries" in awhile. So I dusted off the bits of my Excel DXCC spreadsheets and discovered that I had 291 entities confirmed. "Not bad for someone who just dabbled in the DX chase!" I thought to myself, because if I told this bit of news to my spouse, she just would not understand.
To impress myself some more, I compared my spreadsheet with a recent "100 Most Needed Countries" list and was pleased to discover that I had 16 of the top 20 on that needed list confirmed. On the other hand, I stopped chasing DX just about the time ham radio was restarting in China, so I don't have one QSL card with a B prefix!
There have been a lot of changes since I entered Bouvet in the log. Old countries became new countries (such as Czechoslovakia and the Netherlands Antilles) and old countries that were not ham radio-active back then are now on the air (like the aforementioned China), so I can probably push my confirmed total over the 300 mark with a little dabbling on the air.
And soon I will have a new radio to dabble with. I ordered a Hermes Software Defined Radio (SDR) transceiver from TAPR. I have written about SDR here and there many times; even as far back as 1996, but I have been holding off getting into SDR because I was always waiting for the next best thing.
I think that Hermes is the "next best thing" and I am very excited about the project. And I have put my money where my words are.
The Hermes order page will close Wednesday, July 25, so don't be late!
(Full disclosure: I am on the board of directors of TAPR; I am also its secretary and newsletter editor. Transparency? Now you can see right through me!)
Until next time, keep on surfin'!

RI0K/KL7RRC IOTA DXpedition 2012
Ratmanova Island (Big Diomode Island)AS-061 / Little Diomode Island NA-150 / Alyumka Island AS-092

ABOUT RAMANOVA:

Big Diomede Island (Russian: ostrov Ratmanova; native name Imaqliq) is an island among the Diomede Islands in the middle of the Bering Strait. The island is a part of the Chukotsky District of the Chukotka Autonomous Okrug of Russia.
Geography
Big Diomede Island is located about 45 km (28 mi) southeast of Cape Dezhnev on the Chukchi Peninsula and is Russia's easternmost point. The coordinates are 65°46′52″N 169°03′25″W / 65.78111°N 169.05694°W / 65.78111; -169.05694
The rocky tuya-type island has an area of about 29 km2 (11 sq mi) The International Date Line is about 1.3 km (0.81 mi) east of the island.

History
The island was originally inhabited by Yupik Eskimos. During the Cold War all local population was forcibly moved to Chukotka in order to prevent contacts with American Little Diomede island Inupiat inhabitants. Unable to assimilate or live among Russians, they have perished. The First Alaskans Institute says that, "The people of the Diomede and King Islands are Inupiat…".
The first European to reach the islands was the Russian explorer Semyon Dezhnev in 1648. The Danish navigator (in Russian service) Vitus Bering re-discovered the Diomede Islands on August 16, 1728, the day on which the Russian Orthodox Church celebrates the memory of the martyr St. Diomede.[4]
In 1732, the Russian geodesist Mikhail Gvozdev plotted the island's map.
In 1867 during the Alaska Purchase the new border between the nations was drawn between the Big Diomede and Little Diomede islands. (TNX to Wikipedia)

Navassa Island, May 12-15, 1972

Operators: Rick K3FPY, Ray K4PGM, Skip K4TMA, Wayne W2NSD/1, Chaz W4GKF, Phil W4GTS, Steve WA4VWV, Don WB4SST (now N4DK), Neil WB4UPC and Bill, WB4WMG (Names in bold were members of the SEDXC.)

The IdeaThis adventure began (the planning stages at least) at a Southeastern DX Club (SEDXC) meeting in October 1971. We were sitting around talking about going on a "real" DXpedition (not just another hotel/contest one) and I drew a 2,000 mile circle centered on Atlanta. We pored over the DXCC Country List and noticed a little island in the Top 10. The tiny (only 2 square miles) island is named "Navassa" and it's in the triangle formed by Cuba, Haiti and Jamaica. It's just a tiny dot on the map:

Everyone said, "Well, Navassa hasn't been activated in years, chiefly because access is controlled by the US Coast Guard and you'd never get permission to go there. There's no place to land a boat (40' cliffs surround the place) and it's really dangerous."

So I contacted the Coast Guard and my Congressman and received permission to go there. Wasn't too hard; but one did have to sign a lot of papers indicating you were "on your own" if any life-threatening problems arose.

"Oh, they said, you might be able to go there but you'll never get a KC4 callsign (that was then Navassa's prefix); the FCC isn't giving those out."

So I worked through the local FCC office (and my Congressman again) and was issuedKC4DX. That quieted the naysayers right down, I can tell you.

The PlanningI read everything I could about Navassa and there was a lot -- and this was thirty years before Google! The island had been used to mine phosphorite (initially mistaken for bird guano) for a phosphate fertilizer company (Navassa Phosphate in Baltimore) late in the 19th century. From what I could tell it was largely a slave labor situation. I mean, where could the miners go? They were literally in the middle of nowhere. In 1889 there was an uprising and several management-types were murdered. The mining operation was shut down and the place abandoned in 1901.

The Coast Guard thought it was a nifty place to put a lighthouse to aid in navigation, so one was built (162' high) in 1917. It was a battery-operated strobe and the CG would go there twice each year to service the light and change the batteries. (Before it was shut down in 1996, they used a helicopter from Guantanamo Bay to do that, but in the 60-70s it was done by boat).

The island looks like a porkchop:

There is a 40' cliff completely around the island; no beach, no harbor. The technique used to get from a boat to the island was this:

Anchor a safe distance away from Lulu Bay (an indentation in the island cliffs)

In a small boat, approach a 40' metal rope ladder dangling from a cantilevered catwalk extending some 30' over the water.

When you reach the bottom of the rope ladder (which is, BTW, unsecured at the bottom) you leap from the small boat to the ladder and scramble up.

Once on the catwalk, lower a line to a person in the boat and haul up whatever.

And if that doesn't turn you off, Haiti thinks they own Navassa Island. Possibility of conflict? You bet!

Now all I have to do is find a boat and a build a team -- oh, and collect everything we'd need to take with us. Navassa is (still) uninhabited and there isn't any drinking water there (let alone food or gasoline for the generators).

With the help of two Jamaican ham friends Lloyd Alberga, 6Y5LA and Chris Brennan, 6Y5CB I was able to hire a suitable boat, the "Tycoon". "Tycoon" was a 41' Hatteras Sports Fisherman with a captain and two-man crew. Since no one had much disposable income in 1971 (at least no one I knew), my next objective was to sign up as many team members as the boat would hold. With the three-man crew there was room for ten others. (As I write this, I'm struck by the headcount of thirteen -- a number any sailor would hold as at least potentially unlucky. Oh, well..)

NOTE: The photos on the rest of this page were scanned from 35mm slides taken nearly forty years ago. Their quality isn't up to contemporary standards -- but they're all we have; hope you enjoy 'em.

The Captain, "Busha" Jervis ("Busha" is slang for "boss" in Jamaica):

.. who'd been near Navassa before, estimated the trip as twelve hours (each way). We wanted to avoid hurricane season so we chose the dates of May 12-15, 1972 for our adventure. The plan was to fly to Kingston, Jamaica and spend one day/night at a hotel near the marina from which we'd sail. We'd sail after supper on Thursday May 11th and arrive at the island mid-morning on Friday. We'd unload and set up by early evening on Friday and be on the air. We'd operate around the clock Friday, Saturday and Sunday, break down early Monday morning and sail back to Jamaica arriving after dark on Monday, May 15th.

But getting there took a lot of recruiting and planning. Exclusive of air transportation to and from Jamaica, the total cost of the adventure was $5,000. That's right; in these days of six-figure DXpeditions it's hard to imagine one costing only $5,000. Of course we were only going to be on the island some 54 hours -- staying longer would have run the cost of the boat out of our sight.

Soooooo. $5,000/ten guys =$500 per man. Doable even in 1972. And that trip was the most fun I ever had for $500. For sure.

The next several months were spent in getting stuff together and publicizing our plans to the ham radio community. We got mentions in all the magazines every month and in all the DX newsletters. The world would be waiting.

The TeamWe recruited eight of the ten operators from the Southeastern DX Club (SEDXC); SEDXC members are shown in bold. Here they are:

K3FPY
Rick Feld
Philadelphia, PA

K4PGM
Ray Cobb (now SK)
Atlanta, GA

K4TMA
Skip Staub
Marietta, GA

W2NSD/1*
Wayne Green
Peterborough, NH

W4GKF
Chaz Cone
Atlanta, GA

W4GTS
Phil Latta (now SK)
Atlanta, GA

WA4VWV
Steve Smith (now SK)
Atlanta, GA

WB4SST
Don Kasten
(now N4DK) Roswell, GA

WB4UPC
Neil Stone
Atlanta, GA

WB4WMG
Bill Donovan
Marietta, GA

(*)Yes, that Wayne Green, controversial Editor and Publisher of 73 Magazine. Wayne had been to Navassa before and he wanted to document the trip for an article in the magazine. The article appeared in the fall of 1972. It was a very nice job although he was a little hypercritical of one of the guys.

We decided that we had enough people to operate three rigs at the same time. We were lucky enough to get a Swan 500C transceiver donated and it became our main rig:

We also took along two Heathkit SB303 Receiver/SB401 Transmitter stations (owned by Neil WB4UPC and Bill WB4WMG) and that was it, radio-wise:

Oh, yes, we took along several Drake TR22C 2M rigs (remember them?)

.. for communication around the island and to the boat.

Our antennas were dipoles, a Mosley Classic 33 tribander and a Hustler 4BTV vertical.

We had a pair of Homelite generators (2.5KW if memory serves):

The plan was to have two rigs relatively close together but operating on widely different bands and the third rig some distance away.

Bill, WB4WMG was assigned the overall quartermaster planning function.

Neil, WB4UPC had the power/equipment maintenance role.

I took care of being treasurer, handling publicity, travel arrangements and crew scheduling.

Ray, K4PGM was cook and bottlewasher.

Steve, WA4VWV and Skip, K4TMA had the antenna job.

Wayne, W2NSD/1 and I shared the photographic mission.

The rest of the guys pitched in where needed.

In March we had everything together (except the fuel, water and some foodstuffs which we planned to buy in Jamaica) so we set it all up in my backyard to see what bits and pieces might be missing. Everything worked well.

Rick, K3FPY was a friend of Don (WB4SST) and we met him for the first time when we boarded our flight to Jamaica in Miami. Rick would be our primary CW operator. With travel the way it is now after 9/11, he wouldn't have made it on the flight. All of his belongings were in a bright yellow army surplus watertight case clearly stencilled "Bomb Tossing Computer" on all six sides. And he was wearing a T-shirt with a giant marijuana leaf on the chest. No problem.

We arrived in two groups in Jamaica (carrying the rigs as carry-on baggage), loaded our 2,000 lbs. of gear into a couple of small vans and headed to the marina where we'd have dinner and board the boat thereafter. We had no problem with Jamaican customs as one of our local Jamaican ham buddies, Chris 6Y5CB:

.. met our flights and smoothed things with the locals. Thanks to a few (budgeted) well-placed US dollars we were permitted to "transit" the country without our gear ever technically entering Jamaica. Equals no duty. Sweet.

We sail!I don't remember mentioning that I'd never been to sea. Never. In any size boat. Ours was a 41-footer which ain't all that big. Just after dinner Captain Jervis fired up the boat and off we went in our motor yacht "Tycoon".

Turns out that I get seasick pretty darned easily. My friend Bill WB4WMG tells me there are only two kinds of people in the world:

Those who get seasick
Those who have not YET gotten seasick.

What an unpleasant surprise. I heaved over the rail for the entire TWELVE HOUR TRIP from Jamaica to Navassa Island. Truly. No fun -- and, thankfully, no photos.

Meanwhile, Neil WB4UPC loaded up one of the aluminum outrigger poles and made several maritime mobile contacts during the voyage.

The seas were a bit rough, averaging 8-foot swells. And it was a head-on sea; the boat would rise up and then fall and then repeat. For twelve hours. Not pleasant for "bad sailor" me.

We Arrive!Right on schedule we saw Navassa on the horizon (apparently our Captain knew the way all right!) at about 8AM and dropped the hook about 200 yards offshore at about 10:30a. Here's a photo of the boat taken with a telephoto lens from the island:

Why so far away? I mentioned that the island is ringed by 40 foot cliffs. With an 8-foot sea, the waves crashed heavily into the cliffs -- right at our intended access point, Lulu Bay. So the captain elected to anchor well away from the waves/breakers to protect the boat. The plan was to row from the boat to the island in the boat's dinghy.

I've told you about 8-foot seas in a 41-foot boat. Now imagine 8-foot seas in an 6-foot boat. And one without a motor.

The boat crew consisted of two lads, Richard (the first mate):

.. and Joseph (the other guy):

Richard had the physique of a body builder. Joseph was a little scrawny guy about 5' tall. Guess who got to row?

Yep. The plan was for Joseph to row one or two of us and 75-100lbs of gear the 200 yards from the boat to the island:

Then what?

Catch the rope ladder and scamper up. Right.

Who'd be the first to go? As DXpedition leader I pre-empted everyone else because I HAD TO GET OFF THE $^%#%#% BOAT! So I went first. All Joseph and I took with us was a u-bolt, a small pulley, 100' of nylon line and a bundle of supplies. Off we went.

Did I mention I wasn't a good sailor?

I wasn't sick on the way over to the island; I think because I was so anxious to get onto dry land again. The tiny dinghy would disappear between swells; you'd see water 6' above our heads on all sides when in a trough and in a few seconds we'd be high up above everything on wave crests.

When we reached the ladder (thank goodness it was still there -- we didn't have a backup plan). I timed the rise and fall of the dinghy, grabbed a rung of the ladder and let the boat drop away.

There's a trick to climbing a rope ladder where it isn't secured at the bottom. You climb up the edge of the ladder straddling the rope and putting a foot on either side onto a rung. It's not difficult and I was in a hurry to get onto dry land.

At the top:

That's me on the catwalk, Richard, Steve WA4VWV and (poor) Richard in the dinghy.

.. I affixed the pulley to the rail of the catwalk, threaded the line through and ran it down to Joseph. He attached it to a bundle and I hauled it up. Joseph returned to the boat for the next player/load.

Poor Joseph did this dozens of times without complaint:

Richard, Don WB4SST, Ray K4PGM and Richard

Don on his way up..

Me watching Steve WA4VWV pull on the rope

Finally we were all ashore with all our gear -- except that one operator refused to make the trip. Phil, W4GTS was 53 years old at the time (the rest of us were in our 30s except for Wayne W2NSD/1 who was fearless) and was not comfortable with the "dinghy, 8-foot sea, rope ladder" thing. We all appealed to him and he finally made it over unscathed. Attaboy, Phil!

What a shame it would have been to come all that way and then miss out on the fun part!

The SetupWe set up camp under Don's direction:

We got the radios, antennas and campsite assembled and, at about 4pm, made our first scheduled contact with our Atlanta-based communications station, Dale K4ROZ. I worked Dale on 20 Meter SSB as W4GKF/MM so as not to give away that we had actually landed. Once I let Dale know that we were all OK and to call the wives to tell them, we signed off.

The OperationThen I said: "QRZ KC4DX" -- and the world erupted! Unless you've been on the DX-end of a worldwide pileup, you simply cannot imagine the cacaphony. It sounded like I imagine 500 ducks would sound like stuffed into a blender. You could hardly pick out a single letter of a callsign. But, we did and we were off and running. Since our main rig was a transceiver, we were unable to work split (as is the custom today), so managing pileups on your own frequencey was a major challenge.

We were all really excited and the bands were open to somewhere all the time. We only broke for food when we were starving; a good thing, too because Ray K4PGM (our cook):

.. was 50% of our CW operation!

The layout was, as planned, with two rigs near each other and the third some 100' away:

Because of the layout of our campsite, the two rigs were "up-the-hill" and the third was "down-the-hill". The "hill" was about a 10% grade. The generators were set up between them.

The generators precipitated our first intra-group conflict. Neil WB4UPC was in charge of the elecrical system as well as electronic maintenance. He had devised a simple switching device to handle the 110VAC. It worked like this: Neil placed the two generators about 100' apart. The output from the generators ran down heavy #4 rubber-covered cable to a switch box. From there, cables ran to the three operating positions. A single generator ran the whole thing; when it needed fuel (about every 40 minutes), someone would start the other generator and then flip a switch (this happend so quickly that it never interrupted power on the rigs). They'd then shut down the out-of-gas generator and refill it for the next cycle. Worked well. The generator refueling task rotated among the operators.

Neil reasoned that separating the generators would prevent a fire from taking them both out. Made sense.

What he didn't think through was that the refueling process involved a pretty good hike (uphill one way) and then back carrying five-gallon gas cans. Skip K4TMA, when it was his turn, would move the generators together to ease refueling. Neil would notice that they had moved together and move them apart. Skip would move them together; Neil would move them apart. When they finally caught each other doing this it almost came to blows! Good thing that it was "almost" because Skip outweighed Neil by a good 70lbs...

The literature available on Navassa says it doesn't rain there in May. So we only had one tent and the rest slept on cots under the stars:

But the guidebooks were wrong. It rained a little every afternoon:

Unplanned ExcitementLate Saturday night I was operating 20M SSB and someone came by and announced that there was a large ship in Lulu Bay. This was a cause for some alarm since the ownership of Navassa Island was disputed by Haiti. This dispute was many years in the making. While we had Coast Guard permission to be there, we definitely did NOThave Haitian permission and it could have been dicey if the ship in the bay was a Haitian gunboat.

It wasn't.

It was, however, a Russian fishing trawler:

The captain of that ship had been in touch with our captain and had learned that a bunch of radio techies were on the island. The Russian ship had long-distance radio trouble and wondered if one of us would take a look. Captain Jervis radioed us on 2 meters and Neil WB4UPC volunteered to take a look.

It's deep in the middle of the night. The Russian ship sent a rubber Zodiak lifeboat over to the island, Neil lowered his 80lb. tool box down the line and climbed down the rope ladder and into the Russian tender. And off they went.

I can't imagine what it would have been like climbing down that rope ladder in the pitch black night.

They returned Neil to the island several hours later. He had successfully repaired their radio and they were very appreciative. So much so that they gifted our captain with a rubber fuel cell containing fifty gallons of diesel fuel:

You'll see the importance of this bit of extra fuel later.

ExplorationOn Sunday, when the pileups were ebbing, a few of us went to explore the rest of the island. When the phosphorite mining was going on in the 19th century, they'd laid a narrow gauge rail line from the top of the island (where the mine was) down to Lulu Bay. We were able to follow that roadbed and avoid the sharp rocks and cactus that was thick everywhere:

Here's our first glimpse of the lighthouse as we hiked up to the highest point on the island:

The lighthouse was padlocked so we couldn't get in:

.. but we did explore the ruins of the buildings. Some walls were still standing more than seventy years after the occupants left Navassa:

One of the oddities was a three-holer latrine built over a deep shaft. 400' deep we estimated (by dropping a rock and listening for the clunk/splash at the bottom):

There was a lot of graffiti on the remains of the buildings. We added our own:

Yes, Steve couldn't remember Bill's call -- hence the strikeout. The typo was scratched out and the proper callsign inserted at the bottom... I just noticed that Rick's call is mis-spelled as K3FBY instead of K3FPY; maybe tne next visitors to Navassa can fix that!

Goin' Home!Our arrangement with the boat was that it would stay near the island all the time we were there; they took little fishing trips to allay their boredom but they were always back in Lulu Bay by nightfall.

We were going to leave on Tuesday but the Captain advised us on Sunday that the seas were building so we elected to break camp and leave the island Monday instead. Reversing the process was a bit easier (climbing down a rope ladder beats climbing up one!)

On the trip home I didn't have one bit of seasickness. This time the seas were 90° to our direction of travel and apparently the rocking motion doesn't bother me. Also the pressure from the responsibility of the DXpediton was pretty much off my shoulders by then. No one had been hurt, we made 5,500+ contacts and had a great time.

As we came into sight of the harbor at Kingston:

..one last little challenge awaited us.

It turns out that the little fishing excursions our captain and crew went on (while we were making contacts) used more fuel than expected. Even with the fifty gallons that Neil's talent had secured for us, the "Tycoon" ran out of fuel fifty feet from the dock in Kingston! We coasted into the berth on momentum.

My bride Gael, our eleven-month-old daughter Kristyn and Ray's bride B.A. were there at the dock with Chris Brennan 6Y5CB to welcome us. On Lloyd's suggestion we'd booked rooms at the Rose-Neath Hotel in Kingston for the night. Gael, Kristyn and B.A. had already checked in and reported that it was lovely. They noticed quite a number of young ladies at the hotel.

Turned out that the Rose-Neath Hotel is a brothel. We didn't know and, when we did, we didn't care!

I built an 80-slide presentation that I gave hundreds of times; some of the pictures on this page were scanned from those slides. This one is the title slide (crude but, remember, it was 1972!):

One of the advantages of having a ham radio magazine publisher along on your DXPedition is that you can often get an issue of the magazine devoted to the trip. Here's the cover of the August 72 issue of 73 Magazine:

Click HERE to read the article.

Fund raising (after the fact)..In our extensive planning we forgot that there would be post-DXpedition expenses that were going to invade our wallets -- among them, the decision to go with a full-color QSL card (not cheap in those days; see top of this page). So we

came up with the idea of selling "shares" in the DXpedition at $2/share. Didn't work too well but it covered the costs; here's mine:

(Click to see it larger)

News!At the Southeastern DX Club (SEDXC) meeting on July 19, 2012, I presented the KC4DX story; 30% of the original team was there:

Bill WB4WMG, Chaz W4GKF and Don N4DK

Here's a letter from Neil WB4UPC:

Here's a 13 minute video made from the super8 film shot by Steve WA4VWV on the trip:

And so it's over..Navassa was a tremendous experience and I've been dining out on this story for forty years. We made 5,700 contacts (not a lot by today's standards but we only operated for 50 hours). QSLs and the logs are still available so if you worked us and need a card, just click HERE to let me know!

73 es gud DX,
Chaz, W4GKF

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1071
BID: $OPDX.1071
July 23, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, WP3GW, N4AA & QRZ DX, N4JF, W5KNE, KH6BZF, AA7JV, K8GI, K8YSE, WB8BBQ, W8GEX & 60m News, W9ILY, 9M6DXX, AT International, CO8ZZ, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, F6FQK, G3SWH, G4IRN, HA0HW, I1JQJ/IK1ADH & 425 DX News, IK7XIV, IW3SQY, IZ2LSC, OH1MN, ON4LN, ON4TO, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, TA3J, VA3RJ & ICPO, VE3ZIK, the VHF-DX-Portal (MMMonVHF) and YF1AR for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 15th-July, through Sunday, 22nd-July there were 209 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OZ, P2, P4, PA, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB,
YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
2O12, ENGLAND (Update - Special Event Amateur Radio Station for the London 2012 Olympic and Paralympic Games)
Publicity Liaison Officer John Warburton, G4IRN, sent out the following "Press Release #5" on July 16t:
"As a celebration of the London Olympic and Paralympic Games, two flagship amateur radio stations will be active during the Games as part of the Cultural Olympiad.
>The Cray Valley Radio Society is to host England's celebration from the Royal Borough of Greenwich, home to many of London's events outside the main Olympic arena. The call-sign used will be 2O12L (two Oscar one two Lima).
>A similar amateur radio celebration is happening in Barry, south Wales, where the call-sign will be 2O12W (two Oscar one two whisky).
>Both teams are looking to make as many contacts as possible throughout the world during the Games, particularly with countries participating in the Games. They will be operating 24/7 from Wednesday 25th July until Sunday 9th September and will be open to the public

from Thursday 26th July. The London station will be open from 10am to 4pm and the Welsh station from 10am to 5pm daily.
>Commemorative QSLs will be available for both stations, QSL details are on the web site. It is hoped that Clublog and LOTW uploads will be made during the event.
>For more information about the stations, their locations, operating frequencies etc., their web-sites can be found at
>www.2o12l.com and www.2o12w.com."3B8, MAURITIUS
Alex, IW5ELA, will be active as 3B8/IW5ELA from hotel "Le Cannonier" between September 6-12th. Alex is part of a honeymoon trip with his wife Michela that will take him through Corsica, Mongolia, Finland and now Africa, so activity will be holiday style on the bands 20/17/15/12 meters using CW and SSB. He will use a FT857 with 100w into a vertical and operate mainly CW. QSL via his home callsign, direct or by the Bureau. Visit his special Web page at:http//: honeymoonafrica2012.jimdo.com
5R, MADAGASCAR (IOTA Op!)
Moise, F4EZG, will once again be active as 5R8VE, but this time from Nosy Alanana (AF-090) in the Tamatave region between September 1-3rd. Activity will only be on 20 and 15 meters. QSL via F4EZG.
9A, CROATIA
Zik, DK8ZZ/VE3ZIK/YT3ZZ, will be once again be active as 9A/VE3ZIK from Croatia between June 24th and August 18th. This time he will be focused on 6m, WFF and IOCA (Island of Croatia Award) activity. Prior to RSGB IOTA Contest (July 28-29th), he will be active from Zirje Island (EU-170 & CI-151). QSL via DK8ZZ, by the Bureau or LoTW.
9H, MALTA
Ignacio, EA2BD, will be active as 9H3BD until July 30th. Activity will be QRP on 20 meters using CW and SSB. QSL via his home callsign.
9M, SPRATLY ISLANDS
Operators John/9M6XRO and Steve/9M6DXX will be active as 9M4SLL from Pulau Layang Layang, Spratly Islands (AS-051) between August 7-13th. Activity will be on all bands from 80-10 meters using CW, SSB and RTTY, using two stations with linear amplifiers to vertical antennas on the edge of the ocean. Spratly Islands are ranked 29th in the current The DX Magazine ‘100 Most Needed Countries’ survey (world-wide, mixed modes), up from number 32 last year. The QSL Manager for 9M4SLL is Tim Beaumont, M0URX. QSL direct with SAE + 2 USDs or 1 new IRC, OQRS
(see http://m0urx.com/oqrs)or via the RSGB bureau (all bureau cards MUST be marked "via M0URX"). Logs will be uploaded to LoTW as soon as possible after the end of the operation (within a few days), but there will be NO online log during the DXpedition itself. If you are not certain of any QSO you are welcome to work them again for an 'insurance' contact.
9M6XRO and 9M6DXX would like to thank the Malaysian Prime Minister's Department National Security Council for granting the operating permission from Layang-Layang Island. They would also like to thank Amid Drajak, 9W6ABD, of the MCMC licensing office in Kota Kinabalu for issuing the 9M4SLL licence, as well as the President of the Borneo Amateur Radio Club, Hamid, 9W6MID, and Rahim, 9M6RHM, for their help in obtaining the licence. Pekka, OH2YY, was of great help with the initial planning of the trip.
Finally, thanks go to Vicky Lee of the Layang Layang Island Resort for her help in making this operation possible. (Note for users of computer logging programs: The 9M4 prefix is issued to special event stations that may be anywhere on Malaysian territory; this includes the DXCC entities of West Malaysia, East Malaysia or, as in this case, Malaysian islands in the Spratly group.)
A2, BOTSWANA
Arnold, WB6OJB, will be active as A25JB from Botswana between July 24-31st. Activity will be on HF bands, 40-10 meters using mostly SSB with some CW. QSL direct to his home

callsign.
CG3, CANADA (Special Event)
Members of the Niagara Peninsula Amateur Radio Club (NPARC, VE3VM) will be active as CG3B until the end of the month of July. Activity is to celebrate the 200th Bi-Centennial of Friendship between Canada and the United States of America. Operations has been on 80-6 meters, CW, SSB and the satellites. Frequencies are available on QRZ.com. QSL Manager is VE3FOI. All contacts will receive QSL via Bureau system.
CR3/CT9, MADEIRA ISLANDS
German operators from the RRDXA will be active once again as CR3L during the CQWW DX RTTY Contest (September 29-30th) as a Multi-? entry. This team has won the 2009, 2010 and 2011 competition from their QTH in Santana (Northern part of the island). The crew is still looking for one or more good contest operators on this mode. The length of stay on Madeira is one week. Communication: English and German languages. If interested please contact Hans, DL1YFF at: dl1yff@... More information is available on Han's Web page at: http://www.dl1yff.deAlso info on the Crew's Web site at:http://www.CR3L.deQSL via DJ6QT. Operators will probably be active as CT9/homecall before and after the contest.
CY9, ST. PAUL ISLAND (Update)
The CY9M St. Paul Island DXpedition is expected to be active this week between July 26th and August 1st. The team of five operators will have six Elecraft K3 transceivers, four amplifiers, three Hex Beams and a number of other antennas. They will be active on all bands between 160-6 meters using CW, SSB and the Digital modes. Suggested frequencies are:
CW - 1826.5, 3526, 7026, 10106, 14026, 18076, 21026, 24896 and 28026 kHz
>SSB - 3793, 7185, 14215, 18160, 21295, 24950 and 28485 kHz
>RTTY - 7035, 10145, 18105, 21090, 24925 and 28090 kHz
>6m - 50105/CW and 50105/SSBAll contacts will be verified via LoTW after their activity, and for those who want paper QSLs, Tim Beaumont, M0URX, will be the QSL Manager. The log will be available through ClubLog.
The following was posted on their Web page Wednesday, July 18th:
"With under week to go before the CY9M team leave their respective homes for the journey to St. Paul Island, we are happy to report all radio equip- ment has arrived safely to Nova Scotia and now in secure storage. Ad- ditional items such as generators will be collected as we travel to Bay St Lawrence, NS. QRV date of July 26th is unchanged. Look for some of the team to sign VE1/home call on July 25th. See you in the pileups!"PRESS RELEASE #4 (Dated July 20th) - RSGB IOTA Contest Participation (July 28-29th):
"The CY9M team will participate in the IOTA contest next weekend giving both DXCC and IOTA hunters the chance to confirm NA-094. Our contest operation will be limited to 20 meters only please do not ask for a contest exchange on other bands.
>We will operate both SSB and CW modes throughout the contest. The contest log will be merged with the regular DX operation, so there is no need to work us twice. Your contest contact will be valid for DXCC.
>The CY9M QSL card will be used for confirmation and the log will be uploaded to LoTW. Contest log will be submitted to the RSGB IOTA Committee.
>CY9M St Paul Island Expedition starts next week, visit our website at
>www.cy9m.comIf you like to help out, please go towww.cy9m.com/donorTOPBAND NEWS - CY9M on Topband next week
Björn, SM0MDG/SE0X, posted the following on the TopBand Mailing List on July 21st [edited]:
"Greetings, This Tuesday I am boarding my flight with destination Halifax, Nova Scotia, to be part of the 10 man team going to CY9 St Paul Island this week. I have gotten several requests from my Topband friends, so I thought I'd hand out some brief information about our operation here.
>CY9M will be active on Topband during the few dark hours we have available to us. We will

use a top loaded vertical based on the 18 meter Spiderbeam pole with elevated radials.
>Depending on WX, we have zoomed in on two possible landing sites, one where we will have more space for antennas (Atlantic Cove) and the other will have less space but better takeoff in more directions (North Island). For, RX we have prepared both for pennants and beverages and will use what possible depending on location. We will use K3 radios and Acom 1011 amplifiers and DXE RX preamps.
>A special thanks to the topbanders who contributed to offset our costs, including the support from TBDXC to help offset the costs for shipping an Acom amplifier to be used for topband.
>Main operators on topband will be N2WB/"Wild Bill", AB5EB/Mike and me (SM0MDG/Björn).
>Our activity on Topband will most likely commence in the evening of August 26, and we are schedule to leave St Paul August 1st, so the last night will be July 31st. And as always, dates and times are dependent on weather and sea conditions.
>Also worth mentioning is that we will have a dedicated 6 meter station with main operator VE3EN, "Solarham" Kevin."Remember, the following media pages are available for this operation at:Website: http://www.cy9m.com/Twitter: https://twitter.com/#!/CY9MFacebook: ht tp://www.facebook.com/CY9M.2012
D6, COMOROS (Update to OPDX.1067/Web Page Change)
It was announced this past week that the D64K DXpedition to Ngazidja (Grande Comore), Comoros Islands (IOTA AF-007), which will be active between August 8-20th, has changed their Web page. The following was sent out: "Due to continuing problems with our web platform, we decided to migrate to a new system. Our new web address is: http://www.d64k.netThe old .com website will no longer be updated, and every post will be published only on the new site. For real-time news, our twitter account remains unchanged: @d64k
If you need to contact us, our E-mail support is: support@...
We apologize in advance for any confusion that will be created, and we thank you for understanding.....Cu on the air!"
DXPEDITION VIDEOS OF THE WEEK
With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2010 - 3B8/IZ4AKS & 3B9/IZ4AKS DXpedition: http://www.youtube.com/watch?v=G4MCCZu_V3Y
2008 - TX5C Clipperton Island DXpedition:
http://www.youtube.com/watch?v=NQSaZTkDYlQ (Part 1)
http://www.youtube.com/watch?v=YiFd65zZwwo (Part 2)
2002 - K1B Baker Island: http://www.youtube.com/watch?v=9WjAMvTwA4E
1990 - 1S0XV Spratly Island (w/Romeo, UB5JRR): http://www.youtube.com/watch?v=G8A6_5lf08w
If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.
EF8, CANARY ISLANDS (Cancelled/Rescheduled)
Luis, EA8AY, has cancelled his activity as EF8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the RSGB IOTA Contest. He has been invited to go with a Multi-Op station in other island. However, Luis has announced that he will be active in the CQWW DX CW Contest (November 24-25th) as a Single- Op/All-Band entry. QSL via W2GR.
EF8, CANARY ISLANDS
Operators Manuel/EA8ZS, Marino/EA8DP, Jesus/EA8RY, Tony/EA8AKN, Domingo/EA8CST, Severo/EA8NL, Dunia/EA8MT (YL), Felipe/NP4Z and Luis/EA8AY will be active as EF8U from Gran Canaria Island (AF-004) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via EA8URL. Visit:
http://www.ea8url.com
FK, NEW CALEDONIA

Tsuyoshi, JJ2NYT, will be active as FK/JJ2NYT from Grande Terre (OC-032) between July 29th and August 2nd. Activity will be active on 40-10 meters using CW, SSB and RTTY. QSL via his home callsign.
IOTA (EUROPEAN) ACTIVATION
Operator Giacomo "JACK", IZ3DBA, will be on a holiday style IOTA DXpedition to activate some islands from Sardinia and the Island of Corsica between July 22nd and August 17th. Here is his tentative schedule:
July 22-28th - La Maddalena Island (EU-041); callsign IM0/IZ3DBA
July 30th-August 5th - San Pietro Island (EU-165); callsign IM0/IZ3DBA
August 7-12th - Corsica Island (EU-014); callsign TK0/IZ3DBA
August 13-17th - Sardinia Island (EU-024); callsign IS0/IZ3DBA; Activity for WAIP AWARD - new province Ogliastra (OG), Medio- Campidano (MC) and CarboniaIglesias (CI).
His activity will be 80% on CW and 20% on SSB (NO DIGITAL MODE) using an ICOM IC-7400 w/100w into a vertical antenna HM (by Ampelio/IK3JBP). QSL via his home callsign, by the Bureau, direct, eQSL and LoTW. See (QRZ.com) for details.
IOTA NEWS
AS-006. Paul, R2AD/W8AY, will be active as VR2/W8AY from Lamma Island, Hong Kong, between July 28-30th. Activity will be active on 80-10 meters using the CW and SSB modes, and a TS-480 into a GP antennas. He will be active in the RSGB IOTA Contest (July 28-29th). QSL via R2AD, direct or by the Bureau.
AS-099. Berkin, TA3J, will be active as TA3J/0 from Yassica Adasi (Yassica Island, WW Loc. KM38KJ) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/DXpedition/SSB-Mode/12HRS/Low- Power entry. Activity will be on 80/40/20/15/10 meters. QSL via the TA3J QSL Service at: http://www.aydogmus.gen.tr/ta3j/qslservice.htm, direct (only SASE and 1 IRC, no green stamps please) or by the Bureau. No eQSL. SWL QSL cards are OK. Twitter: @TA3J
AS-105. Operators Sungki/HL1IWD, Aves/DS2AGH, Harry/WX8C and Jussi- Pekka/OH6RX will be active as DS0DX/2 from Kanghwa Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/ Multii-Mode/High-Power entry. QSL via HL1IWD.
AS-105. Kim "Tai", DS2NMJ, will be active as DS2NMJ/2 from Yonghung Island between August 12-13th. Activity will only be on 15 and 12 meters SSB. QSL via his home callsign, direct or by the Bureau; if possible, you want to use direct.
EU-004. Andrea, IZ2LSC, will be active as EA6/IZ2LSC from Menorca Island (WLOTA 2988, EAFF-061) between July 24-30th. Activity will be holiday style on the HF band 30-6 meters using CW, SSB and the Digital modes. He will take part in the RSG IOTA Contest (July 28-29th). QSL vis his home callsign, by the Bureau, direct and LoTW. His logbook page is at:
http://www.timpy.it/ea6To receive updates and news, follow him on twitter: @iz2lsc
EU-008. Members of the Cockenzie and Port Seton Amateur Radio Club (CPSARC) will once again operate from the Isle of Tiree (IOSA NH04, WAB NM04), the most westernly part of Scotland's Inner Hebridean Islands, during the RSGB IOTA (Islands on the Air) Contest which runs from 1200z, July 28th to 1200z, July 29th, using the club's special contest callsign GM2T. Look for pre-contest activity by the members signing as MM0CPS/P. This year's team consists of: Cambell/MM0DXC, Bob/GM4UYZ, John/ MM0JXI, Brian/M0RNR, Gary/MM0FZV, Cephas/ MM0INS, Robin/MM0VTV, MM0VPR, Geoff/MM5AHO, Steve/MM0GZA, Ellis/GM4GZW, Bob/GM4IKT, Brian/G3UJE. QSL GM2T via the Bureau, or their QSL Manager GM4UYZ, by the Bureau or direct. Also use LoTW and eQSL. Details are available at:
http://www.qrz.com/gm2tFor details about CPSARC, visit their revamped Web site at:http://www.cpsarc.comADDED NOTE: This is the club's 14th anniversary on the island, and the team would like to express their gratitude to all the islanders who have looked after

them over the years, but in particular to Elaine Hutchinson of Elephants End Restaurant (www.elephantsend.com) for her unrivalled support and hospitality over the last 14 years.
EU-030. Carten, OZ4CG, will be active from Bornholm Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/Low- Power entry. QSL via his home callsign.
EU-054. Sal, IT9BXR, will once again be active as IF9/IT9BXR from Favignana Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/24HRS/Low-Power entry. QSL via IT9BXR.
EU-073. Members of the IJ7A DX-Contest Group are pleased to announce their DXpedition to St. Peter Island, in the Cheradi Group, between July 26-29th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. The team is composed of the following operators: Gianni/I7PHH, Davide/ IK4DCT, Vin/IK7IMO, Art/IK7JWY, Piero/IK7VJX, Roby/IK7XIV, Bartolo/IW7ECA and Luigi/IZ7PDX. QSL via IK7XIV. See their contest Web site for more details at , or follow them onTwitter: @ik7imo_ij7a
EU-096. A group of operators will be active as OH10TA from Kustavi Island during the RSGB IOTA Contest (July 28-29th) as a Multi- Op/Low-Power entry. Preparations are been done and antennas are being tested for the activation. They will also have equipment for 6m. Locator is KP00PN. Kustavi Island is approx. 70km northwest from Turku City. QSL via OH1MN.
EU-096. Riku, OH2CI, will be active as OH2CI/P from Kustavi Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ CW-Mode/Low-Power entry.
EU-110. Operators Silvo/S50X, Krajcar/S52P, Vinko/S53F, Drgan/S55Z and Franc/S56UGB will be active as 9A8ZRS from Sveti Ivan Island (CI112) during the RSGB IOTA Contest (July 28-29th) as a Multi- Single entry. The group will be on the island between July 24-30th, using 2 stations on HF and possibly 6/2m as well. QSL via S57L. QSL will be sent automatically by the Bureau.
EU-124. Members of the Dragon Amateur Radio Club will be active as GW4TTA/p from Holy Island (Anglesey) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Island entry. Operators mentioned are Stewart/GW0ETF, John/GW3VVC, John/MW0BER and possibly others. The team will use simple wires/verticals. QSL via GW4TTA by the Bureau or LoTW.
EU-125. Operators Gaby/DF9TM and Frank/DL2SWW will be active as OZ/homecall from Römö Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/12HRS/High-Power entries. DF9TM will operate on SSB and DL2SWW will be on CW. QSL via their home callsigns by the Bureau.
EU-129. A German group will be active as DM3X/p from Goermitz Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via the Bureau.
EU-136. Kordic, 9A4KJ, will be active as 9A4KJ/p from Rab Island in the Kvarner IOTA group during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mix-Mode/12HRS/Low-Power entry. He is expected to be on the island between July 26-29th. Activity will be on 80/40/20/15/10 meters using a Kenwood TS 140S into a vertical, Inverted Vs and dipoles. QSL via his home callsign.
EU-140. Members of the OH5AD group and possibly others will be active as OG5A from Kuorsalo Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. QSL via OH5AD.
EU-146. Operator Ron, ON6CQ, will be active as PA/ON6CQ from Schouwen Duiveland, Netherlands, during the RSGB IOTA Contest (July 28-29th) as a Single-Op/SSB entry. QSL via ON6CQ, by the Bureau (preferred) or LoTW.
EU-170. Operators Alen/9A3MA, Ivo/9A1AA, Zlatko/9A2EU, Rolando/9A3MR, Rax/9A3BMR and Zik DK8ZZ/VE3ZIK/YT3ZZ will be once again be active from Zirje Island (CI-151) but as 9A0D (first time using this call) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Single-TX/DXPN/Low-Power entry. All QSOs will be automatically confirmed via the Bureau. However, if you need a direct QSL, please send it to DK8ZZ.
EU-170. A Hungarian team will go to Pasman Island (CI-085), Croatia, this year again. The team will be active between July 24-31th, from two villages - Tkon (JN73RW) and Kranj

(JN73QW). Activity will be on the HF bands and 6m, using CW, SSB and the Digital modes. They will take part in the RSGB IOTA Contest (July 28-29th) too. Look for the following operators (w/QSL routes):
9A/HA7PL Operator Laci; via Bureau or direct
9A/HA6NL Operator Laci; eQSL, by the Bureau or direct
9A/HA6PS Operator Zsolt; via Bureau or direct
9A/HA6PJ Operator Jani; eQSL, by the Bureau or direct
9A/HA7JJS - Operator Sanyi; by the Bureau or direct
EU-172. Henning, OZ1BII, will be active as OU2I from Aro Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ Low-Power entry. QSL via his home callsign.
EU-174. Laci, HA0NAR, will be active as SW8LR from Thassos Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ CW-Mode entry. He will be on the island between July 25th and August 1st. QSL via his home callsign.
EU-177. Matthias, DL3KUD, will be active as SM5/DL3KUD from Kättilö Island between July 27-29th. Activity will include the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/24HRS/ Low-Power entry. QSL via his home callsign.
EU-178. Juri, ES5GP, will be active as ES5GP/8 from Kihnu Island between July 25-30th. His activity will include the RSGB IOTA Contest (July 28-29th) on all HF bands on SSB. QSL via his home callsign.
EU-181. Operators Stan/LZ1GC, Dechko/LZ1QV, Boyko/LZ1QN, Boris/LZ2JR, Nasko/LZ3YY, Lliam/LZ1CNN and possibly others will be active as LZ0I from Sveti Ivan Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Single/DX/High-Power entry. QSL via LZ0I (by the (QRZ.com) address) or by the Bureau to LZ1BJ.
NA-010. Alan, VE1AL, will be active from Cape Breton Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/ Low-Power entry. QSL via VE1AL.
NA-081. Operators John/VE1CDD, Barry/VE1TRI, Alan/VA1MM, Fraser/VE1WO, Sheldon/VE1GPY and Greg/VY2MP will be active as VC1X from Little Tancook Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Mixed-Mode/High-Power entry. QSL via VE1CDD.
NA-091. Rob, VE7RSV, will once again be active as VE7RSV/P from Broughton Island (CISA BC-026), located in the Broughton Archipeligo just east of Port McNeil towards the Mainland, during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ SSB-Mode/24HRS/Low-Power entry. He usually uses a FT-857 with a G5RV antenna about 35 feet high. He prefers to QSL direct or by the Bureau.
NA-137. Several members of the Long Island DX Society will be active as N1LI from Long Island, ME, during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via N1LI.
NA-148. Scott, NE1RD, will be active as NE1RD/1 from Lovell Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ SSB-Mode/24HRS entry. QSL via his home callsign.

Members of the Movimiento Radioaficionados de Puerto Rico will celebrate the 60th anniversary of the Constitution of Puerto Rico with the special event callsign K4C on July 25th, from the Julio Enrique Monagas National Park in Bayamon. They will operate from 10 to 40 meters SSB and their local net of repeaters from 1400z on. QSL info is via WP4NPC.
M0, ENGLAND
Phil, G3SWH, will activate the special callsign M0RSE on CW only on all bands over the

weekend of 18th and 19th August, 2012. All QSOs will be uploaded to LoTW immediately after the weekend. There will also be an on-line log at www.g3swh.org.uk/m0rse.htmlSpecial QSLs are available via G3SWH, either via the OQRS facility atwww.g3swh.org.uk/decision.html(bureau or direct) or direct with SAE and adequate return postage or even via the traditional bureau route.

NH8, SWAINS ISLAND (Press Release)

The following press release was sent out on July 16th [edited]:

"Swains press release # 2

>Craig/K9CT and Joe/W8GEX are happy to report that preparations for the NH8S Swains Island DXpedition are on schedule. The 20 man international team should be on the island from September 4th, thru September 17th. Swains is # 31 most wanted worldwide. They will operate all bands with SSB, CW and RTTY.

>A big thank you goes to John/N7CQQ and Paul/W8AEF for their time in building and testing the SVDA's that will be used. Thanks also to Paul/W6XA and Tom/N4XP for testing the radios, amps and laptops. All of the equipment has been shipped to Arnie/N6HC in California for the upcoming departure via cargo ship later this week.

>The QSLing will be handled by Joe/AA4NN with help from his XYL Margarett. Plans are to upload logs daily by satellite phone from the island to Clublog.

>We are very grateful to our equipment sponsors, including: ICOM, Elecraft, VIbroplex, Innovantennas, DX Engineering, Heil Sound, Primus, Hi-Z Antennas, and The RF Connection. Also to Kimo, KH7U, for the 160m vertical, and George, W8UVZ, for the Battle Creek Special.

>We have updated our Web site with pictures, operating information and links. Thanks to John, K6MM, for doing the webmaster duties.

>There will be a great emphasis placed in working Europe where Swains is most needed. We will have several receiving antennas aimed that direction.

>It will be very hot and humid, and mosquitoes should be plentiful, so please have patience with the operators. We ask that you listen to the operator instructions to ensure we are able to work as many stations as possible.

>This tent and generator operation is a very expensive endeavor, and the group is most grateful for the foundations, clubs and individuals who have already contributed. For those that would like to donate, you may do so from our Web site at:

>http://www.nh8s.orgThe skilled international crew that is looking forward to working you includes: 9V1FJ, AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, KB8OCP, N2TU, N4HH, N6HC, NA6M, ND2T, SM5AQD, W4BUW, W6KK, W8GEX, W8TN and WB9Z."ON85, BELGIUM (Special Event)

Eric, ON4LN, President RCL, informs that the members of the Radio Club Leuven (RCL) will celebrate their 85th anniversary this year. They will be active using the special callsign ON85RCL from their RCL club shack and proudly. Activity begun on July 1st and will last until December 31st. Operations will be on all bands (6m if condx) and on various modes. For more info, see QRZ.com under ON85RCL or ON4CP.

OZ12, DENMARK (Special Event)

In connection with the largest Scout and Guide Jamboree ever held in Denmark, a special event station with the callsign OZ12SJ will be - very - active during the period between July 21-29th from Holstebro. Five "Jamboree On The Air" stations will be active on all bands. The activity includes many different JOTA activities within Amateur Radio and is supported by EDR, Eksperimenterende Danske Radioamatører, and members will be helping to activate and demonstrate the hobby to the Scouts. The activity also includes a license course and the option of actually taking a license test on site. The callsign is expected to be active in the DMC RTTY Contest, CQWW VHF Contest and the RSGB IOTA Contest QSL via the Bureau.

PT0. ST. PETER AND ST. PAUL ROCKS (Update/Funds Needed)

George, AA7JV, informs that his TX3A partner, Tomi, HA7RY, and himself have teamed up with

the Brazilian Aruacaria group to activate St. Peter and St. Paul Rocks under the callsign PT0S. As you may know, the Brazilian Navy has placed a permanent ban on DXpeditions to the rocks. Due to the efforts of Atilano, PY5EG, the Brazilian Navy made an exception and has given them permission to operate from the Rocks. This is a "once in a lifetime" opportunity to both activate the place and to prove to the navy that Amateur Radio is not incompatible with the operation of the scientific mission there.
Although there have been some small operations from this entity, it remains high on the most wanted list because conditions on the rocks are tough and a lack of level space precludes a large and traditionally equipped operation. PY0S is No. 16 on Clublog's most wanted list. George mentions that although they will work all the HF bands, they do have a low band focus. This time they would like to take things one step further and make PY0S easily available on all bands to small and midsize stations (as well as the big ones). They intend to achieve that even on 160 meters. The need for large antennas for serious DX on 160m has discouraged many small urban amateurs from getting on that band, where they feel they can not compete with the big guns in the pile-ups.
The proximity of PY0S to NA (and EU) creates a unique opportunity to activate a rare location that could be worked by modest stations from NA and Europe. They intend to make sure that this possibility is fulfilled. This will likely create a new level of excitement and increased activity on 160 meters. They have also developed a new beam antenna that will allow them to work very modest stations on 20, 15 and 10 meters. Additionally, led by PY5CC and PY2XB, they will also make a serious 6 meter effort. George states, "This will be a tough and costly mission for us. We will have to have a minimal environmental foot-print, while we want to make sure that we give this rare entity to as many hams as possible in the relatively short time frame available. We want to do our best, as we know that there may not be another DXpedition to this place for a long time.
The team is looking for financial assistance for this very crucial DX- pedition. In the past, Tomi and George have covered all expense (less donations received) and used their own gear. They did not mind roughing it on some remote island without much support (and on the cheap). This time, however, they are working against serious obstacles that are proving to be costly to overcome. They can not fund this operation themselves. They hope that clubs/associations/individuals would be able to help them. They most certainly promise to work hard to make the entire HF DX com- munity, happy. Please remember that this DXpedition will take place in the late November to mid December 2012 time frame. The actual dates will depend on weather conditions and will be announced later on their Web site.
An "Online QSL Request Service" (OQRS) will be set up on their Web site for both direct or Bureau QSLs. For direct cards via the mail, QSL via HA7RY (read details on the Web page). The log will be uploaded on LoTW, generally within 36 hours of the QSO taking place. For further information, please visit:
http://pt0s.com

QSLS RECEIVED VIA THE BUREAU: 8J1RL, BV2A, BV100, E51YNB, FJ/OS1T, HB0/SP7VC, OH0/SP7VC, PJ4C, T32JB, VK100WIA and YB9/F4BKV
T6, AFGHANISTAN
Stefan, DL4ST, will be active as T6SS from from Mazar- e-Sharif until end of September. Activity will be a on the HF bands, but so far it has been mainly on 20 meters using CW, SSB and PSK31. QSL via his home callsign.
TP8, FRANCE
The "Council of Europe Radio Amateur Club" (CERAC - TP2CE) will be active as TP8CE during the RSGB IOTA Contest (July 28-29th). Operations will take place before the contest, starting July 27th, and are usually on all HF bands and modes, possibly the satellites. QSL via F5LGF. An online log search will be available at:
http://www.tp2ce.eu
V6, MICRONESIA
Haru, JA1XGI will be active as V63XG from Yap Island (OC-012) between December 5-12th. Activity will probably be on 20-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Look for updates and details at:
http://ja1xgidxvacation.blogspot.com
V8, BRUNEI (Ops Needed)
Gabriele Villa, I2VGW, team leader of the next DXpedition to Brunei, announced that they are looking for some CW operators for the upcoming V84SMD DXPedition, November 11-23rd. If interested, please contact by E-mail to Gabriele at:gabrielei2vgw@...
VP2V, BRITISH VIGRIN ISLANDS
Steven, AA7V, will once again be active as VP2V/homecall from Virgin Gorda (Tortola) between September 26th and October 1st. QSL via AA7V.
WILL KOSOVO BE OUR NEXT DXCC COUNTRY?
Several sources are reporting that Kosovo, former province of Serbia, shall receive its full sovereignty in September, almost four and a half years after obtaining its independence. Stay tuned!
XP, GREENLAND
Henning, OZ1BII/OU2I, will be active as XP2I from club station XP1AB in Kangerlussuaq between September 13-17th. Activity will be CW only. QSL via his home callsign.
YB67, INDONESIA (Special Event)
Look for members of the YB Land DX Club (YBDXC) to activate special event station YB67RI between 0000z August 10th and 2400z August 17th. Activity is to celebrate the 67th anniversary of the independence of Indonesia. Activity will be on all bands and modes. QSL via YB2DX direct or LoTW only. NO YB Bureau cards.

Goodbye Post-Contest Log Massage; CQ Announces Five Day Log Submission DeadlineBy Jamie Dupree NS3T radio-sport.net
Posted July 21, 2012
In a major change, CQ Magazine has announced that effective with the CQ WW SSB Contest at the end of October, all logs must be submitted within five days after the end of the contest, drastically shortening the time that contesters will have to electronically submit their contest entries.
The announcement came on the CQ-Contest reflector from CQ WW Contest Chair Bob Cox K3EST.
"With the technology available today and the presence of the internet practically everywhere, it has been decided to reduce the log submission time for all CQ contests to five (5) days," Cox wrote.
"Reviewing the submissions from last year's CQ WW DX contests, ~ 70% of all electronic logs were received within 7 days after the contest," Cox said, acknowledging that the five day limit might cause some heartburn for certain contesters.
"We realize that in some cases circumstances may not allow a timely submission. Requests for an extension must be received before the log submission deadline by sending an e-mail to questions at cqww.com."
[Cox initially said the first contest impacted by this new change would be CQ WW RTTY in September, but CQ Magazine Editor Rich Moseson W2VU made clear on Monday that the change would not go into effect until the 2012 CQ WW SSB Contest in October.)
The decision accelerates what had been a general move to shorten the time for log submission by major contests; in 2010, CQ WW shortened the log submission deadline to basically three weeks, while the ARRL moved its submissions in major contests to 15 days.
The Fight Against "Log Massage"
It was less than a year ago that Cox led a public call by the CQ WW DX Contest against "log massage," which is basically defined as using outside aid *after* a contest has ended to alter your log and improve your score.
"CQ WW CC considers the use of post contest data sources as unsportsmanlike," was the message from the CQ WW Contest Committee in 2011.
It wasn't immediately clear if that appeal for "fair play" had been judged to be effective or not, but the move to institute a five day log submission deadline would certainly restrict efforts by contesters to make changes in their logs after a contest has ended.
Your contest result is a measure of your contesting skill," argued CQ WW Contest Committee member Doug Zwiebel KR2Q in a 2011 webinar on contest ethics.
Some have argued for immediate submission of logs as a way to avoid any post-contest log change issues - the 2010 WRTC used that in Russia, for example - but some opponents argue getting internet access for some isn't always easy.
Still, with this decision, the largest contests of the year are now edging towards more immediate log submission, which raises an obvious question.
"Does this also mean that the results will be available and published much quicker?" asked Rich N2WQ.
That has happened with the ARRL DX Contests; it wasn't immediately clear if CQ Magazine was heading that was as well.

http://cqnewsroom.blogspot.com/2012/07/erin-king-ak4jg-named-2012-young-ham-of.html

Erin King, AK4JG, Named 2012 Young Ham of the Year

Seventeen-year-old Erin King, AK4JG, of Columbus, Georgia, has been selected as the Amateur Radio Newsline Young Ham of the Year for 2012. She was recognized for promoting amateur radio through a video she made of launching the mailing tube in which her acceptance letter to the Massachusetts Institute of Technology (MIT) arrived as an amateur radio high-altitude balloon payload. The award was scheduled to be presented at the Huntsville (Alabama) Hamfest in August.CQ is a corporate co-sponsor of the Young Ham of the Year Award. For more on Erin, see September's "Zero Bias" editorial.

www.qrz.com/db/ak4jg

Daughter of K4ETY. MIT class of 2016!

Member of Columbus Amateur Radio Club (W4CVY) and Russell County Radio Club (WX4RUS). Founder and President of Columbus High School Radio Club (W4CHS).

I enjoy contests (Field Day, School Club Roundup) and using radio for high-altitude balloon missions. I am a part of the DREAMS high-altitude balloon program at Columbus High, and have participated in six flights so far. I also conducted my own balloon launch on January 16, 2012. The payload was my MIT tube - the container they sent my early-action acceptance letter in - containing two APRS trackers and a GoPro HD video camera. The mission was for MIT's "Hack the Tubes" project for the class of 2016's early admits.

3098. DXNL 1790 - Jul 25, 2012 DX Newsletter

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-26 02:15:30 UTC
From: Yb land Dx club
Topic: 3098 Message: 3098

DXNL 1790 - Jul 25, 2012
DX Newsletter

Due to the number of messages concerning the IOTA Contest this DXNL has
no calendar and QSL information.

4O, MONTENEGRO
The radio club "Bijelo Polje" celebrates its 60th anniversary by
using the special callsign 4O60GBP until the end of 2012. QSL via 4O3Z.

9H, MALTA
Ignacio,EA2BD, will be active as 9H3BD until July 30. Activity will be
IN QRP on 20m using CW and SSB. QSL via homecall.

A2, BOTSWANA
Arnold,WB6OJB, will be active as A25JB from Botswana between Jul 24-31.
Activity will be on 40m-10m using mostly SSB with some CW.
QSL via homecall, unfortunately only direct.

CY9, ST PAUL ISLAND
Mike,AB5EB, Bill,N2WB, George,EA2TA, Christian,EA3NT, Simon,IZ7ATN,
Col,MM0NDX, Bjorn,SM0MDG, Vicky,SV2KBS, Steve,VA3FM, and Kevin,VE3EN,
will be QRV as CY9M from Atlantic Cove on St. Paul (NA-094, CIsA NS003,
WLOTA 0166, Loc FN97) between Jul 26 and Aug 1. Operation will take
place in all modes on 160m-2m with emphasis put on 6m and 160m. They
will join the IOTA Contest in CW/SSB only on 20m. QSL via M0URX, LoTW.
See also: http://www.cy9m.com and https://twitter.com/#!/CY9M and
http://www.facebook.com/CY9M.2012

F, FRANCE
The Scout station TM12VTR will be active from Jul 27-30 from the
national jamboree "Vis Tes Reves!" (Live Your Dreams!) in Jambville.
Main operating frequencies will be 14290, 7190, 3690 and 3940 kHz.
QSLs via operator's instructions.

The Council of Europe Radio Club (CERAC) will be active as TP8CE from
Jul 27-29, including the IOTA contest. QSL via F5LGF.
See also: http://www.tp2ce.eu

FK, FRENCH NEW CALEDONIA
Tsuyoshi,FK/JJ2NYT, will be QRV in CW, SSB and RTTY on 40m-10m from
Grande Terre (OC-032) between Jul 29 and Aug 2. QSL via homecall.

G, ENGLAND
2O12L will be the callsign of the London ham radio station celebrating
the Olympic and Paralympic Games operating from Eltham Palace (JO01ak)
in Greenwich (EU-005, WLOTA 1841) between Jul 27 and Sep 9.

QSL via G4WNF. See also: http://www.2o12l.com

GB4GBO is another special event station during the Olympic Games which will be activated by the "Sands Contest Group" until Sep 10.
QSL via bureau or direct via G1LAT.

The special event station GB2VET celebrates the Army, Air Force and Navy Reunion's 10th anniversary, will be QRV from Jul 27-29 from East Park in the city of Hull. QSL via G0SWO.

The "Warrington Amateur Radio Club" will sign GB2012MV between Jul 25 and Sep 9. QSL via bureau. See also: http://www.gb2012mv.com

GW, WALES
Members of the "Barry Amateur Radio Society" (BARS) will activate the special callsign 2O12W in all modes on 160m-23cm. QSL via GW1FKY.
See also: http://www.2O12W.com

KP4, PUERTO RICO
The special event station K4C will be active on 40m-10m on July 25 to celebrate the 60th anniversary of the Constitution of the Commonwealth of Puerto Rico. QSL via WP4NPC.

OK, CZECH REPUBLIC
Vasek,OK2AN/p, plans to activate several castles between Jul 28 and Aug 4. QSL via homecall.

ON, BELGIUM
The radio club Leuven (RCL, ON4CP) celebrates its 85th anniversary by activating the special call ON85RCL until Dec 31. QSL via ON3AR.
See also: http://www.radioclubleuven.be

OX, GREENLAND
Bo,OX3LX, will be QRV again from HP15eo on HF-2m during his spare time. His main emphasis will be put on 2m EME and 4m ES. QSL via OZ1PIF.
See also: http://ox3lx.geronne.dk

PJ2, CURACAO
Anja,DH2AK, and Torsten,DL1THM, have planned another trip to Curacao and will be QRV as PJ2/homecalls from the clubstation PJ2A mostly in SSB on 15m and 20m between July 26 and Aug 1. QSLs via bureau to their homecalls, the direct QSL route can be found on QRZ.com.

UA0, ASIATIC RUSSIA
Victor,RW0BG/p, plans to work from Oleniy Island (AS-083, RRA RR-06-06, RDA YN-12) between Jul 31 and Aug 1. QSL via homecall, LoTW.

W, USA
Dave,N1EDU/p, is working from Bailey Island (NA-137/USi ME022S) and maybe also from other island in the Casco Bay until Jul 28.
QSL via K1HRO.

YA, AFGHANISTAN
    Stefan,DL4ST, works as T6SS from Afghanistan until the end of Sep.
    He is currently staying in Mazar-e-Sharif and wants to work in CW on
    14020 kHz and 7020 kHz or in SSB on 14195 kHz and 7095 kHz from 1200
    to 1600 UTC. QSL via homecall.

Safari DX Activators Club: The Safari DX Activators Club informs about its
    activities on its website: http://safari.16mb.com/wordpress

HQ Award: The "Brave Radio Friends" issue another special award for working
      at least 10 different HQ stations in the IAR HF World Championship.
    The diploma can be applied via e-mail to DE3EAR@... and will be
    sent in PDF format free of charge.

LINKS: Current SOTA activities (mountain summits) are announced at:
    http://www.sotawatch.org

    Detailed information about current VHF activities can be found on the
    VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Jul 28/29 RSGB IOTA Contest

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Information about the IOTA Contest:
    The IOTA Contest Team informs about some rule changes on their website:
    http://www.rsgbcc.org/hf/rules/2012/riota.shtml
    For example:
      - The World Multi OP category has been discontinued.
      - Island Multi OP stations must identify Run and Multiplier stations
        in their log.
      - The scoring for Island to World and World to World QSOs has changed
    The exact rules can be found on their website.

Island activities:
Due to the number of messages information is kept short this time.
The RSGB IOTA Contest will take place on the upcoming weekend of Jul 28/29.

AF-004, EA8, Canary Islands: The contest station EF8U (OPs EA8ZS, EA8DP,
    EA8RY, EA8AKN, EA8CST, EA8NL, EA8MT) is working from Gran Canaria
    during the IOTA Contest. QSL via EA8URL. See: http://www.ea8url.com

AF-018, IH9, Pantelleria Iceland: Raffaele,IH9YMC, will be QRV from
    Pantelleria (IIA TP-001, MIA MI-124, LOC JM56XT) in the IOTA Contest.
    QSL via eQSL only.

AS-006, Paul,R2AD/W8AY, will be active as VR2/W8AY from Lamma Island
    between July 28-30. Activity will be on 80m-10m in CW and SSB.
    He will join the RSGB IOTA Contest as well. QSL via R2AD.

AS-061, R0K, Ratmanova Island: RA5A, RL3AA, RW3RN, UA3EDQ and UA9OBA plan to
    become active as RI0K from Ratmanova Island (Big Diomede, AS-061) on

Jul 27-30 (incl. IOTA Contest). His next stop will be Alyumka Island (AS-092) from where he will be QRV as RI0K/p from Aug 3-5. QSLs for RI0K via RW3RN and for RI0K/p via UA9OBA. See also: http://www.ri0k.ru

AS-074, 9M2, Selangor/Negeri Sembilan State group: 9M2FB will join the IOTA Contest from Pulau Ketam (WLOTA 0150). QSL only direct via 9M2FB.

AS-083, R9K, Kara Sea Coast East group: Victor,RW0BG/p, plans to activate Oleniy Island (RRA RR-06-06, RDA YN-12) from Jul 31 until Aug 1. QSL via RW0BG (bureau/direct). The logs will be uploaded to the LoTW.

AS-099, TA, Canakkale/Balikesir/Izmir Province group: TA3X, TA3TTT, TA3GO and TA3ATA will sign TC0P from Celebi Island in the IOTA Contest. QSL via TA3X (d).

TA3J/0 will be QRV in SSB from Yassica Island (Loc KM38kj) during the IOTA Contest. QSL via TA3J (bureau/direct).

AS-105, HL2, Kyonggi-Do Province group: HL1IWD, DS2AGH, WX8C and OH6RX will be the OPs of DS0DX/2 from Kanghwa Island. QSL via HL1IWD.

AS-113, BV, Matsu Islands: BO0M is the call of a DXpedition by BV1EL, BV2DD, BM2AAV, BV2KS, BV2NT, BX2AB, BX4AG, VR2SA and XX9LT to Matsu Island (Loc OL96XD) from Jul 27-30. QSL only direct to: A.R.T. QSL Service, PO Box 73-326, Taipei, Taiwan.

AS-137, BY5, Zhejiang Province North group: The Shanghai DX Club members Xuhui,BD4CQ, Zhang,BD4DYH, Ming,BD4FM, Tony,BG4GMA, Siqing,BG4HRM, Colin,BH4ACQ, and Feng,ON6WFO, will be active as BY4DX/5 from Shengsi Island from Jul 27-29. QSL via BD4HF.

AS-147, JA8, Hokkaido's Coastal Islands: Taka,JA8COE/8, will once again be active from Yagishiri Island (WFF JAFF-034 WLOTA 2512) from Jul 27-29. QSL via homecall.

AS-158, BY2, Liaoning Province East group: Members of the Harbin Institute of Technology Amateur Radio Club are on the air as BY2HIT/2 from Guanglu Island (Loc PM19EE) between July 25-31. QSL direct via BY2HIT. More information is available at: http://www.qsl.net/by2hit

AS-159, TA, Black Sea Coast West group: TC0KLH (and not TC2KLH as previously announced) will be the callsign to be used from Kefken Island (AS-159, ARLHS TUR-058, WLOTA 0691, Loc KN51DF, WEBLOTA 004) on July 27-29. QSL via TCSWAT/TA1HZ (TA bureau). See also: http://www.tcswat.org

EU-004, EA6, Balearic Islands: Andrea,IZ2LSC, spends his holidays on the island of Menorca (EAFF-061, WLOTA 2988) from Jul 24-30. He works in holiday style as EA6/IZ2LSC in CW, SSB and digital modes on 30m-6m. He also plans to participate in the IOTA Contest. QSL via homecall. More information at: http://www.timpy.it/ea6

DX Bulletin 30 ARLD030
From ARRL Headquarters
Newington CT July 26, 2012
To all radio amateurs

SB DX ARL ARLD030
ARLD030 DX news

This week's bulletin was made possible with information provided by IZ3DBA, NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MONTENEGRO, 4O. Members of the radio club Bijelo Polje are QRV using special event station 4O60GBP until the end of 2012 in celebration of its 60th anniversary. QSL via 4O3Z.

BOTSWANA, A2. Arnold, WB6OJB is QRV as A25JB until July 31. Activity is on 40 to 10 meters using mostly SSB with some CW. QSL direct to home call.

ST. PAUL ISLAND, CY9. A large group of operators are QRV as CY9M from Atlantic Cove until August 1. Activity is on 160 to 2 meters using all modes, with an emphasis on 160 and 6 meters. They will be active in the RSGB IOTA contest on 20 meters using CW and SSB. QSL via M0URX.

PHILIPPINES, DU. Bodo, DF8DX is QRV as DU8/DF8DX from Mindanao Island, IOTA OC-130, until August 10. Activity is on the HF bands. This includes being an entry in the RSGB IOTA contest. He will activate other IOTA groups as well. QSL to home call.

CANARY ISLANDS, EA8. A group of operators will be QRV as EF8U from Gran Canaria Island, IOTA AF-004, in the RSGB IOTA contest as a Multi Op entry. QSL via EA8URL.

ESTONIA, ES. Dominik, SQ7OXU and Jack, SP7DPJ are QRV as ES0W from Ruhnu Island, IOTA EU-178, until July 30. This includes an entry in the RSGB IOTA contest. QSL via SP7DPJ.

NEW CALEDONIA, FK. Tsuyoshi, JJ2NYT will be QRV as FK/JJ2NYT from Grande Terre, IOTA OC-032, from July 29 to August 2. Activity will

be on 40 to 10 meters using CW, SSB and RTTY. QSL to home call.

ST. PIERRE AND MIQUELON, FP. Yuri, VE3DZ and Victor, VA2WA are QRV as FP/home calls from Miquelon, IOTA NA-032, until July 31. Activity is on 160 to 6 meters using CW, SSB and RTTY. They will be active as TO2U in the RSGB IOTA contest. QSL via operators' instructions.

REPUBLIC OF KOREA, HL. A group of operators will be QRV as DS0DX/2 from Kanghwa Island, IOTA AS-105, in the RSGB IOTA contest as a Multi Op/Multi Mode/High Power entry. QSL via HL1IWD.

SARDINIA, IS0. Giacomo, IZ3DBA will be QRV as IM0/IZ3DBA from San Pietro Island, IOTA EU-165, from July 30 to August 5. Activity will be on the HF bands using primarily CW with some SSB. QSL to home call.

BULGARIA, LZ. A group of operators will be QRV as LZ0I from Sveti Ivan Island, IOTA EU-181, in the RSGB IOTA contest as a Multi Single/DX/High Power entry. QSL via bureau.

BELGIUM, ON. Members of the Radio Club Leuven are QRV as ON85RCL until December 31 in celebration of the club's 85th anniversary. QSL via ON3AR.

DENMARK, OZ. Henning, OZ1BII will be QRV as OU2I from Aro Island, IOTA EU-172, in the RSGB IOTA contest as a Single Op/Low Power entry. QSL to home call.

GREECE, SV. George, SV1CDY is QRV as SV8/SV1CDY from Aegina Island, IOTA EU-075. Activity is mostly on 6 meters. He will be active in the RSGB IOTA contest. QSL to home call.

CRETE, SV9. Members of the SV9 DX Team will be QRV as J49A from Falasarna Beach in the RSGB IOTA contest. QSL via SV9GPV.

TURKEY, TA. Berkin, TA3J will be QRV as TA3J/0 from Yassica Island, IOTA AS-099, in the RSGB IOTA contest as a Single Op/DXpedition/SSB Mode/12HRS/Low Power entry. Activity will be on 80 to 10 meters. QSL via bureau.

UKRAINE, UR. UT9IO/p is QRV from Zmeinyi Island, IOTA EU-182, until July 29. Activity is on the HF bands using CW, SSB and various digital modes. This includes an entry in the RSGB IOTA contest. QSL to home call.

BELIZE, V3. Henry, W5HNS, Jay, K0BCN and Marty, W5MRM are QRV as V31WH, V31MX and V31MO, respectively, from Caye Caulker, IOTA NA-073, until July 31. Activity is on 40 to 10 meters using CW and SSB. They will be active as V31MX in the RSGB IOTA contest. QSL to home calls.

HONG KONG, VR. Paul, R2AD will be QRV as VR2/W8AY from Lamma Island, IOTA AS-006, from July 28 to 30. Activity will be on 80 to 10 meters using CW and SSB. This includes an entry in the RSGB IOTA contest. QSL to home call.

THIS WEEKEND ON THE RADIO. The RSGB IOTA Contest, QRP CW Fox Hunt, NCCC RTTY Sprint, NCCC Sprint, US Counties QSO Party, New Jersey QSO Party and the ARS Flight of the Bumblebees are all on tap for this upcoming weekend. Please see July QST, page 77 and the ARRL and WA7BNM Contest Websites for details.

SB DX @ WW < KB8NW $OPDX.1072
Ohio/Penn DX Bulletin No. 1072

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1072
BID: $OPDX.1072
July 30, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NJ1Q & W1AW, W1HEO, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, AA7V, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DL2VFR, DxCoffee.com, DX-World.Net, E21EIC, F5NQL, F6AJA & Les Nouvelles DX, G1VDP, I1JQJ/IK1ADH & 425 DX News, IK7JWY, JI3DST, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY2WAS, RSGB IOTA Web Site, Sixitalia Weekly, SM0W, TA1HZ, UT7UT, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier
    than normal to accommodate the late RSGB IOTA Contest announcements.
    Also, we wanted to provide the readers with a consolidated listing
    of the RSGB IOTA Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Saturday, 21st-July, through Friday, 27th-July there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FO/a, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OZ, P2, P4, PA, PJ2, PY, PZ, R1FJ, S2, S5, SM, SP, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
  more likely a "BUSTED CALLSIGN". As always, you never know - "Work
  First Worry Later" (WFWL).

2011 DXCC YEARBOOK NOW AVAILABLE ONLINE. The latest ARRL Letter (July 26th) reports: "The 2011 ARRL DXCC Yearbook is now available to all ARRL members as a supplement to the August digital edition of QST at" http://www.nxtbook.com/nxtbooks/arrl/qst_201208/index.php?startid=91rr
A printed copy of the Yearbook is also available for purchase on the ARRL Online Store at: http://www.arrl.org/shop/The-DXCC-Yearbook-2011
The contents include:
- The Year in Review by Carl Smith, N4AA
- PJ2/W5MPC, October 10-15, 2010 by Mike Corey, KI1U
- ST0R Story by Antonio Gonzalez, EA5RM/ST0R
- Clinton B. DeSoto Challenge standings
- 2011 DXCC Annual List"

4S, SRI LANKA (IOTA Op). Members of Radio Society of Sri Lanka (RSSL) will be active as 4S7LGT from the Beruwala lighthouse (ILLW LK0002) on Barberyn Island (AS-171) during the International Lighthouse/Lightship Weekend (ILLW), August 18-19th. Activity will be on the HF bands using CW and SSB. QSL via Bureau. For more info, please visit:
http://www.rssl.lk/photo-gallery/lighthouse-expedition

9M2, WEST MALAYSIA. Champ, E21EIC, will be active as 9M2/E21EIC during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. Look for activity before and after the contest. Champ is expected to be there between November 23-27th. QSL direct to E21EIC. JAs QSL via JR5XPG. NO eQSLs. Visit his Web page at: http://www.e21eic.net

A2, BOTSWANA (Update/Correction). Arnold, WB6OJB, will be active as A25JK (not A25JB) from the Lotsane Game and Safari Lodge in the extreme eastern part of Botswana between July 24-31st. He plans to be on the air every day. Activity will be on HF bands, 40-10 meters using mostly SSB with some CW. He will use an Icom 746PRO, an Expert 1K amplifier, a Tennadyne T6 antenna with a vertical Butternut HF2V for 40 and 80 meters. Arnold states, "My wife, Joan and I go to southern Africa almost every year. We have done some missionary work in the past and continue to bring medicines to the medical clinics in the the areas we visit." QSL direct to his home callsign. He states, "For QSL DX stations please send 2 stamps and a 4x6 envelope. For State side QSL please send stamped 4x6 envelope. My QSL cards are unique and slightly larger than regular QSL cards. State side donation would be appreciated because of the cost of the cards."

CY9, ST. PAUL ISLAND (Update). The CY9M St. Paul Island DXpedition is now active until August 1st. Activity will be on all bands between 160-6 meters using CW, SSB and the Digital modes. They announced on Tuesday: "Please note that CY9M will work SPLIT throughout the entire expedition (except during the IOTA contest)." Suggested frequencies are:
CW - 1826.5, 3526, 7026, 10106, 14026, 18076, 21026, 24896 and 28026 kHz
SSB - 3793, 7185, 14215, 18160, 21295, 24950 and 28485 kHz
RTTY - 7035, 10145, 18105, 21090, 24925 and 28090 kHz
6m - 50105/CW and 50105/SSB
All contacts will be verified via LoTW after their activity, and for those who want paper QSLs, Tim Beaumont, M0URX, will be the QSL Manager. The log will be available through ClubLog.

Remember, the following media pages are available for this operation at:
Website: http://www.cy9m.com/
Twitter: https://twitter.com/#!/CY9M
Facebook: http://www.facebook.com/CY9M.2012

DX MAGAZINE ARTICLE (Info Needed!). "Dee" Logan, W1HEO, is researching an article on the rising costs of DXpeditons for the DX Magazine, and would like to hear from DXpeditioners for their comments on how to cover the rising costs of DXpeditions. Specific areas of interest: examples of specific costs and reasons for their larger amounts, and suggestions for new sources or approaches to donations. Comments are requested within the next two weeks. Respond to W1HEO at: deverelogan@...

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:

2011 - ZB2/VAI3TA Gibraltar DXpedition: http://www.youtube.com/watch?v=CDba3NvRTDk

2002 - VK9ML Mellish Reef DXpedition (Part 1-6, still looking for Part 7):
http://www.youtube.com/watch?v=1ZLGfb-ojvw (Part 1)
http://www.youtube.com/watch?v=ptqG-8VmmoM (Part 2)
http://www.youtube.com/watch?v=XqmR2-TFf2I (Part 3)
http://www.youtube.com/watch?v=tH802VozQkM (Part 4)
http://www.youtube.com/watch?v=MhmJ0e0RjYs (Part 5)
http://www.youtube.com/watch?v=YeIYj0lf6M4 (Part 6)

1998 - Conway Reef DXpediton: http://www.youtube.com/watch?v=GoNAATqP2BM

1992 - Glorioso Island DXpedition (Operators DJ6SI, DJ8CR, DJ3OS and DG4FCD): http://www.youtube.com/watch?v=Z_rBrgh55Ys

1980 - Glorioso Island DXpedition (Operators DJ6SI, DJ5RT, DJ7YQ, DJ3NG, DK9KX and DF3KX; formed the team of FR0DZ/G, FR0RZ/G, FR0CIW): http://www.youtube.com/watch?v=4KjsdKysQQA

1980 - Juan De Nova Island DXpedition (Operators DJ6SI, DL8CM, DJ5RT, DL6PE and F6EXV; formed the team of FR0DZ/J, FR0RX/J, FR0CIW/J): http://www.youtube.com/watch?v=04Q8CdkK87c

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

E2, THAILAND. Champ, E21EIC, will be active as E21EIC during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low-Power entry. QSL direct to E21EIC. JAs QSL via JR5XPG. NO eQSLs. Visit his Web page at: http://www.e21eic.net

IOTA NEWS.....

AS-008. Takeshi "TAKE", JI3DST, will be active as JI3DST/JI1 from Shikine Island (North Izu Island) between 0800z, July 27th and 0000z, July 30th. Activity during the RSGB IOTA Contest, Take will be signing JI3DST/1 (only). Operations will be on 40/30/20/17/15/12/10 meters using CW, SSB, FM, RTTY and PSK31. In case of heavy rain or other conditions, the operation condition may vary, but he will be active during the IOTA

contest. QSL info for JI3DST/JI1 and JI3DST/1 is available on QRZ.com.

AS-018. Operators Yuri/RA0FU, Vlad/RC0F and Igor/RU0FM will be active as RU0FM from Sakhalin Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Single-TX/High-Power entry. QSL via RU0FM.

AS-074. Ian, 9M2FB, will be active from Pulau Ketam Island (Crab Island) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/ CW-Mode/24HRS entry. QSL via 9M2FB.

AS-099. Operators Nuri/TA3X, Can/TA3GO, Mehmet/TA3ATA and Selim/TA3TTT will be active as TC0P from Celebi Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Single-TX entry. QSL via TA3X (see QRZ.com).

EU-014. Patrick, ON4HIL, will be active as TK/OT2A from the Island of Corsica during the RSGB IOTA Contest (July 28-29th). He will use a K3 into a G5RV. QSL via ON4HIL.

EU-025. Joe, IT9RZU, will be active from Sicily Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/ CW-Mode/Low-Power entry. QSL via his home callsign, by the Bureau or LoTW.

EU-040. Operators Jorge/CT1BOL, Augusto/CT1BZG, Jose/CT1DSV, Joaquim/ CT1DZR, Antonio/CT1ENV, Joel/CT1HXB and Mino/CT1IZW will be active as CR5B from Berlenga Grande Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Island entry. QSL via CT1BOL.

EU-042. Peter, DC1HPS, will be active as homecall/p from Pellworm Island (DID N-23, WLOTA 1188) during the RSGB IOTA Contest (July 28-29th). He will be there between July 27-29th. QSL via his home callsign, by the Bureau or direct.

EU-047. By the time you read this, operator Dominik/DL5EBE, Ric/DL2VFR, Klaus/DL7UXG and Friedrich/DL4BBH will be active as DM50IOTA from Borkum Island for an early start just before the RSGB IOTA Contest (July 28-29th). The group will be a Multi-Op/ High-Power entry. QSL via Bureau – if you really need a direct QSL go via DL2VFR. ADDED NOTE: This is the second German Island group activated by DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate all German IOTA during that time. If you have worked DM50IOTA from all German IOTA by the end of 2013 you can apply for a special award.

EU-055. Operators Bjørn/LA6SFA, Morten/LA7XIA, Knut/LA9RY, Gerald/LA0HK, Vikingstad/LA9YGA and Nils/LA6IOA will be active as LN4C from Bokn Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/ 24HRS entry. QSL via LA4C.

EU-064. Members of the Provins ARC will active as F9IE from Noirmoutier Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Op/Island/Mixed-Mode/24HRS/Low-Power entry. QSL via F9IE, direct or by the Bureau.

EU-066. Operators Vasily/RU3SD, Sergei/UA3SKV and R3S-367 (SWL) will be active as RK3SWB/1 from Solovetskiy Island (possibly Anzerskiy Island) during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via the Bureau or direct (QRZ.com).

EU-081. Antoine, F5RAB, will be active as F5RAB/P from Ile du Large (DIFM MA-001, WLOTA L0060, DPLF PB-052, WW Loc IN99KL, DFCF50-013 Fort de l'île du large) during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode/24HRS/DXpedition/Low-Power entry. He will use 100 watts into a dipole. QSL via his home callsign. He mentions that access to the island is very restricted, landing depends highly on the weather conditions and is dangerous, so he is not sure he'll be on the air in time for the contest.

EU-084. Mel, SM0MPV, will be active as SK0HS/0 (the Hässelby Strand's Sea Scout group's callign) from Blido Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/All-Band/SSB-Mode/Low-Power entry. QSL via LoTW or by the Bureau.

EU-120. A small group of operators will be active as MX0LDG from Lundy Island between October 11-16th. They will have 2 stations on the air between 0600-0000 each day - the islands power closes down at midnight each day. Activity will be on SSB and possibly some Digital modes. The equipment will consist of a Elekraft K3 and KPA500 amp, a Kenwood TS590s and Expert 1KW amp, and a Icom IC706 as a backup radio. Antennas will be 2 G3XTQ Hex-beams built by MW0JZE (see http://www.g3txq-hexbeam.com) and a Vertical for 40m. Operators mentioned are John/M5JON (Team Leader), Pete/M0ILT, Ant/MW0JZE and Chris/G1VDP. A special QSL card will be available through the team's manager Tim, M0URX, and all logs will be uploaded to LoTW and ClubLog. Please use the OQRS on Tim's Web site <http://m0urx.com/oqrs/>. DO NOT SEND CARDS FOR THIS ACTIVATION VIA THE BUREAU PLEASE USE OQRS.

EU-121. Gerard, EI5KF, will be active as EI5KF/P from Lohehort Battery, Bere Island, during the RSGB IOTA Contest (July 28-29th) as a Single-Op/12HRS/CW-Mode/Low-Power entry. QSL via EI5KF.

EU-123. Operators Tom/MM0BHX, Gordon/MM0GPZ, Iain/GM0OQV, Philip/GM0LIR and Brian/GM0EGI will be active as GM0B from Isle of Bute during the RSGB IOTA Contest (July 28-29th) as a Multi-Op entry. QSL via MM0BHX.

EU-130. Operators Ivan/IV3CTS, Marijan/S56A and Goran/YT7AW will be active as IL3/IV3CTS from Grado Island during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. QSL via the Bureau.

EU-136. Marcus, DL3NCI, will be active as 9A/DL3NCI from Losinj Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode/12HRS/QRP/Low-Power entry. He will be there ± 2 days outside of the contest and operating holiday style. QSL via his home callsign.

EU-136. Neven, 9A5YY, will be active from Losinj Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode/12HRS/QRP/Low-Power entry. QSL via his home callsign.

EU-164. Operators Tom/DL2RMC and Heiko/DL1RTL will be active as TK/homecall from Piana Island during the RSGB IOTA Contest (July 28-29th) as Single-Ops/12HRS/CW-Mode entry. They will use a vertical antenna. Tom will run QRP, while Heiko runs Low-Power. QSL via their home callsigns.

EU-170. Matus, HA9MDN, will be active as 9A/HA9MDN from Vir Island between July 28th and August 4th. Activity will include the RSGB IOTA Contest (July 28-29th). Operations will be on SSB, RTTY and SSTV. QSL via HA9MDN, by the Bureau or eQSL.

EU-182. A Russian-Ukrainian team of nine operators will participate in the RSGB IOTA Contest (July 28-29th) as UT/UA3A from Ochakovsky Island (WFF: URFF-006, WW Grid: KN45TJ). Operators mentioned are Vlad/UA3A, George/RQ7M, R6LP, Vlad/RJ3FF, Liliya/RN3AQU, Andrei/UA3EDP, Mike/UA3EKG, Boris/UT7UT and Nikolay/UX0FF. Look for the operators outside of contest to sign UT/UA3A, UT/RQ7M, UT/R6LP, UT/RJ3FF, UT/RN3AQU, UT/UA3EDP, UT/UA3EKG, UT7UT/P and UX0FF/P. QSL UT/UA3A via UA3A, by the Bureau dor direct.

NA-026. Mike, N2GC, will be active from Long Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/CW-Mode entry. QSL via LoTW.

NA-031. John, NY6DX, will be active as NY6DX/1 from Block Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op/12HRS/Low-Power. QSL via his homecall, LoTW or eQSL.

NA-046. Howard, K1VSJ, will be active from Martha's Vineyard during the RSGB IOTA Contest (July 28-29th) as a Single-Op/Mixed-Mode/Unassited/24HRS entry. QSL via his home callsign, direct or by the Bureau.

NA-059. Tim, NL8F, will be active from Unalaska Island during the RSGB IOTA Contest (July 28-29th) as a Single-Op entry. QSL via K8NA.

NA-143. Members of the Cavalla Historical Society Radio Club will be active as N5BPS from Pelican Island, near Galveston, TX, during the RSGB IOTA Contest (July 28-29th). They will be operating from the radio room on board of USS Stewart at Seawolf Memorial Park. QSL via N5BPS - SASE appreciated.

SA-046. A group of Brazilian operators will be active as PX7C from Itamaraca Island, Brazil, during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. Operators mentioned are Antonio/PY7OO, Benedito/PY7VI and Jim/PY7XC. QSL via PY7CRA.

J49, CRETE (IOTA Contest). Operators Manos/SV9JI, Dimis/SV9COL, John/SV9CJO, Georgios/SV9DJO, George/SV9GPV, Manolis/SV9IOI, Konstantinos/SV9OFS and Christo/LZ3FN will be active as J49A from Falaserna Beach, near Chania City the west part of Crete (EU-015) during the RSGB IOTA Contest (July 28-29th) as a Multi-Single entry. QSL via LoTW or direct to SV9GPV.

KH6BZF PROPAGATION FORECAST/REPORT (July 23-29th)....

DIS - Disturbed	Major Storm	K=5	50-99
VRY DIS - Very Disturbed	Severe Storm	K=6-9	100-400

N8, UNITED STATES (Special Event). Look for special event station N8M operating from the Henry Ford/Greenfield Village (Detroit) Maker Faire, July 28-29th. Activity will be on all bands and modes, including the satellite and 6 meters. Satellite operations will be active on all modes on as many passes as possible. QSL via the info on the Ford Amateur Radio League Web site at: http://www.k8utt.org/index.htm

OJ0, MARKET REEF (Press Release - date July 23rd) [edited]: "A limited Market Reef (OJ0) activation during the IOTA Contest -- Next Friday morning on the 27th of July, a group consisting of G3TXF, G3XTT, SM0DZB and SM0W will attempt to land on Market Reef (OJ0), now from Sweden, with a small boat to activate the Reef during the IOTA contest as OJ0R, EU-053. During last winter the Lighthouse on the Reef lost all permanent antennas plus the wind generator, so the team will put up several vertical antennas and dipoles and run modest power.

The main goal for the team on this trip will be to prepare for a new permanent antenna installation that will be done later in August. SM0W will also collaborate with the Finnish Lighthouse Society to find a good permanent solution for the electricity for future activations. They will still try to keep at least one station open for the IOTA contest. The team will try to leave the Reef early Monday morning on the 30th of July, says team leader Teemu, SM0W. QSL OJ0R via G3TXF. For more information see: http://www.qrz.com/db/oj0r/ "

S7, SEYCHELLES. Operators Luca/I5IHE (S79LC), Danio/I5OYY (S79YY) and Simone/IK5RUN (S79XX) will be active from Praslin Island (AF-024) between October 21st and November 4th. Activity will be holiday style on 80-10 meters using CW, SSB and RTTY. QSL S79LC via I5IHE direct only. QSL S79YY via I5OYY (direct + SASE and LoTW). QSL S79XX via IK5RUN (direct + SASE and LoTW).

T30, WESTERN KIRIBATI (Update). Alex, PY2WAS, sent the following press release (#2) on June 24th, with updated details on the upcoming T30PY/T30SIX DXpedition to Tarawa Island (OC-017), Western Kiribati, between October 16-25th: "Preparation of antennas and gear progress successful. Between August 17-19th, the whole team will gather at PW2D contest station to test antennas and stations that will be used in the expedition. At this time each one will carry back home the items that will be transported as individual baggage in the airlines. Unfortunately, excess baggage is a main concern mainly within the Pacific island flights.

As previously announced the group is very committed to put a meaningful effort on Low Bands and Six meters.

We would like to thank clubs, companies and individuals for their donations and for making this Dxpedition possible. Donations will certainly enhance our performance, enabling us to take better antennas and gears.

Our QSL policy has also been improved to better match people's needs. Five different QSO confirmation possibilities are available including a fast track for donors.

Details can be checked at: http://www.mdxc.org/t30py/ "

TO2, ST. BARTHELEMY (Update to OPDX.1068). Ludovic, HB9EOU, will be active as TO2D from St. Barthelemy Island (NA-146) during the RSGB IOTA

Contest (July 28-29the) as a Single-Op/SSB-Mode/24HRS entry. QSL via HB9EOU, direct or by the Bureau. He currently on the island with Andre, HB9CVC, until August 4th. For more details and udates, visit:
http://st-barth.hb9eme.ch

TT8, CHAD. Members of the "Italian Dxpedition Team" will be active as TT8TT from N'Djamena, Chad, during October 2012 (specific dates to be announced). Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are:

CW - 1823, 3530, 7025, 10113, 14050, 18069, 21050, 24891 and 28450 kHz
SSB - 3790, 7056, 7125, 14270, 18130, 21275, 24980 and 28450 kHz
RTTY - 7041, 10142, 14080, 18103, 21080, 24915 and 28080 kHz
6m - 50105/CW and 50105/SSB

Operators have not yet been announced, but the pilot station is IK7JWY. QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A TT8TT survey (for needs), a log search and an OQRS are all available on their Web page at: http://www.i2ysb.com
Official forum is at: http://bit.ly/NVQaav
Look for more details to be forthcoming.

V6, MICRONESIA. Masatuki, JH1DVG, will be active as V63JX from Pohnpei Island (OC-010) between November 23-26th. Activity will be on 40/20/15/10 meters. QSL via his home callsign, direct or by the Bureau.

V8, BRUNEI (Update/Press Release). The follwing are edited excerpts from a press release (#4) sent out on July 25th, by the "Mediterraneo DX Club": "Great news from Brunei! Thanks to the efforts, made during the past weeks by the V84SMD team, the Magic Band will come back. -- Members of a 18 multi-national DXpedition team organized to be active between November 11-23rd by the Italian Mediterraneo DX Club, has obtained a 50 MHz license and will now be able to put up a dedicated antenna for this band!

This is a real great target reached by the team, and just as a reminder, they will be active on all bands/modes, 24 hours per day because the six meters band from V8 land has come back on air after a silence of more than 10 years! So, all of the team is very happy to give to the DX community this great opportunity to work them on 6m. Once again the very motivated and professional V84SMD guys are asking for support to help them in any way -- even with small donations. Please, don't miss any updated news by visiting (from time to time), the DXpedition official Web site at:
http://www.mdxc.org/v84smd "

VK0H, HEARD ISLAND (Update). Bob, KK6EK, Team Leader/Organizer of the planned 2014 Cordell Expedition to Heard Island, has posted two documents of interest for DXers to read on Heard Island Web page at:
the http://www.cordell.org/HD

Documents are:

1. The Preliminary Project Description for the 2014 Heard Island Expedition (v. 3.7, PDF, 6 MB):
http://www.cordell.org/HD/HD_documents/HD2014/HIP_Project_Description_3.7X.pdf
PLEASE NOTE: This document is revised often. They request that you do not distribute out-of-date versions.

2. The book VK0IR Heard Island, by KK6EK (1997, PDF files, various sizes, entire book 100 MB):
http://www.cordell.org/HD/HD_documents/VK0IR/VK0IR_Book.PDF
(The book is available in parts -- see Web page)

Bob states on the Web page, "Currently we are elaborating the scientific program for the expedition and adding to the list of candidates for the team. We are pleased to have Jean-Michel Cousteau as Honorary Expedition Leader and Joe Taylor N1JT (Nobel physics) as Honorary DXpedition Leader. If you have interest in being involved in the project as a team member, advisor, scientist, sponsor, or in any other capacity, we would welcome your inquiry."

VP2V, BRITISH VIGRIN ISLANDS (Update). Steve, AA7V, will once again be active as VP2V/homecall from Virgin Gorda (Tortola) between September 26th and October 1st. He mentions that he will be in the CQWW DX RTTY Contest (September 29-30th), and probably won't take a keyer/paddles and possibly a microphone. Steve states, "I will lug my Ameritron amp down there and (hopefully) run 400w. I have a G5RV and an 80/40 trap dipole which will both hang off the porch of one of those cliffside villas. If any time, I will try 17 meter RTTY. Thank goodness no 160 in this contest." QSL via AA7V direct or LoTW. NO BUREAU QSLS. ADDED NOTE: Also look for Art/N3DXX and Steve/AA7V, to be going to Virgin Gorda, BVI, starting Wednesday November 21st through (tentative) Monday December 3rd. They will be in the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry and the ARRL 160m CW Contest (November 30th-December 2nd) with N3DXX as a Single op (tentative) using the callsign VP2V/AA7V. They will run high power/400w for both contests. Outside of the contests, they will be on the WARC bands possibly, if time permits. QSL LoTW or direct. NO BUREAU QSLS.

WAEDC CW CONTEST. Helmut, DF7ZS, WAEDC Manager, would like to remind everyone that between 0000z Saturday, August 11th and 2359z Sunday, August 12th, the next edition of the "Worked All Europe DX Contest CW" is hitting the HF bands again! They would appreciate your participation in this exciting event. Complete rules can be found here:
http://www.darc.de/referate/dx/contest/waedc/en/rules
For latest news and updates you can also join them on the WAEDC Facebook group: https://www.facebook.com/groups/453972741287450/

The following stations are expected to be active in the
RSGB IOTA Contest (July 28-29th, 2012)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2012 RSGB IOTA Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:
http://www.ng3k.com/Misc/iota2012.html

WHAT IS IOTA?
SOME FREQUENTLY ASKED QUESTIONS (FAQ)

Created in 1964 by Geoff Watts, a leading English short wave listener, and taken on by the RSGB in 1985, IOTA is an amateur radio activity programme designed to encourage contacts with island stations world-wide. The oceans' islands have been grouped into some 1200 'IOTA groups' with, for reasons of geography, varying numbers of 'counters', i.e.qualifying islands, in each. The objective, for the island chaser, is to make radio contact with at least one counter in as many of these groups as possible and, for the DXpeditioner, to provide such island contacts. For both it is a fun pastime adding much enjoyment to on the air activity. 22 separate certificates are currently available for island chasers, graded in difficulty, as well as two prestigious awards for high achievement. See IOTA Rules, Section A.

WHICH ISLANDS COUNT?
To count for IOTA islands need to meet a few simple rules relating to location. They must not lie in rivers, inland lakes or seas, or largely enclosed bays. They must be a minimum distance from the mainland. And they must be either 1 kilometre in length or shown on a 1:1,000,000 scale map. Islands world- wide that meet these requirements are listed in this Directory. They are grouped wherever possible since they are far too numerous to be allowed to count separately. If you cannot immediately find the island you want in the list, look for the officially recognised island group name, e.g. the Canary Islands if you want to find Lanzarote. Where there is no officially recognised group, an IOTA group name is often given to cover a range of islands in a particular geographical sector. Look through these, possibly with an atlas to hand. If the island qualifies for IOTA, it will be covered by a group in the list and will be named.
See Section B.

HOW DO I KNOW IF AN ISLAND HAS BEEN ACTIVATED?
For a specific island, it is not always possible to know or find out. The Directory indicates the IOTA groups that have been activated, not individual islands unless they constitute an IOTA group on their own. These are shown with a reference number, e.g. EU-001 for the Dodecanese. Such numbers are frequently quoted on the air or on QSL cards. IOTA groups with known qualifying islands that have yet to be activated are listed with a provisional number e.g. OC-288P. The number is confirmed as soon as a valid operation is judged to have taken place. See Section B.

WHAT IS THE SCORING SYSTEM?
For the standard category of application you count one credit for a confirmed contact made on any amateur band with each IOTA group listed. Additional credit is not given for a second confirmed contact either with the same island or another in the group. The only exception to this is if you are running a second record in the VHF / UHF category of application.

HOW DO I APPLY FOR AN AWARD?
The basic award is the IOTA 100 Islands of the World and this is normally where to start. But, before doing anything, make sure you have to hand the latest issue of the IOTA Directory with current island listings and award application rules as it will not be easy to prepare an application without one. You can download the Directory from the RSGB IOTA web-site1. By far the most recommended way for applying is on-line on that web-site by means of the web-form provided. Complete your application and mark it as ready for processing. It will then be flagged up with 1 http://www.rsgbiota.org your Checkpoint (for a list of these, see Annex A) for checking prior to it being cleared for acceptance on the Central IOTA Database. This requires sight of your QSL cards. So, once you receive confirmation that your application is being processed, mail the cards, the appropriate fee and adequate return postage for the QSLs to your Checkpoint. If you do not have Internet access, see if you can use a friend's Internet connection since submitting on paper will attract a much higher administration fee. See Section C and Annex B.

WHY DO I NEED TO SEND QSL CARDS? WHY NOT JUST A CERTIFIED CHECKLIST?
IOTA is a difficult award programme to administer. IOTA groups are not always distinguishable by the call-sign prefix or suffix and mistakes can easily be made. To maintain the integrity of the programme the person certifying the application needs to be thoroughly familiar with IOTA and its rules and to have access to the cards, the IOTA Directory and a good atlas during card- checking. It is felt unreasonable to expect busy national award managers or local radio club officials to take the time to carry out this function to the level of accuracy required. However, to meet a demand for local processing of IOTA applications, a number of Checkpoints have been appointed overseas.

ARE PARTICIPANTS' SCORES PUBLISHED?
The IOTA Honour Roll and other performance tables giving participants' scores are regularly published on the official IOTA web-site. As a record of current achievement these listings are a popular feature of the IOTA Programme. See Section D.

HOW DO I GET IOTA INFORMATION?
If you are on Internet, there really is no problem. The IOTA web- site provides a wealth of information on island activity as do a number of excellent DX bulletins. If you are not on Internet, you can subscribe to one of the overseas DX bulletins distributed by post on a weekly or two weekly basis. RadCom, the RSGB's house magazine, also features a bi-monthly IOTA column giving latest news and information from the Committee. Access to one of these sources is a 'must' for the keen IOTA island chaser. See Annex G.

WHAT ARE THE IOTA MEETING FREQUENCIES?
The main frequency is 14.260MHz. Other ones on SSB are 28.560, 28.460, 24.950, 21.260, 18.128, 7.055 and 3.755MHz. The CW frequencies are 28.040, 24.920, 21.040, 18.098, 14.040, 10.115 and 3.530MHz. No specific frequency has been nominated for 7MHz CW but it is recommended that operations should include a frequency above 7.025 when the band is open to North America. The 14.260 frequency and other nominated frequencies are not reserved exclusively either for IOTA nets or for the making of island contacts but are shared with others on a normal non-interference basis.

CAN I HAVE A NEW GROUP ADDED TO THE LIST?
The standard answer is no. The IOTA Committee has set a limit of 1200 on the number of groups on the IOTA list. The reason for this is to prevent the IOTA 'total' becoming an unmanageable figure. QSL cards have to be submitted for each credit claimed and there has

to be a limit on the work that we ask Checkpoints to undertake. For every island that seems to be a good candidate for a separate IOTA group, there are hundreds of other similar candidates elsewhere, each with its own ardent champion! A detailed set of criteria have been used to establish the present list and, while we don't claim that different groupings might not have been equally feasible, we believe that the RSGB IOTA DIRECTORY present list is fair, provides a useful mix of easy and difficult groups to work and at the same time reflects decisions taken at earlier stages of IOTA Programme development. The IOTA Committee is however committed to reviewing the list every five years, the next occasion being in 2014 in celebration of the 50th anniversary of IOTA's launch. In the meantime, with the rare exception of the occasional new island DXCC entity group that might qualify under the rules for separate listing or of a previously declared 'barren' IOTA group found to possess a valid island, no new groups will be added. As for the five year reviews, we can say only that, while we do not wish to bind the hands of future IOTA Committees, we do not currently expect any changes made to be more than minimal. See Section E.

FOR DXPEDITIONERS

HOW MANY CONTACTS DO I NEED TO MAKE FOR MY OPERATION TO BE ACCEPTED?
There is no minimum required unless you are operating from a provisionally numbered group and are expecting that number to be confirmed. In this case, see Section E.2.

DO I NEED TO TELL YOU MY PLANS IN ADVANCE OR CONTACT YOU AFTERWARDS?
No, it is normally not necessary. Just let the DX bulletins know your plans so that they can publicise the operation. However, this said, there are occasions when you need to be in contact with us. If you plan to operate from a new, i.e. provisionally numbered, or rare IOTA group or a group which geography, politics, or licensing or environmental restrictions make difficult to access, please contact us early in the planning stage as there is a procedure you will need to follow for your operation to be accepted for IOTA. For routine, i.e. not new, rare or difficult, operations you do not need to send any documentation to us – in fact we prefer you not to do so – but it is prudent to keep travel invoices, ticket stubs, permits and evidence of being on the island in case of subsequent challenge. See Section F.

DO YOU PROVIDE FINANCIAL OR OTHER ASSISTANCE TO DXPEDITIONERS?
Not directly. We have in the past allocated our small DXpedition support budget to the Island Radio Expedition Foundation, Inc. (IREF), an organisation set up with the primary function of assisting IOTA expeditions to operate from all-time new or very rare IOTA groups. If you are planning an operation that you think will qualify for support, contact IREF2. In the current absence of more than one or two other funding bodies, work on the basis, particularly for DXpeditions to easy or moderately rare groups, that you will probably have to finance by far the major part of your expedition costs from your own resources. By all means advertise for support in the DX bulletins – this has quite a good record of producing contributions from individual amateurs. If, however, external funding is essential to the expedition going ahead, you need seriously to consider whether to proceed or not.

HOW CAN I FIND OUT THE RARITY OF AN IOTA GROUP?
The IOTA web-site shows for each group, by means of a search routine, the percentage of total record-holders who have the group credited. A 'most wanted' list is also provided showing, for each continent, very

rare (defined as credited to less than 15% of record-holders) and moderately rare (defined as 15 to 35%) IOTA groups in descending order of rarity. See Annex H.

CAN I PUBLICISE MY OPERATION THROUGH IOTA HQ?
Yes, on the RSGB web-site. You are encouraged to enter details yourself via a web - form availablethere . This serviceis moderated so there may be a delay before the information appears. Please do not include queries about island validation, assistance with funding, etc. Don't forget, you could also obtain useful publicity by forwarding this information directly to the DX bulletins. See Annex G.

WHEN IS THE IOTA CONTEST?
It is always the last full weekend in July each year.

CAN I RESERVE AN ISLAND FOR THE IOTA CONTEST?
All you can do is to publicise the fact that you are planning to operate from a particular island during the July contest. Do this through the normal publicity channels, including reflectors. See Annex G.

CAN I USE THE RSGB IOTA LOGO ON MY QSLS?
Yes, you can use the logo so long as you do not amend it in any way. It can be downloaded from the RSGB IOTA web-site.

DO YOU HAVE ADVICE ON QSL DESIGN GENERALLY?
Continuing growth in popularity of the IOTA Programme makes simplification of the card-checking procedure essential. Care on QSL design can help enormously if it removes all scope for ambiguity about the island location at time of contact. It is for this reason that we require the island name to be printed on the card and that the island be one that is recognised as valid for the programme through its listing in this Directory. Please, therefore, make sure that you print the island name, as well as, of course, your call-sign since failure to do this can invalidate your operation for IOTA. Also, although it is not as essential, please print the IOTA reference number on the card but first check it against the listing in this Directory as some numbers have changed from earlier listings. See Section C.4.

CAN YOU PROVIDE OVERSEAS LICENSING INFORMATION? Ask RSGB Headquarters3. Or you can check the web-site4 run by Veikko OH2MCN which covers the licence requirements of almost every country in the world. It is regularly updated and is undoubtedly the most comprehensive source of other countries'licensing available on the Internet.

ABOUT THE ON-LINE SYSTEM
WHERE CAN I FIND DETAILED INFORMATION ON THIS?
Section C.5 and, in more detail, Annex C provide information on how to get started, including the registration process for preparing an award application. Go to the web-site and browse through it. Each screen is accompanied by a full explanation of the features available. This has been translated into several languages with, it is planned, more translations to come.

IS THERE ANY PROGRESS TOWARDS GETTING CREDIT ELECTRONICALLY FOR QSOS WITHOUT SENDING QSLS?
Yes. You can claim credit for contacts made in IOTA contests from 2004 onwards without submitting QSL cards provided that the other station submitted a log and the contact

details match. Each year, a few weeks after the contest has been adjudicated, the logs will be uploaded to the web-site to enable applicants to claim credit. Full details are available on the web-site.

WHAT ABOUT LOGBOOK OF THE WORLD (LOTW)?
We are continuing software development and one of our projects is to investigate the potential for linking up with ARRL’s LoTW. However, any project aimed at moving to paperless QSLing would have major financial and manpower implications which probably could be met only by help from the IOTA Community.

IOTA PROGRAMME RULES

A THE AWARDS
A.1 ACHIEVEMENT CERTIFICATES
A.1.1 Certificates are issued on presentation of satisfactory evidence of contact with, or, for SWLs, reception of, licensed amateur radio stations operating from numbered IOTA groups listed in the IOTA Directory. Currently, 22 separate certificates are available, graded as follows:

IOTA 100 ISLANDS OF THE WORLD
IOTA 200 ISLANDS OF THE WORLD
IOTA 300 ISLANDS OF THE WORLD
IOTA 400 ISLANDS OF THE WORLD
IOTA 500 ISLANDS OF THE WORLD
IOTA 600 ISLANDS OF THE WORLD
IOTA 700 SLANDS OF THE WORLD
IOTA 800 ISLANDS OF THE WORLD
IOTA 900 ISLANDS OF THE WORLD
IOTA 1000 ISLANDS OF THE WORLD
IOTA 1100 ISLANDS OF THE WORLD
IOTA AFRICA
IOTA ANTARCTICA
IOTA ASIA
IOTA EUROPE
IOTA NORTH AMERICA
IOTA OCEANIA
IOTA SOUTH AMERICA
IOTA ARCTIC ISLANDS
IOTA BRITISH ISLES
IOTA WEST INDIES
IOTA WORLD DIPLOMA

A.2 IOTA 750 ISLANDS PLAQUE OF EXCELLENCE
A.2.1 The IOTA Plaque of Excellence is available for contacting 750 IOTA groups. It takes the form of an attractively produced walnut wood shield, suitably engraved, with space for 10 metal mini-shields, each signifying a score increment of 25 groups, to upgrade.

A.3 IOTA 1000 ISLANDS TROPHY
A.3.1 The prestigious IOTA Trophy is available for contacting 1000 IOTA groups. It is a beautiful diamond glass feature resting on a highly polished wooden base fitted with a metal plate, suitably engraved. The space in this case is for 8 metal mini-plates to upgrade.

B THE ISLAND LIST

B.1 VALID IOTA ISLANDS

B.1.1 Every island must meet certain basic criteria for acceptance within the IOTA Programme. Specifically, it must be located in the open sea, not a lake or river, must be natural, not man-made, must be demonstrably above water at high tide and must have a recognised island name! There is no minimum island sizerequirement but an island needs to be shown on a 1:1,000,000 scale map and to be separated from the mainland at low tide by a minimum 200 metres of sea measured at the narrowest point. Connection to the mainland by bridge does not invalidate an island so long as the minimum sea separation requirement is met under the bridge as
well as elsewhere. (Sections E.6 to 8)

B.1.2 All islands valid for IOTA are listed by name in the Directory, either in the IOTA group heading or in brackets following it. In most cases the entry in brackets starts with an '=' sign. This means that only the islands named currently count and that any other islands that appear to justify inclusion in the list should be referred to IOTA Centre for decision. (Section E.3)

B.2 LIST STRUCTURE

B.2.1 The Directory lists island groups by continent – Africa (AF), Antarctica (AN), Asia (AS), Europe (EU), North America (NA), Oceania (OC) and South America (SA). Within these it highlights those IOTA groups which count for the three regional awards by prefacing the group entry with a distinguishing letter – 'A' for Arctic Islands, 'B' for British Isles and 'W' for West Indies. The geographical boundaries adopted are ones commonly recognised in amateur radio. However the definition of Antarctica is the area south of the Antarctic Convergence Line and that of the Arctic the area which lies north of the tree line, not the Arctic Circle.

B.2.2 Each continental list is divided by country, that is 'country' in the commonly understood political sense. Overseas island territories (including self-governing), departments, dependencies or possessions are listed in the appropriate continent under the parent country. The official reference used for determining political status was The Times Comprehensive Atlas of the World, 2000 Millennium Edition, published by Times Books, London (ISBN 0 72300792 6). Where the atlas was unclear, the island was allocated to the country that was perceived to exercise main administrative control. One exception is the Spratly Islands which, in the absence of a central unitary control, is listed separately. Antarctica, where all territorial claims are in abeyance, is treated as a special case. Islands that are shared between countries are listed under a joint
sovereignty heading. Nothing in the way that an island is listed should be taken to indicate the IOTA Committee's view as to the legal position on sovereignty.

B.2.3 Depending on its size and geography a country may have several IOTA groups. Most of these groups may contain several, sometimes many, islands, all equally valid for that group. Groups consisting of a single island are relatively few and are mainly reserved for 'large islands' or 'remote islands.' IOTA's grouping policy (see next paragraph) applies not only to 'officially recognised island groups', for example an archipelago, where the practice is not to split, but also to the many 'unofficial island groups' created in the interests of completeness to cover a sector of sea. The main categories of islands that have influenced construction of the list – these include a special DXCC category – are detailed in Section E.5.

B.2.4 IOTA relies on an island grouping policy to prevent the total number of IOTA groups becoming unmanageable both for those who wish to work island stations and those who have to

administer the programme. The IOTA Committee has decided that the IOTA list shall not exceed 1200 groups and has acted to maintain the list within this limit. Consequently, it will not accept for consideration requests for new groups except in circumstances where there has been a DXCC entity change triggering action under paragraph E.5.5.

B.3 IOTA REFERENCE NUMBERS

B.3.1 Each listed IOTA group that has been activated since 15November 1945 has been given an individual IOTA reference number, e.g. EU-001 for the Dodecanese, EU-005 for Great Britain and so on. Such numbers are now very much a feature of the amateur radio scene, frequently quoted on the air and printed on QSL cards.

B.3.2 Each IOTA group with a known qualifying island that has yet to be activated is listed with a provisional number e.g. OC-288P. The number is confirmed as soon as a valid operation is judged to have taken place. (Section F)

B.3.3 Each IOTA group that is included in the list with a partial number e.g. AF- is believed to have a qualifying island. Such groups, most of which are in Antarctica, will in due course be issued reference numbers or, if no qualifying islands can be found, will be deleted.

C AWARD REQUIREMENTS

C.1 STANDARD CATEGORY OF APPLICATION

C.1.1 The applicant in this category should be a licensed radio amateur.

C.1.2 If the applicant is an RSGB member, he / she is entitled to a 15% discount on administration and certificate fees on submission of proof of membership in the form of a recent address label from RadCom, the members' magazine.

C.1.3 The applicant must use the latest available information when preparing an application, i.e. the island listings detailed here in this Directory or on the RSGB IOTA web-site1. Please do not use as your reference an IOTA Directory earlier than IOTA Directory 2000 because of the significant changes to the listings in that year.

C.2 THE NUMBER OF CONTACTS REQUIRED

C.2.1 The IOTA 100 Islands of the World is the basic award and the place to start. This requires proof of contact with at least 100 IOTA groups with different reference numbers in the Directory. At least one contact must be with each of the 7 continents. See Appendix to Rules.

C.2.2 The IOTA 200, 300, 400, 500, 600, 700, 800, 900, 1000 and 1100 Islands awards are for that number of confirmed contacts.

C.2.3 Each continental award is for contacting 75% of the confirmed numbered IOTA groups in that continent or, alternatively, 75 IOTA groups whichever is the less. This means that in the case of the IOTA Africa, Asia, Europe, North America and Oceania awards the requirement is 75 groups. If, for the other awards, the qualifying percentage figure works out as a fractional number, round the fraction down to the nearest whole number.

C.2.4 The IOTA Arctic Islands, British Isles and West Indies awards are for contacting 75% of the confirmed numbered IOTA groups in those areas. This means that for the three awards the requirement is 75, 21 and 42 groups respectively. The groups that count for each award are marked by an 'A', 'B' or 'W' as appropriate on the continental pages.

C.2.5 The IOTA World Diploma is for contacting, in each of the 7 continents, 50% of the confirmed numbered IOTA groups or, alternatively, 50 IOTA groups, whichever is the less. Round the fraction down if necessary (see paragraph C.2.3).

C.2.6 The IOTA Plaque of Excellence is for contacting at least 750 numbered IOTA groups. Shields for attachment to the Plaque are available for contacting 775, 800, 825, 850, 875, 900, 925, 950 and 975 IOTA groups.

C.2.7 The IOTA 1000 Islands Trophy is for contacting at least 1000 numbered IOTA groups. Mini-plates for attachment to the Trophy base are available for contacting 1025, 1050, 1075, 1100, 1125, 1150, 1175 and 1200 IOTA groups.

C.2.8 Remember, only one confirmed contact counts for credit for each IOTA group. QSL cards from different islands with the same reference number do not count separately.

C.2.9 Some of the above provisions have been varied for the VHF / UHF category of application – see Section C.8.

C.3 THE TYPE OF CONTACTS

C.3.1 All contacts must be made personally by the applicant, using an amateur radio call-sign issued personally to him / her by the licensing authority. IOTA Centre may ask to see proof of licence. For requirements governing the use of more than one currently valid call-sign to feed a record, see Appendix to Rules.

C.3.2 All contacts must be made from the same DXCC entity and from a land-based location. The location shall be defined as the location of the operator. Contacts made while operating land mobile are accepted.

C.3.3 All contacts must be made with other licensed amateur stations and in accordance with licence conditions.

C.3.4 All contacts must have taken place since 15 November 1945.

C.3.5 Contacts may be made on any amateur radio frequency band licensed to the applicant and his contact. IOTA Centre may ask to see proof of licence.

C.3.6 Contacts with maritime mobile stations near islands, whether or not they operate with a /MM call-sign, will not be accepted. This applies also to stations on board boat in harbour, including tied up to dockside, or anchored close to shore. Contacts made using an HF, VHF, UHF or Internet link from a land- to a sea-based station or from a sea- to a land-based station to enhance signal transmission or reception will not count.

C.3.7 Exceptionally, in a force majeure situation, occasioned by poor weather or sea conditions or personal injury sustained in attempting a landing or serious risk of one, contacts, valid for IOTA, may be made from a station on board a boat lying within 100 yards of the island if an essential part of the station, namely the transmitter, receiver, transceiver, antenna or power supply in use, are on shore and physically wire-linked to the boat. In such an eventuality proof will always be required from the operator before credit is allowed and must show that such operation was not determined by operator con- venience or the need to circumvent national or local government constraints on landing or operating. Section F procedure applies.

C.3.8 Contacts made using a single remote receiving or transmitting site are permitted if the site is land-based, is contained within a 500 metre (0.31 statute miles) radius circle

and is not located more than 50 kilometres (31 statute miles) from the operator's location, and the control system relies on radio for all linkage (i.e no internet or non-radio links). The operator and the remote site must be located within the same DXCC entity. IOTA qualification shall be determined by the location of the station operator and the transmitter - to count they need both to be on one or, if a remote transmitter, a maximum two qualifying islands for the same IOTA group. They will not count if either is on the mainland. Use of multiple remote sites or a network using multiple sites is not permitted.

C.3.9 Credit will be given for contacts made entirely on a single mode of transmission or on a combination of modes. Certificate endorsements for single mode and / or single band transmission may be made on the submission of cards clearly confirming the mode or frequency, but the request must be made at the time of the first submission. Only one record is ma intained per applicant, so, if he / she chooses a particular mode or band, updates will only be accepted on the same basis.

C.3.10 Credit will not be given for cross-mode, cross-band or repeater- or satellite-aided contacts.

C.3.11 Some of the above provisions have been varied for the Club and VHF / UHF categories of application – see Sections C.7 and C.8.

C.4 THE QSL CARDS

C.4.1 QSL cards submitted must confirm two-way radio contact and specify the date, time, band and mode used.

C.4.2 QSL cards submitted must have printed on them both the call-sign and the name of the island from which the operation took place. The latter must be an island mentioned as qualifying for that IOTA group in the island listings available in the latest IOTA Directory or on the RSGB IOTA web-site. The IOTA group name and IOTA reference number are not acceptable alternatives although it is desirable that they also appear on the card, nor are geographic co-ordinates, a grid locator square or a lighthouse or castle name. The name of the island should not have been handwritten, nor should it have been added in a way that makes ambiguous the location of the station at the time of contact.

Note 1: A card mentioning the name of an ‘officially recognised island group’, for example the Balearics, but not the name of the exact island from which the operation took place, will be accepted but only if all islands in the group are known to meet the IOTA qualification requirements and there is only one possible reference number for which the group can qualify.

Note 2: A ca rd mentioning an unlisted small island, islet or rock which is a satellite of a larger listed isla nd will be accepted if it meets IOTA qualification requirements with the possible exception of paragraph E.6.4 in its own right and the name of the parent island is also mentioned prominently on the card. The term ‘satellite’ is to be construed as a small island lying within 200 metres of a larger listed island.

Note 3: A card mentioning an island with an u nofficial or obviously fabricated name will not be accepted unless its exact location is clear from other info rmation on the card and the island belongs to an ‘officially recognised island group’, all islands of which are known to meet the IOTA qualification requirements and the re is only one possible reference number for which the gro up can qualify.

C.4.3 QSL cards for operations prior to 1 Januar y 2001.
Checkpoints have some discretion to accept cards for operations prior to 1 January 2001 that fall sh ort of meeting the requirements of paragra ph C.4.2 above where the operation is known to them. This discretion extends, for e xamp le, to accepting a card that mentions, instead of the island, the name of a town or city on the island or, in the case of Antarctica, the name of a recognised research base. It does not extend to accepting a card that mentio ns an unlisted island or just a reference number.

C.4.4 Wherever possible, submit QSL cards that are likely to cause least problems for your Checkpoint. Cards from recent operations are more easily processed than old cards from several decades ago. Clean cards, with the island name and IOTA reference number prominently displayed in large print, are likely to be the most welcome while cards that are 'messy' or very likely not to meet the requirements are the least welcome – in fact the latter should not be submitted at all. Checkpoints do the job voluntarily, so they do deserve your consideration.

C.4.5 Photocopies of QSL cards and electronic cards (eQSLs) are not acceptable for credit.

C.4.6 A warning note, do not amend a QSL card in any way, however justified you believe you r action to be to rectify an omission or error made by the writer. This could lead to rejection of a card which otherwise might have been accep ted, or, where deception is suspected, to your disqualification from the award programme.

ISLAND NAMES ON QSL CARDS
The current Directory includes a comp rehensive list of qualifying islands for most IOTA gro ups. This enab les DXpeditioners and chasers to check which islands count for IOTA, thereby saving time and effort and possibly expense and disappointment. Requests for the addition of an island to the list, supported b y information on its exact location, may be made to IOTA Centre at any time but such cases may be held over for a twice-yearly review, in April and October, particularly if the IOTA group concerned already ha s a large number of qualifying islands.
With regard to the tightene d require ments for QSL cards for operations from 1 Ja nuary 2001 – the Committee decided in ye ar 2 000 that cards submitted should achieve a minimum standard of content and format allowing processing without the need to refer to atlases, maps and other data or reference to IOTA Centre for a decision. Hence our insistence that cards must have printed on them the n ame of the island from which the operation took place and that this must be an island listed in the latest IOTA Directory. The decision not to accept cards that have the island name handwritten stems from the practical difficulties of operating a decentralised system of card-checking where decisions can vary according to individual people's judgement on the accuracy o r origin of such annotations and from the Committee's view in principle that neither Checkpoints nor IOTA Centre should be put in a position of having to make such judgements. Island operators are regularly advised of the alternatives to getting cards specially printed (the preferred solution) – they can have existing cards overprinted or rubber-stamped individually with the island name and additional wo rding to remove ambig uity, or they can print the island name on their computerised QSL labels.
National Island Award Managers may wish to consider the implications of this for their programmes. Some have already established in agreement with the IOTA Committee a look-up facility on their web- site where it is possible to check the official IOTA status of their programme's small islands. Where this is done, a n ote is

added to the Directory island listing indicating that the web-site information is to be regarded as an
official extension of the Directory.

Date (DDMMYY)	Time (UTC)	Call-sign (as given)	IOTA Ref (by continent)	Island Name (from QSL)	Frequency Band (MHz)	Mode (CW/PH/DATA)
070207	2229	3B9/G3TXF	AF-017	Rodrigues	10	CW
160107	1153	VU7MY/VU2RBI	AS-106	Minicoy	21	PH
251106	1628	HK0GU	NA-049	Providencia	14	CW
280499	1917	VK9NS	OC-005	Norfolk	1.8	CW
200302	0706	XR0X	SA-013	San Felix	7.0	PH

C.4.7 Applicants should realise that on occasions Check- points will have no option but to reject a card pending the receipt of more information about the operation concerned. In such a case a letter from the island op- erator may provide the only acceptable solution – it will normally be for the applicant to obtain this. On other occasions also Checkpoints may need to withhold credit on instructions from IOTA Centre for reasons that will be explained. Applicants' cooperation and un- derstanding are requested at all times.

C.5 HOW TO APPLY FOR YOUR FIRST AWARD

C.5.1 If you have not already done so, go to the RSGB IOTA web-site and register to obtain a password, following the instructions given there. This opens up the 'My Credits' module that allows you to see any record you already have and, when you are ready, to build a new application, using a web-form provided. The on-line system will calculate the fee payable. See Annex C for more information.

C.5.2 If you choose to submit your application on paper (we really hope you will go on-line), follow the rules below and in this case you will need to complete Parts 1 and 2 of Application Form for Paper Submission at Annex D.

C.5.3 Start with the basic IOTA 100 Islands of the World award.
It is best to send a minimum of 120 cards in case any are rejected. There is no upper limit – the extras will be credited to the score on your on-line record. Include at least one QSL from all 7 continents.

C.5.4 Arrange the cards numerically by IOTA reference number and by continent in the following order: AF–AN– AS–EU–NA–OC–SA. Use the Short Title IOTA Refer- ence Number List at Annex F to get it right – it will save a lot of time.

C.5.5 If you are submitting a paper application, list the call- signs in this same order on Part 2 of the Application Form at Annex D. For each QSO type or print clearly the date, time (UTC), call-sign, IOTA Ref, island name taken from the QSL, frequency band (MHz) and mode (CW / phone / data) – see the examples at the top of the page. If you prefer to submit your own computer pro- duced listing, you may do so.

C.5.6 List all call-signs in exactly the form shown on the QSL card – include /A, /P or /xxx as appropriate, and in par- ticular do not change call-sign/xxx into xxx/call-sign.

C.5.7 Check your application before despatch for call-sign, island name and other data errors. It may be subject to a higher administration charge if it contains more than 10% careless errors that involve checkpoints or IOTA Centre in corrective work. In a worst case scenario the application will be rejected.

C.5.8 Do not include 'doubtful' cards where you, yourself, are unsure what group they belong to as this can delay processing of your application. Please try to find out the answers yourself by checking a good atlas or map or by searching Google or Google Earth.

C.5.9 When ready, send your application to your Checkpoint electronically. In the case of a paper application, send by post, first checking that it includes a completed and signed Application Form. In both cases send the QSL cards and appropriate fees, not forgetting return postage for the cards. See Annex B for a schedule of charges.

C.5.10 You will be able to access your record on the Central IOTA Database on-line at any time. If you submit on paper, keep your own record of credits gained. On your initial application for the IOTA 100 Islands certifi- cate you will receive free of charge a paper Record Sheet showing the credits listed on the Central IOTA Database. Subsequent Record Sheets are available on request but attract a small charge. See Annex B.

ELECTRONIC APPLICATIONS
Use of the on-line facility on the RSGB IOTA web-site has the advantages of saving you time by simplifying the application process as well as your own IOTA record-keeping,
- entitling you to a significantly lower administration fee, compared with a paper application,
- calculating the fee for you, including conversions into dollars and euros, if required,
- advising you on screen of valid islands without the need to check the Directory,
- enabling you to claim credit for islands worked in the IOTA Contest without the need to obtain QSL cards,
- providing an exact copy of your record on the Central IOTA Database,
- learning about problem cards much sooner than has been possible in the past,
- allowing you to build your next claim on-line as IOTA QSLs come in,
- having certificates sent electronically to you, if you wish, so that you can print them on parchment of your choice,
- endearing you to your Checkpoint by hugely easing his/ her task, and
- offering the same advantages on each subsequent occasion.

C.6 HOW TO UPDATE
C.6.1 You are encouraged to grow your IOTA score. The IOTA Programme offers an exciting operating challenge, combined with opportunities to obtain a range of at- tractive certificates and to enjoy, if you wish, a degree of friendly competition with fellow island chasers.

C.6.2 You may update your record whenever you wish – there is no limit on the number of times per year. However, the system will not allow you to update at a time when a previous application or update is still being proc- essed. Once you have pressed the key sending the submission, it’s closed. Do not attempt to get your
Checkpoint to add in manually late cards just received.

C.6.3 You should prepare your update in the same way as when applying for the IOTA 100 Islands certificate. Yo u may claim as many or as few credits as you wish but bear in mind that there is a minimum update charge.

C.6.4 When submitting your application, let your Che ckpoint know of any awards requested – these are not provided automatically – and enclose the correct fees and return postage with your cards.

C.6.5 If you submit on paper, retain a copy of your update to amend your own record when you receive notificatio n that your cards have been credited to your score. See Annex B for the fee for an updated Record Sheet.

C.7 CLUB CATEGORY OF APPLICATION

C.7.1 The club category of application caters for the growing interest in the IOTA Programme by clubs, DX teams and multi-operator groups. Th e ann ual IOTA Contest with its huge success has done much to introduce hundreds of contesters to IOTA and with the ever-increasing number of IOTA team operations the time was right to respond to this enthusiasm by making the full range of IOTA awards available on a non-personal basis.

C.7.2 Applicants should regard general IOTA rules as applying but with the following variation:

• The applicant need not be a lice nsed radio amateur but should be able to provide evidence of authority to represent the club / group, for example by holding the position of secretary, awards manager or team leader. (C.1.1)

• Contacts need not be made by the applicant. They should however be made by licensed amateurs wh o are members of the club / group at the time. (C.3.1)

• The call-sign used must be one issued to the club / group. All IOTA con tacts made with that call-sign will normally be allowed to accrue for credit. (C.3.1)

• Where a club / group wishes to grow an IOTA score from a combination of call-signs, it must provide evidence that each call-sign was clearly issued to it – copies of licences should be submitted on each occasion. A club / group call-sign may not be combined with a call-sign issued personally to a club member. (C.3.1)

Note that all co ntacts need to be made from the sameDXCC entity.

C.7.3 Clubs / groups are asked to keep their compliance with these provisions as transparent as possible. Checkpoints will not be able to engage in detailed correspondence.

C.8 VHF / UHF CATEGORY OF APPLICATION

C.8.1 The IOTA Committee decided in early 2000 to respond to popular demand and open up the IOTA Programme to VHF / UHF enthusia sts by making available the full rang e of certificates, albeit with lower qualification levels, for VHF / UHF only contacts.

C.8.2 Applicants should reg ard general IOTA rules as applying but with the following variation:

• All contacts must be made on the 50MHz and / or higher frequency bands. (C.3.5)

• The Committee will nee d to be satisfied that contacts were made with stations properly licensed at the time and may withhold credit if in doub t. (C.3.3)

• For the 100 Islands certificate at least one contact should be made with each of 5 continents. (C.2.1)

• Each continental award is for contacting 50% of the confirmed numbered IOTA groups in that continent or, alternatively, 50 IOTA groups whichever is the less. (C.2.3)

• The IOTA Arctic Islands, British Isles and West Indies awards are for contacting 50% of

the confirmed numbered IOTA groups in those areas. (C.2.4)
• The Plaque of Excellence is for contacting at least300 numbered IOTA groups. Shields for attachment to the Plaque are available for contacting 325, 350, 375 etc IOTA grou ps. (C.2.6)
• Given that the VHF / UHF community is less aware of IOTA rules about printed island names on QSL cards, the discretion on acceptance given Checkpoints in C.4.3 will be extended to VHF / UHF cards without any restriction as to date of contact. Location indi- cators such as geographic co-ordinates and grid
locators will be factors taken into account. This decision will be reviewed every five years starting
2014.Attention is drawn to the fact th at credit will not be given for contacts made with the aid of a repeater or satellite or other artificial means. (C.3.10)

C.8.3 A participant may run one entry in each of the HF and VHF / UHF categories. Each has its own separate award numbering system.

C.9 SWL CATEGORY OF APPLICATION
C.9.1 Applicants should regard general IOTA rules as applying but with the following variation:
• The applicant sho uld be an SWL holding a standard SWL number from a national or international amateur radio society which he / she uses when sending an SWL report. If the applicant is, or subsequ ently becomes, a licensed radio amateur, he / she should submit cards made out to the SWL number, and not to the amateur radio call-sign (such cards will not be accepted). (C.1.1)
• The term 'two-way radio contact' should be read as 'two-way radio contacts hea rd personally'. (C.4.1)
• Each outgoing SWL report should list at least two and preferably three QSOs heard.
• QSL cards submitted for credit should list the call- sign and contact details of at least one and preferably two QSOs. Island stations are asked to note these requirements when replying to SWL reports. If an SWL submits a card that fails to give
the call-sign of the station reported in QSO, he / she should provide a separate note of this information to the Checkpoint.

C.9.2 The IOTA Committee re gards maintenance of the overall integrity of the IOTA Prog ramme as being of primary importance. It reserves the right to deny credit for a card submitted where it is known from well-equipped amateurs in the area that the IOTA station con cerned was not being received with intelligible signals at the time. It will not hesitate to ta ke similar action if a Checkpoint reports over-frequent mention on cards of one particular call-sign or that a search on DX PacketCluster™ or other Internet sources reveals a high degree of matching
details suggesting irregular practice.

D PERFORMANCE LISTINGS

D.1 THE HONOUR ROLL
D.1.1 The Honour Roll is a list of the call-signs of stations with a checked score equalling or exceeding 50% of the total confirmed numbered groups at the time of preparation. It is published in spring on the official RSGB IOTA web-site.

D.2 THE ANNUAL LISTING
D.2.1 The Annual Listing is a list of the call-signs of stations with a checked score of 100 or more IOTA groups but less than the qualifying threshold for entry into the Honour Roll.

D.3 THE CLUB LISTING

D.3.1 The Club Listing is a list of the call-signs of club or multi-operator stations with a checked score of 100 or more IOTA groups.

D.4 THE SWL LISTING

D.4.1 The SWL Listing is a list of SWLs with a checked score of 100 or more IOTA groups.

D.5 THE VHF / UHF LISTING

D.5.1 The VHF / UHF Listing is a list of the call-signs of stations with a checked score of 100 or more IOTA groups on the VHF / UHF bands.

D.6 GENERAL CONDITIONS

D.6.1 Except as specified below, the same call-sign may not feature in more than one listing or more than once in the same listing. In the case of applicants for VHF / UHF awards an additional entry in that listing is allowed.

D.6.2 Call-signs will not be annotated with mode, band or power endorsements.

D.6.3 Where a station has not updated for 5 years or more, his / her score will not be published in the annual performance listings.

D.6.4 The listings are intended to be statements of personal performance. The IOTA Committee wishes it to be known that it will transfer a call-sign from the Honour Roll or Annual Listing to the Club Listing if it is satisfied that the licensee has breached this intent by allowing other operators to make contacts on his / her behalf. This applies even where the licence conditions allow such operation.

D.7 PROCEDURE FOR INCLUSION

D.7.1 Your score on the Central IOTA Database will be included automatically in the appropriate listing unless you have asked for it to be excluded.

D.7.2 The last date for submitting an update electronically to your Checkpoint to influence your score in the current year’s listing is 31 January. This is also the last date for mailing cards and paper submissions. Those postmarked after that date will be processed in the normal way but the scores will be held over to the following year’s listing.

D.7.3 If you remain active in IOTA, you are encouraged to update at least once every three years. This gives the listings greater relevance and helps to maintain the interest of other participants in their comparative positions. However, your record is maintained on the computer system and will remain there for updating whenever you choose to make a further submission.

E MORE ABOUT THE ISLAND LIST

E.1 REQUESTS FOR THE ADDITION OF A NEW GROUP TO THE DIRECTORY LIST

E.1.1 The Directory list has been capped at 1200 IOTA groups. The IOTA Committee will not consider further additions, with the rare exception of the occasional new island DXCC entity group that might qualify under the rules for separate listing. Please, therefore, do not ask for new groups to be added. If you do, the
standard answer you will get is “Sorry, no”!

E.1.2 The IOTA Committee has decided, as part of its strategic planning, to review the island list every five years. The next such occasion will be in 2014 to coincide with the 50th anniversary of IOTA’s launch. It is expected that any changes made will be very

small.

E.2 REQUESTS FOR CONFIRMATION OF A REFERENCE NUMBER LISTED AS PROVISIONAL
E.2.1 The IOTA Committee will consider at any time a request for confirmation of an IOTA reference number listed as provisional for a group that has been activated. This request may come from the DXpeditioner responsible for the operation or a resident amateur or from an island chaser. Before agreeing the request the Committee will need to be satisfied that the island qualifies under the rules for island qualification (see Sections E.6 and E.7) and that the operation has met the requirement of a minimum number of contacts (see paragraph E.2.3) and has properly validated (see Section F).

E.2.2 The Committee may have no option but to delay confirmation of a provisional reference number if the operation is one about which it has received insufficient information and validation. This causes disappointment all round. To ensure a full understanding of programme requirements, particularly on validation, DXpeditioners are advised to alert the IOTA Manager well in advance of the operation, giving full information on the island to be activated, dates, operators and means of transportation. And, of course, most importantly, if the island is by chance not listed in the current Directory, this is the time to check that it will qualify for the specified group. Please note that, in the case of islands lying less than one kilometre from the mainland, the Committee will need to see a detailed marine map before giving a decision – this will be returned on request if postage is provided. Taking this action will enable DXpeditioners to
post a note in advance publicity that the operation is a New One For IOTA.

E.2.3 The IOTA Committee requires an operation to make a minimum 1000 contacts with different stations in five continents before it can consider confirming a provisional reference number on submission of validation. This is by way of recognition that new IOTA groups added to the list can affect the threshold figure for awards. In rare cases the Committee may find it necessary to ask for a letter from the operator detailing the scale of the activity.

E.2.4 The Committee may decide to withhold confirmation of a provisional number where an operator by his / her behaviour has created doubts about the seriousness of attitude to the making of contacts, log-keeping, the provision of validation or QSLing. In particular, poor or erratic QSLing of a previous operation will be
regarded as adequate justification for such action as will selective or discriminatory QSLing or a QSLing policy involving unacceptable financial terms, or the threat of one ormore of these. Such action would be taken sparingly and only on the decision of the full IOTA Committee after the operator had been give n an opportunity to state his / h er case.

E.2.5 Regular status reports on recently confirmed reference numbers are given on the RSGB IOTA web-site and the IOTA Manager’s web-site1.

E.2.6 DXpeditioners p lanning activity from any IOTA group that is included in the list with a partial number e.g. AF-, should at an early stag e con tact the IOTA Manager with details of the island to be visited to establish IOTA status.

E.3 REQUESTS FOR CONFIRMATION THAT AN ISLAND QUALIFIES FOR A NUMBERED GROUP
E.3.1 The current Directory includes a compreh ensive list of qualifying islands for most IOTA groups. The occasions when it will be necessary to seek confirmation from the IOTA Committee that an island qualifies for a numbered group should be very few. However, such action will still be required from time to time, particularly in the case of groups

that are not shown in the Directory with a full list of qualifying islands. The Committee remains ready to consider such cases but see E.3.3 below.

E.3.2 A request may come from a DXpeditioner or a resident amateur or an island chaser either before or after an operation. In order to be able to reply the Committee will need to be satisfied, on the b asis of evidence provided or available to it, that the island qualifies under the rules for island qualification (see Sections E.6 and E.7). As a first step go to Google Earth2 , identify the island and note its exact co-ordinates and then e-mail this information to the IOTA Manager3. If Google Earth does n ot mention the island by name, you will need to send evidence to confirm the name as well. In the case of islands lying less than one kilometre from the mainland, the Committee may need to see a detailed marine map before giving a decision – this will be returned on request if postage is provided. Checking in advance of an operation that an island will
qualify will remove doubts and possibly prevent disappointment.

E.3.3. As all islands listed as qualifyin g for an IOTA group count the same for the pu rposes of the IOTA Progra mme, there is no special advantage for the IOTA chaser in a DXped- itioner’s activating one island rather than another. The Directory lists more than 15,000 islands and most groups have ample qualifying islands. The processing of every request for an addition to the list takes valuable time, and this is becoming increasingly difficult to justify in cases where the IOTA group already has numerous qualifiers. The Committee will continue to process deserving cases but will now institute a practice of normally holding over requests to add islands to groups with more than 25 qualifiers to a twice-yearly review, in April and October. Folk hiring a holiday or contest even t cottage should note and act in good time but first consider whe ther or not
going to a listed isla nd is just as good.

E.4 REFERENCE SOURCES

E.4.1 The main work on the construction of the islan d list was carried out in 1990 / 91. The reference atlases used were: the National Geographic Atlas of the World (Fifth & Sixth Editions) and The Times Atlas of the World (Eighth Edition). In addition, considerable help was obtained from Lee S Motteler's excellent book Pacific Island Name s, published by the Bishop Museum Press, Honolulu, 19 86, as well as from a selection of maps made available by friends.

E.4.2 The 1999 / 2000 review included a root and branch examination of the island list. The IOTA Programme had moved on since 1990. A more precise definition of IOTA group b oundaries and a fuller listing of qualifying islands were both required. Also, with the passage of time, IOTA group names and coverage needed to be updated and adjusted to reflect latest geographical and political information. The reference atlas used for the latter task was The Times Comprehensive Atlas of the World, 2000 Millennium Edition, published by Times Books, London (ISBN 0 7230 0792 6).

E.4.3 The main source of reference fo r compiling the lists of qualifying islands was the Cambridge University Library, the holder of one of the two most comprehensive collections of maps in England open to the public. The material use d included British Admiralty Charts and Pilots, recognised World Series 1:1,000,000 maps, ONC 1:1,000,000 and TPC 1:500,000, US ‘Quad’ Series 1:24,000, NOAA 1:40,000, Canadian Department of Mines and Resources Map Series 1:1,000,000, 1:250 ,000 & 1:50,000, Russian World Series 1:200,000, Swedish Hydrographic Department WGS-84 1:50,000,

Finnish Merenkulkulaitos Sjofartsverket WSOY 1:50,000, Croatian Hydrographic Institute 1:100,000, French IGN, Cartographie Caraibe (F.W.I) and an extensive assortment of national maps. Use was also made of sources of mapping information available on the Internet, including Google Earth.

E.5 THE MAIN CATEGORIES OF GROUP RECOGNISED

E.5.1 The Directory lists the IOTA groups by continent and country. For further information, see List Structure at Section B.2. The main categories of island / group recognized in the construction of the list are detailed below. The Committee makes it known that it will not consider, except in the case of new DXCC entity changes triggering action u nder paragraph E.5.5, requests for new groups or chan ges in group coverage justified in the terms of these defined categories (see paragraph E.1.2).

E.5.2 'Officially recognised island gro up' – defined as a group shown and named as th e '..... Isles' or 'Islands' in English or the local language in one of the reference atlase s. Although most such groups are separately listed, a number of really tiny o nes have been included in wider groupings in the interests of keeping the IOTA group 'to tal' with in bounds.

E.5.3 'Remote island group' – defined as a group of one or more islands named in the reference atlas which lie more than 16 1 kilometres (100 statute miles) at low tide from the o fficially recognised island group to which they belong.

E.5.4 'Unofficial island group ' – defined as a grouping of islands which do not belong to an officially recognised island group but nevertheless exist and are listed in the Directory with an unofficial name . This category applies particularly to islands in a sector of coast that have beengrouped for political or administrative reasons or for reasons of convenience. It applies also to small islands that are close to a named larger island and do not justify a separate listing in their own right.

E.5.5 'Island DXCC entity group' – defined as a DXCC entity on the 'current' list which consists entirely of an island or several islands. Others may be added in line with future DXCC changes. Such an island may be allocated a new reference number so long as its existing IOTA group remains viable, i.e. has other valid islands, after its detachment. An island that qualifies for separate listing only because it is a DXCC entity will have a start and / or deletion date for credit in line with DXCC decisions. In the event of an island DXCC entity group being deleted, the IOTA group number will be archived and score credits will normally be moved on request to the IOTA group to which the island or islands are transferred.

E.5.6 'Large island' – defined as an island with a size of 65,000 square kilometres (25,000 square miles) or more. The Directory lists some 28 such islands, and almost all have separate coastal island groups, the largest having several.

E.5.7 'Split sovereignty island' – defined as an island that is split between two or more DXCC entities. The Directory lists some 13 of these, for example Borneo (Brunei / East Malaysia / Indonesia), Great Britain (England / Scotland / Wales) and Hispaniola (Haiti / Dominican Republic). Each split sovereignty island counts for one credit only. However the coastal islands of almost all of them count separately (for one or more IOTA groups) on the grounds that they are not 'split sovereignty' like the main island.

E.5.8 ‘Other single island’ – defined as a single island which cannot be grouped easily with other islands.

E.6 ISLAND QUALIFICATION CRITERIA

E.6.1 The common definition of an island is a piece of land, whether earth, sand, stone or rock, which at some point of the day is surrounded by water, either fresh or sea. At its widest this could include sand-bars, mud-flats, shingle or rocks submerged for all but a few hours of the day, land separated from the mainland by a skip and a jump (just a few metres of water), land joined to the mainland for part or most of the day and land located in rivers, lakes, inland seas and largely enclosed bays. The RSGB has taken the view that an award programme for island contacts based on such a wide definition of what const-itutes an island would be
impossible to manage and that a narrower definition should be adopted.

E.6.2 In an attempt to find a generally accepted standard the IOTA Committee has considered making qualification dependent on the inclusion of 'island' (in whatever language) in the island name as shown on a map. This unfortunately has proved
an unsatisfactory solution because of inconsistencies between different atlases and maps – too often a small island is called an 'island' on one map and 'islet', 'atoll', 'cay', 'rocks', 'reef' or 'The ....' on a second. Furthermore in some countries the practice is to use the term 'island' to describe any land surrounded by water irrespective of size while in others a variety of different terms are used indicating something less than
an island. In the circumstances the Committee has decided to set its own qualification criteria. It considers that these are fair and reasonable in a difficult situation and are more likely to enhance the integrity of the programme.

E.6.3 The first requirement for an island (atoll, cay, etc) is that it has an official name. It will then qualify for an existing numbered group if it meets two basic rules – the so- called 1:1,000,000 rule and the 200 metres rule – and does not fall into one of the categories of islands specified as not qualifying at Section E.7 below. Where reference is made to ‘low tide’, this is defined as ‘mean low tide’. If, in the absence of a
suitable marine map showing mean low tide, a map showing mean lowest low tide or similar datum is available, this will normally be used to decide qualification.

E.6.4 FIRST RULE – The island must be shown on a map with a scale of at least 1:1,000,000 (10 kilometres to 1 centimetre or 16 statute miles to 1 inch).
